Total	220,622,487	96,686,943	36,168,646	96,773,413	450,251,489

The figures represent a decrease of 23,839,831 pounds of black powder, 23,932,573 pounds of high explosives, and 1,987,952 pounds of permissible explosives, as compared with 1913.

* Include ammonium nitrate explosives, hydrated explosives, organic nitrate explosives, and certain nitroglycerine explosives containing an excess of free water or carbon. All permissible explosives have passed certain tests of the Bureau of Mines, and are not to be regarded as permissible unless used in the manner specified by the bureau.

EMPLOYEES IN MUNITION PLANTS.

Statistics of 1906 placed the number of men in the Krupp works at 30,000. A recent work on the Krupps places the number of employés at Essen just before the war at 85,000, and states that since the declaration of hostilities the number has been increased to 100,000. In connection with the strike at the Remington Arms Company works at Bridgeport in August, 1915, the following figures were published, giving the number of men employed in the various arms and munition factories of New England at that time:

Remington Arms and Ammunition Company	16,000	Iver Johnson Arms Company	2,500
Union Metallic Cartridge Company	14,000	General Electric Company (Pittsfield)	*8,000
Winchester Repeating Arms Company	15,000	Marlin Fire Arms Company	2,000
Colt Patent Fire Arms Company	8,000	American and British Manufacturing Company	5,500
Smith & Wesson Company	4,000	J. Stevens Arms and Tool Company	4,000
Hopkins and Allen	3,000	U. S. Cartridge Company	2,000

* In addition to this number the General Electric Company has about 15,000 employés in Schenectady, N. Y., and about 22,000 elsewhere in the United States, making a total for this company of about 45,000.

FOURTH OF JULY ACCIDENTS.

The *Journal of the American Medical Association* has kept a record of the accidents in the United States, due annually to the celebration of Independence Day.

Year.	Killed.	Injured.	Total.	Year.	Killed.	Injured.	Total.
1904	183	3,986	4,169	1910	131	2,792	2,923
1905	182	4,994	5,176	1911	57	1,546	1,603
1906	158	5,308	5,466	1912	41	945	986

1909	215	5,092	5,307	1915	30	1,135	1,165

The decrease from 466 deaths in 1903 to 30 in 1915 was due to more intelligent methods of celebration, the most marked decrease taking place in States where the agitation for restrictive measures was strongest.

THE INTERCOLLEGIATE PROHIBITION ASSOCIATION.

This association was incorporated in 1901 and is organized in 260 colleges and universities, and has an enrolled membership of 8,800. It encourages study and discussion of the liquor problem, especially in its economic and social phases, and enlists students for service and leadership in the settlement of this and similar civic social problems. To this end it conducts among the colleges of the United States oratorical contests, journalistic contests, study groups, debates, etc., and sends out hundreds of students annually into local and State anti-liquor campaigns. Its work is educational in character, training leaders and workers for the various anti-liquor organizations of the country.

NATIONAL COMMITTEE ON PRISONS AND PRISON LABOR.

President—Adolph Lewisohn. *Honorary President*—Thomas Mott Osborne. *Chairman, Executive Committee*—E. Stagg Whitin. *Secretary*—R. Montgomery Schell. *Treasurer*—Bernard H. Ridder. Headquarters, Broadway and 116th Street, New York.

"The object of this organization is to study the whole problem of labor in prisons and correctional institutions, with a view to securing legislation among the States of the Union, to the end that all prisoners may be so employed as to promote their welfare and at the same time to reimburse the institutions for expense of maintenance, while preventing unfair competition between prison-made goods and the products of free labor, and securing to their dependent families a fair proportion of the rightful earnings of prisoners."

Crimes and

COMPILED FROM THE CODES OR REVISED STATUTES OF THE

WITHIN the limits of the subjoined table showing the penalties prescribed by the respective States for the offences enumerated it is impossible to attain complete accuracy in comparing the several penalties, for the reason that the provisions of the several States defining these very familiar crimes are not identical. Especially is this true in regard to crimes classified in degrees, some States making but little attempt in that direction, leaving it to the discretion of the trial court to adapt the severity of the punishment to the gravity of the offence, while other States provide a minute classification into degrees, depending on the several possible circumstances attending the commission of the crime. Where no penalty is shown under a given degree of crime the State recognizes but one designation, namely, that of the crime committed.

Murder in the First Degree—in the table below—may be generally defined to be the unlawful intentional and premeditated killing of a human being, or such a killing resulting from the commission or attempt to commit one of the graver crimes, such as arson, burglary, rape, or robbery.

Murder in the Second Degree is such a killing without premeditation, or resulting from the attempt to commit some lesser crime.

Manslaughter may be defined as a killing either unintentionally resulting from the careless or unlawful doing of some otherwise lawful act or from the commission of some unlawful act of comparatively trivial character, or intentionally, in the heat of passion and without premeditation.

Arson—where classified in degrees—though the number and exact definition of degrees varies greatly—is in general classified with reference to two conditions. First, the character of the building burned, whether a dwelling house or structure likely to or containing a human being; and, second, whether the crime is perpetrated by day or night. Thus the most serious offence is the burning of an inhabited dwelling by night, and the least serious, the burning of an uninhabited structure by day. Often intermediate degrees are recognized, such as burning a dwelling by day or an uninhabited building by night.

Their Penalties.

SEVERAL STATES AS AMENDED BY SUBSEQUENT LEGISLATION.

Burglary—The classification of burglary or house breaking depends on substantially the same elements as that of arson, namely the building entered, whether a dwelling or other building, and whether the offence was committed by day or night.

Robbery may be generally defined as the theft of property from the *person or immediate presence* of the victim, accomplished by force or fear. Where degrees of robbery are recognized, the distinction is generally determined by whether the thief be armed or unarmed, though some States also distinguish the second from the first degree, where the theft is accomplished by means of threats of future rather than immediate injury.

Grand Larceny is simple theft, of property above a fixed value, generally $25 to $50—most States also classify as grand larceny, theft of property from the person of the victim, irrespective of value, though, of course, accomplished without the force or fear which constitute the crime of robbery.

Assault with intent to kill, bigamy, forgery, perjury and rape are not subdivided into degrees in the subjoined table.

Where crimes are divided into several degrees it is generally within the province of the jury, in convicting, to fix the degree of the crime, and in almost every case in which a crime is punishable by death or imprisonment it is the province of the jury to determine the punishment, except upon a plea of guilty, when the duty devolves upon the court.

Where the classification of a crime in a particular State does not approximately agree with the definitions given above, note is made of the fact.

NOTE—In the table below, after the figures given, "years" is understood, unless otherwise stated. Where two figures are given, separated by a dash, as 1—7, the provision should be understood as "not less than one year nor more than seven;" where a sum of money is given in the table the provision should be understood as meaning a fine of not exceeding the sum mentioned.

NEW YORK STATE PROBATION COMMISSION.

THE State Probation Commission, created by Chapter 430, Laws of 1907, consists of seven members. Four are appointed by the Governor for terms of four years each; one is appointed by the State Board of Charities from among its members; one is appointed by the State Commission of Prisons from among its members; and the State Commissioner of Education is a member *ex-officio.* Commissioners serve without compensation, but are entitled to necessary travelling expenses.

The general duties of the commission are to exercise general supervision over the work of probation officers and to keep informed as to their work; to collect and publish statistical and other information as to the operations of the probation system; to inquire from time to time into the conduct and efficiency of probation officers, and when advisable to conduct a formal investigation of the work of any probation officer; to make recommendations and to secure the effective application of the probation system and the enforcement of the probation law in all parts of the State. The commission makes an annual report to the Legislature showing its proceedings and the results of the probation system as administered in the various localities in the State, and making suggestions and recommendations The commission in the discharge of its duties has access to all offices and records of probation officers, and may direct formal investigation of the work of any probation officer.

President—Homer Folks, New York. *Secretary* — Charles L. Chute. The commission has its office at Albany.

LYNCHINGS AND LEGAL EXECUTIONS.

Lynchings—The total number of lynchings in the United States from 1885 to October 11, 1915, was 3,583. In 1915 to October 11 there were 78 lynchings, of which 77 were in the South and one in the North. Seventy-six were males and one female. Of the lynched, 42 were negroes, 21 whites, and 15 Mexicans. The offences for which they were lynched were: Murder 29, rape 10, theft 10, murderous assault 6, by night-riders 6, attempted rape 4, alleged murder 3, insults to women 2, accessory to murder 2, race prejudice 1, unnamed cause 1, wife beating 1, poisoning mules 3. The States in which these lynchings occurred and the number in each State were as follows: Alabama 7, Arkansas 3, Arizona 2, Florida 4, Georgia 14, Illinois 1, Kentucky 5, Louisiana 3, Mississippi 6, Missouri 2, North Carolina 4, Oklahoma 3, South Carolina 1, Tennessee 3, and Texas 20.

Legal Executions—In 1908 to November 15 there were 92; in 1909, 107; in 1910, 104; in 1911, 61; in 1912 to November 15, 128; in 1913 to November 12, 81; in 1914, 74; and in 1915 to October 11, 94, of which 52 were in the South and 42 in the North; 55 were whites, 36 negroes, and 3 Chinamen; all were males. The crimes for which they were executed were: Murder 87, rape 7. The States in which the executions in 1915 to October 11 took place, and the number in each, were as follows: Alabama 7, Arkansas 6, California 8, Colorado 1, Connecticut 2, Delaware 1, Florida 2, Georgia 6, Illinois 2, Kentucky 3, Massachusetts 1, Mississippi 4, Maryland 1, Missouri 1, New York 19, New Jersey 3, North Carolina 1, Pennsylvania 5, South Carolina 7, Tennessee 1, Texas 4, Virginia 5, and West Virginia 4.

According to the records kept by the Department of Records and Research of the Tuskegee Institute there have been during the first six months of 1915 34 lynchings. This is 13 more than the number, 21, for the same period last year. Of those lynched 24 were negroes and 10 were whites. This is 3 more negroes and 9 more whites than were put to death by mobs in the first six months of 1914, when the record was 20 negroes and 1 white. Eight, or one-fourth of the total lynchings, occurred in the State of Georgia. Only 7—6 negroes and 1 white—of those put to death, or 21 per cent. of the total, were charged with rape. Other offences and number lynched were: Murder 8, 3 whites and 5 negroes; killing officers of the law 4, 2 whites and 2 negroes; clubbing an officer, a family of four—father, son, and two daughters; stealing hogs 2, white; disregarding warnings of night-riders 2, white; insulting a woman 1; writing an insulting letter 1; wounding a man 1; stealing meat 1; burglary 1; stealing cotton 1; charged with stealing a cow 1. In this instance it was later reported that the negro had not been indicted, that the woman to whom the cow belonged did not know that the accusation had been made. The cow, which had simply strayed, finally returned home.

CRIMES IN THREE LARGE CITIES.

In a statement made by the Chairman of a Special Council Committee in Chicago on September 17, 1914, the following comparison for year 1913 was made: Murders—Chicago, 262; New York, 131; London, 36. Robberies and assaults to rob—Chicago, 1,022; New York, 926; London, 78. Burglaries—Chicago, 1,041; New York, 1,755; London, 1,129.

In 1913 in New York City there were 7,413 delinquent boys and 1,606 girls arraigned in the Manhattan court. Of the 4,645 in Brooklyn, 3,886 were boys and 759 girls. Queens had 610 boys and 148 girls; Richmond, 295 boys and 110 girls.

THE MILLENNIUM GUILD.

President—Mrs. Maud R. L. Freshel. *Recording Secretary*—Miss Lena Stevens. *Treasurer*—Miss Edna Donnell. *Corresponding Secretary*—C. P. Freshel. *Headquarters*—74 Commonwealth Avenue, Chestnut Hill, Mass.

The object of this association is to promote by precept and example a just consideration of the rights of all races, human and subhuman, and to teach that foremost among the unnecessary evils of the world, and one which underlies most of the other evils, is the mutilation and slaughter of our fellow-creatures for food and other selfish ends, and to set forth the physical and moral reasons why this is so.

BENEVOLENT INSTITUTIONS IN THE UNITED STATES.

(From a Report issued January 29, 1914, by the Census Bureau, based on the Census of 1910.)

Of the total number of 5,408 benevolent institutions reported in the United States in 1910, 2,492, or 46.1 per cent., were institutions for the sick; 1,435, or 26.5 per cent., were institutions for the care of children; 1,151, or 21.3 per cent., were homes for adults or adults and children; 205, or 3.8 per cent., were societies for the protection and care of children, and 125, or 2.3 per cent., were institutions for blind and deaf.

A considerable number of these institutions, especially the dispensaries and the societies for the care of children, made no report of inmates at the close of 1910, but in the 4,272 institutions that did make such report there were 336,127 inmates, of whom 116,228, or 34.6 per cent., were in homes for adults or adults and children; 108,070, or 32.1 per cent., were in institutions for the care of children; 96,390, or 28.7 per cent., in institutions for the sick, and 15,439, or 4.6 per cent., in institutions for blind and deaf.

A total of 2,960,538 persons of all classes were received in 4,307 of these benevolent institutions during the year 1910, 1,953,309, or 66 per cent., of whom were received in institutions for the sick, the remaining 34 per cent. being divided among the other three classes of institutions. In this connection the report calls attention to the fact that among persons received in these institutions there were a number who were only indirectly recipients of benevolence, being pay inmates who met the regular charges for treatment.

All classes of benevolent institutions in the United States reported in 1910 for 4,281 institutions a total income of $118,379,859, with expenses of $111,498,155, while 3,871 showed property valued at $643,878,141. This income of $118,379,859 was divided among the different classes of institutions as follows: Hospitals, 55.9 per cent.; homes for adults or adults and children, 20.4 per cent.; institutions for the care of children, 16.2 per cent.; institutions for the blind and deaf, 4.8 per cent.; societies for the protection and care of children, 1.8 per cent.; dispensaries, 0.9 per cent.

Benevolent institutions in New York State reported a total income of $28,216,055; in Pennsylvania, $14,668,108; in Illinois, $12,25°,819; in Massachusetts, $8,633,048, and in California, $4,602,315. New York reported the valuation of its benevolent institutions at $187,760,531; Pennsylvania, $116,912,027; Massachusetts, $62,010,787; Ohio, $34,665,751; Illinois, $30,470,428, and California, $16,286,673.

The number of institutions for the blind and deaf in the United States in 1910 was 125, of which 72 were State and 53 were private. The total number of inmates at the close of that year was 15,439, of whom 10,658 were in State institutions and 4,781 were in private. The valuation of the property of these institutions was reported as being $33,159,771 at the close of 1910. The institutions for the blind and deaf under private management are almost entirely in the Eastern States, chiefly Massachusetts, New York, and Illinois. One institution alone in Massachusetts, the Perkins Institution and Massachusetts School for the Blind, reported 295 of the 664 inmates of blind and deaf institutions in that State.

EMBEZZLEMENTS.

The fidelity department of the Fidelity and Casualty Company of New York keeps a record of embezzlements reported in the United States. The following are the figures for five calendar years:

The total amount of embezzlements reported by the same authority for each year from 1896 to 1914, inclusive, was as follows: 1896, $9,113,030; 1897, $11,154,530; 1898, $9,236,351; 1899, $5,873,086; 1900, $8,090,878; 1901, $7,734,250; 1902, $6,933,516; 1903, $10,312,793; 1904, $10,068,971; 1905, $12,623,536; 1906, $18,883,709; 1907, $9,367,964; 1908, $11,565,679; 1909, $10,652,060; 1910, $10,731,965; 1911, $11,482,051; 1912, $7,233,456; 1913, $3,713,857; 1914, $7,796,084; total, $182,567,766.

THE WORLD of July 31, 1910, said: Amount stolen from banks in past five years, $28,000,000. Banker convicts in Federal Penitentiary, Fort Leavenworth, Kan., exceeded every other class of prisoners except burglars and mail robbers. Records show that a majority of embezzlers stole money to gamble in Wall Street. Total thefts of $28,000,000 do not represent complete record of losses, because banks conceal them whenever possible. Temptation to try and repeat performances of the few men who have made quick fortunes in Wall Street is held responsible for increasing embezzlements among bank employés.

* Registration area.

According to Frederick L. Hoffman, author of the above table, the average homicide rates per 100,000 of population for 30 representative American cities were as follows: For the years 1885-1894, 4.8; for 1895-1904, 5.0; and for 1905-1914, 8.1. The homicide rates for the 10 years ending with 1913 were as follows: For 9 Southern cities, 18.2; for 3 Pacific Coast cities, 10.0; for 7 Central cities, 8.6; and for 11 Eastern cities, 4.9. Estimate of the entire United States for 1915, 7,500. Homicides in 1914 in some of the large cities were as follows: Memphis, Tenn., 103; New Orleans, La., 79; Atlanta, Ga., 58; St. Louis, Mo., 117; San Francisco, Cal., 60; Chicago, Ill., 217; Manhattan and the Bronx, N. Y., 186; Brooklyn, N. Y., 94; Boston, Mass., 25; Philadelphia, Pa., 76; Milwaukee, Wis., 22.

The average number of murders in the United States annually during the twenty years from 1885 to 1904 was 6,597. In 1896 the murders reached high-water mark, 10,662, and in 1895 there were 10,500.

For 1912 the Census Bureau reported the number of homicides in the registration area of the United States—63.2 per cent. of the total population—as 3,954, and in 1913 as 4,567.

The excessive mortality from homicides among the colored race is indicated by the following data: For the last available five-year period, in New Orleans the colored rate from homicide was 64.6 per 100,000 of population as against 9.5 for whites; in Savannah, Ga., the comparative rates were 43.8 for the colored against 18.5 for the white; and in Charleston, S. C., 60.6 for the colored against 10.7 for the white population.

SUICIDES.

THE suicide rate of the registration area of the United States in 1913 was 15.8 per 100,000 of population. The estimated number of suicides for the United States, but excluding insular possessions, in 1915 was 25,800. The most common means of self-destruction in 1913, according to the mortality returns of the Census, were: Poisoning, 2,824; asphyxia, 1,262; hanging or strangulation, 1,380; drowning, 568; firearms, 1,930; cutting or piercing instruments, 673; jumping from high places, 183; crushing, 90; and other methods, 1,958. The suicide rate of large American cities for 1914, according to Frederick L. Hoffman, Statistician, Prudential Insurance Company of America, was 20.3 per 100,000 of population. The number of suicides in 100 American cities for the ten years ending 1914 was 42,944. The average suicide rates for 20 leading cities for the decade ending with 1913 were as follows: San Francisco, 48.0; San Diego, 41.1; Sacramento, 40.1; Hoboken, 34.1; St. Louis, 32.8; Los Angeles, 32.5; Oakland, 32.0; Springfield, Ill., 30.2; Denver, 29.8; Seattle, 28.6; Salt Lake City, 26.7; Indianapolis, 26.3; Omaha, 25.2; Pueblo, 24.8; Tacoma, 24.7; Atlantic City, 24.3; McKeesport, 23.9; Portland, Ore., 23.4; Washington, 22.7; and Newark, 22.6. In New York City the rate for Manhattan and the Bronx was 19.3. The number of suicides for the decade ending with 1914 was 4,318 for Greater New York, 4,735 for Chicago, 2,489 for Philadelphia, 1,920 for San Francisco, and 1,200 for St. Louis.

The average suicide rates for large foreign cities for recent years were 31.4 for Berlin, 24.8 for Paris, 16.0 for Buenos Ayres, 11.6 for London, and 10.6 for Sydney, New South Wales.

The average annual suicide rates for the more important countries have been as follows: Ireland, 3.4; Scotland, 5.7; Netherlands, 6.7; Norway, 6.4; England and Wales, 10.2; Australia, 11.6; Belgium, 12.4; Sweden, 12.4; United States registration area, 16.0; Austria, 17.3; Japan, 18.9; Hungary, 19.2; Denmark, 19.4; Germany, 21.3; Switzerland, 22.7; and France, 22.8.

PAUPERISM.

According to Census Bulletin 120, issued in 1914, the number of paupers in almshouses in the United States on January 1, 1910, was 84,198. Of these, 57,049 were males and 27,149 females; 44,149 were native born, 33,125 foreign born, 355 nativity unknown, 6,464 colored. The total number of admissions to almshouses in 1910 was 88,313. The deaths of pauper inmates of almshouses in 1910 were 17,486, the largest causes of these deaths being tuberculosis of the lungs, 3,135; senility, 1,818; heart disease, 1,439; pneumonia, 1,071; Bright's disease, 1,071. The number of paupers in almshouses who were discharged in 1910 to be self-supporting was 44,491; to relatives and friends, 14,160; to be boarded out, 459, and indentured, 10. More than half of the persons admitted during the year were over 50 years of age. The number 80 years old and over was 3,365.

PAUPERISM IN UNITED KINGDOM IN 1914.

England and Wales (on January 1), indoor 271,463, outdoor 389,314; Scotland (on January 15), paupers 66,832, dependents 38,413; Ireland (at close of first week in January), indoor 35,355, outdoor 37,837. Total number, 839,214. Amount of relief in 1913, £17,784,579.

NATIONAL PROBATION ASSOCIATION.

Organized in 1906 as the National Probation Officers' Association; title changed to present one in 1911.

The purposes of the association are to promote the more extensive and wise use of the probation and parole systems of dealing with both juvenile and adult offenders; also to encourage the adoption of the most approved methods of conducting children's courts. The association holds an annual conference each Spring at the time and place of the meetings of the National Conference of Charities and Correction. It publishes an annual directory of probation officers in the United States, the proceedings of its annual conferences, and other literature. From time to time it appoints special committees to study and report on particular phases of probation, parole, and juvenile court work. Supported by membership fees ($1 a year) and voluntary contributions.

A federation of societies and individuals "for the prevention of cruelty, especially cruelty to children and animals." The officers are: *President*—Dr. William O. Stillman, Albany, N. Y. *Secretary*—N. J. Walker, Albany, N. Y. *Treasurer*—Edgar McDonald, Brooklyn, N. Y.

ADMINISTRATION OF DECEASED PERSONS' ESTATES.

INHERITANCE TAX LAWS.

THE following is a synopsis of several of the laws of the various States affecting the administration of the estate of a deceased person:

1. Who to Administer.—(a) If the deceased leaves a will, the duty of administration falls upon the executor. If no executor is named, or in the event of the death or refusal of the executor to act, the Court will grant administration under the will to some suitable person, generally selected from those most largely interested under the provisions of the will, such as the residuary legatees, if any. (b) If the deceased died intestate, letters of administration are granted to the following persons in practically all the States:

First—To the surviving husband or widow.
Second—To one or more of the next of kin entitled to share in the estate.
Third—If none of the above consent to act, to one of the creditors of the estate, except in localities where there is provided by law a Public Administrator, who is preferred to creditors.

In practically all the States an administrator is required to give bond for the faithful performance of his duties in double the value of the estate to be administered.

In most of the States, if so provided by the will, no bond is required of an executor, except that in some States an executor is required to give a bond to cover the probable amount of the debts of the estate, and in practically all the States, in the discretion of the Court, for cause shown, an executor may be required to give a bond.

2. Claims of Creditors.—The procedure in the several States in presenting creditors' claims against the estate varies very considerably. In the majority of the States the executor or administrator is required promptly to give public notice to creditors to present their claims to him, and the creditors are required so to present their claims supported by an affidavit that the same are justly due and owing from the estate, above any offsets or counter claims, within a period limited generally to six months or a year. The law of each State should be consulted for more specific details. Most of the States direct a final closing of the estate by the executor or administrator within a year or eighteen months after his appointment, though the time limit may be extended by the Probate Court if conditions require it.

3. The following table contains an analysis of the laws of the several States, covering:

(1) The inheritance or succession tax upon property received either by intestate laws, last will, or by gift or transfer, designed to take effect at death, excepting legacies for religious, charitable or educational purposes, which are tax exempt in most of the States. In the great majority of the States no distinction as to tax is made between real estate and personal property.

(2) The various classes of estate obligations given priority over other claims in case of the insolvency of the estate.

THE BANKRUPTCY LAW.

EXTRACTS FROM THE UNITED STATES BANKRUPTCY ACT OF JULY 1, 1898, AS AMENDED BY ACT OF JUNE 25, 1910.

SEC. 4. WHO MAY BECOME BANKRUPTS.—(*a*) Any person except a municipal railroad, insurance or banking corporation shall be entitled to the benefits of this act as a voluntary bankrupt.

The bankruptcy of a corporation shall not release its officers, directors, or stockholders, as such, from any liability under the laws of a State or Territory or of the United States.

(*b*) Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any unincorporated company and any moneyed business, or commercial corporation, except a municipal railroad, insurance or banking corporation, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial and shall be subject to the provisions and entitled to the benefits of this act.

SEC. 7. DUTIES OF BANKRUPTS.—(*a*) The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a Judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days, unless further time is granted, after the adjudication if an involuntary bankrupt, and with the petition if a voluntary bankrupt, a schedule of his property, showing the amount and kind of property, the location thereof, its money value in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings.

Provided, however, that he shall not be required to attend a meeting of his creditors, or at or for an examination at a place more than one hundred and fifty miles distant from his home or principal place of business, or to examine claims except when presented to him, unless ordered by the court, or a Judge thereof, for cause shown, and the bankrupt shall be paid his actual expenses from the estate when examined or required to attend at any place other than the city, town, or village of his residence.

Act of March 3, 1911 (Judicial Code) 36 Stat. 1134, as follows:

SEC. 24. Original jurisdiction in district courts.

"SEC. 130. The Circuit Courts of Appeals shall have the appellate and supervisory jurisdiction conferred upon them by the act entitled 'An act to establish a uniform system of bankruptcy throughout the United States,' approved July first, eighteen hundred and ninety-eight, and all laws amendatory thereof, and shall exercise the same in the manner therein prescribed."

SEC. 252 states the appellate jurisdiction of the Supreme Court conferred upon it by the Bankruptcy act of July 1, 1898.

SEC. 4, act of January 28, 1915, as follows:

"That the judgments and decrees of the Circuit Courts of Appeals in all proceedings and cases arising under the Bankruptcy act and in all controversies arising in such proceedings and cases shall be final, save only that it shall be competent for the Supreme Court to require by *certiorari*, upon the petition of any party thereto, that the proceeding, case, or controversy be certified to it for review and determination, with the same power and authority as if taken to that court by appeal or writ of error; but *certiorari* shall not be allowed in any such proceeding, case, or controversy unless the petition therefor is presented to the Supreme Court within three months from the date of such judgment or decree."

DISTRIBUTION OF INTESTATE'S PERSONAL ESTATE.

THE following is a synopsis of the laws of the various States providing for the distribution of the personal estate of a deceased after the payment of funeral expenses and other debts where there is no will:

In many of the States the widow and children are entitled to receive a small portion of the estate, generally varying from $100 to $500, before the claims of creditors are paid. Aside from such exempt portion of the estate, the property to be distributed to the widow or relatives is that remaining after all creditors' claims have been satisfied.

The following is the plan of distribution of a male's property. The same rules apply to a female's estate, except in some States, where the rights of a husband in the estate of his deceased wife differ from those of a wife in the estate of her deceased husband, which will be shown in a separate table.

I. In all States where the deceased leaves a child or children, or descendants of any deceased child, and no widow, the children or descendants take the entire estate, to the exclusion of all other relatives. The children take equal shares, and in most States the descendants of a deceased child together take the share of their parent, except where the descendants are all in equal degree to the deceased (all grandchildren, no children surviving), when they share equally and do not take their proportionate share of their parent's interest.

No statement is given in this synopsis of the law of Louisiana, which, being founded on the provisions of the French code and Roman law instead of the English common law, which is the underlying principle in the other States, differs in many respects from the principles followed in the other States, especially on the question of the rights of a husband and wife in each other's property and in the property acquired by the husband and wife during their married life. The provisions of the law of Indiana are also not included, for the reason that for an accurate statement of its provisions a reading of the entire statute is necessary, together with the decisions of the Indiana courts construing its provisions, which would occupy too much space for a statement here.

II. (a) If deceased leaves a widow, and no children or descendants, the widow takes all. This is the rule in Alabama, Arizona, Colorado, Florida, Georgia, Illinois, Kansas, Minnesota, Mississippi, New Jersey, New Mexico, Ohio, Oregon, Tennessee, Texas, Washington, West Virginia and Wisconsin.

(b) In the following States the widow takes one-half, the residue being taken by the other relatives in the manner and proportion in which they take the entire estate when the deceased leaves neither widow nor descendants (given below); Arkansas, California, Delaware, District of Columbia, Idaho, Iowa, Kentucky, Maine, Maryland, Missouri, Montana, Nebraska, Nevada, North Carolina, Oklahoma, Rhode Island, Texas, Washington, West Virginia and Wisconsin.

(c) In Massachusetts, North Dakota, Pennsylvania and Utah the widow takes the entire estate up to $5,000 and one-half of the residue.

(d) In Connecticut the widow takes the entire estate up to $2,000 and one-half of the residue.

(e) In New York, if there be a father or mother of deceased surviving, the widow takes one-half; if there be no father or mother, but a brother or sister, nephew or niece surviving, the widow takes $2,000 and one-half residue; if there be no parent, brother, sister, nephew or niece, the widow takes all. The residue after the widow's share passes in each case in accordance with the provisions applying where no widow or issue survive.

(f) In New Hampshire the widow takes $1,500, and, if the estate exceeds $3,000, one-half of the residue.

(g) In Wyoming the widow takes the entire estate up to $20,000 and three-fourths of the residue (if brother, sister or parent survive, otherwise all to widow).

(i) In Michigan the widow takes the entire estate up to $3,000 and one-half of the residue (if brother, sister or parent survive, otherwise all to widow).

(j) In Vermont the widow takes entire estate if not exceeding $2,500; if more than $2,500, widow takes that sum and one-half of residue.

III. (a) When the deceased leaves a widow and children, or descendants, the widow takes one-third and the children share equally in the residue in the following States: Arizona, Arkansas, Connecticut, Delaware, District of Columbia, Illinois, Iowa, Maine, Maryland, Massachusetts, Minnesota, New Hampshire, New Jersey, New York, Ohio (one-half if less than $400), Pennsylvania, Rhode Island, South Carolina, Texas, Vermont, Virginia and West Virginia.

(b) In the following States, if there be but one child, the widow takes one-half and the child one-half; if two or more children or their descendants, the widow takes one-third, as above, and the children or their descendants the residue: California, Florida, Idaho, Michigan, Montana, Nevada, North Dakota, Oklahoma, South Dakota and Utah.

(c) In the following States the widow takes one-half and the children, or descendants, the residue: Colorado, Kansas, Kentucky, Oregon, Washington and Wyoming.

(d) In the following States the widow takes the same share as each of the children: Mississippi, Missouri, Tennessee and Wisconsin.

(e) In North Carolina, if there are less than three children, the widow takes one-third and the children the residue; if there are three or more children, the widow takes the same share as each of the children.

DISTRIBUTION OF INTESTATE'S PERSONAL ESTATE—*Continued.*

(f) In Alabama, if there is but one child, the widow takes one-half and the child one-half; if there are more than one child and less than five children, the widow takes the same share as each of the children; if there are five or more children, the widow takes one-fifth and the children or their descendants share equally in the residue.

(g) In Georgia, if there are less than five children, the widow takes the same share as each of the children; if there are five or more children, the widow takes one-fifth and the children or their descendants share equally in the residue.

In Nebraska if widow is not the parent of all the children of the deceased and there be more than one child, widow takes one-fourth and children the residue. If widow is parent of all children of the deceased, she takes one-half if there be but one child and the child the residue; if there be more than one child the widow takes one-third and the children the residue.

(h) In New Mexico, the widow takes one-half of the estate acquired during marriage, otherwise than by gift (by purchase, for example) and the children or their descendants share equally in the residue; the widow also takes one-fourth of the estate acquired before marriage, or by gift or legacy during marriage, the children or their descendants taking the residue.

IV. (a) When the deceased leaves no widow, children or descendants, the parents take the entire estate in equal shares in the following States: Alabama, Arizona, California, Colorado, Connecticut, Idaho, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, North Carolina, Oklahoma, Pennsylvania, Texas, Utah, Vermont, Washington, Wisconsin and Wyoming.

In all of the States just mentioned, except Alabama, Arizona, Maine, and Texas, if one parent is dead, the surviving parent takes the entire estate, to the exclusion of brothers and sisters. In Alabama, Arizona, Maine, and Texas the surviving parent takes one-half and the brothers and sisters, or their descendants, take the residue.

In all of them, if both parents are dead, the brothers and sisters and their descendants take the entire estate.

(b) In the following States the father, if living, takes the entire estate; if the father is dead, then to the mother and brothers and sisters, or their descendants equally; and if both parents are dead, then to the brothers and sisters, or their descendants: Florida, New York, Oregon, Rhode Island, South Dakota, Tennessee, Virginia and West Virginia.

(c) In the following States the father, if living, takes the entire estate; if the father is dead, then to the mother; and if both parents are dead, then to the brothers and sisters or their descendants: Arkansas, District of Columbia and North Dakota.

(d) In the following States the parents, if living, and the brothers and sisters, or their descendants, take the entire estate, sharing equally. Georgia, Illinois, Mississippi, Missouri, New Jersey and South Carolina.

(e) In Delaware, Ohio and Maryland (where the property did not descend to intestate from either parent), the brothers and sisters, or their descendants, take the entire estate in preference to the parents, who only inherit if there are no brothers or sisters or lawful issue of any deceased brothers or sisters.

DISTRIBUTION OF FEMALE'S ESTATE.

In the following States, if the deceased was a married woman, the rights of her surviving husband in her personal estate differ from the rights of a widow in the estate of her deceased husband as shown in the above synopsis.

(a) In Delaware, District of Columbia, North Carolina, Rhode Island, and Virginia the husband takes the entire personal estate, whether there is any issue of the marriage or not.

(b) In New York, if there are no children or descendants of children, the husband takes the entire estate.

(c) In Florida, Georgia, and Pennsylvania, if there are no children or descendants, the husband takes the entire estate; if there are children, the husband takes the same share as each child.

(d) In Ohio the husband takes the entire estate if there are no children or descendants: if there are children or descendants, they take the entire estate.

(e) In Alabama the husband takes one-half of the estate, the children, or descendants, taking the residue.

(f) In North Carolina, where surviving husband is not also the father of all the children of decedent, if there be one child the husband takes one-half and the child one-half; if there be more than one child, husband takes child's share.

LAW EXAMINATIONS IN NEW YORK STATE.

To entitle an applicant to an examination as an attorney and counsellor he shall pay to the examiners a fee of $15, and he must prove (15 days in advance) to the satisfaction of the State Board of Law Examiners: 1. That he is a citizen of the State, twenty-one years of age, and that his residence for six months prior to the examination is actual and not constructive, which proof must be made by his own affidavit. 2. That he has studied law in the manner and according to the conditions prescribed for a period of four years, except that if the applicant is a graduate of any college or university his period of study may be three years instead of four, and except also that persons who have been admitted as attorneys in the highest court of original jurisdiction of another State or country, and have remained therein as practising attorneys for at least three years, may be admitted to such examination after a period of law study of one year within this State. 3. That the applicant, if not a college graduate, has passed the regents' examination or its equivalent must be proved by the production of a certified copy of the regents' certificate filed in the office of the Clerk of the Court of Appeals.

Address communications concerning law examinations to F. M. Danaher, Secretary, Albany, N. Y.

ACKNOWLEDGMENT OF DEEDS.

AN ACKNOWLEDGMENT is the act of declaring the execution of an instrument before an officer authorized to certify to such declaration. The officer certifies to the fact of such declaration, and to his knowledge of the person so declaring. Conveyances or deeds of land to be entitled to be recorded must first be acknowledged before a proper officer. Most of the States have forms of acknowledgments, which should be followed.

Acknowledgments may be taken in general by Notaries Public, Justices of the Peace, Judges or Clerks of Courts of the higher grades, Registers, Masters in Chancery, Court Commissioners, Town Clerks, Mayor and Clerks of incorporated cities, within their respective jurisdictions.

The requisites to a valid deed are the same in general as other contracts, but the appointment of an attorney to execute a deed for another person must in general be executed with the same formalities requisite to the deed itself.

SEALS or their equivalent (or whatever is intended as such) are necessary in Alaska, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Vermont, Virginia, West Virginia, Wisconsin, Wyoming. In almost all the States deeds by corporations must be under seal. FORMS are prescribed or indicated by the statutes of most of the States except Connecticut, Florida, Louisiana. SEPARATE ACKNOWLEDGMENT by wife is required in Alaska, Arkansas, Delaware, District of Columbia, Florida, Georgia, Idaho, Kentucky, Louisiana, Montana, Nevada, New Jersey, North Carolina, Oregon, Pennsylvania, South Carolina, Tennessee, Texas. ONE WITNESS to the execution of deeds is required in District of Columbia, Maine (customary), Maryland, Nebraska, New Jersey (usual), Oklahoma, Utah, Wyoming. TWO WITNESSES to the execution of deeds are required in Arkansas, Connecticut, Florida, Georgia, Louisiana, Michigan, Minnesota, New Hampshire, Ohio, Oregon, South Carolina, Texas, Vermont, Wisconsin.

PROMISSORY NOTES AND CHECKS.

Negotiable instruments, the common forms of which are promissory notes, checks, or other bills of exchange, while having the same general requisites as other contracts, have certain distinct features. The purpose of the law is to facilitate as much as possible their free passing from hand to hand like currency. The assignment of an ordinary contract leaves the assignee in no different position for enforcing his rights than that of his assignor, but one who takes a negotiable instrument from a prior holder, without knowledge of any defences to it, before its maturity, and gives value for it, holds it free of any defences which might have been set up against his predecessors, except those defects that were inherent in the instrument itself.

To be negotiable an instrument must be in writing and signed by the maker (of a note) or drawer (of a bill or check).

It must contain an unconditional promise or order to pay a sum certain in money.

Must be payable on demand, or at a fixed future time.

Must be payable to order or to bearer.

In a bill of exchange (check) the party directed to pay must be reasonably certain.

Every negotiable instrument is presumed to have been issued for a valuable consideration, and want of consideration in the creation of the instrument is not a defence against a bona-fide holder.

An instrument is negotiated, that is completely transferred, so as to vest title in the purchaser, if payable to bearer, or indorsed simply with the name of the last holder, by mere delivery, if payable to order by the indorsement of the party to whom it is payable and delivery.

One who transfers an instrument by indorsement warrants to every subsequent holder that the instrument is genuine, that he has title to it, and that if not paid by the party primarily liable at maturity, he will pay it upon receiving due notice of non-payment.

To hold an indorser liable the holder upon its non-payment at maturity must give prompt notice of such non-payment to the indorser and that the holder looks to the indorser for payment. Such notice should be sent within twenty-four hours.

When an indorser is thus compelled to pay he may hold prior parties through whom he received the instrument liable to him by sending them prompt notice of non-payment upon receiving such notice from the holder.

One who transfers a negotiable instrument by delivery, without indorsing it, simply warrants that the instrument is genuine, that he has title to it, and knows of no defence to it, but does not agree to pay it if unpaid at maturity.

The maker of a note is liable to pay it if unpaid at maturity without any notice from the holder or indorser.

Notice to one of several partners is sufficient notice to all.

When a check is certified by a bank the bank becomes primarily liable to pay it without notice of its non-payment, and when the holder of a check thus obtains its certification by the bank, the drawer of the check and previous indorsers are released from liability, and the holder looks to the bank for payment.

A bona-fide holder of a negotiable instrument, that is, a party who takes an instrument regular on its face, before its maturity, pays value for it and has no knowledge of any defences to it, is entitled to hold the party primarily liable responsible for its payment, despite any defences he may have against the party to whom he gave it, except such as rendered the instrument void in its inception. Thus, if the maker of a note received no value for it, or was induced to issue it through fraud or imposition, they do not defeat the right of a bona-fide holder to compel its payment from him.

The following States have enacted a similar Negotiable Instrument law: Alabama, Arizona, Colorado, Connecticut, Dist. of Columbia, Florida, Idaho, Iowa, Kansas, Kentucky, Louisiana, Maryland, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, Tennessee, Utah, Virginia, Washington, and Wisconsin—and the same general rules apply in all the States.

LAW OF CONTRACTS.

A contract is an agreement of two or more parties, by which reciprocal rights and obligations are created. One party acquires a right, enforceable at law, to some act or forbearance from the other, who is under a corresponding obligation to thus act or forbear.

Generally speaking, all contracts which are made between two competent parties, for a proper consideration, without fraud and for a lawful purpose, are enforceable at law.

To the creation of a valid contract there must be:

1. Precise agreement. The offer of one party must be met by an acceptance by the other, according to the terms offered.

2. There must be a consideration. Something of value must either be received by one party or given up by the other.

3. The parties must have capacity to contract. The contracts of insane persons are not binding upon them. Married women are now generally permitted to contract as though single, and bind their separate property. The contracts of an infant are generally not binding upon him, unless ratified after attaining his majority. The contracts of an infant for "necessaries" may be enforced against him to the extent of the reasonable value of the goods furnished. It is incumbent upon one seeking thus to hold an infant to show that the goods furnished were in fact necessary to the infant, and that he was not already supplied by his parents or guardians.

4. The party's consent must not be the result of fraud or imposition, or it may be avoided by the party imposed upon.

5. The purpose of the parties must be lawful. Agreements to defraud others, to violate statutes, or whose aim is against public policy, such as to create monopolies, or for the corrupt procurement of legislative or official action, are void, and cannot be enforced by any party thereto.

Contracts in general are equally valid, whether made orally or in writing, with the exception of certain classes of contracts, which in most of the States are required to be attested by a note or memorandum in writing, signed by the party or his agent sought to be held liable. Some of the provisions, which are adopted from the old **English Statute of Frauds,** vary in some States, but the following contracts very generally are required to be thus attested by some writing:

Contracts by their terms not to be performed within a year from the making thereof.

A promise to answer for the debt, default, or miscarriage of another person.

Contracts made in consideration of marriage, except mutual promises to marry.

Promise of an executor, or administrator, to pay debts of deceased out of his own property.

Contracts for the creation of any interest or estate in land, with the exception of leases for a short term, generally one year.

Contracts for the sale of goods above a certain value, unless a portion of the price is paid or part of the goods delivered. The required value of the goods sold varies in different States from $30 to $200. In a number of the States no such provision exists.

In many of the States declarations or conveyances of trust estates.

In many States representations as to the character, credit, or responsibility of another person.

Partial performance of the contract is generally held to dispense with the necessity for a writing.

If the damages liable to result from the breaking of a contract are uncertain the parties may agree upon a sum to which either may be entitled as compensation for a breach, which will be upheld by the courts, but if the sum so fixed is not designed as a fair compensation to the party injured, but as a penalty to be inflicted, it will be disregarded.

A party is generally excused for the failure to perform what he has agreed only by the act of God or the public enemy. Except in cases involving a personal element in the work to be performed, such as the rendition of services, when the death or sickness of the party contracting to perform them is a valid excuse, or contracts for the performance of work upon a specified object, when its destruction without the fault of the party sought to be held liable is a sufficient excuse.

ARREST IN CIVIL ACTION.

WHILE imprisonment for debt as it formerly existed in English and American law, by which a debtor might be arrested and imprisoned for mere inability to pay his creditor, no longer exists in the United States, the statutes of the majority of the States provide for the arrest of a defendant in a civil action under varying conditions. A large number of States determine the right of arrest by the character of the claim on which suit is brought, allowing in it actions for fraud or the injuries known in the law as "torts," such as an injury to the person or property, conversion or embezzlement, libel, slander, or the like.

In the following States no civil arrest is allowed—Arizona, District of Columbia, Florida, Maryland, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, Tennessee, and Texas.

In the following States the right to arrest depends upon the nature of claim in suit: In actions for fraud or torts, Connecticut; for fraud, libel, slander, or violent injury to person or property, Delaware for fraud only, Iowa and Kansas; only after verdict of jury, finding malice, fraud, or wilful deceit, Colorado; for torts, breach of promise to marry, misconduct or embezzlement in office or professional capacity, Michigan, Pennsylvania, and New York (also for fine or penalty or to recover property concealed from Sheriff).

In the following States arrest is only allowed against a defendant about to remove from State or about to conceal, transfer, or remove his property to avoid plaintiff's claim or defraud creditors, irrespective of the nature of the claim: Indiana, Kentucky, Louisiana, New Hampshire, Utah, Virginia. In New Hampshire tax collector may also arrest person for non-payment of poll tax, if not sufficient property upon which to make distress.

In the following States arrest is allowed in contract actions where the defendant is about to depart from the State, or conceal or remove his property, and also in actions for fraud or torts of various kinds, though the provisions are not identical: Arkansas (fraud only), California, Idaho, Illinois, Maine, Massachusetts, Montana, Nevada, New Jersey, North Carolina, North Dakota, Oregon, South Carolina, South Dakota, Vermont, Washington, West Virginia (fraud only), Wisconsin.

In Georgia arrest only allowed against attorneys, Sheriffs or other officers of the court for failure to pay over money collected and in certain circumstances against defendant who conceals property from Sheriff. The drawer of a check, which on presentation to the bank payment is refused, is guilty of a misdemeanor. Criminal prosecution cannot be instituted, however, until after an expiration of thirty days, and not then if the drawer makes good the invalid check.

In Wyoming (only after judgment) in actions for fraud, or money lost at gambling, or where defendant has removed or concealed property to avoid judgment.

In Rhode Island, allowed in all actions except to recover debt or taxes.

In Ohio, when an affidavit is filed showing: About to remove property to defraud creditors, convert property into money for same purpose, conceal property or rights in action fraudulently, assigned or disposed of property with intent to defraud creditors. Fraudulently contracted the debt, or incurred the obligation. Money or property sought to be recovered was in gambling on a bet or wager.

The marriage is void without divorce proceedings, consanguinity, insanity, former existing marriage.

*Exclusive of South Carolina, which has no divorce law.

Age at Which a Valid Marriage May Be Contracted—The age at which a valid marriage can be contracted varies in different States. The lowest statutory age for a male is fourteen. The States in which a marriage can be contracted by a male at fourteen years are Kentucky, Louisiana, New Hampshire, and Virginia. The States in which the statutory limit is fifteen years are Kansas and Missouri. Those in which it is sixteen years are the District of Columbia, Iowa, North Carolina, Texas, and Utah. Those in which it is seventeen years are Alabama, Arkansas, and Georgia, and those in which it is eighteen years are Arizona, California, Delaware, Idaho, Illinois, Indiana, Michigan, Minnesota, Montana, Nebraska, Nevada, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, West Virginia, Wisconsin, and Wyoming.

Age Limit for Females—The lowest age at which a valid contract can be made by a female is twelve years. The States in which the statutory limit of twelve obtains are Kansas, Kentucky, Louisiana, Missouri, and Virginia. In New Hampshire the statutory limit is thirteen years. In the following States it is fourteen years. Alabama, Arkansas, District of Columbia, Georgia, Iowa, North Carolina, Texas and Utah. The States in which the statutory limit is fifteen are California, Minnesota, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, and Wisconsin. The States in which the statutory limit is sixteen years are Arizona, Delaware, Illinois, Indiana, Michigan, Montana, Nebraska, Nevada, Ohio, West Virginia, and Wyoming. The statutory limit is eighteen years in Idaho and New York. In other States, for which no minimum marriageable age is given, the provisions of the common law apply

Parental Consent—The age below which parental consent is required for the marriage of a male is twenty-one years in nearly all the States and Territories. In Tennessee it is sixteen years and in Idaho and North Carolina eighteen years. In Georgia, Michigan, New Hampshire, New York, and South Carolina no limit is established. It is twenty-one years in all the other States and Territories.

The age below which parental consent is required for the female is sixteen years in Maryland and Tennessee. It is twenty-one years in Connecticut, Florida, Kentucky, Louisiana, Pennsylvania, Rhode Island, Virginia, West Virginia, and Wyoming. No statutory limit is established in New Hampshire, New York, and South Carolina. In all the other States and Territories it is eighteen years.

DIVORCE STATISTICS.

THE Bureau of the Census issued in 1909 a report of the results of a compilation of statistics of divorces of married people granted by the courts in the United States for a period of forty years; being from 1867 to 1906, both years inclusive, and which are shown in 1912 ALMANAC, pages 197-199. For comparison with foreign countries see 1914 ALMANAC, page 277.

FROM 1910 CENSUS REPORT.

The number of divorced persons in the United States when the census was taken in 1910 was 156,176 men and 185,101 women—0.3 per cent. of the total male population and 0.4 per cent. of the total female population. There were fourteen boys and thirty-three girls less than fifteen years old who were divorced.

The statistics of the number of divorced persons fifteen years old and over in New York State are: Men—Native white of native parentage, 3,784; native white of foreign or mixed parentage, 1,692; foreign-born white, 1,775; negro, 164; total, 7,436. Women—Native white of native parentage, 4,950; native white of foreign or mixed parentage, 2,347; foreign-born white, 2,609; negro, 292; total, 10,227. The total figures for the males include 18 divorced Indians, 2 Chinamen and 1 Japanese; those for females include 28 divorced Indians and 1 Japanese.

THE PROCREATION COMMISSION.

THIS Commission, created by an act of the Legislature of New York State, is to examine into the mental and physical condition and the record and family history of the feeble-minded, epileptic, criminal and other defective inmates confined in the State hospitals, reformatories, charitable and penal institutions; and if in the judgment of the majority of the board procreation by any such person would produce children with an inherited tendency to crime, insanity, feeble-mindedness, idiocy, or imbecility, and there is no probability of an improvement in their condition, then the board shall appoint one of their number to perform such operation for the prevention of procreation that shall be decided to be most effective. All orders made under this law are subject to review by the Supreme Court.

The board, as appointed by Governor Dix, consists of Dr. Charles H. Andrews, Buffalo, N. Y., Chairman; Dr. Leomon Thompson, Glens Falls, N. Y., Secretary; Dr. Wm. J. Wansboro, Albany, N.Y.

BLINDNESS IN THE UNITED STATES.

(From a report of Bureau of the Census, July 2, 1915.)

THE blind population of the United States in 1910 numbered 57,272, or 62.3 to each 100,000 of the total population in that year. Blindness is less common in America than in most other countries; it has apparently decreased among the youngest classes of the population in the last half century; it is more prevalent among men than among women; it is very much more prevalent among Indians, and considerably more prevalent among negroes than among whites. Trades taught in schools or workshops for the blind have equipped about 1,500 blind persons for total or partial self-support.

BLINDNESS IN FOREIGN COUNTRIES.

The total number of blind persons in the world is roughly estimated at 2,390,000. The total number enumerated at the most recent censuses of the blind in all countries in which such censuses have been taken is 1,194,346. These countries represent all of Australia, nearly all of Europe and North America, and portions of South America, Africa, and Asia, together with certain of the insular possessions of European and American countries. The only countries and provinces in which the ratios of the blind to the total population are lower than that for the United States (62.3 per 100,000) are Canada, where the ratio was 44.9 per 100,000 in 1911; Belgium, where it was 43.5 in 1910; Denmark, 52.7 in 1911; Germany, 60.9 in 1900; Netherlands, 46.3 in 1909; New South Wales, 61.4 in 1911; Western Australia, 50.3 in 1911; and New Zealand, 47.8 in 1911.

WHERE BLINDNESS IS MOST PREVALENT.

In the United States blindness is most prevalent in New Mexico and Nevada, in which States the ratios of blind to total population in 1910 were 169.3 to 100,000 and 118.5 to 100,000 respectively. The high ratios for these States are due to the fact that Indians, among whom trachoma (granulated eyelids) is of frequent occurrence in those sections of the country constitute relatively large elements in their population. In Arizona, Kentucky, Tennessee, and Vermont the ratios are also high—95.9, 94, 89.5, and 84.6 respectively. The relatively large Indian population of Arizona is responsible for the high ratio in that State; trachoma is prevalent in certain parts of Kentucky and Tennessee; and in Vermont there are relatively more people of advanced ages than in other parts of the country, to which fact is doubtless due the high ratio for that State, since susceptibility to blindness increases with advancing age.

SEX AND AGE.

In 1850 and at every succeeding census the proportion blind has been greater among males than among females. In 1910 the ratio of males to females among the blind population was 130.7 to 100, whereas in the total population the corresponding ratio was 106 to 100. In the majority of foreign countries a similar condition exists.

Although blindness may occur at any time of life, it is peculiarly a defect incident to old age. In fact, approximately one-half—49.4 per cent.—of the blind population reported in 1910 were 60 years of age and over, whereas only about one-fifteenth—6.8 per cent.—of the total population were 60 years of age and over. To make the comparison in another way: The median age of the total population in 1910 was 24 years—that is, one-half the population were under that age and the other half had passed it—while the median age of the blind population was 59.6 years, or nearly two and one-half times as great. Among children under 5 years only 5 in every 100,000 were blind; but among persons 85 years of age and over, 2,575 in 100,000 were blind. Comparisons with earlier censuses indicate that there has been a decrease in the prevalence of blindness among the younger classes of the population.

RACE AND NATIVITY.

Among native whites the number of blind persons per 100,000 population of the same race and nativity was only 55, whereas for the total population the ratio was 62.3 to 100,000. The corresponding ratios for other elements of the population were: Foreign-born whites, 74.5 to 100,000; negroes, 90 to 100,000; Indians, 302.6 to 100,000; Chinese, Japanese, and all other non-whites, 23.2 to 100,000. The fact that blindness is more common among foreign-born whites than among native whites is, however, due to the fact that the former class contains relatively more people of advanced age than does the latter. When the comparison is confined to persons of the same age the lower ratio is invariably found among the foreign-born whites. The remarkably high ratio for Indians is due to the prevalence of trachoma (granulated eyelids) on Indian reservations. The low ratios for the Chinese and Japanese may be explained in part by the fact that the members of these races in the United States are comparatively young and are, as a rule, engaged in occupations having no particular hazard of blindness. It is probable, too, that the enumeration of the blind among the Chinese and Japanese was somewhat deficient.

OCCUPATIONS.

Of the 31,473 blind males 10 years of age and over in 1910, only 7,976, or 25.3 per cent., were reported as being gainfully employed, while of the 24,000 blind females 10 years of age and over, only 1,345, or 5.6 per cent., were reported as gainfully employed. The corresponding percentages with reference to the total population were 81.3 for males and 23.4 for females. It does not follow, however, that more than 9,000 blind persons were actually self-supporting, since in most cases their earnings were far from sufficient to constitute a livelihood, and often amounted to a mere pittance of less than $100 a year. In this connection it should, of course, be borne in mind that a very considerable proportion of the blind population has already passed the age when retirement from active employment usually occurs, so that the number of blind persons not reporting an occupation does not by any means indicate the number of individuals lost to the working force of the United States by reason of blindness.

Of the 7,976 blind males reported as gainfully employed, 1,768, or 22.2 per cent., were returned as farmers; 665, or 8.3 per cent., as broom makers; 646, or 8.1 per cent., as musicians and teachers of music; 619, or 7.8 per cent., as retail merchants and dealers (other than hucksters and peddlers); 401, or 5 per cent., as hucksters and peddlers; 349, or 4.4 per cent., as piano tuners; 242, or 3 per cent., as chair caners.

Particular interest attaches to the figures for those trades which have been found especially available as a means of employment for the blind, and the reporting of which presumably indicates the receipt of special vocational training after the loss of vision. The most important of these trades are broom making, piano tuning, chair caning, basket making, mattress making, carpet and rug making, weaving, and hammock and net making. The numbers of blind males engaged in these trades in 1910 were 665, 349, 242, 50, 45, 30, 19, and 18 respectively, making a total of 1,418, or 17.8 per cent. of the entire number of gainfully employed blind males.

Of the 1,345 blind females 10 years of age and over reported as gainfully employed in 1910, 167, or 12.4 per cent., were returned as musicians and teachers of music; 127, or 9.4 per cent., as farmers; 102, or 7.6 per cent., as knitters; 86, or 6.4 per cent., as fancy workers; and 56, or 4.2 per cent., as professors, school principals, and teachers.

THE EUGENICS RECORD OFFICE.

The purposes of this office are to serve eugenical interests in the capacity of repository and clearing house; to build up an analytical index of the traits of American families; to study the forces controlling and the hereditary consequences of marriage matings, differential fecundity, survival and migration; to investigate the manner of inheritance of specific human traits; to advise concerning the eugenical fitness of proposed marriages; to train field workers to gather data of eugenical import; to maintain a limited field force actually engaged in gathering data for eugenical studies; to co-operate with other institutions and with persons concerned with eugenical study; to encourage new centres of eugenical research and education; to publish the results of researches and to aid in the dissemination of eugenical truths.

The Eugenics Record Office was organized in October, 1910, by Charles B. Davenport with funds provided by Mrs. E. H. Harriman, who has remained the principal patron of the work. It has also received generous support from John D. Rockefeller.

MORTALITY STATISTICS FOR 1913.

(From a bulletin issued by the Census Bureau, February 8, 1915.)

THE annual report on mortality in the United States, relating to the calendar year 1913, shows a death rate of 14.1 per 1,000 estimated population in the registration area of the United States, a slight increase as compared with the rate for 1912.

TOTAL DEATHS IN REGISTRATION AREA.

The total number of deaths (exclusive of stillbirths) in the registration area, which now contains about two-thirds of the population of the United States, was 890,848. The lowest rate ever shown in the bureau's reports was that for 1912, which was 13.9 per 1,000. There has been a marked, though not continuous, decline in the death rate since 1880, when it was 19.8 per 1,000, based on the deaths among 17 per cent. of the country's population.

The registration area of the United States, as constituted for the year 1913, consists of 24 States (in one of which, North Carolina, the registration is restricted to municipalities which had 1,000 population or over in 1900), the District of Columbia, and 41 cities in non-registration States. The States and cities making up this area are those whose registration of deaths has been accepted by the Bureau of the Census as being fairly complete (at least 90 per cent. of the total number of deaths), and from which transcripts of the death certificates recorded under the State laws or municipal ordinances were received by the Bureau of the Census.

The estimated population of the registration area in 1913 was 63,298,718. It has grown from sixtenths of 1 per cent. of the total land area of the United States in 1880 to 38.6 per cent. in 1913, and the proportion of the population living in it has increased from 17 per cent. in 1880 to 65.1 per cent. in 1913.

COMPARISON WITH FOREIGN COUNTRIES.

Comparative figures for foreign countries are not available for 1913, but in 1912 the only important countries or provinces having lower death rates than the United States were Norway (13.4 per 1,000), England and Wales (13.3), Denmark (13), the Province of Ontario (12.4), Holland (12.3), Australia (11.2), and New Zealand (8.9).

DEATH RATES OF STATES.

Following are the death rates per 1,000 population in 1913 for the States included within the registration area: California, 14.5; Colorado, 11.5; Connecticut, 15; Indiana, 13.3; Kentucky, 13.3; Maine, 15.3; Maryland, 16.2; Massachusetts, 15; Michigan, 13.9; Minnesota, 10.4; Missouri, 12.5; Montana, 12; New Hampshire, 17.1; New Jersey, 14.3; New York, 15; North Carolina (figures relate only to municipalities having a population of 1,000 or over in 1900), 16.8; Ohio, 13.8; Pennsylvania, 14.6; Rhode Island, 15; Utah, 11; Vermont, 15.8; Virginia, 13.9; Washington, 8.5; Wisconsin, 11.5.

The lowest death rate shown by any registration State was that for Washington (8.5 per 1,000), while New Hampshire's rate (17.1) was the highest. The fact that the average age of Washington's population is much lower than that of New Hampshire's doubtless constitutes the chief reason for this difference; and a like explanation holds good in many similar cases.

DEATH RATES FOR CITIES.

Following are the death rates per 1,000 population in 1913 for the 50 registration cities with populations of 100,000 or over in 1910. Separate figures for white and colored persons are given in parentheses for cities in which the colored population constituted 10 per cent. or more of the total in 1910:

Alabama—Birmingham, 17.4 (white, 12.3; colored, 25.2). California—Los Angeles, 15; Oakland, 12.5; San Francisco, 15.9. Colorado—Denver, 13.7. Connecticut—Bridgeport, 14.9; New Haven, 15.9. District of Columbia—Washington, 17.3 (white, 14.4; colored, 24.4). Georgia—Atlanta, 17.4 (white 13.5; colored, 25.2). Illinois—Chicago, 15.1. Indiana—Indianapolis, 15.7. Kentucky—Louisville, 16.2 (white, 14.3; colored, 24.8). Louisiana—New Orleans, 19.9 (white, 15.6; colored, 31.9). Maryland—Baltimore, 18.5 (white, 16.2; colored, 31). Massachusetts—Boston, 16.4; Cambridge, 13.5; Fall River, 17.2; Lowell, 15.9; Worcester, 15.8. Michigan—Detroit, 17.3; Grand Rapids, 13.3. Minnesota—Minneapolis, 11.6; St. Paul, 11. Missouri—Kansas City, 14.8; St. Louis, 14.9. Nebraska—Omaha, 13.9. New Jersey—Jersey City, 14.6; Newark, 14.4; Paterson, 13.5. New York—Albany, 19.8; Buffalo, 15.8; New York, 14.3; Rochester, 14.6, Syracuse, 15.7. Ohio—Cincinnati, 16.9; Cleveland, 14.2; Columbus, 15.3; Dayton, 16; Toledo, 16.2. Oregon—Portland, 9.5. Pennsylvania—Philadelphia, 15.7; Pittsburgh, 17.1; Scranton, 14.8. Rhode Island—Providence, 15.2. Tennessee—Memphis, 20.8 (white, 15.9; colored, 28.2); Nashville, 17.8 (white, 14.7; colored, 24). Virginia—Richmond, 20.4 (white, 16.7; colored, 26.8). Washington—Seattle, 8.4; Spokane, 8.9. Wisconsin—Milwaukee, 12.7.

The lowest rate shown by any of these cities was that for Seattle, Wash. (8.4), while the highest (20.8) was for Memphis, Tenn.

DEATH RATES IN CITIES HAVING LARGE COLORED POPULATIONS.

An interesting feature of the report is the presentation of a table showing comparative death rates for white and colored persons (including Indians, Chinese, and Japanese) in 67 cities in which the colored population constituted 10 per cent. or more of the total in 1910. In these 67 cities (including two in Kentucky and two in Maryland in which the colored population constituted less than 10 per cent. of the total), taken together, the death rate among the white in 1913 was 15.3 per 1,000, while among the colored population it was 26.8 The highest rate for the colored was 37.2, in Charleston, S. C., and the lowest was 8.5, in Coatesville, Pa.

By the aid of this table it is possible to make a much fairer comparison between the healthfulness of different cities, on the basis of the death rates among the whites alone, than could be made on the basis of general death rates. For example, Birmingham, Ala., in which the combined death rate for white and colored persons was 17.4 per 1,000—considerably above the average for large cities—shows a rate of only 12.3 for whites alone—a little less than that for Oakland, Cal., and considerably less than the rates for many other cities.

AVERAGE AGE AT DEATH.

The average age at death for both sexes, from all causes combined, was 39.8; for males alone, 39.2; for females alone, 40.6. The corresponding averages for 1912 were 40.6, 39.9, and 41.4. The report cautions the reader not to confuse the average age at death with expectation of life as given in life tables.

Nearly 18 per cent. of all deaths were of infants under 1 year of age, and more than 25 per cent. were of children under 5 years. After the first five years of age deaths are most frequent among persons between 70 and 74, inclusive. This applies to both sexes combined and to women alone, the deaths among these groups forming 6.56 per cent. and 6.88 per cent. respectively of the corresponding totals. For men alone, however, the period of greatest mortality is between the ages of 65 and 69, inclusive, the deaths during this period constituting 6.4 per cent. of the total for males.

FEWER DEATHS FROM TUBERCULOSIS.

The death rate from tuberculosis (all forms) declined from 149.5 per 100,000 population in 1912 to 147.6 in 1913. The rate from this cause shows a continuous, though irregular, decline from year to year since 1904.

The death rates from cerebral hemorrhage (apoplexy) and organic heart diseases and endocarditis also declined as compared with 1912, the former from 75.7 to 74.6 per 100,000 population, and the latter from 151.2 to 147.1. These rates, however, are higher than in most of the years between 1900 and 1912.

Although the rates for typhoid fever, scarlet fever, diphtheria and croup, pneumonia (all forms), and diarrhœa and enteritis (infants under 2 years) show increases as compared with 1912, there has been a general and pronounced decline in the rates from these causes since 1900.

DEATHS FROM CANCER INCREASING.

On the other hand, there has been an almost continuous increase from year to year since 1900 in the death rates from cancer, organic heart diseases and endocarditis, nephritis, and Bright's disease. The

MORTALITY STATISTICS FOR 1913—*Continued.*

most marked increase for any one of the most important 12 causes of death was that in the rate for cancer, which rose from 63 per 100,000 population in 1900 to 78.9 in 1913, and in only two cases did the rate for any year between 1900 and 1913 show a decrease as compared with the preceding year.

DEATHS FROM SUICIDES AND VIOLENCE.

There were 9,988 suicides in the registration area during the year 1913, the rate being 15.8 per 100,000 population— a slight decrease as compared with 1912, when the rate was 16.

In the registration area there were 58,578 deaths from violence (including homicide and legal execution but excluding suicide), corresponding to a death rate of 92.5 per 100,000 population. This rate shows a considerable increase as compared with that for 1912, which was 88.9.

DEATHS CAUSED BY AUTOMOBILES AND HORSES.

That the automobile, in spite of the rapidity with which it has come into general use, is still less deadly than the horse, might be inferred from the fact that the mortality incident to its operation was less in 1913 than that chargeable, directly and indirectly, to man's faithful but sometimes erratic friend. During the year the number of deaths resulting from automobile accidents and injuries was 2,488, while the number due to injuries and accidents caused by other vehicles (principally horse drawn) was 2,381, and the number caused by animals (principally horses) was 540. The corresponding figures for 1912 were 1,758, 2,221, and 543. A few fatalities caused by motorcycles and bicycles are included in those due to "other vehicles," and a small number chargeable to animals other than horses are comprised in those caused by animals; but, after making due allowance for these factors, there still remains a considerable "margin of safety" in favor of the automobile. Deaths due to railway accidents and injuries during the year numbered 8,212, and those resulting from street-car accidents and injuries, 1,998. The corresponding figures for 1912 were 8,209 and 1,832. For the first time the number of fatalities due to automobile accidents and injuries exceeds the number resulting from injuries caused by other vehicles and also exceeds the number due to street-car accidents.

PRINCIPAL CAUSES OF DEATH.

(From a bulletin issued by the Census Bureau April 20, 1915.)

More than one-half of all the deaths in the registration area—which in 1913 contained about 65 per cent. of the total population of the United States—were due to nine causes: Tuberculosis, heart diseases, pneumonia, Bright's disease and nephritis, diarrhœa and enteritis, cancer, apoplexy, diphtheria and croup, and typhoid fever. The first three of these maladies alone were responsible for more than 30 per cent. of the total mortality reported for that year. The death rate from these nine causes combined in 1913 was 810.4 per 100,000 population.

TUBERCULOSIS—Tuberculosis in its various forms claimed 93,421 victims in 1913, of which number 80,812 died from tuberculosis of the lungs (including acute miliary tuberculosis).

A comparison of the mortality among whites from tuberculosis of the lungs in urban and rural districts brings out a very considerable difference in favor of the latter, the rates in 1913 being 128.5 for cities of 10,000 and over, taken as a whole, and 100.8 for places of less than 10,000.

HEART DISEASES—The deaths from heart diseases (organic diseases of the heart and endocarditis) in the registration area in 1913 numbered 93,142, or 147.1 per 100,000. While the mortality rate for tuberculosis has been declining from year to year, the rate for heart diseases has been rising.

PNEUMONIA—Pneumonia in its various forms was the cause of 83,778 deaths, or 132.4 per 100,000, in the registration area during 1913. The mortality rate for pneumonia in 1913 was about 70 per cent. greater among the colored population than among the whites.

BRIGHT'S DISEASE AND NEPHRITIS—The only remaining death rate higher than 100 per 100,000 in 1913 was that for Bright's disease and "acute nephritis," 102.9. The total number of deaths due to these causes in 1913 was 65,106, about nine-tenths of which were caused by Bright's disease, the remainder being charged to acute nephritis, a related kidney disorder.

DIARRHŒA AND ENTERITIS—Diarrhœa and enteritis caused 57,080 deaths, or 90.2 per 100,000, in the registration area in 1913. Of these deaths, more than four-fifths were of infants under 2 years of age, and over two-thirds were of infants under 1 year.

The mortality from these causes fluctuated greatly between 1900 and 1913, but on the whole shows a material decline, having dropped from 133.2 per 100,000 in the earlier year to 90.2 in the later.

CANCER—Next in order of deadliness comes cancer, which filled nearly 50,000 graves in 1913. The exact number of deaths due to this dreaded malady was 49,928, of which about 40 per cent. resulted from cancers of the stomach and liver.

It is worthy of note that the colored population, for which the death rates from most causes are much higher than for the whites, shows a decidedly low rate for cancer—57.3 per 100,000 for the entire registration area in 1913, as compared with 80 for the whites.

APOPLEXY—Apoplexy was the cause of 47,220 deaths, or 74.6 per 100,000, in the registration area in 1913. This rate increased gradually, with occasional slight declines, from 67.5 per 100,000 in 1900 to 75.7 in 1912 but dropped slightly in 1913.

DIPHTHERIA AND CROUP—No epidemic disease produced a mortality rate as high as 20 per 100,000 in 1913. The fatal cases of diphtheria and croup numbered 11,920, or 18.8 per 100,000, in that year, the rate having fallen from 43.3 in 1900.

TYPHOID FEVER—Deaths from typhoid fever also showed a very gratifying decline between 1900 and 1913, decreasing from 35.9 per 100,000 in the earlier year to 17.9 in the later, or by almost exactly 50 per cent.

THE INSANE.

(From a bulletin issued by the Census Bureau, January 25, 1915. The report is based upon data relative to the insane in hospitals and asylums in 1910.)

MORE MEN INSANE THAN WOMEN.

On January 1, 1910, there were 98,695 males in institutions for the insane, as compared with 89,096 females, and during the year 1910 34,116 males were admitted, as compared with 26,653 females.

There were 208.5 male inmates of insane asylums to every 100,000 males in the total population, while the corresponding ratio of female inmates to total female population was 199.6 to 100,000. The males admitted during the year 1910 represented a ratio of 72.1, the females a ratio of 59.7. This means that in a typical community of 200,000 persons equally divided as to sex 208 of the males would be found in insane asylums and 200 of the females, and in the course of one year 72 males would be admitted to the asylums, as compared with 60 females.

The number of males in asylums for the insane has increased faster than the number of females. In 1880 the two sexes had, in fact, a nearly equal representation in these institutions, as the total number of inmates included 20,635 males and 20,307 females; but by 1910 the number of male inmates had increased to 98,695 and the number of female inmates to 89,096, so that the males outnumbered the females by a ratio of 111 to 100. The excess of males among the current admissions in 1910 was still greater—128 males to 100 females.

ONE REASON WHY.

Of peculiar interest in this connection is the table which distinguishes the cases diagnosed as alcoholic psychosis or general paralysis—mental diseases which, generally speaking, are the aftermath of vice and dissipation. Of the 34,116 males admitted to hospitals for the insane in 1910, 8,356, or about 25 per cent. of the total number, were reported as suffering from one or the other of these diseases, while the number of females having these diseases was only 1,851, representing about 7 per cent of the 26,653 females admitted. If from the total number of admissions the cases of alcoholic psychosis and general paralysis are deducted, the disparity between the sexes practically disappears. There are left of the total admissions 25,760 males as compared with 24,802 females, a slight excess of males, but not so great as naturally would result from the fact that there are more males than females in the general population.

The table following shows the number of admissions to hospitals for the insane in 1910:

	Males.	Females.
Total number admitted	34,116	26,653
Having general paralysis	2,989	895
Having alcoholic psychosis	5,220	902
Having both diseases	147	54
All other cases	25,760	24,802

COMPARISON BY AGE PERIODS.

The statistics give the number of insane of each sex admitted to hospitals in each age period per 100,000 persons of the same age and sex in the total population. The ratio of admissions increases with advancing years, reaching its maximum in extreme old age, when senile dementia marks the weakening of the mental faculties.

This does not mean that a majority of the admissions to institutions for the insane are old people. On the contrary, only about 10 per cent. of the insane admitted to hospitals were over 65 years of age, while about 57 per cent. were between 25 and 50 years of age; but in proportion to the total number of people in the same period of life the number of admissions is larger in old age than in middle life, and larger in middle life than in youth. In fact, very few young people are included in the admissions, and practically no children.

Throughout the entire life period the ratio of admissions for males is larger than that for the other sex. Upon eliminating the cases of alcoholic psychosis and general paralysis, the ratio for males still remains higher than that for females up to the age of 30 and above the age of 60, but is lower in the intervening years. This indicates, in other words, that when the cases of general paralysis and alcoholic psychosis are eliminated there are more cases of other forms of insanity among women than among men in the period of life from 30 to 60 years of age, but fewer in early life and in old age.

An increase of insanity is probably in some degree a natural consequence of the rapid growth of cities in the United States. Between 1880 and 1910 the proportion of the population of the United States living in urban communities increased about 190 per cent., while the rural population increased only about 40 per cent. As a result, 46 per cent. of the total population of the United States was urban in 1910, as compared with 30 per cent. in 1880. The percentage living in cities of over 100,000 inhabitants nearly doubled in the same interval, being 12.4 per cent. in 1880 and 22.1 per cent. in 1910.

THE FEEBLE-MINDED.

The number of feeble-minded in institutions on January 1, 1910, was 20,731; on January 1, 1905, the number was 15,318. The total number of feeble-minded in the United States has been estimated at not less than 150,000. Of the feeble-minded in institutions 47.2 per cent. were under twenty years of age and 76.4 per cent. were under thirty years of age.

MOTHER'S DAY.

SECOND SUNDAY IN MAY.

Its object—An all-nations' and simultaneous observance for the well-being and honor of the home.

How observed—Through some distinct act of kindness, visit, letter, gift or tribute, show remembrance of the Mother and Father to whom grateful affection is due. Mother's Day is equally a Father's Day, and is designed to deepen and perpetuate all family ties. The day is so-called because in most countries no national celebration is in special honor of the home and noble motherhood.

Its slogan—In honor of "The Best Mother Who Ever Lived" the mother of your heart. The badge is a white carnation. Time of observance is the second Sunday in May by churches of all creeds, etc. Schools celebrate on Friday, and business and other organizations on Saturday preceding second Sunday in May.

On May 10, 1913, a resolution passed the United States House of Representatives and the Senate commending Mother's Day for observance by the House and Senate, the President of the United States and his Cabinet and other heads of Government departments. In 1913 the Legislature of Nebraska made Mother's Day a State flag day in honor of the patriotism of Nebraska's true homes and mothers.

In 1914, Hon. J. Thomas Heflin, at the request of the founder of Mother's Day, Miss Anna Jarvis, introduced in the House of Representatives a joint resolution (which was agreed to) whereby the President of the United States should designate, through an annual proclamation, the second Sunday in May as Mother's Day, and "request the display of the American flag on all Government buildings, homes and other suitable places."

President Woodrow Wilson issued the first National Mother's Day proclamation on Saturday, May 9, 1914, asking that Sunday, May 10 (second Sunday in May, 1914), be observed as Mother's Day in accordance with the joint resolution of the House of Representatives. This official recognition of Congress of the Mother's Day Movement was the culmination of years of work to permanently establish a day for sons and daughters of all lands to honor their homes. The United States is the first nation of the world to give such a national, patriotic honor and tribute to its homes as "the fountain head of the State," and to its sons and daughters "for their work for the home, moral uplift and religion," for the good of the Government and humanity.

For several years it has been the custom of the Governor of almost every State in the Union to issue a Mother's Day proclamation, asking citizens, churches, homes, and organizations to enter into the spirit of the day. Former Governor Colquitt of Texas made it a practice to pardon a number of prisoners on Mother's Day.

MOTHER'S DAY INTERNATIONAL ASSOCIATION—This association was organized to promote and protect the celebration of Mother's Day and its work in the United States and foreign countries. Any son or daughter of any country is eligible to membership in the Mother's Day Association.

In the United States the association has among its honorary national officers President Wilson and ex-Presidents Roosevelt and Taft, and Governors, or other prominent citizens of the various States. Headquarters, 2031 N. 12th Street, Philadelphia, Pa.

FATHER'S DAY.

The State of Delaware in 1913 granted a charter to Charlotte K. Kirkbride and B. Carrie Sternberg and others for the celebration under the laws of that State of "Father's Day" on the first Sunday in June of each year. In accordance with the request of these incorporators, Representative J. Hampton Moore of Pennsylvania, on October 2, introduced a bill in Congress providing that: "The first Sunday in June in each and every year hereafter be designated as Father's Day, upon which, as an expression of sentiment corresponding to that of Mother's Day, the rose, irrespective of color, shall be regarded as the emblem."

VITALITY OF LAST CHILDREN.

The old belief, still common among the laity, that first-born children are endowed by nature with greater vitality and longevity than last-born, has induced Dr. Alfred Ploetz of Munich, Germany, to make an exhaustive study to ascertain if this were true. He compiled the returns from a very large number of families of the nobility, and his figures show, generally speaking, that the vitality of first to ninth-born children varied very little, but that from the tenth to the nineteenth-born the mortality was markedly greater. Dr. Ploetz's figures, published in the "Archiv für Rassen und Gesellschafts-Biologie," appeared in a recent issue of the Journal of Heredity of the American Genetic Association.

In the following table Dr. Ploetz has made groupings of first-born children, second-born, and so on, and it was his object to find out how many of these died before the fifth year. Order of birth, number of children, and per cent. died, as follows:

First-born	614	26.4	Fifth-born	311	26.0	Tenth to nineteenth-born	302	34.4
Second-born	539	24.9	Sixth-born	249	26.1			
Third-born	455	26.4	Seventh to ninth-born	463	26.3		3,319	26.7
Fourth-born	386	25.6						

WILLS.

A WILL OR TESTAMENT is a final disposition of a person's property, to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made *orally* by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the *presence* of the testator. The form of wording a will is immaterial as long as its intent is clear.

AGE at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Hawaiian Islands, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Washington, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia any one over 14 years, and in Louisiana any one over 16 years is competent to make a will. In Colorado persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personalty. WITNESSES—Most of the States require two witnesses, except in Connecticut (3), Maine (3), Massachusetts (3), New Hampshire (3), South Carolina (3), Vermont (3).

LEGISLATION OF NEW YORK IN 1915.

LIST OF THE MORE IMPORTANT LAWS PASSED BY THE NEW YORK STATE LEGISLATURE OF 1915.

THE Legislature of New York in 1915 in addition to passing laws passed an act providing for the submission to the people at the polls in 1915 a proposition to expend $27,000,000 in the further improvement of the Erie Canal, the Oswego Canal and the Champlain Canal.

The Legislature of 1915 also approved of a proposed amendment to the Constitution permitting women to vote and another amendment to the Constitution making the following provisions:

> In case any annual tax heretofore imposed for the payment of a debt authorized by vote of the people under the Constitution will, if continued, provide for the payment of the interest on such debt as it falls due and also the payment of the principal of such debt before it becomes due, the Legislature may amend the law by reducing the rate of such tax, provided that the same shall not be reduced below a sum sufficient to pay the interest on such debt as it falls due and also the principal of such debt when it becomes due.
>
> The Supreme Court shall have jurisdiction to direct the Comptroller or any officer of the State to impose a tax sufficient to comply with the provisions of this section for the protection of any sinking fund of the State.

Both of these proposed amendments to the Constitution were to be submitted to the voters at the Fall election of 1915.

The list of the more important laws passed by the Legislature of 1915 is as follows:

Chapter 1—Abolished the Board of Claims and re-established a Court of Claims, with three Judges, with terms of three, six and nine years respectively; and thereafter nine years each; and also authorized the temporary appointment of two additional Judges. The Court of Claims was granted all the powers of the former Board of Claims and also given jurisdiction over private claims against the State, and also any claim on the part of the State against a claimant.

Chapter 2—Authorized the payment of interest not to exceed 4½ per cent. on certain bonds of the State.

REVIEW OF LEGISLATION OF 1915.

(FROM REPORT PRESENTED AT THE MEETING OF THE AMERICAN BAR ASSOCIATION, AT SALT LAKE CITY, UTAH, AUGUST 17-19, 1915.)

At the regular 1915 session in forty-three States there were introduced in rough numbers 58,600 bills, and in the three sessions of the 63d Congress 29,400 bills. It appears from the table submitted with the report (Appendix B) that the legislative mill in forty States ground out of this mass of bills over 16,000 separate statutes. Of these, Governors vetoed more than 1,000, leaving in rough numbers 15,033 which became laws.

ADMINISTRATION OF JUSTICE.

Important practice acts were passed in Pennsylvania, Michigan, and Vermont The Pennsylvania act was draughted by a committee of the State Bar Association, while the Michigan and Vermont acts were the work of commissions appointed for that purpose. To simplify procedure and expedite the final determination of a case is the common purpose of these acts. None of them adopts the principles of code pleading, but each is a further modification or evolution of the modified common law systems which have always been in use in these States. The Michigan and Vermont acts abolish all the common law forms of action, except assumpsit, trespass, replevin, and ejectment (assumpsit and trespass being called contract and tort in Vermont) a step taken in Pennsylvania nearly thirty years ago. Both of these acts permit liberal amendments so that substantial sufficiency takes the place of technical nicety of form, and they also expressly provide that an action at law may be so amended or transferred as to become a bill in equity or vice versa. The Michigan act also adopts the practice long established in Pennsylvania that summary judgment may be rendered in contract actions on the plaintiff s affidavit of claim, unless the defendant files an affidavit of merits or defence. A somewhat similar provision applying to actions arising out of contract, whether in equity or at law, is found in Chapters 74 and 78 of the laws of West Virginia

The most notable feature of the Pennsylvania act, which applies to all actions in contract or tort, except actions for libel and slander, is its extension of the use of the affidavit of defence The act abolishes special pleadings and demurrers, extends the affidavit of defence (which has always been a characteristic and essential part of an action of assumpsit in Pennsylvania but never considered a pleading) to all actions, and confines the pleadings to the plaintiff's statement, the affidavit of defence, and, in cases in which a counter-claim or set-off has been pleaded, the plaintiff's reply thereto Mere general denials in an affidavit or reply are insufficient, and each party must answer specifically each allegation of fact the truth of which he does not admit Under the present practice in assumpsit it is very usual for judgment to be entered by the Prothonotary for want of an affidavit of defence or by the court for want of a sufficient affidavit; but, as recognized in the act, this practice will seldom be practicable in trespass, because the amount of the judgment can seldom be determined from the plaintiff's statement and provision is made that in such actions, on failure to file an affidavit of defence, the case shall be deemed to be at issue, but certain specified facts shall be taken to be admitted

The Michigan act also provides that where at the close of testimony a motion is made for a directed verdict and is denied, the trial court on motion, or the Appellate Court on appeal, may render in favor of the party lawfully entitled thereto a judgment notwithstanding the verdict. Chapter 31 of the Minnesota laws is very much to the same effect, and Chapter 133 of the Wyoming laws provides that where, upon a trial a case presents only questions of law, the Judge may direct the jury to render a verdict subject to the opinion of the court, and may at the same term set aside the verdict and direct judgment for either party with like effect and in like manner as if such direction had been given at the trial These acts, in connection with a Massachusetts act of which mention is about to be made, probably represent the most important single tendency in the legislation of the present year relating to the administration of justice.

The Michigan and Minnesota acts follow the practice which has been sustained by the courts of some six or seven States; but which was, by the vote of a single Judge, held unconstitutional as applied to the Federal Courts in Slocum *vs.* Insurance Company, 228 U. S. 364. The strong dissenting opinion of Justice Hughes, however, has aroused much favorable comment and it is notable that the Supreme Court of Massachusetts has, since this decision, unanimously upheld the constitutionality of this practice in Bothwell *vs.* Railway, 115 Mass. 467. Massachusetts has, however, gone even further and has added to its legislation a provision which, it is thought, will overcome the objection discovered by the majority of the Supreme Court. The only difficulty which the majority of the court found insuperable—the lack of a verdict of a jury—is probably met by the provisions of Chapter 185 of the Massachusetts laws to the effect that:

"When exceptions to any ruling or direction of a Judge shall be alleged, or any question of law shall be reserved, in the course of a trial by jury, and the circumstances shall be such that if the ruling or direction at the trial was wrong, the verdict or finding ought to have been entered for a different party or for larger or smaller damages or otherwise than as was done at the trial, the Judge may reserve leave, with the assent of the jury, so to enter the verdict or finding, if upon the question or questions of law so raised the court shall decide that it ought to have been so entered."

As this leave is reserved at the trial and by the consent of the jury, the verdict finally entered pursuant to the leave is the jury's verdict. This practice has already been followed in the United States District Court in that State. In so far as practice in the Federal Courts is concerned the Wyoming act is perhaps not so open to the objection sustained in the Supreme Court in the Slocum case as are the Michigan and Minnesota acts.

Another Michigan act prohibits setting aside a verdict or granting a new trial on account of mere technical errors, and a Montana act simplifies procedure on appeals to the Supreme Court.

The New Jersey "Chancery act of 1915" (Chapter 116) is probably the most important passed this year affecting equity practice. It is based largely upon the English rules under the judicature act and the new equity rules of the United States Supreme Court. The act is very short and probably its most important provision is that giving the Chancellor additional power to prescribe rules "to give effect to the provisions of this act, and otherwise to simplify procedure in the Court of Chancery. Such rules shall supersede (so far as they conflict with) statutory and other regulations heretofore existing."

Act No. 381 of the Pennsylvania laws makes a radical change in the theory of equity practice, although its practical effect may not be so great. The act provides that a suit in equity may be begun as in an action at law by summons without first filing a bill. It might be noted in this connection that, while a bill in equity may be served by any one, a summons must be served by the Sheriff.

Chapter 111 of the Massachusetts laws, relating to the dismissal of frivolous appeals, provides that whenever an appeal is claimed after the entry of a decree following a rescript from the full bench of the Supreme Judicial Court in equity or probate proceedings, the Justice by whose order the decree was entered may order the appeal dismissed if, in his opinion, the decree conforms to the terms of the rescript and the appeal is claimed for purposes of delay. If a further appeal is claimed from an order so dismissing an appeal it shall not operate to suspend or supersede the carrying into effect of the terms of the decree.

Of the acts relating to the service of process Montana provides that if none of the persons named in the act can be found within the State service of a summons against a corporation may be made upon the Secretary of State, who shall accept on behalf of the corporation. North Carolina authorizes the service of "subpœnas and summonses for jurors" by telephone.

A number of acts relate to trial of cases. Perhaps the most radical of these is in Pennsylvania, which authorizes in any action at law a written demand by

either party for a jury trial and further provides that if neither party files such a demand, he shall be deemed to forfeit "his right and the Court shall proceed to try the cause without a jury." A California act adds as new methods of waiving trial by jury in certain actions a failure to announce at a given time that a jury is required and a failure to deposit the jury fees. South Dakota provides for a verdict by five-sixths of a jury in civil cases.

Nebraska passed another radical act. It provides that every litigant shall be deemed to have excepted to any judgment, order, or other ruling made at any state of a case or proceeding, and material and prejudicial to his substantial rights, and that he shall not be required, in order to preserve his rights, to actually take or cause to be noted upon the record any such exception. This permission to raise objections not noticed at the trial seems to open the way to the multiplication of appeals. Less open to criticism is Chapter 245 in the same State, which provides that where an objection to the admission of testimony has been made once and overruled by the Court, it shall be unnecessary to repeat the same objection to further testimony of the same sort by the same witness in order to save the error, if any, in the ruling of the Court whereby such subsequent testimony is received.

Of acts relating to the competency of witnesses and the admissibility of evidence, Minnesota provides that abstracts of title duly certified by a bonded abstractor or by a Registrar of Deeds may be introduced in evidence in actions in which the title to land is in controversy. In this connection it might be noted that Montana makes it a misdemeanor to compile abstracts of title for compensation without first filing a bond for the protection of any person dealing with the abstractor. An Illinois act provides that the handwriting of a deceased or absent person may be proved by the comparison of specimens of such person's handwriting whether such specimens are relative to the issue or not.

Acts passed in Kansas, Missouri, and Oklahoma provide that a continuance shall be granted whenever a party or attorney is serving as a member of the Legislature; and the Oklahoma act even goes so far as to provide that a refusal to grant such a continuance shall constitute an error and entitle the party to a new trial as a matter of right. These acts are in marked contrast to the English practice, where such continuances are never granted. American courts have always been most lenient in the matter of continuances on the grounds of public engagements, and it would seem that the legislators have gone out of their way to provide for their own convenience at the expense of the speedy administration of justice.

The acts providing new remedies are not of great importance, but a few deserve mention. Nebraska creates a physician's lien against any party, except claimants under the Workmen's Compensation act. Montana provides for liens upon growing crops and grain for the price of seeds furnished for the production of such crops and for the compensation of threshermen. Utah amends the sections of the civil code relating to the specific performance of contracts so that such sections will also cover contracts in writing to sell or deliver personal property, securities, and other choses in action. New Jersey authorizes the garnishment of wages for debt where the wages amount to $18 a week. Ohio authorizes the attachment of the amount covered by an insurance policy for injury or damage to person or property or an execution of judgment for damages or injury to the person or property covered by the insurance.

A Missouri act provides that in an action for damages against joint tort-feasers the plaintiff may settle with and discharge and release from further liability any of the defendants without impairing his right to demand and collect the balance of the claim from the other joint tort-feasers. A provision in this act, that the defendants in such a judgment shall be subject to contribution and other consequences of such judgment in the same manner as defendants in a judgment founded on contract, is a radical departure from the generally accepted principles of law. The act gives a release a standing in a tort case which heretofore it had only had collaterally as an incident of covenant not to sue.

Massachusetts provides that a failure to comply with the laws relating to the regulation and equipment of motor vehicles shall not be a defence in actions of tort. This act is designed to protect the rights of innocent passengers in motor vehicles, and to remedy the situation created by a series of decisions to the effect that any person riding in an automobile, the operation of which did not in every respect comply with the law, was a trespasser on the public highways, and entitled only to the rights of a trespasser.

South Dakota provides that before any action for libel other than a libel of a female can be brought against a newspaper the plaintiff must give at least three days notice, and if the statements were published in good faith and a retraction is made, as prescribed by the act, punitive damages cannot be recovered.

Act No. 140 of the Vermont laws is an interesting example of an attempt to remedy a serious complaint that persons suffering damages done by floating lumber had been unable to get reasonable satisfaction in the hands of the courts. Jurisdiction of the assessment of such damages is transferred to the Public Service Commission, and the act provides that its finding shall be final and without appeal and shall be entered upon the court records as a judgment.

A curious and unnecessary statutory requirement is found in a Pennsylvania act (No. 138) which requires that in every county containing more than 40,000 persons who emigrated from Germany, or more than 40,000 persons who emigrated from Italy, or more than 40,000 Yiddish speaking persons who emigrated from Europe, legal notices required to be published in a newspaper in the English language, shall also be published in one German daily newspaper, and one Italian daily newspaper, and one Yiddish daily newspaper. An attack upon the constitutionality of this act has already been sustained in the lower courts.

The most important legislation affecting practice and procedure in probate matters is a Massachusetts act relating to proceedings in Probate Courts, and a Texas act relating to wills probated in another jurisdiction.

Massachusetts changes in many respects the proceedings in the Probate Courts and gives such courts jurisdiction as in equity of many rights and duties. Legacies may be recovered and claims may be enforced in the Probate Court in the same manner as under a decree in equity. An interesting feature of the act is that power is conferred upon the Supreme Court to fix by rule from time to time the rate of interest to be allowed upon pecuniary legacies.

Texas authorizes an executor under a foreign will to sell and convey without any further order from a court of that State real and personal property situated in the State when authorized to do so by the will, if such will has been properly probated in a court having jurisdiction thereof. This act, which also validates all such sales and conveyances heretofore made, is novel in its terms and should be warmly welcomed by the practicing lawyer who has often had occasion to realize the lack of interstate comity in this field of the law. A Delaware act, which provides that a will of a non-resident admitted to probate outside the State shall be admitted to probate in the State when a verified certified copy of the record of its filing has been recorded within the State, is also a step in this direction.

Utah provides that court orders for the sale of real property may allow such sale to be made on credit if in the opinion of the Court it is beneficial to the estate.

Kansas requires executors and administrators to make final settlement before the Probate Court within thirty days after the expiration of two years from their qualification under penalty of the assessment upon them of all costs connected with the settlement on a citation by the Court.

Chapter 383 of New Jersey, which authorized dispensing with publication and notice when the personal estate is not more than $500, is an example of a tendency to dispense with formalities in the case of small estates.

Acts were passed in North Dakota and Indiana relating to the transfer of prosecutions from one Judge to another. The Indiana act contains a novel provision, permitting the prosecuting attorney and the defendant to agree in open court upon some Judge or member of the bar of any court of the State, and compelling the Judge in such a case to appoint that person as Judge in the trial. But in the absence of an agreement, if the Judge on the bench is disqualified, or for any other reason unable to serve, the Court in five days shall nominate five competent and disinterested persons, each a Judge or member of

the bar, the Prosecutor and the defendant may each strike off two names from the list presented by the Court, and the remaining nominee shall serve as Judge.

Several interesting acts were passed relating to the rights of defendants and accused persons. Chapter 124 of the North Carolina laws makes it a misdemeanor for any officer to require any person charged with a criminal offence to appear in court for trial in any other apparel than ordinary civilian's dress or with head shaved or cropped, unless so shaved or cropped while the person was serving a term of imprisonment for the commission of a crime. Chapter 157 of the Nevada laws adds to the law, making a defendant in a criminal case a competent witness for himself, a proviso to the effect that no special instruction shall be given relating exclusively to the testimony of the defendant or particularly directing the attention of the jury to the defendant's testimony. An Ohio act makes it a misdemeanor for any one having the custody of a person suspected or accused of a crime to refuse to permit such person to consult privately at any reasonable hour with an attorney-at-law for the purpose of enabling such person to employ such attorney, or with an attorney employed by such person. Chapter 96 of the New Hampshire laws amends the Juvenile Court act so as to prohibit publication even of the names of juvenile offenders, publication of proceedings having already been prohibited

Act No. 214 of the Pennsylvania laws requires Magistrates, upon the preliminary hearing of a person charged with any but the most serious crimes and misdemeanors, to hear on his demand the accused or witnesses in his behalf. The acknowledged purpose of this latter act is to give persons arrested on charges of a sort which are very apt to be dropped at a later date an opportunity to get their side of the story into the newspapers at the same time as the original publication of the charges brought against them.

The death penalty was abolished in North Dakota, Oregon, and South Dakota, except that under the North Dakota act a person convicted of murder in the first degree, while under a life sentence for the same crime, may be punished by death. The North Dakota act, which provides that the punishment for murder in the first degree shall be life imprisonment also provides that no person shall be eligible to pardon, except in cases in which the Pardon Board is satisfied of his innocence, until he shall have been confined in the penitentiary for 50% of the time of his life expectancy as based on the Carlisle tables of mortality. Chapter 65 of the New Hampshire laws provides that if a jury finds a defendant guilty of murder in the first degree the punishment shall be life imprisonment unless the jury adds the words "with capital punishment." If the defendant pleads guilty of murder in the first degree the Court may impose a sentence of imprisonment for life or submit to a jury the question whether it shall be imprisonment for life or capital punishment. Chapter 87 of the laws of Wyoming authorizes the jury in cases involving capital punishment to qualify their verdict by adding thereto "without capital punishment," and an Arkansas act gives the jury a similar discretion.

Chapter 339 of the Kansas laws provides that no defendant acquitted on the ground of insanity shall be liberated except on an order of the State Board of Correction that he is wholly restored to his right mind and that no one will be injured by his discharge. Laws providing for indeterminate sentences were passed in New York and Montana, and the New York act and Chapter 1156 of the Rhode Island laws also provide for the parole of prisoners. An advisory pardon board to assist the Governor at his request was established in California. The Kansas act makes it a misdemeanor to expose or threaten to expose a paroled or discharged prisoner as such in order to extort money or prevent his obtaining employment.

Chapter 93 of the New Jersey laws, an act recommended by the State Bar Association, creates a Council of Judicial Procedure, consisting of the Chancellor and one Vice-Chancellor named by him, the Chief Justice and one Associate Justice named by the Supreme Court, the Attorney-General and three counsellors-at-law designated by the Governor. It is the duty of the council to consider the operation of and defects in the statutes and rules of court relating to judicial procedure and report thereon to the Governor and the Legislature, and, at least once in every two years, to recommend any amendments, additions or alterations which in their judgment are expedient.

A Michigan act to expedite judicial administration which provides for the election of a Presiding Circuit Judge to apportion the work of each circuit and assign the Judges where needed, and a Missouri act, which makes the Judges of each Circuit Court a commission for their respective court to select the opinions to be published in the official reports of the State and to supervise the preparation of the syllabi of those opinions, seem commendable steps in the right direction. A Nebraska act relieves the Supreme Court from writing opinions except in cases involving new points of law or those which are reversed.

Chapter 284 of the New York laws amends the New York City Charter by abolishing the office of Coroner and creating in its place that of Chief Medical Examiner. The New York Industrial Commission act also makes an interesting change in the jurisdiction of the courts and one which is in accord with the most advanced ideas in the field of labor legislation. This act provides that the question of the validity of any provision of the labor laws or of any rules or orders made thereunder cannot be raised as a defence but can only be tested in a special action for that purpose to be brought in the Supreme Court, and in the case of rules and orders such an action can only be brought after petition and hearing before the Industrial Commission, thus making available for the courts a full investigation of the matters involved.

A Nebraska act shows another phase of the effort to improve the methods of the administration of justice. This act creates in counties having a population of 100,000 or more the office of Public Defender to defend all persons charged with any offence which is capital or punishable by imprisonment in the penitentiary and who are unable to procure counsel. The limitations provided in this act suggest the question whether, as has already been brought out in the report of at least one public defender, there is not even greater need of such an office for the defence of those charged with petty offences.

Massachusetts is one of the States in which the rules governing the admission of attorneys are largely controlled by legislation. The law authorizes the Board of Bar Examiners to make rules, but these are sometimes changed by the Legislature, and this year, in answer to the new rules of the examiners requiring all applicants to take a preliminary examination of a general character, the Legislature has enacted that an applicant who is a college graduate or who has complied with the requirements of a day or evening high school or school of equal grade shall not be required to take an examination as to his general education. This act is regarded in some quarters as an unfortunate interference with the endeavor of the board to raise the standard for admission to the bar. Along somewhat the same lines is Chapter 18 of the Montana laws, which provides that a diploma from the department of law of the State university shall entitle the holder to a license to practise law without further examination.

An interesting bit of special legislation relating to the same subject is found in Chapter 77 of the laws of Tennessee which removes the disability of infancy of Miss R. F. so as to permit her to practise law before she reaches the age of 21.

Act No. 154 of the Pennsylvania laws, which gives an attorney a lien for compensation for services upon his client's cause of action and attaching to any award, order, report, decision, compromise, settlement, verdict or judgment in the client's favor and the proceeds thereof in whosoever's hands the same may be, has been severely criticised in the report of the Committee of Legislation of the Law Association of Philadelphia. In the absence of provisions for supervisory control by the Court over the amount of the fee it subjects clients to disadvantages at the hands of certain classes of practitioners and it also tends to put the relation of attorney and client on a business basis and to obscure and weaken the relationship as one of confidence and trust.

Among the acts relating to the conduct of attorneys are No. 393 of the laws of Pennsylvania, which makes it a misdemeanor for attorneys to receive compensation for insurance sold to or solicited from clients and in some instances fellow-attorneys; Chapter 63 of the laws of Oregon, which makes it a misdemeanor for attorneys or other persons to in any way advertise for business in divorce matters; and Chapter

259 of the laws of Oregon, which provides that a member of the bar shall be disbarred whenever it appears that his conduct has been such that if he were applying for admission his application should be denied. A Missouri act (p. 99) which prohibits the practice of law without a license and provides that no association or corporation may secure such a license defines law business as the advising or counseling for a valuable consideration of any person, firm, association or corporation as to any secular law or the drawing or the procuring of or assisting in the drawing for a valuable consideration of any paper, document or instrument affecting or relating to secular rights or the doing of any act for a valuable consideration in a representative capacity.

EDUCATION.

Compulsory education laws were passed in Texas and in Florida and South Carolina.

A State bureau of vocational education was created in Pennsylvania and Nebraska and Vermont provided for the establishment of vocational schools.

Kansas created a State department of education and California authorized the State board to determine the course of study in high schools and to withhold State subsidy from high schools whose courses were not approved by the board.

Illinois appropriated $5,000,000 for its State university. This is probably the largest sum ever appropriated in one year to a single institution of higher learning in this country. Texas proposed a constitutional amendment authorizing the creation of a students' loan fund, authorizing counties to lend money to students to complete their education.

ELECTIONS.

QUALIFICATIONS OF ELECTORS.

Constitutional amendments authorizing woman suffrage were proposed in Massachusetts, New Jersey, New York, Pennsylvania, South Dakota, and West Virginia. The Massachusetts resolution expressly authorizes women to be members of committees to favor or oppose this amendment, thereby removing all doubt of their right so to serve under the Corrupt Practices act.

A constitutional amendment requiring a property qualification for electors on propositions to incur public debt is proposed in Washington.

The voter who changes his residence within fifteen days prior to election day in Vermont may vote in the town from which he so removes. Connecticut authorizes a voter to retain for six months for the purpose of voting a residence in a town from which he removes, and meanwhile he is regarded as a resident of the town to which he removes for the purpose of becoming a voter there. A similar provision is contained in California.

Qualified voters absent from their residential precincts are authorized to vote elsewhere in the State in Colorado, Michigan, Montana, and Washington. Texas proposes a constitutional amendment authorizing absentee voting for State officers or on referendum, and Massachusetts calls for a report from the Attorney-General and the Secretary of the Commonwealth on the feasibility and desirability of legislation permitting absentee voting.

ELECTION OF UNITED STATES SENATOR.

An act of Congress requires United States Senators to be elected at regular elections for Congress next preceding the expiration of a Senator's term and makes temporary provision for nominations and elections until the State Legislatures provide therefor. Legislation providing for the election of United States Senators was enacted in many of the States.

NON-PARTISAN ELECTION OF JUDGES.

Separate ballots for judicial candidates in cities of 200,000 are required in Illinois and Wyoming. These acts provide that Judges shall be nominated regardless of political affiliation on "judicial ballots" at the general primary.

PARTY ORGANIZATION AND ELECTIONS.

Party committees of all kinds are to be elected by popular vote in Indiana. A State central committee composed of district chairmen from each Congressional district is vested with the administrative power under the law. This law also provides that candidates for all offices except State offices and Presidential electors are to be chosen by direct primary, but preferential vote for candidates for President, Vice-President, United States Senator, and Governor is authorized.

West Virginia provides for nomination by direct primary of State and county executive committees, delegates to National conventions and all candidates for office except specified judicial offices, Presidential candidates and electors, and officers in small cities.

A new Primary act in South Dakota repealed the Richards Primary law, initiated and enacted by the people in 1913, and restored the 1909 law with amendments. The proponents of the Richards law are expected to ask the courts to pass on the power of the Legislature to repeal the initiated measure.

California enacted a new Direct Primary law. Oregon provided for the election of delegates to National conventions, nomination of Presidential electors, and for expression of choice of candidates for President and Vice-President.

Washington regulates party committees, conventions, etc., and gives a place on the official ballot to any political organization which polled 10% of the vote at the previous general election and which has held a State convention prior to July 10 and declared its political principles and legislative programme.

Vermont enacted a Primary law with a curious referendum provision. If the act is approved by the people it takes effect 1916, and if rejected it takes effect 1927.

Kansas provides as an alternative for nomination by petition a system for individual declaration of intention to become a candidate. At the time of making his declaration the prospective candidate must pay an "entry fee." For United States Senator, State offices, and certain listed offices the entry fee is 1% of one year's salary. For the minor offices the entry fee runs as low as 50 cents.

Campaign expenditures of any party for a single campaign are limited to $15,000 in Nevada. Kansas limits a candidate's expenditures, exclusive of travel expense, to 10% of the office salary for the first year, with a minimum of $50. This act requires candidates owning newspapers to take into account "all personal references at the same rate as charged other candidates." Kansas prohibits any candidate or organization to provide conveyances to take voters to the polls.

INITIATIVE, REFERENDUM, AND RECALL.

Constitutional amendments authorizing the initiative and referendum were proposed in Minnesota and North Dakota.

For the purpose of preventing fraudulent petitions setting in motion the initiative, referendum, and recall Washington requires that such petitions shall contain a warning against signing by persons not legal voters or by other than their true names, and requires a detailed certificate by the precinct registration officer that all the signers identify themselves and *sign in his presence at his office*. This bill was bitterly opposed by the radicals in the Legislature.

California penalizes frauds in connection with initiative, referendum, or recall petitions and makes it a felony punishable by one to fifteen years' imprisonment to subscribe a fictitious name or the name of another to such petitions.

Nevada provides for referendum on local and special legislation to the voters of the county affected. Laws so adopted are to remain in force until repealed by direct vote of the county.

Improvement in the form of initiated bills is provided for in California, which requires the legislative counsel to co-operate in the preparation of such measures on request of twenty-five electors, and which requires the Attorney-General to prepare a title and summary for initiated measures.

REVISION AND AMENDMENT OF STATE CONSTITUTIONS.

The question of calling a constitutional convention was submitted to the voters in New Hampshire, South Dakota, and Tennessee. If authorized, the New Hampshire convention will meet in 1918, and the Tennessee convention November 15, 1916. Tennessee also provides that amendments recommended by the convention shall be submitted separately.

At the regular session in New Jersey an amendment revising the article describing the method of amending the Constitution was submitted, but at a special session this act was repealed and in its place a detailed amendment (Chapter 2) describing procedure for submission of proposed amendments was enacted.

A large number of specific amendments were pro-

posed in various States. These are noted in connection with the legislation dealing with the subject matters to which they refer.

UNIFORM STATE LAWS.

Bills recommended by the Conference of Commissioners on Uniform State Laws were passed as follows:

Uniform Warehouse Receipts Act—Oklahoma, Idaho (Chapter 31), Arkansas.

Uniform Bills of Lading Act—Vermont, Idaho (Chapter 16).

Uniform Desertion and Non-Support Act—Vermont (Chapter 101).

Uniform Workmen's Compensation Act—With slight modifications, Vermont (Chapter 164).

Uniform Partnership Act—Pennsylvania, Wisconsin.

Uniform Sales Act—Pennsylvania, Nevada.

Uniform Probate of Wills Act—Nevada.

Uniform Acknowledgment of Deeds Act—Wisconsin.

Uniform Marriage Act—Wisconsin.

In addition to these uniform bills several model bills recommended by various organizations were enacted, *e. g.*, the Blue Sky law, drafted by a conference of State Attorney-Generals; the Mobile Fraternal Insurance bill and the Uniform Mutual Insurance act. All of these are included in this review under the subject matter to which they relate.

TAXATION.

From its very nature most tax legislation is of merely local interest. Only a few acts are of general interest.

The most evident tendency in tax legislation is toward the centralization in a State board of general control and supervision over the assessment and collection of all taxes, including the property tax.

Among the more important of the laws imposing taxes might be mentioned two Oklahoma acts providing for an inheritance tax and a graduated income tax respectively, the Kansas and South Dakota acts imposing inheritance taxes, the Connecticut, South Dakota, and West Virginia acts, all of which provide complete systems of corporate taxation, and the Massachusetts and Pennsylvania acts which impose stock transfer taxes. A Pennsylvania act, which is of some importance, inasmuch as its effect will be felt beyond the boundaries of the State enacting it, imposes upon every ton of anthracite coal a tax of 2½% of its value when prepared for the market. Most of the important legislation enacted at the special session of the Virginia Legislature this year relates to taxation and constitutes a revision of practically all the tax laws of the State.

The most important constitutional amendment relating to this subject which was proposed this year is the Massachusetts resolve which would authorize the Legislature to impose and levy a tax on incomes which may be graduated according to whether the income is derived from property or not, or according to the class of property from which it is derived, and permit the exemption from taxation of any property the income from which is taxed. A special investigating commission was also created to recommend changes in the tax laws generally and to draft laws in anticipation of the adoption of this amendment.

Special commissions to study taxation and report at the next session were created in California, Indiana, and New York.

For a discussion of acts of Congress relating to taxation see the report of the committee.

MILITARY AND NAVAL AFFAIRS.

Acts of Congress provide for the raising organizing, and maintenance of a volunteer army in time of actual or threatened war and for the organization of an aviation section of the Signal Corps.

A State National Guard Reserve is created in New York, which provides that officers and enlisted men who have served in the regular army or navy or in any State militia may be commissioned or enrolled on the reserve list, from which they may be arbitrarily ordered into active service. Massachusetts created a special board to report on the practicability of providing military education for boys and of creating a military reserve.

Acts of Congress created a Chief of Naval Operations, charged with operations of the fleet and with preparation and readiness of plans for its use in war; provided for the organization of a naval militia; created a naval reserve consisting of citizens honorably discharged from the Navy, who are to receive compensation not exceeding $100 a year when not actively employed in the Navy and to perform in times of peace not less than one month nor more than two months' service on board a naval vessel; combined the Life-Saving Service and Revenue Cutter Service into a Coast Guard under the Treasury in time of peace and under the Navy in time of war; and conferred the title of Admiral on the Commanders-in-Chief of the Atlantic, Pacific, and Asiatic fleets.

A Pennsylvania act reorganized the National Guard to conform as far as practicable to the requirements of the organized militia under the laws of the United States.

CONSERVATION.

In Indiana four voluminous acts one of which is a general act and the other three of which apply to the cities of Fort Wayne, Indianapolis, and Peru, provide for the straightening, widening, and deepening of streams and water courses, the enlargement of dikes and levees and the construction of other improvements necessary to prevent such destruction from floods as the State has experienced in the past. A detailed act for the organization and administration of levee and improvement districts to prevent overflow was also passed in Texas.

New York passed an important act looking to the construction of storage reservoirs to regulate the flow of rivers largely for the purpose of creating water power. The act provides for the formation of districts which must include the whole watershed of a river or of a tributary, and while the affairs of each district are to be managed by a local board, the whole system is placed under the supervision of the State authorities. The expense of construction and maintenance is to be assessed according to benefits, but provision is also made for the issuance of bonds. In Vermont a commission was created to investigate and report upon the advisability of State storage reservoirs for water power and flood prevention purposes, and in New Hampshire the Governor was authorized to investigate available water power in the State and to co-operate with the geological survey.

Comprehensive irrigation laws were passed in Oklahoma and California providing in detail for the organization and administration of irrigation districts, and the scope of the California act also includes water power.

In Utah a commission to investigate the subject of irrigation and water rights was created, and the California Legislature memorialized the Federal Government to adopt a fixed policy regarding the development of oil lands. The resolution recites that the development of the oil business in that State is hampered by the existing condition of Federal law and regulation.

LIQUOR LAWS—PROHIBITION.

Constitutional amendments to establish Statewide prohibition were proposed by laws enacted in Colorado, Idaho, and South Dakota. The manufacture or sale of intoxicating liquors was prohibited in Arkansas, Colorado, Idaho, Oregon, and Washington. In the latter State the law adopted was an initiated measure. Prohibition acts were referred to the voters in Montana and South Carolina, and Local Option laws were passed in Minnesota and South Dakota.

Alabama forbade advertisements of the manufacture or sale of liquor, and also in furtherance of the Webb-Kenyon act prohibited their shipment into the State.

Kansas made owners of premises where liquors are sold liable for damages caused by intoxicated persons who obtain liquor on such premises, such damages to be a lien on the premises as soon as suit is filed. In the same State cities are made liable for damages caused by intoxicated persons, but good faith on the part of State officers in the enforcement of liquor laws or lack of knowledge of the sale of liquor is a good defence.

HEALTH AND SANITATION.

A State Department of Health under control of a Commissioner and a "public health council" composed of physicians of five years' practice is created in West Virginia and given wide powers, including power to prosecute for violations if the Prosecuting Attorney fails to act, and to apply to the courts for injunctions.

Provision for the collection of vital statistics is contained in laws passed in Illinois and California.

A number of laws having for their object the control of communicable diseases were passed. Physicians are required to report venereal diseases in Connecticut and Vermont. The Vermont act also punishes severely any person suffering from such diseases who marries. An Ohio act (§1275 Code), while making wilful betrayal by a physician of a professional secret such unprofessional conduct as to justify a refusal of a license, expressly provides that a physician who informs a party to a contemplated marriage of the fact that the other party is suffering from such a disease is not to be deemed guilty of betrayal of a professional secret and shall not be liable in damages.

To prevent the spread of tuberculosis Indiana enacted an important law requiring physicians to report cases to a State board, and county health authorities to report monthly the condition of such cases. Premises occupied by tubercular persons must be disinfected on their removal.

A New Hampshire law provides that any person believing that a member of his family has any one of listed diseases shall, if no physician be in attendance, immediately notify the local Board of Health.

The sale or transfer of narcotic or habit-forming drugs is regulated and restricted in Colorado, Idaho, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Jersey, South Dakota, Utah, and Vermont.

Regulations of the professions dealing with the health of persons are contained in a number of acts. Massachusetts adds to the qualifications of physicians "the degree of doctor of medicine or its equivalent from a legally chartered medical school," and requires for dentists "a diploma from the faculty of a reputable dental college as defined by this act." The practice of dentistry is also regulated by acts passed in Arkansas, California, and New Jersey.

Chiropractics are regulated and provision made for licensing in Nebraska, North Dakota, and Oregon. A New Jersey act aims at the prohibition of chiropractics.

The practice of optometry is regulated by Minnesota, Tennessee, and Utah.

Nursing is regulated by Connecticut, Colorado, Maine, Ohio, and Tennessee.

Physicians and surgeons are forbidden to split fees except with the full knowledge of the patient by a Kansas act.

Chiropody is regulated by Connecticut, which forbids the use of "doctor" by chiropodists.

The common drinking cup and towel are banished from public places by Rhode Island, New Hampshire, and Pennsylvania. Sterilization of dishes used in public eating houses "in hot boiling water changed every two hours" is required in Texas. Pennsylvania prohibits the employment in hotels and public eating places of persons suffering from specified diseases. A similar rule for laundries, and detailed sanitary regulations for canning factories, were enacted in Delaware.

The manufacture and sale of mattresses and bedding are regulated in the interest of public health by Massachusetts, Colorado, California, Connecticut, Montana, and Oregon. These laws follow a model bill on this subject previously enacted in other States. It is evidently one of those bills prepared and advocated by some organized group.

The bill regulating the size of sheets in hotels and lodging houses, often cited by critics of legislation as a ridiculous instance of detailed legislation, was adopted this year in Indiana. Despite the undesirability of clogging our statute books with such details, the enactment of desirable sanitary rules will be an important duty of the Legislature until adequate power to make and enforce detailed rules of this sort is delegated to our administrative officials. Such delegations tend to increase in number and importance, and the courts are growing more lenient in dealing with their constitutionality under the rule that delegations of legislative power are void.

PURE FOOD LAWS.

A large number of this year's statutes deal with regulations enacted to secure the public against impure and adulterated foods. Necessarily, only a few of these can be mentioned here.

The ingredients which may be used in bread sold by the loaf are designated in Massachusetts, and it is required that the presence of other materials, if any, be stated on a label.

California enacted an interesting law requiring the marking of wrappers or containers of butter and eggs imported into the State from outside the United States and the display of a sign by persons selling such butter.

Similarly Oregon and Washington require the classification and branding of eggs as "storage," "preserved," or "foreign," and require hotels and public houses using "foreign" eggs to display conspicuously a sign "we use foreign eggs."

Conspicuous marking of cold-storage eggs is required in Rhode Island and Minnesota. The latter act makes it a misdemeanor to sell or advertise cold-storage eggs without informing a prospective purchaser that they are cold storage.

Pasteurization of milk is required in New Jersey and in California unless the cows have passed the tuberculin test.

SOCIAL LEGISLATION.

Pensions to widowed, divorced or abandoned mothers to enable them to provide for dependent children in their own homes are provided for in Nebraska, Wyoming, Washington, Montana, Oklahoma, North Dakota, South Dakota, New Hampshire, Tennessee, and Nevada.

New York (Chapter 288) provides for the organization of county boards of child welfare to grant allowances to widowed mothers with one or more children. Detail provision is made for the organization of the board and for its procedure in securing and distributing the public funds, but there is no compulsion on county fiscal authorities to provide funds. Commissions to investigate and report to the next Legislature were authorized in Florida and in Indiana.

Regulations for the treatment of newly born infants' eyes in the interest of conserving eyesight are prescribed in New Hampshire, California, Illinois, and Nebraska. Indiana established an industrial board to aid the blind, and Maine and New Hampshire provide for financial assistance to needy blind not inmates of institutions. Missouri proposed a constitutional amendment authorizing pensions to blind persons.

A commission to investigate the condition of the feeble-minded was created in Utah, and a comprehensive measure for their relief was enacted in Illinois. Nebraska required sterilization before their parole or discharge from State institutions.

California provides for an unpaid county board of public welfare with power to investigate charitable institutions and jails. The board must be appointed on petition of 100 electors.

Pennsylvania passed a Housing act for Philadelphia, while New York repealed a comprehensive Second-Class Cities Housing act which, though passed two years ago, had never been in force because of legislative postponement of the time of its taking effect. Massachusetts prohibited "sleeping compartments built on the cubical plan" in lodging houses.

Regulations in the interest of more effective control of disorderly houses through power to enjoin or abate them as moral nuisances were passed in Idaho, Michigan, Colorado, and Indiana.

Money lenders are required to be licensed by Ohio where more than 8% per annum is charged. This act also limits the maximum charge, including interest, to 3% per month. Nebraska limits maximum interest to 10%. A Pennsylvania act, after a long preamble reciting the evils of the business, regulates the lending of money in sums of less than $300. Similar "Loan Shark" acts were passed in Michigan, Oregon, and Texas.

Provision for the trial of juvenile delinquents in juvenile courts is made in South Dakota, California, Rhode Island, and West Virginia. West Virginia also authorizes courts to suspend sentence of minors found guilty of non-capital offences and to parole them. Tennessee provides that children convicted of crime shall not be declared infamous within the operation of statutes relating to infamous crimes. Maine authorizes the commitment of delinquent children to correctional institutions or to individuals willing to support them.

LABOR LEGISLATION—ADMINISTRATIVE ORGANIZATION.

Connecticut consolidated the Bureau of Labor Statistics and the office of Factory Inspector in a Department of Labor and Factory Inspection.

Nevada created an industrial commission for the

administration of the Workmen's Compensation act and provided that one of the Commissioners should hold the office of Labor Commissioner for the enforcement of the Labor laws.

New York consolidated the Workmen's Compensation Commission and the Labor Department under an Industrial Commission. The provisions of this act are confined to administrative organization and procedure for the enforcement of the Labor laws and the Compensation law. Particular powers are given to the commission to make rules and regulations, to vary in cases of hardship statutory provisions and to hear and determine in the first instance all cases involving validity of the labor statutes or the rules and orders made by the commission. The Compensation Commission prior to the enactment of this law had power to hear and determine compensation claims subject to limited appeal to the courts. This law extends the power to the whole field covered by the State Labor laws. The commission's decision is subject to court review on appeal within thirty days. Failure to bring a question of validity of the law or the commission's orders before the commission or to appeal from its decision waives the right to raise the question of validity in a prosecution for violation. In general, the act is in accord with laws in Wisconsin, Ohio, and a few other States which have created industrial commissions with powers similar to those exercised by public utility commissions.

HOURS AND WAGES.

Six o'clock closing in all mercantile and commercial houses, except six days preceding Christmas, is required in Utah.

The nine-hour day and the fifty-four-hour week for women and children is required in Arkansas, Maine, Nebraska, Oklahoma, and Texas. The limit is made ten hours a day and fifty-six hours a week in Wyoming. The fight of the canning industries to escape the restrictions of limited hours for women and children resulted in the exemption of these industries in Tennessee, and they are also exempted from the Maine act.

Wages in private employments are required to be paid semi-monthly on regular pay days in money or checks, California. Corporations are required to pay wages semi-monthly in Kansas and weekly in Maine. Railroads are required to pay semi-monthly in Iowa and North Carolina, and public service corporations semi-monthly in Minnesota.

South Carolina makes it a misdemeanor to acquire at less than par trade checks given in payment of wages and provides that there shall be no right to collect or enforce checks so acquired.

Assignment of the wages of a head of a family is rendered void in Nebraska unless executed and acknowledged by husband and wife as in the case of real estate conveyances.

The Minimum Wage law for women was amended in California and a new law enacted in Arkansas. A commission to investigate the wages of women and minors and report on the advisability of establishing a minimum wage board was created in Idaho. An important act relating to hours and wages of women was enacted in Kansas. After declaring that "the State of Kansas exercising herewith its police and sovereign power declares that inadequate wages, long continued hours, and unsanitary conditions of labor exercise a pernicious effect on the health and welfare of women, learners and apprentices and minors," the act creates an industrial welfare commission and makes it unlawful to employ women or minors under conditions detrimental to their health or welfare or at wages not adequate for their maintenance or for more hours than is consistent with their health and welfare. The commission may make investigations and establish wage, hour, or sanitary boards whose recommendations, when approved by the commission, become binding on all employers in the occupations affected.

CHILD LABOR.

Delaware created a labor commission with power to supervise and investigate the employment of children and women.

Child labor acts prohibiting employment of children under 14 except in specified cases and limiting the employments in which or the circumstances under which children over 14, but under 16 (in Wyoming 18) may be employed, were passed in Alabama, Iowa, Maine, Pennsylvania, and Wyoming. Under the Pennsylvania act children between 14 and 16 are not to be employed more than 9 hours a day or 51 hours a week, and each such child must attend a vocational school at least 8 hours per week, to be deducted from the 51 hours.

SAFETY AND SANITATION.

First aid rooms or emergency kits in all manufacturing establishments where machinery is used is required in Connecticut, and in Massachusetts manufacturers are required to provide such accommodation for first aid as a State board prescribes. Executive officers of corporate employers are made personally liable for failure to comply with the Connecticut act.

Pure drinking water for employés is required to be furnished by their employers in California. Detailed provisions regulating heating, lighting and ventilating factories and guarding machinery therein were enacted in Illinois and similar provision regulating work in coal and zinc mines in Missouri. The latter act also requires employers to furnish wash-rooms and provides that a separate room be maintained for negroes. South Carolina also requires complete separation of different races laboring in textile manufactories.

HIRING AND DISCHARGING OF EMPLOYES.

A New York law prohibiting employment of aliens on public works was amended so as to give citizens a preference over aliens, but authorizing the employment of aliens where citizens are not available. This legislation was brought about by the necessity of employing foreigners on extensive subway construction in New York City.

Any person authorized to hire or direct others is forbidden to receive any fee or gift as a condition of giving or continuing employment to any workman under penalty of punishment for misdemeanor, in California and Nevada.

Corporations are forbidden to dismiss an employé on the statement of a "spotter" without a hearing, in California, and a similar act applying to employers generally was enacted in Nevada.

A black list act in Indiana provides that employés discharged or quitting are entitled on request to a letter from their former employer "setting forth the nature and character of the service rendered and the duration of employment and stating the cause for dismissal or quitting of the service" in all cases where written recommendations or written application showing qualifications or experience were required by such employer. Refusal to give the letter is made a misdemeanor. The same Indiana act and similar acts penalize failure to pay wages of discharged employés within a specified time in Minnesota, South Carolina and Texas.

Employers are forbidden to make a rule prohibiting employés from engaging in politics or becoming candidates for public office in Nevada.

New York created a legislative committee to make a thorough revision of the State labor laws and report to the next session.

UNEMPLOYMENT AND EMPLOYMENT AGENCIES.

Public attention was directed to the problem of unemployment by the large number of unemployed who crowded into the centres of population last winter. That this condition in the labor market was due to some extent at least to failure to bring the jobless man and the manless job together resulted in the creation of temporary public employment agencies. The propaganda to increase the importance of the securing of employment for the unemployed as a function of government has resulted in much legislation on the subject at the session this year. California, because of acute unemployment problems due to large numbers of people who go there for the winter, requested Congress to investigate unemployment and adopt remedial measures.

Free public employment offices were provided for in California, Illinois, Iowa, New Jersey, and Pennsylvania. Idaho declares the duty of maintenance of suitable employment offices in the municipalities of the State to be a function of government and provides that such offices shall be established by the municipalities, and provides for the maintenance of State employment agencies for farm labor. On the theory that private employment agencies have been used to the detriment of the laboring classes and have become social nuisances, an act was initiated and adopted at the last general election in Washington, pro-

hibiting under penalty collection of remuneration or fees by such agencies.

The business of such agencies was regulated generally in Nebraska, Oregon, Pennsylvania, and Texas. Idaho forbids further maintenance of private employment offices within the State except charitable offices and agencies for professional employment. The Oregon act makes it a misdemeanor for the employer to request an agent for laborers and then refuse to accept such laborers or to discharge them without cause. Oregon and Nebraska acts make it a misdemeanor for an employer to divide with an employment agent fees paid by applicants. The Texas act and a Connecticut act require the agent to return fees paid by applicants if they fail to obtain jobs within a specified time.

Commissions to investigate unemployment were provided for in California and Illinois.

Emergency public employment is provided for by Idaho by an act which requires County Commissioners to provide not more than sixty days' emergency employment a year for United States citizens resident for six months within the State.

WORKMEN'S COMPENSATION.

Compulsory acts providing compensation for injuries in hazardous employments were passed in Montana, Oklahoma, and Wyoming. Elective acts were passed in Colorado, Indiana, Maine, Pennsylvania, and Vermont. The Vermont act is modelled on the uniform Compensation act recommended by the Conference of Commissioners on Uniform State Laws. The Maine act contains a curious drafting error which may necessitate a special session to amend. In some instances compensation based on weekly wages is to be determined in the phraseology of the act on the basis of 300 times "weekly" wages when 300 times *daily* wages was evidently intended.

Securing to the injured workman or his dependents the compensation due under the act has become the most important problem of compensation legislation. The Wyoming act creates a State insurance fund and the Colorado and Pennsylvania acts provide for State insurance as one of the alternative methods of insuring the compensation liability under the act.

Insurance provisions also constitute the most important amendments to existing compensation acts. Michigan transferred the administration of the State insurance fund from the Compensation Commission to the State Insurance Department. West Virginia (and one of the extraordinary session) require that the State fund pay its expenses out of the fund without contribution by the State and also require it to set up reserves. Both of these provisions are, of course, intended to make the State fund compete on more equal terms with private insurance.

In New York administration of the Compensation act was transferred from a Compensation Commission to an Industrial Commission, which also administers the State Labor Department. Another New York act authorizes direct payment of compensation by the employer or his insurer to the beneficiary instead of payment to the Compensation Commission for distribution by the commission to the beneficiary. This law also authorizes direct settlements between the employer and beneficiaries subject to the approval of the commission, and Chapter 168 provides that payments made by the employer prior to an award may be credited on account of the award.

Most of the important workmen's compensation acts in this country provide for their administration by commissions with only limited review by the courts. The original Massachusetts act authorized summary procedure in the handling of compensation cases before the commission. A new act requires that such procedure shall also be "simple," which indicates that simplification of practice is not assured by substituting commissions for the courts.

Amendments to existing compensation laws were also enacted in California, Connecticut, Illinois, Minnesota, and Washington.

Constitutional amendments authorizing compulsory workmen's compensation legislation were proposed in Oklahoma and Pennsylvania, and a commission to investigate the subject was authorized in Utah.

Employers' liability laws were passed in Minnesota and North Dakota.

INSURANCE.

Mutual insurance companies to carry various kinds of risks are authorized by Illinois, North Dakota, Oklahoma, South Carolina, South Dakota, and Washington. The comprehensive bill recommended by the National Association of Mutual Insurance Companies was enacted in Indiana, which also passed the Uniform and Fraternal Insurance act, known as the Mobile bill.

Employers' mutual liability insurance companies were authorized in New Hampshire, and provision for similar mutuals is contained in several of the workmen's compensation acts, which have given great impetus to the organization of mutual insurance companies among the employers.

New Jersey authorized domestic life stock companies to change from participating to non-participating business, or *vice versa*, on approval of the Commissioner of Banking.

Insurance by individual concerns, known as Lloyds, is regulated by New Jersey and Pennsylvania.

Individuals and corporations are authorized to exchange reciprocal or inter-insurance contracts by Missouri and Texas.

Premiums are regulated and agents licensed by a State insurance board created in Oklahoma. Corporations are authorized to act as insurance brokers in Massachusetts.

Rebating of agents' commissions is prohibited in Maine and South Carolina. Pennsylvania made it a misdemeanor for attorneys, partners or employés to receive compensation for life insurance sold or solicited for the benefit of or on lives of their clients, partners, masters and employés, and in certain cases of fellow attorneys and fellow employés.

A standard fire policy was provided in Pennsylvania. Washington provided that no oral or written misrepresentation or warranty made in negotiating a contract of insurance shall avoid the policy unless made with intent to deceive.

Maine requires commencement of the adjustment of fire loss within twenty days after notice, but prohibits payment within forty-five days without approval of Insurance Commissioner. Payment of sickness and accident insurance is required in Massachusetts at least once in thirty days, even though not provided in the policy.

Life policies and annuities for the benefit of dependent relatives are exempt from claims of creditors in Pennsylvania "notwithstanding the right to change the beneficiary named has been reversed by the insured or is permitted by the insurer." North Dakota exempts insurance policies from the claims of creditors when the wife, children or dependent relatives of the insured are beneficiaries by its provisions.

The emphasis which is everywhere put on securing to the injured employé and his dependents the compensation provided by compensation acts is illustrated in Massachusetts by a requirement that foreign insurance companies writing compensation insurance in the State give bond, conditioned on compliance with a provision that on withdrawal from such business in the State they shall deposit security for the payment of all losses insured by them.

BANKS AND BANKING.

The banking business was regulated generally and the banking laws codified in South Dakota. Montana also passed a complete act regulating the banking business and creating a State Banking Department. Laws providing for the incorporation of banks, savings banks, and trust companies, prescribing their powers and duties and providing for their regulation and control by State agencies were enacted in Washington, New Mexico, New Hampshire and Indiana.

State banks are authorized to subscribe to the Federal Reserve system and comply with its rules. Idaho, Michigan, New Mexico, Nebraska, and Kansas Federal Reserve laws are probably responsible indirectly for the number of statutes enacted this year strengthening the State control of trust companies.

Banks are forbidden in Kansas to engage in trade or commerce or to invest in the stock of other banks or corporations or to loan money on or purchase their own shares unless to prevent loss on debts previously contracted.

Provision for guarantee of bank deposits is made in Indiana and South Dakota. A bank's liability in damages for non-payment through mistake or error but without malice of a depositor's check is limited to actual damage proved, by Montana.

Malicious circulation of false rumors with intent to injure the financial standing or reputation of banks or financial institutions or the financial standing of

individuals is made a misdemeanor by Delaware and Kansas. The Kansas act also applies to any act tending to start a run on a bank.

The drawing of a check on a bank in which the drawer has no funds or credit (the latter term being defined as an arrangement with the bank for the payment of the check) is punished criminally by Kansas, North Dakota, Colorado, and Washington. An Ohio act makes it a felony to give, with intent to defraud, a check on a bank in which the drawer "never had" any funds or credit. The issuing of a check without sufficient funds to meet it is made *prima facie* evidence of intent to defraud in Idaho.

Banks are authorized in West Virginia to pay checks of minor depositors unless otherwise specifically directed in writing by the parent or guardian.

PUBLIC UTILITIES.

Wyoming was the only State which created a public service commission this year; but the jurisdiction of existing commissions was greatly enlarged in many cases.

Acts regulating the very recent industry of running "jitney buses" were enacted in Colorado, New York, Pennsylvania, Tennessee, and Washington. These acts require in general that the persons operating motor vehicles not running on tracks and carrying passengers for pay should take out a license and conform to the regulatory provisions of the statute. Pennsylvania and Washington did not declare the "jitney bus" business a public utility, but Colorado and Tennessee (Chapter 60) specified in their acts that "jitneys" are common carriers and to be regarded as public utilities.

California defines public utilities to include common carriers, pipe lines, gas, electrical, telephone, telegraph, and water supply corporations, wharfingers, and warehousemen, "where service is performed or commodity delivered to the public."

Washington (Chapter 132) declared corporations operating pipe lines for the conveyance of light and natural gas to be common carriers and subject to control and regulation by the Public Service Commission of the State. Connecticut (Chapter 65) extended the jurisdiction of the Public Utilities Commission to include complaints by municipalities, persons or corporations whose pipes or other property are injured by electrolysis or by the escape of electricity of any public service or electric company. In Oklahoma (Chapter 176) cotton gins were declared to be public utilities and the business of ginning all seed cotton to be a public business. By the law of North Dakota (Chapter 147) regulation of corporations organized for furnishing water, gas or electricity was placed under the control of the Board of Railroad Commissioners. In Minnesota (Chapter 152) telephone companies were placed under the control and jurisdiction of the Railroad and Warehouse Commission. A curious provision in Kansas (Chapter 238) makes it the duty of the Public Service Commission to require every railroad company to provide facilities for stopping every passenger train entering or leaving the State within a reasonable distance of the State line and to stop such train for sufficient time to enable passengers who care to, to enter or leave the train. It is possible that this act was intended to permit passengers to alight and purchase tickets in Kansas, thus enabling them to take advantage of cheaper fares than the regular three-cent fare in interstate traffic.

In Illinois railroads or transfer companies are given the right to sell transportation to newspapers or magazines in exchange for advertising.

A peculiar provision in Oklahoma extending the doctrine of the "Jim Crow" legislation to telephone and telegraph companies compels these companies to furnish separate booths for white and colored people when the Corporation Commission shall determine the necessity of such regulation (Chapter 262).

Of the acts authorizing municipal ownership of public utilities the most important is California, which authorizes the incorporation of public utility districts composed of municipalities of the State with extensive power to construct or acquire and operate public utilities. The act contains detailed provisions for the organization and administration of the districts.

"A Deep Waterway Canal bill" passed by the Illinois Legislature provides for the construction, management, and operation of an eight-foot canal from Lockport to Utica, thereby providing a waterway with a minimum depth of eight feet from Lake Michigan to the Mississippi River. An appropriation of $5,000,000 was made for this work and a provision inserted in the act that when the waterway shall have been completed and paid for the channel shall be tendered to the United States Government for navigation uses.

CORPORATIONS.

Of the many statutes dealing with corporations only a few deserve to be mentioned as of general interest.

New Jersey amended the famous "Seven Sisters bill" by providing that corporations may purchase securities of other corporations for investment, but not for voting purposes or to restrain trade or lessen competition.

In Colorado, where cumulative voting for directors has been in force for a number of years, a new act permits corporations existing or hereafter organized to elect not to have the cumulative system.

"Blue Sky" laws seeking to protect the investing public by regulating the sale of corporate securities were enacted in Arkansas, Colorado, Iowa, Kansas, Louisiana, Michigan, North Dakota, South Carolina, South Dakota, and West Virginia, and an amending act was passed by Oregon. A criticism of these bills from the point of view of the bankers will be found in the Bulletin of the Investment Bankers' Association under date of June 12, 1915.

Corporations dealing in milk, poultry, and eggs are forbidden by Wyoming from creating a monopoly or destroying the business of competitors by discrimination. A Kansas act dealing with monopolies, which, though it applies to persons as well as corporations, will probably affect only the latter, forbids price discriminations between different parts of the State for the purpose of destroying competition. Detailed provision is made for investigation and prosecution of alleged violations. The Attorney-General is given power in case he finds that a violation was not "wilful" and that the offender intends in good faith to abandon the practice complained of may "permit such person to go" without instituting prosecution. The act declares its purpose to be "regulating trade and promoting confidence in persons engaged therein." An act of Congress provides that no part of the appropriation for enforcement of anti-trust laws shall be spent in prosecution of labor or agricultural organizations.

The organization of co-operative industrial or agricultural associations was authorized in Colorado, New Mexico, Oregon, North Carolina, South Carolina, Wyoming, and Kansas.

DOMESTIC RELATIONS.

Abandonment by the husband of his wife or children is made a misdemeanor and thereafter an extraditable offence in Indiana, Illinois, Idaho, Virginia, Oklahoma, Wyoming, and Tennessee. Tennessee also makes it a felony for the husband wilfully to leave the State after abandoning his wife or child with intent to leave them destitute. The offence of "cruelty and neglect of children" is defined and punished in New Jersey. This act authorizes payment to charitable organizations of fines imposed under its provisions in cases in which the organization is complainant, a practice which has developed abuses in the field of legislation protecting animals from cruelty.

Equal right to the custody of children is given to the father or mother in South Dakota and Idaho and in Maine, where the husband and wife have lived apart for a year.

A duty to support their indigent parents is placed on adult children in Massachusetts and Montana. Provision is made for proceedings in such cases similar to the usual non-support cases.

DIVORCE.

The California Legislature memorialized Congress to propose an amendment to the Constitution granting to Congress power to pass uniform divorce laws for the United States.

The Nevada law giving jurisdiction in divorce cases to the district court of the county in which the plaintiff has resided for six months before suit is brought is worthy of mention only as a step backward, as it re-establishes the prestige of Reno.

The libellant is made a competent witness generally in Pennsylvania even though the respondent may not have been personally served and may not have resided within the State.

Colorado passed a comprehensive act specifying the grounds of divorce and procedure in divorce cases.

Divorced persons are prohibited from remarrying within six months, and the Court is authorized to prohibit the guilty party from marrying within five years, by West Virginia.

For the purpose of supervising the conduct of divorce cases, Tennessee provides for a proctor in divorce in counties of 100,000, who shall not appear for either party but shall attend the trial of every divorce case, investigate the charges made, and be prepared to advise the Court as to the merits of the case. He is given power to examine witnesses or parties. West Virginia makes provision for a divorce commissioner with similar duties to investigate, appear at trials, and take necessary steps to prevent fraud and deception.

PROPERTY AND DECEDENTS' ESTATES.

Pennsylvania provided for the appointment and expense of a commission of three persons to codify the law of decedents' estates.

Oklahoma and Wyoming provided by statute that no person who is convicted of taking or having caused to be taken the life of another shall inherit or take by devise or legacy from or receive any insurance on the life of the deceased.

Several States removed the common law disability from women and gave them further power to own, control, and devise their own property. In Pennsylvania two acts give married women the right to appoint testamentary guardians both of the person and of the estate of their children. New Jersey makes the paraphernalia of a married woman the sole and separate property.

Texas passed an act providing that all property or moneys received as compensation for personal injuries sustained by a wife shall be her separate property except actual and necessary expenses accumulated against the husband for medical bills and other expenses incident to the collection of the compensation. New Mexico removes from the control of the husband the real property of the wife and provides that only during coverture shall the husband have the sole power of disposition of the personal property, and that either husband or wife may convey or mortgage separate property without the other joining in the conveyance or mortgage. In Maine a conveyance of his or her property by either the husband or wife, if they have lived apart for good cause for over a year, is permitted.

By an amendment in Pennsylvania no wife who has for one year or more previous to the death of the husband wilfully or maliciously deserted her husband shall have the right to claim any title to the real or personal estate after his decease.

Two States, Washington and Indiana, passed laws in an attempt to provide for a more expedient settlement of decedents' estates. Indiana provides that in case a non-resident entitled to own real estate by descent or devise is absent from the State for more than seven years and makes no claim during that time upon such real estate, he is presumed to be dead and the real estate which he would have taken is to descend to his heirs. A novel and questionable extension of the powers of the Court is contained in Chapter 39 of Washington, which provides that the property of an absentee whose whereabouts or continued life is uncertain, after notice by publication, may be taken charge of by the Court upon petition and administered by an appointed trustee in a manner somewhat similar to the administration of the property of a deceased person, but without sale or distribution until the absentee has been gone for five years.

A very important act was passed by the New Jersey Legislature providing that the father and mother shall take as tenants by the entirety on the death of a person without leaving lawful issue or brother or sister.

FRAUD AND MISREPRESENTATION.

Many States passed acts providing for punishment in cases of fraudulent advertisements. West Virginia, Idaho, Oklahoma, and Montana make it a misdemeanor for any such advertisements to be circulated. Colorado, Missouri, Kansas, and New York specify that the advertisement must not be untrue and misleading, or circulated for the purpose of disposing of property or service or to make a sale. The Kansas act is not to apply to the publisher of any publication who publishes or circulates it without knowledge that it is false. Another act of New York makes it a misdemeanor to affix in any manner a business or commercial advertisement on any property of another without his consent or on any object within the limits of a highway. The act contains an interesting provision for its enforcement in the provision that any advertisement within the highway in violation of its provisions may be removed or destroyed by any one.

Acts providing for punishment in cases of the making or using of false statements in writing to procure property or credit were passed by West Virginia and Wyoming. A New Hampshire act provides that any person who either directly or indirectly makes any false statement in writing, respecting the financial condition or means or ability of himself or any other person, with intent that it shall be relied upon, shall be guilty of a crime. Oklahoma contains a similar provision.

Kansas provides that the obtaining with intent to cheat and defraud of money or of property by fraudulent representation or device or by check or other written instrument or "spurious coin or metal" shall be punished. Tennessee makes it a misdemeanor for any person to give a second mortgage upon property without giving information to the mortgagee that there is a first or previous mortgage and to whom the same is made.

SALES.

Several of the States adopted the Uniform Sales act. A list of these States is contained under a discussion of uniform legislation.

Three States adopted acts prohibiting the sale of merchandise, goods, and chattels in bulk in fraud of creditors, New Jersey, Kansas and Colorado.

FOREIGN LOANS IN UNITED STATES.

GREAT BRITAIN'S action in closing her money markets to loans other than those floated by her allies has been justified by current events, but it has had the effect of turning other needy nations to the United States for financial aid. (London Statist, July 10, 1915.) These loans are as follows:

Swedish Government 2-year notes	$5,000,000	Republic of Panama 30-year 5 per cent. bonds	$3,000,000
Argentine National 1-3-year loan	15,000,000	Swiss Government 1-5-year notes	15,000,000
Argentine 5-year 6 per cent. bonds	25,000,000		
Norway short-term loan	3,000,000		
Bolivian loan	1,000,000	Total	$67,000,000

The significant fact which these figures reveal is that almost two-thirds of this type of financing has been consummated by Latin-American countries. The $25,000,000 of Argentine 6 per cent. bonds floated in London was only one-half of the total issue.

To the foregoing may be added the $85,500,000 Canadian loans placed in the United States.

Since the outbreak of the great European war the United States has made formal loans to foreign countries to the amount of $257,090,000. Of this total $131,090,000 went to Canada, $44,000,000 to Latin America, and $82,000,000 to Europe. This large figure does not, however, express the sum total of all our loans to foreign countries recently. The rapidity and volume of recent European purchases in this country have not permitted the floating of formal loans. Instead, credits have been organized here on behalf of foreign purchases and payments for merchandise have been made against these credits, many of which have been bank credits. The total amount of such credits cannot, of course, be given with accuracy, but it is likely that they exceed $250,000,000. (From a bulletin issued by the Department of Commerce.)

Further specific loans made in the United States as follows: October 15, 1915, Anglo-French loan, $500,000,000; Italian Government, $25,000,000.

According to compilations made early in November, 1915, the total of loans obtained in the United States by foreign countries since the outbreak of the war was nearing the $900,000,000 mark, and it was not unlikely that credit arrangements then under negotiation would largely increase this figure. The latest French credit for $15,000,000, announced November 4, brings the total of foreign credits to $879,000,000, of which $35,000,000 has matured and been paid off. France alone has borrowed $118,000,000 here, not including her share of the $500,000,000 Anglo-French loan; Canada has obtained approximately $115,000,000 in various loans, Argentina has borrowed $40,000,000, and Russia $25,000,000. Other countries which have obtained small loans here include Germany, Switzerland, Sweden, Norway, Republic of Panama, and Bolivia. Of all the money borrowed by these countries less than one-fourth has gone from the United States. The big portion has been left here to cover the cost of purchases.

The returns are for the fiscal year 1915 unless otherwise indicated. * Belongs to the State educational funds. † Including Public Service corporations, railroad, telegraph, or other public utilities. ‡ Year 1914. (*a*) Personalty, 100 per cent. (*b*) In Pennsylvania, real none, personal none. The State's revenue is principally derived from tax on capital stock of corporations, the rate being 5 mills on the actual value of the capital stock; tax on corporate loans, the rate being 4 mills on the par value. It also collects 8 mills on the gross receipts of railroad, railway, electric light, telephone and telegraph, and express companies. (*c*) There is no State tax on property in Delaware, consequently no assessed valuation.

STATE REVENUES AND EXPENDITURES.

(From a bulletin issued by the Department of Commerce, August 13, 1915.)

A new line of work has just been undertaken by the Bureau of the Census, namely, the collection and publication of statistics of State revenues, expenditures, assets and liabilities, tax levies, etc.

When the ALMANAC went to press the work for 1914-1915 had not progressed far enough to yield statistics of any value, but a few figures from the Census Bureau's recently published report on wealth, debt, and taxation are of interest in this connection. Between 1903 and 1913 the revenues of the Federal Government increased 45 per cent., while its expenditures for governmental cost increased by 54.5 per cent. During the same period the revenues of the States increased by 94.3 per cent. and their expenditures for governmental cost by 105.9 per cent.; the revenues of the counties increased by 85.8 per cent. and their expenditures by 95.2 per cent., and the revenues of incorporated places of 8,000 and over increased by 98.3 per cent. and their expenditures by 103.2 per cent.

For every division of Government the increase in expenditures was greater than the increase in revenues, and, except in the case of the Federal Government, which showed a small surplus, the revenues in 1913 were less than the expenditures for governmental cost. The surplus for the Federal Government was about $1,000,000, or approximately one-tenth of 1 per cent. of the revenues; the deficit for the States was $15,000,000, or 4 per cent. of the revenues; the deficit for the counties was $15,000,000, or 4 per cent. of the revenues; and the deficit for incorporated places of 8,000 and over was $129,000,000, or 13 per cent. of the revenues. These deficits, however, are more than accounted for by outlays for permanent improvements. The outlays of the Federal Government in 1913 amounted to nearly 7 per cent. of the total expenditures for governmental cost; of the States, to nearly 13 per cent.; of the counties, to over 23 per cent.; and of the municipalities of 8,000 and over, to over 31 per cent. The excess of expenditures over revenues furnishes an approximate measure of the rate at which the State, county, and municipal Governments are increasing their indebtedness from year to year and thus shifting to the future the burden of paying for present permanent improvements.

* Estimates for the United Kingdom prior to 1910 were for coin only; these figures include $100,000,000 for bullion in banks. † The figures for the stock of gold in Germany are based upon an estimate by Dr. Arnold, a director of the Reichsbank, of 3,000,000,000 marks in German coin in the country at the end of 1910. At the close of 1913 the Reichsbank held $114,873,080 in bullion and foreign coin.

"Lawful money" includes gold coin, silver dollars, United States notes and Treasury notes. United States notes are by regulation receivable for customs so long as they continue redeemable in coin. There are still in use small amounts of $1 and $2 national bank notes; also $500 and $1,000 silver certificates. Treasury notes were issued for purchases of silver bullion, which was coined into dollars wherewith the notes are being redeemed as rapidly as practicable. The issue of national bank notes is practically dependent upon the market price of United States bonds. When the premium is high it is not profitable to issue notes.

The above table was revised for THE WORLD ALMANAC by the Director of the Mint.

LOWER WALL STREET BUSINESS MEN'S ASSOCIATION.

Organized in 1883 to encourage patriotism and philanthropy among the business men of New York. *President*—William Bayne, Jr. *Treasurer*—L. W. Munford, 106 Wall Street, New York City. *Secretary*—A. Wakeman, 96 Water Street, New York City.

HOLDINGS OF STOCK EXCHANGE SECURITIES.

(From M. Neymarck's Report issued in 1914.)

Great Britain, Germany, and France hold more than 330 milliard francs (franc=19.3 cents; hence this sum=$63,690,000,000) of paper securities out of the 570 to 600 milliards ($110,010,000,000 to $115,800,000,000) which belong to the various nations inhabiting the various countries of the globe. These 330 milliards taken at 4 per cent. bring them in a minimum interest of 13,200,000,000 francs ($2,509,000,000). On their markets more than 600 milliards are negotiable of the 815 milliards of the negotiable securities quoted in the different markets of the world.

The following table shows the holdings of the Stock Exchange securities held by the peoples of the leading countries of the world:

COUNTRIES.	End of 1908.		End of 1910.	
United Kingdom.....	$25,090,000,000 to	$26,055,000,000	$27,020,000,000 to	$27,406,000,000
United States.....	22,195,000,000 to	23,160,000,000	25,090,000,000 to	25,476,000,000
France.....	19,879,000,000 to	20,265,000,000	20,458,000,000 to	21,230,000,000
Germany.....	15,440,000,000 to	16,405,000,000	17,370,000,000 to	18,335,000,000
Russia.....	4,825,000,000 to	5,211,000,000	5,597,000,000 to	5,983,000,000
Austria-Hungary.....	4,053,000,000 to	4,246,000,000	4,439,000,000 to	4,632,000,000
Italy.....	1,930,000,000 to	2,316,000,000	2,509,000,000 to	2,702,000,000
Japan.....	1,158,000,000 to	1,351,000,000	1,737,000,000 to	2,316,000,000
Other countries.....	6,369,000,000 to	7,334,000,000	6,755,000,000 to	7,720,000,000
Total.....	100,939,000,000 to	106,343,000,000	110,975,000,000 to	115,800,000,000

Taking the highest figures, the wealth of the world expressed in Stock Exchange securities alone would thus amount to the huge figure of $115,800,000,000, in which the share of the United States would be $25,476,000,000.

PREMIUMS ON GOLD.

GOLD sold first at a premium early in January, 1862, the New York banks having suspended specie payments December 28, 1861. The highest point reached was 285, July 11, 1864. The premium on gold disappeared at the end of 1878, just prior to resumption of specie payments.

Following is given a table of the high and low prices of gold from 1862 to 1878 inclusive:

The value of a membership in an exchange depends in a large measure upon the prevailing state of business and the market level of securities.

NEW YORK STOCK EXCHANGE SEATS.

(Corrected to November 12, 1915.)

THE following table prepared by Dow, Jones & Co., publishers of *The Wall Street Journal*.

Before 1868, seats on the New York Stock Exchange were not transferred by purchase and sale. An initiation fee of $3,000 was, however, required from members duly elected by the board. In 1868, the transfer of seats began to have a market valuation, for in that year the present system of transfer was instituted.

PAN-AMERICAN FINANCIAL CONFERENCE.

(Convened by authority of the Congress of the United States under the direction of William G. McAdoo, Secretary of the Treasury and Chairman of the Conference, May 24-29, 1915, in Washington.)

REPORT of the General Committee on Uniformity of Laws Relating to Trade, Commerce, and International Commercial Court, appointed to consider and report upon (1) the subjects to be dealt with by the General Committee, and (2) the organization necessary to carry into effect the resolutions of the Conference.

SUBJECTS.

The subjects which should, in the opinion of the committee, be dealt with in the report of the committee to the Conference are:

1. The establishment of a gold standard of value.
2. Bills of exchange, commercial paper, and bills of lading.
3. Uniform (*a*) classification of merchandise, (*b*) customs regulations, (*c*) consular certificates and invoices, (*d*) port charges.
4. Uniform regulations for commercial travellers. Consider in this relation the question of a certificate to be issued by the proper department of the Government of the country from which the traveller comes that the bearer is a bona fide commercial traveller, this certificate to be properly visèd.
5. To what extent further legislation may be necessary concerning trade-marks, patents, and copyrights.
6. The establishment of a uniform low rate of postage and of charges for money orders and parcel post between the American countries.
7. The extension of the procedure of arbitration for the adjustment of commercial disputes.

ORGANIZATION.

1. That for the purpose of carrying into effect the resolutions of the Conference, and particularly for bringing about uniformity of laws on the subjects embraced in those resolutions, there be established an International High Commission, to be composed of not more than nine members, resident in each country, to be appointed by the Minister of Finance of such country. The aggregate members thus appointed shall constitute the commission.
2. That for the purpose of aiding the International High Commission and co-ordinating its work, there be created in the Pan-American Union a bureau whose chief shall receive a salary of not less than $5,000 (gold) per annum. Expenses of the bureau, including the salaries of the chief and his assistants, to be paid by the Pan-American Union, in whose budget a corresponding increase shall be included.
3. The American Governments are requested to instruct their diplomatic and consular officers and their commercial attachés to co-operate with the International High Commission and with the bureau. The bureau shall be authorized to obtain in each country such expert assistance as may be necessary to the prosecution of its work, the expenses thus incurred to be treated as a part of the expenses of the bureau.
4. The bureau shall make to the governing board of the Pan-American Union, for distribution among the Governments concerned, and to the International High Commission, an annual report.

The bureau shall make to the next International American Conference a full report of its proceedings up to that time, with recommendations as to future work.

WILLIAM C. REDFIELD,
Chairman of Committee.

After the report of the Committee on Uniformity of Laws had been read and unanimously adopted, John Bassett Moore presented the following additional resolutions, which were unanimously adopted at the afternoon session of Saturday, May 29, 1915:

Resolved, That it is the sense of this Conference—

1. That the local members of the International High Commission should be immediately appointed by their respective Ministers of Finance.
2. That the members of the International High Commission appointed in each country should immediately begin preparatory work, and that the various Governments be requested, through their appropriate departments, to co-operate in the work of the commission.
3. That pending the establishment of the bureau in the Pan-American Union, as recommended in the report of the Committee on Uniformity of Laws, the President of this Conference be requested immediately to appoint a general secretary to the International High Commission to perform such duties as are necessary in the preparatory work of the commission.
4. That the United States members of the International High Commission should, as soon as practicable, proceed to visit the other American countries to meet the members of the commission there resident.

FEDERAL RESERVE BOARD.

THE new banking and currency law, known as the Federal Reserve act, was passed December 23, 1913.

Under the system known as the National Banking System, which was inaugurated at the latter end of the Civil War, the National banknote currency was based upon Government bonds deposited in the Treasury, and the currency thus issued has been classed by economists as bond-secured currency. This plan was evolved not only to nationalize and unify the currency, which had theretofore consisted of notes issued by State banks, but as well to create a market for United States bonds, and in this way to sustain their value. It was entirely successful for the latter purpose, but has outworn its usefulness as a banking system because of its entire want of elasticity.

The Federal Reserve act is the result of a long discussion by statesmen, financiers, economists and bankers, and is a constructive measure based upon and growing out of many bills which have been introduced within the past twenty years. Under it twelve cities, known as Federal Reserve cities, are established, and the (continental) United States is divided into twelve geographical districts, each district containing one of the reserve cities. The twelve districts and their respective reserve cities are as follows:

Dist. No. 1..	Boston, Mass.	Dist. No. 5..	Richmond, Va.	Dist. No. 9..	Minneapolis, Minn.
Dist. No. 2..	New York, N. Y.	Dist. No. 6..	Atlanta, Ga.	Dist. No. 10..	Kansas City, Mo.
Dist. No. 3..	Philadelphia, Pa.	Dist. No. 7..	Chicago, Ill.	Dist. No. 11..	Dallas, Tex.
Dist. No. 4..	Cleveland, Ohio.	Dist. No. 8..	St. Louis, Mo.	Dist. No. 12..	San Francisco, Cal.

Every National bank is required to become a stockholder in the Federal Reserve bank of the district in which it is situated, and any State bank or trust company which complies with certain specified requirements is permitted to become a member bank. There are at the present time 7,621 National banks in the United States which have thus been required to become member banks. Twenty-seven State banks are also members.

The largest district, in respect to number of member banks—the seventh or Chicago district—has 987 member banks. The smallest district—the sixth or Atlanta district—has 385 member banks. The number of member banks may largely increase in the near future from the addition of State banks and trust companies as member banks.

Each member bank is required to subscribe to the stock of the Federal Reserve bank of its district in the amount equal to 6 per centum of its paid-up capital stock and surplus. The Federal Reserve bank does not do business with the public in the sense that banks usually do; it may better be described as a bank of banks. It is made a depositary for a certain proportion of the reserve of all the member banks, and in addition may also be a depositary for Government funds. An important function is as a bank of issue and redemption of currency, for it may secure from the Treasury Government notes known as Federal Reserve notes, which it is authorized to issue against commercial

paper with a minimum gold reserve of 40 per centum. Besides this, Federal Reserve banks are granted certain powers in the matter of operations in the open market, such as the purchase of commercial paper, foreign exchange, etc., and in a general way are expected to perform important functions as clearing houses between their member banks.

Each Federal Reserve bank has nine directors, three of whom represent the member banks, three represent commercial, agricultural or other industrial pursuit (these six being chosen by the member banks), and finally three Government directors chosen by the Federal Reserve Board. These nine directors are charged with the duty of appointing all necessary officers, including the active manager of the bank, who is designated as its President or Governor.

Under the act the whole system is under the supervision of a central board in Washington, known as the Federal Reserve Board, consisting of the Secretary of the Treasury and the Comptroller of the Currency acting ex-officio, and five members named by the President with the approval of the Senate. The five members first selected (who took oath of office August 10, 1914) are as follows:

Charles S. Hamlin, Governor, term of office, 2 years.
Frederic A. Delano, Vice-Governor, term of office, 6 years.
Paul M. Warburg, term of office, 4 years.
W. P. G. Harding, term of office, 8 years.
A. C. Miller, term of office, 10 years.

At the termination of the term of office of these five members all subsequent appointees will be named for ten-year terms, except, of course, those who may be selected to fill unexpired terms.

The salary of the members of this board is $12,000 per annum each, which salaries, together with all other expenses of operating the system, are assessed against the Federal Reserve banks in proportion to their capital stock and surplus. Secretary to the board, H. Parker Willis; Assistant Secretary and Fiscal Agent, Sherman Allen. Headquarters, Washington, D. C.

The capital of the Reserve banks of the system follows:

Dist. No. 1 (Boston)	$10,323,800	Dist. No. 8 (St. Louis)	$5,563,433
Dist. No. 2 (New York)	21,971,700	Dist. No. 9 (Minneapolis)	4,977,550
Dist. No. 3 (Philadelphia)	10,531,000	Dist. No. 10 (Kansas City)	6,045,200

FEDERAL EMPLOYMENT OFFICES.

The Department of Labor, through the Division of Information of the Bureau of Immigration, has recently established Distribution Branches throughout the country for the purpose on the one hand of developing the welfare of the wage earners of the United States and improving their opportunities for profitable employment, and on the other hand of affording to employers a method whereby they may make application for such help as they need, either male or female, citizens or alien residents, and have their wants supplied through said distribution branches. No fee is charged employer or employé for this service.

Manufacturers, contractors, farmers, and, in fact, all employers of labor, may now utilize the Government machinery to supply their wants in this direction.

The country has been divided into eighteen zones, thus bringing the distributing points near to the places where help is needed. The applications for laborers of all kinds and the applications for employment are cleared through one office in each zone. Many of these head offices have sub-branches under their jurisdiction.

Applications for workers should be addressed to the Distribution Branch, Immigration Service, in the city named in this list as the headquarters of the zone in which the help is required.

Zone No.	Location of Branch.	Local Address.	States or Territory Controlled.
1	Boston, Mass.	Long Wharf	Maine, Massachusetts, Rhode Island.
2	New York, N. Y	United States Barge Office	New York, New Jersey, Connecticut, New Hampshire, Vermont.
3	Philadelphia, Pa.	135 South Second Street	Pennsylvania, Delaware, West Virginia.
4	Baltimore, Md.	Stewart Building	Maryland.
5	Norfolk, Va.	119 West Main Street	Virginia, North Carolina.
6	Jacksonville, Fla.	Federal Building	Florida, Georgia, Alabama, South Carolina.
7	New Orleans, La.	Immigration Station	Louisiana, Mississippi, Arkansas, Tennessee.
8	Galveston, Texas.	Immigration Station	Texas, New Mexico.
9	Cleveland, Ohio	Post-Office Building	Ohio, Kentucky.
10	Chicago, Ill.	845 South Wabash Avenue	Illinois, Indiana, Michigan, Wisconsin.
11	Minneapolis, Minn.	Federal Building	Minnesota, North Dakota, South Dakota.
12	St. Louis, Mo.	Chemical Building	Missouri, Kansas, Oklahoma, Iowa.
13	Denver, Col.	Central Savings Bank Building	Colorado, Wyoming, Nebraska, Utah.
14	Helena, Mont.	Power Building	Montana, Idaho.
15	Seattle, Wash.	208 Liberty Building	Washington.
16	Portland, Ore.	Railway Exchange Building	Oregon.
17	San Francisco, Cal.	U. S. Appraisers' Building	California, north of the northern boundary of San Luis Obispo, Kern, and San Bernardino Counties; also State of Nevada.
18	Los Angeles, Cal.	Post-Office Building	California, south of the northern boundary of San Luis Obispo, Kern, and San Bernardino Counties; also State of Arizona.

All of the postmasters throughout the United States are co-operating in this work by distributing application blanks both to employers and employés. The appropriate blanks may, therefore, be had on request to any postmaster. However, in those cities designated as zone headquarters, application for blanks or information should be made direct to the Inspector-in-Charge of the Distribution Branch at the office of the Immigration Service at the address indicated in the foregoing table.

The present system of distribution has only been in operation since the first of February, 1915. The number of applications for positions during the five months (February 1 to June 30, 1915) was 76,503. The number directed to employment during the same period was 10,916.

THE KNIGHTS OF KING ARTHUR.

The Knights of King Arthur is a church boys' club having over 3,000 chapters, enrolling 150,000 boys. It is a fraternity, private but not secret, self-governing and under control of the local church. Based on the oldest Christian legend, that of the Round Table, it was founded in 1893 by Rev. William Byron Forbush. The councillors of the order are: *President*—G. Stanley Hall; Hon. Ben B. Lindsey and Rev. Frank Graham Taylor. *Headquarters*—Oberlin, Ohio. Dascomb Forbush, National Seneschal.

LIFE INSURANCE PROGRESS IN THE UNITED STATES.

It is within the past seventy years that the vast business of life insurance in the United States has been developed. The experimental stage was ended and the era of advance was opened when, in 1843, the Mutual Life Insurance Company of New York began business, its first policy having been issued on February 1 of that year.

Since then a large number of life insurance companies have been established. The following list includes those now transacting business which had their inception between 1843 and 1860 inclusive, arranged according to the date of the first policy issued:

Mutual Life Insurance Company, 1843, February 1; New England Mutual Life Insurance Company (1), 1844, February 1; New York Life Insurance Company, 1845, April 17; Mutual Benefit Life Insurance Company (2), 1845, May 6; State Mutual Life Assurance Company (3), 1845, June 1; Connecticut Mutual Life Insurance Company, 1846, December 15; Penn Mutual Life Insurance Company, 1847, June 25; Union Mutual Life Insurance Company, 1849, October 1; National Life Insurance Company of Vermont, 1850, February 1; United States Life Insurance Company, 1850, March 4; Ætna Life Insurance Company, 1850, August 1; Manhattan Life Insurance Company, 1850, August 1; Massachusetts Mutual Life Insurance Company, 1851, August 2; Phœnix Mutual Life Insurance Company, 1851, September 11; Berkshire Life Insurance Company (4), 1851, October 27; Northwestern Mutual Life Insurance Company, 1858, November 25; Equitable Life Assurance Society, 1859, July 28; Washington Life Insurance Company, 1860, February 2; Home Life Insurance Company, 1860, May 1; Germania Life Insurance Company, 1860, July 16.

How life insurance has progressed since the early part of 1843 is shown in the subjoined table by periods of years as indicated, assessment insurance not being included.

December 31.	Amount of Outstanding Insurance.	Amount of Assets.
1843	$6,500,000	$1,000,000
1867	1,235,000,000	124,534,000

* Annual statements of the fire insurance companies are rendered to the insurance departments during the month of January; therefore the statistics of condition January 1, 1916, were not ready when this publication went to press.

† The New York law requires a deposit of $200,000 from foreign companies with the Insurance Department. This is treated by the department as "deposit capital," and the surplus stated in the next column is "surplus beyond deposit capital" and other liabilities.

ROWING.

YALE VS. HARVARD—VARSITY EIGHTS.

YALE and Harvard eights have rowed forty-nine races, beginning in 1852 on Lake Winipiseogee at two miles, when Harvard won. In 1855 the course was changed to Springfield and lengthened to three miles. Lake Quinsigamond was the scene for nine years, and Lake Saltonstall for 1869. After an interval of seven years the crews in 1876-77 went to Springfield, Mass., when the four-mile course was inaugurated. In 1878 the crews changed again to New London, Ct. For records prior to 1889 see 1914 ALMANAC.

POLO.

There was no international match between representative teams of the United States and Great Britain and the International Challenge Cup remains therefore in possession of England. Previous cup matches: 1886, at Newport, Great Britain won by 10 to 4 and 14 to 2; 1900, Hurlingham Club, one game, Great Britain won, 8 to 2; 1902, Hurlingham Club, first game, America won, 2 to 1; second and third games, Great Britain won, 6 to 1 and 7 to 1; 1909, Hurlingham Club, America won, 9 to 5 and 8 to 2; 1911, Meadow Brook Club, America won, 4½ to 3 and 4½ to 3½; 1913, Meadow Brook Club, America won, 5½ to 3 and 4½ to 4¼; 1914, at Meadow Brook Club Field, Westbury, L. I., Great Britain won in two straight games by 8½ to 3 and 4 to 2¾.

The polo championship of America was won by Meadow Brook Club (Raymond Belmont, J. M. Waterbury, Malcolm Stevenson and Devereux Milburn) at Narragansett Pier, R. I., July 31, defeating Great Neck by 14 to ½.

General activity and number of matches played equalled those of 1914, and the most prominent teams were: Meadow Brook Club, Great Neck, Cooperstown, Point Judith, Philadelphia Country Club, Bryn Mawr, Fifth United States Cavalry team, Aiken, Piping Rock, Rumson, Islip, Devon.

CHESS.

Activity in chess matters was naturally lessened during 1915 owing to the war, but the players in this country were fairly busy. The first of the year was notable for the return of José R. Capablanca, who had left Europe after the outbreak of the war and gone to South America. Upon his return to New York he took part in the National tournament and captured first prize without the loss of a game. In Brooklyn, on February 22, he set a new record for simultaneous play by conducting sixty-five games against eighty-four opponents simultaneously. Very soon after, at Portland, Ore., F. J. Marshall, the United States champion, surpassed that record with a similar exhibition on ninety-two boards.

Twenty-third Intercollegiate Tourney—New York, December 28, 29, and 30, 1914. Won by Columbia, with total of 10—2. Other scores: Princeton, 5½—6½; Harvard, 5—7; Yale, 3½—8½. The winning team was: Columbia—1, H. E. Leede, '17; 2, A. P. Sachs, P. G.; 3, A. J. Mandell, '17; 4, E. F. Korkus, '17. The record: Columbia, 10 wins; Harvard 9, Yale 2, Princeton 1. In addition, Harvard and Yale tied in 1909. It was not played off.

Sixteenth Triangular College Chess League Tourney—New York, December 30 and 31, 1914, and January 1 and 2, 1915. Result: A tie between Cornell and Pennsylvania, with totals of 12—4; Brown third, with 0—16. The winning teams: Cornell—1, N. S. Perkins, C. E., '15; 2, W. Grafman, C. E., '15; 3, J. Grossman, Ag., '16; 4, J. Jokel, Ag., '16. Pennsylvania—1, Harry Kline, Vet., '17; 2, B. Winkelman, Law, '17; 3, J. Davis, Law, '16; 4, E. H. Bart. Ch. E., '15. The record: Pennsylvania 8, Cornell 5, Brown 0. In addition, Pennsylvania tied once with Brown and twice with Cornell.

Record Simultaneous Play—Brooklyn, February 22. J. R. Capablanca played 65 games (against 84 opponents), won 48, lost 5, and drew 12. Time—6¾ hours. Portland, Ore., February 23, F. J. Marshall played 92 games, won 77, lost 4, and drew 11.

New York State Championship—Brooklyn Chess Club, February 22. Championship tournament won by A. Kupchik, 4—0; R. T. Black and E. Simonson, each 3—1; H. Zirn, 2½—1½; C. Jaffe, 2—2. The general tourney was won by M. Smirka, 4—0.

New Jersey State Championship—West Hoboken, February 22. Championship tournament won by E. E. Cobb of Paterson, 3½—½; B. J. Campbell, Hoboken, O. Prante, West Hoboken, and M. W. Shor, Newark, each 3—1. Class A tourney won by D. Gottfried, 4—0. Class B tourney won by A. Esposito, 4—0.

Rhode Island Championship—Providence, February 22. Championship tournament won by Dr. Leper.

Pennsylvania Championship—Philadelphia, February 22. Winner, S. T. Sharp, after tie with N. T Whitaker.

Illinois Championship—Chicago, February 22. Championship tournament won by C. W. Phillips, 4—0.

Metropolitan League—New York. Club championship won by Brooklyn C. C., 10—0. Other scores: Progressive C. C. 9—1, Staten Island C. C. 7—3, Manhattan C. C. and North Jersey C. C., each 6—4. Individual championship won by E. Lasker, 12—3; R. T. Black and O. Chajes, each 11½—3½; A. Schroeder 11—4, J. Bernstein and A. B. Hodges, each 9½—5½.

New York Masters' Tournament—New York, April 19 to May 10. Won by J. R. Capablanca of Havana, 13—1; F. J. Marshall 12—2, O. Chajes and A. Kupchik 7—7.

WILLARD-JOHNSON FIGHT.

THE feature of the year in pugilism was the winning of the world's heavy weight championship by Jess Willard, challenger, who defeated Jack Johnson, the title holder, at Havana, Cuba, April 5, in 26 rounds. Johnson led on points until the twentieth round, but his hardest blows appeared to have but little effect upon Willard, who increased his speed and aggressiveness as the negro tired, and finally scored a knockout after one minute and twenty-six seconds of fighting in the twenty-sixth round with a left to the body and a right to the jaw.

Johnson, who won the undisputed title to the heavyweight championship by defeating Jim Jeffries at Reno, Nev., July 4, 1910, held the honors for four years and nine months. Including his victory over Tommy Burns at Sydney, Australia, December 26, 1908, his championship tenure covered a period of six years, three months and nine days. The first steps toward arranging a bout between Willard and Johnson were taken early in November, 1914, when a representative of the promoters went to England and secured the champion's signature to articles agreeing to box Willard from twenty to forty-five rounds for the sum of $30,000 and the additional sum of $2,000 for expenses.

The promoters selected the race track at Juarez, Mexico, just across the border from El Paso, as the scene, and Saturday, March 6, as the date of the fight. Johnson left England in December, planning to reach Mexico, via South America, and arrived in Buenos Ayres in January. On February 8 he reached Barbados, British West Indies, from which place he arrived at Havana, Cuba, February 21. Johnson eventually refused to enter Mexico and Willard and his party, after training at El Paso from January 25, was forced to go to Cuba, where he landed on March 16.

Both fighters resumed training again and the contest was set for Saturday, April 3. Later the date was changed to Sunday, April 4, and when objections to the holding of the fight on Easter Sunday developed, the boxers agreed to meet on Monday, April 5. There were no further delays and challenger and defender entered the ring at the Oriental Race Track, Marianao, seven miles from Havana, shortly after 1.30 P. M. on that day, and the bell for the opening round rang at 1.54 P. M.

The battle was fought under a clear sky and hot sun, and it was estimated that between fifteen and seventeen thousand spectators witnessed the contest. The price of seats ranged from $25 for ringside sections to $5 for bleacher seats and $3 for admission. Several squads of Cuban Rural Guards patrolled both inside and outside the track to preserve order. Five machines were used in taking moving pictures of the fight, which have been exhibited in Canada, South America and some parts of Europe, but not in the United States, due to interstate commerce regulations.

No official announcement of the gate receipts or the division of the same was made by the promoters. The receipts from all sources were placed at between $60,000 and $70,000. Out of this sum Johnson received $32,000 and the remainder was divided between Willard and the promoters upon a percentage basis not made public. Willard's was understood, however, to have been less than that received by any heavyweight championship-winning pugilist in modern ring history.

Betting on the fight favored Johnson from the time the match was made until the pugilists entered the ring. In the early stages the negro was quoted as high as 2 to 1, but the odds fell steadily until the day of the fight, when 6 to 5 was the basis of the few wagers made around the ringside. Betting was light at all times, the biggest play being made in the mutuel machines at the race track before and during the battle.

Both pugilists were carefully examined by physicians before entering the ring and each was declared to be in perfect physical condition. Willard had the advantage of height, weight, reach, and youth over Johnson, although the negro was conceded to be a far more skilful boxer. Both stepped on the scales in the ring and the weights were announced as Willard, 236 pounds; Johnson, 225 pounds, although it was understood that the pugilists exceeded this weight by from five to ten pounds each.

Willard was seconded by Tom Jones, Tex O'Rourke, Jim Savage, Walter Monahan, and Jack Hemple, while Johnson had in his corner Tom Flanagan, George Monroe, Sam McVey, Dave Mills, Bob Armstrong, and Colin Bell. The officials of the fight were: Referee, Jack Welsh, San Francisco; alternate referee, Matt Hinkel, Cleveland; official timekeeper and stakeholder, Bob Vernon, New York; timekeeper for Willard, Otto Floto, Denver; for Johnson, Sam Bennett, Toronto.

The physical statistics of the fighters were as follows:

PUGILISTIC CHAMPIONS AND RECEIPTS.

All attempts to designate and classify the pugilistic champions and title holders are more or less arbitrary because of the fact that few such champions won and defended the championships at the same weight. Among the lighter weight boxers it is not at all unusual for a pugilist to be forced from one class into the next higher by growth and increased weight. The following list, dating from 1890, is generally accepted by critics and boxers as being the correct classification, although holders did not always win title from previous champions:

AMERICAN AUTOMOBILE ASSOCIATION.

President—John A. Wilson. *Vice-Presidents*—H. M. Rowe, Ralph W. Smith, F. L. Baker, H. J. Clark, Preston Belvin. *Chairman of Executive Board*—A. G. Batchelder. *Secretary*—John N. Brooks. *Treasurer*—H. A. Bonnell. Headquarters, Riggs Building, Washington, D. C., and 437 Fifth Avenue, New York City.

The American Automobile Association is the national organization of motor car users. It was organized in 1902 and has a membership of over 70,000, subdivided into over 500 State and local clubs, besides which there are many individual members in the several States. Its main objects, briefly stated are: To unite in one body all the automobile clubs and individual motorists of the country to secure reasonable and just legislation; to aid in proper enforcement of automobile laws and ordinances; to advocate and obtain local, State and Federal aid in the construction and maintenance of good roads; to encourage touring and to secure, prepare and disseminate information relative thereto; and to support sportsmanlike contests and other movements that will advance motoring interests.

THE AUTOMOBILE INDUSTRY.

THE AUTOMOBILE BILL OF THE UNITED STATES.

On June 1, 1915, the number of automobiles in the United States was 2,000,000. Figuring on an average of four persons to each car, which is very conservative, there are 8,000,000 people in this country in daily enjoyment of motoring. What it costs to follow this sport is of interest, because of the stupendous figures involved. To run 2,000,000 cars for one year requires at the very least 1,000,000,000 gallons of "gas," worth $130,000,000; 20,000,000 gallons of lubricating oil, worth $8,000,000; 12,000,000 tires, worth not less than $16 apiece, or $192,000,000; accessories and extra comforts, goggles, gloves, and caps, $50 per car, or $100,000,000; garage charges on short tours (exclusive of gas and oil), $100 per car per year, or $200,000,000; repairs made necessary by wear, tear, and accident (exclusive of tires), $50 per car per year, or $100,000,000. Total running expenses for all cars in use, $730,000,000. Add thereto the value of the 500,000 new cars purchased during the year, at an average price of $750, or $450,000,000, and we get the immense total of $1,180,000,000 spent in a single year (1915) on the sport of motoring.—*Scientific American.*

THE INDUSTRY IN NEW YORK STATE.

The tremendous growth in the use of motor vehicles in New York State is demonstrated by the registration and license figures, together with the total receipts since 1910. In the early years, however, annual registration was unnecessary, so that the figures up to 1910 do not show the total number of machines in operation, only those registered in each year. When the present law took effect in August, 1910, there was a re-registration of all machines. The official figures for the registration of cars, licensing of chauffeurs, with the total receipts, are:

Year.	Owners.	Chauffeurs.	Receipts.	Year.	Owners.	Chauffeurs.	Receipts.
1901	954	.....	*$954.00	1910 (to July 31)	19,252	9,595	$57,694.00

AVIATION.

THE European war completely paralyzed competitive aviation, aeroplanes being commandeered for military purposes and aviators pressed into army service. (For notable altitude flights, etc., see 1915 ALMANAC.)

NOTABLE PERFORMANCES, ACCIDENTS, ETC.

February 8-10—Hans Berliner in a spherical balloon with two companions travelled from Bitterfeld, Germany, to Bissertsk, Russia, a distance of 1,897 miles, establishing a world's record. The balloonists were tried on the charge of landing in Russia without Government permission, found guilty, and sentenced to pay a fine of $1,000 or serve six months' imprisonment.

May 22—Zeppelin dirigible L-3, built for the German Navy, in its trial trip cruised from Friedrichshafen over Frankfort, Metz, Bremen, Heligoland and return to Potsdam, being in the air continuously for thirty-four hours fifty-nine minutes, at a speed varying from sixty to ninety miles per hour. While over Heligoland the L-3 was in wireless communication with the dirigible LZ-24 over Friedrichshafen.

June 20—The destruction of the Austrian dirigible M-III. was one of the worst aeronautical catastrophes recorded, causing a loss of the lives of nine aeronauts. The Körting airship set out from Fischamend, near Vienna, and soon after a biplane piloted by Lieut. Flatz set off in pursuit. The aeroplane overtook the dirigible when the latter was at a height of 400 metres. The aeroplane appeared to attempt to rise over the airship, but in some way the two aircraft collided. The aeroplane capsized and fell to the ground, while a great gash was made in the envelope of the airship, and an explosion followed. The seven occupants of the car of the airship, Capt. Hanswirt, Lieuts. Hofstetter, Breuer and Hardinger, Corporal Hadima, Private Weber, and Civilian Engineer Kammerer, were all killed and burned to an unrecognizable extent. The aeroplane fell not far from the wreck of the airship, and both the pilot, Lieut. Flatz, and his passenger, Naval Lieut. Puchta, were killed instantly. The M-III., built in 1911, was 65 metres long, of 3,600 cubic metres gas capacity.

June 28-29—The French military dirigible Adjutant Vincenot, piloted by Georges Joux and carrying eight passengers, established a new world's record for continuous navigation by dirigibles, remaining in the air for thirty-five hours and twenty minutes. The Adjutant Vincenot left Toul, France, June 28 and covered a wide circuit, including Paris, and landed late on the night of June 29. The German dirigible Zeppelin L-3 established the previous record of thirty-four hours and fifty-nine minutes on May 22 in a flight from Friedrichshafen, as noted above.

August 24—A German Zeppelin sailed over the city of Antwerp, Belgium, late at night and dropped eight bombs. Observers thought that the bombs were aimed at the palace of King Albert, but the missiles missed the palace by several hundred yards. One bomb partially wrecked the hospital of St. Elizabeth, which contained no patients at the time of the explosion. A number of private houses were wrecked, however, and close to a score of men and women killed. Reports of the capture of a Zeppelin and its crew on the Belgian border a few hours later were never officially verified.

GREAT BRITAIN'S AERONAUTICAL APPROPRIATION.

The following table shows how the $5,000,000 voted for army aviation by Great Britain early in 1914 was to be expended and how it compares with the 1913-1914 appropriation:

FRENCH AERONAUTICAL RECORDS FOR 1913.

At the annual meeting of the Aero Club of France, held on March 27, 1914, M. Besançon, the Secretary, stated in his report that during 1913 the distance covered in the air by aviators over French territory was about 13,040,000 kilometres, or, taking the kilometre as five-eighths of a mile, 8,150,000 miles, as against 3,000,000 kilometres (1,875,000 miles) flown in 1912. The number of hours of flight in 1913 was 133,800 instead of 39,000 in 1912, and the number of passengers carried was 47,900 instead of 12,200. There was in 1913 a decrease in the number of aeroplanes constructed in France, as the total was 1,148 aeroplanes and 146 hydroaeroplanes, as against 1,423 aeroplanes in 1912. There was also a decline in the number of aviation pilots' certificates by the Aero Club of France last year, as it was 384 as against 489 in 1912.

GERMAN AERONAUTICAL RECORDS FOR 1913.

The official reports of the aerodrome authorities at Johannisthal, the centre of German aviation, while not as complete as those of the Aero Club of France, show the following records as compared with those of 1912: Miles flown—1913, 205,000; 1912, 98,300. Flying days—1913, 336; 1912, 317. Hours in air—1913, 4,039; 1912, 1,966. Number of flights—1913, 36,817; 1912, 17,651. Machines broken—1913, 320; 1912, 165. Fatalities—1913, 12; 1912, 5.

CRICKET—*Continued.*

Somerset C. C. (Bermuda) made a visit to New York playing three games, winning two and the other was drawn.

New York for the first time placed a team in the Halifax Cup competition in Philadelphia, and made a remarkable showing, finishing second. B. Kortlang of the New York team headed the batting averages.

Benn's Mohair defeated Woonsocket by one run in the final game of the Rhode Island and District Amateur Cricket League.

Owing to the European war the International match between United States and Canada did not take place.

Camden Albin won the championship of the St. George League (Philadelphia).

Germantown won the championship of the Associated Clubs Cup (Philadelphia).

Haverford College won the Intercollegiate Championship.

Philadelphia Juniors won the Junior Championship in Philadelphia.

Old Country Cricket Club won the championship of the Church Mercantile League (Toronto). There was no first class cricket in England due to the war and the annual matches between Oxford University and Cambridge University and the Eton vs. Harrow games did not take place.

H. Livingston of the Pittsburgh Field Club established a record for the United States by scoring three consecutive centuries in one week in a tournament held in Chicago in August, 1907; a similar feat was performed by H. N. R. Coblet in Canada in a tournament held in Vancouver, British Columbia, in August, 1906. H. V. Hordern of the University of Pennsylvania established a record for the United States and Canada by securing 213 wickets during 1907. J. B. King and F. F. Kelly are the only two bowlers who have taken over 2,000 wickets. A. C. MacLaren scored 424 for Lancashire vs. Somerset at Taunton, England, July, 1895—the record in a first-class match. A. F. J. Collins, playing at Clifton June, 1899, for Clarke's House against North Town, scored 628, not out—the record in any match. Melbourne University scored 1,094 runs against Essenden at Melbourne (Australia), 1898—the highest authenticated record. In a match between A. E. Stoddart's English team and New South Wales 1,739 runs were scored—a record in first-class cricket. The longest partnership on record was 623 runs by Captain Oakes and Private Fitzgerald, First Royal Munster Fusiliers vs. Army Service Corps at Curragh, 1895. In a small match in Australia F. R. Spofforth bowled down all 10 wickets of his opponents in each inning—a feat without parallel. F. R. Spofforth on the Australian tour in 1878 took 764 wickets—a world's record. Dr. W. G. Grace, the world's greatest cricketer, died October 23, 1915. He hit up 217 centuries during his career, which will not likely ever be equalled.

Best records in the United States and Canada are by G. S. Patterson eleven playing against A. M. Woods eleven at Philadelphia, scoring 689 runs, in 1894. Australians against Vancouver scored 633 for 8 wickets in 1913. J. B. King scored 344 runs for Belmont against Merion B. in 1906. W. Robertson, 206, not out, and A. G. Sheath, 118, not out, scored 340 runs in partnership, without the loss of a wicket, at San Francisco in 1894. Smallest score, Americas 0 against Roseville at Guttenberg, N. J., in 1897. The smallest score in international match in United States, West Indians 13 against Australians, 1913. Smallest score in Canada, Winnipeg 6 against Australians, 1913. Largest score in the Metropolitan District Cricket League Championship, New Jersey Athletic Club 385 runs for 5 wickets against Manhattan, at Bayonne, N. J., 1897.

Seven centuries in a season, P. J. Higgins of Los Angeles in 1912, 159, 100, 100, 121, 182, 110, 240.

G. S. Patterson of the Germantown C. C. scored 1,748 runs in season of 1892—a record for the United States. Rev. F. W. Terry of Toronto C. C. scored 1,509 runs in season of 1892—a record for Canada.

REVOLVER SHOOTING—*Continued.*

U. S. R. A. LEAGUE CONTEST.

During the Winter of 1914-1915 a series of twenty-one matches was shot between as many different teams from affiliated clubs.

This league series conducted annually each Winter means as much to the pistol and revolver sportsman as the baseball leagues to the most ardent "fans."

The conditions of the matches are annually agreed upon, and the clubs at the close are divided into classes of four clubs per class and medals issued to the first and second teams of each class. The teams were composed of ten men, the scores of the best five to count, revolvers and pistols admitted on even terms, distance twenty yards, artificial light, 25 shots per man, with a 250 possible.

The standing of the clubs in the 1914-1915 series is given below:

	Won.	Lost.
Class A.		
Springfield Revolver Club	20	0
Olympic (of Olympic Club, San Francisco)	18	2
Pittsburgh Revolver Club	17	3
Portland Revolver Club (Portland, Ore.)	17	3

Chicago Revolver Club	5	15
Portsmouth Revolver Club (N. Hamp.)	2	18
Citizens' Rifle and Revolver Club (Rochester)	2	18
Belleville Rifle and Revolver Club (Ill.)	1	19

The Osborn Rifle Club of Sault Ste. Marie entered, but was unable to complete the series.

Teams winning and losing the same number of matches tied, and their position was determined by "shooting off the ties."

POLICE TEAM CHAMPIONSHIP.

The match as shot called for teams of five men, twenty shots per man, association target for twenty yards; weapons, revolvers with not less than .32 calibre, three-pound pull, maximum barrel 4½ in.

Scores to be fired in strings of five shots each with a time limit of two minutes per string. Possible per man 200; per team 1,000.

* Made in handicap.

A handicap record from scratch is recognized as competition record if the time made is better than has been made in any scratch race of the same distance. One hour, 28 miles 19 yards, W. Hedspeth, Dayton, Ohio, July 31, 1902.

NOTE—The fastest time ever made in competition in a half-mile contest was done by Frank L. Kramer, from scratch in a handicap, at the Newark Velodrome (Vailsburg), Sept. 16, 1914. He was officially clocked at 0.53 flat, but as he did not finish in first position his time does not count as a competition record.

Owing to the fact that there was a tie for points between Kramer and Goullet early in September, and it was impossible to conduct another full series of championship events prior to the official closing of the championships on October 3, it was decided to run a series of three events, the winner of two of these to be the 1915 champion. These were in reality match races, Kramer winning both, the first a quarter-mile event on September 19, and the second a five-mile event on October 3. This was Kramer's fifteenth consecutive yearly victory as champion.

Kramer-Lawson won one-mile professional championship for 1915, at Newark Velodrome, September 5.

IMPORTANT CYCLING EVENTS.

The World's Championships for 1915 were originally assigned to England by the Union Cycliste Internationale. The European war caused the National Cyclists' Union of England to abandon the project and the National Cycling Association of the United States volunteered to run the championships, subject to the subsequent approval of the U. C. I. The functions of the U. C. I. having been temporarily suspended by the war, official action has not been taken on the matter, but as the National Cycling Association is a charter member of the U. C. I., and will turn into its treasury almost a thousand dollars as the official championship percentage, there is no doubt but that the championships run at the Newark Velodrome on August 22 and September 5, 1915, will be legalized. Two championships were run, the professional one-mile, which was won by Frank L. Kramer, of East Orange, N. J., and one-mile amateur, which was won by Hans Ohrt, of the Olympic Club, San Francisco. The motor-paced championships were not run.

Paul Guignard holds the 100-kilometre paced record, made at Munich, September 15, 1909, in the time of 59m. 1s. Guignard also holds the 1-hour professional paced record, made the same time and place, of 63 miles 189.8 yards. At Munich Guignard, on July 23, 1909, rode 31 miles 1,198 yards in the half-hour (a record). The amateur 1-hour motor-paced record is 56 miles 1,128 yards, and was made by Francois Cuzin at Munich, September 30, 1909. Cuzin completed 100 kilometres in 1h. 5m. 45 2-5s. Oscar Egg, at the Velodrome Buffalo, Paris, in June, 1914, rode 27.50 miles unpaced in the hour. Arthur Van der Stuyft made a two-hour paced record at Leipsic, Germany, October 11, 1908, of 106 miles 1,498 yards.

Six-day race, Boston, Mass., November 8-13, 1915, 10 hours per day. Final score: Grenda-Hill, 1,409 miles 1 lap, 99 points; McNamara-Stears, 1,409 miles 1 lap, 97 points; Bedell-Magin, 1,409 miles 1 lap, 86 points; Root-Hanley, 1,409 miles 1 lap, 78 points; Walthour-Carmen, 1,409 miles 1 lap, 64 points; Cameron-Kaiser, 1,409 miles 1 lap, 55 points; Dupuy-Moran, 1,409 miles 1 lap, 53 points; Eaton-Madden, 1,409 miles 1 lap, 52 points; Sullivan-Linalt, 1,409 miles.

Chicago Six-Day Race, November 20-25, 1915 (continuous), Lawrence-Hanley, 2,582 miles, 32 points; Ryan-Thomas, 2,582 miles, 35 points; Walthour-Walker, 2,582 miles, 45 points; Mitten-Hansen, 2,582 miles, 54 points. (The scoring for points in this race in the last hour was 1 for firsts, 2 for seconds, etc.) Root-Lawson, fifth; Cameron-Kaiser, sixth; Piercy-Bedell, seventh; Madden-Eaton, eighth; Dupuy-Anderson, ninth; Madonna-Ohrt, tenth.

(Compiled by R. F. Kelsey, Chairman Board of Control, National Cycling Association.)

TERRITORY OF ALASKA.

(Statement prepared by Charles E. Davidson, Secretary of Alaska.)

ALASKA was purchased in 1867 for $7,200,000, and since that time has yielded over sixty-six times its purchase price. Congress did not pay any attention to Alaska for the first seventeen years of its existence. From the date of its purchase until 1877 a Collector of Customs and some troops were the sole representatives of the Territory. However, since 1867 (and by far the greater portion since 1899, or only fifteen years), according to official documents, its output has been:

Gold	$244,292,540
Silver	2,251,191
Copper	20,292,860
Other minerals	2,202,120
Fisheries and furs	279,379,490
Other merchandise	1,226,132
Total	$549,644,333

Alaska is situated in approximately the same latitude as the Scandinavian countries, but the climate is much milder, especially along the coast, where there is an unusually large amount of rain fall.

The Agricultural Department has established successful experimental stations at various points within the Territory, demonstrating that vegetables, grains, grasses, and live stock are adapted to the climate.

Next to mining, the fisheries are the most productive industry in the Territory.

The first arterial route of a Government railroad in Alaska, reaching from the coast to navigable waters of the interior, was designated by the President on April 11, 1915. Starting from Seward, on Resurrection Bay, the route follows the line of the Alaska Northern Railroad (acquired by purchase) to Mile 72 on Turnagain Arm of Cook's Inlet; thence following the north shore of the arm to Ship Creek; thence in a generally northerly direction along Knik Arm and the easterly side of the Susitna Valley to Broad Pass in the Alaska range of mountains and the headwaters of the Nenana River; thence down the river to the Tanana Valley and Fairbanks, a total distance of 471 miles, with a spur of 38 miles from a point near the head of Knik Arm to the Matanuska coal field. The estimated cost of this system is $26,800,000. Congress authorized the construction of Government railroads in Alaska to the extent of $35,000,000, which leaves a balance of $8,200,000 available for other routes or branches.

The large and extensive coal fields—the Bering River, the Matanuska Valley, and the Nenana fields—containing deposits of high grade character, were subdivided into townships by Government surveyors during the Summer of 1915. A portion of these and other fields contain low grade deposits known as lignite.

The route of the railroad will open up the development of the coal fields, as well as make available for settlement the many thousands of acres of agricultural lands, not to speak of the immense regions known to be highly mineralized, which the lack of transportation facilities heretofore has prevented the extraction of minerals except at a loss. Every one familiar with Alaska is confident that the building of the road will revolutionize conditions in the North.

The principal shipments from Alaska for the fiscal year ended June 30, 1915, were: Gold, $15,180,824; fish (salmon, canned, and all other), valued at $19,224,849; copper, $5,182,004; and silver ore $251,136.

MEAT AND DAIRY PRODUCTS IN AMERICAN TRADE, 1914-1915.

(From a Report of the Department of Commerce, revised to October 20, 1915.)

Imports of meat and dairy products into the United States in the fiscal year ended July 1, 1915, were three times the value of those in 1913 and eight times those of a decade ago. This movement, according to the records of the Bureau of Foreign and Domestic Commerce, Department of Commerce, first assumed large proportions in the fiscal year 1914, following the transfer of meats to the free list. More recent months, however, have reversed the upward trend, since every month from February to September, 1915, shows much smaller imports than in the corresponding month of the preceding year or when compared with earlier months of the current fiscal year.

In the twelve months ending with June, 1915, imports of meat and dairy products aggregated $43,000,000 in value, meats representing two-thirds of the total. In 1913-1914 the same months gave a total of $39,000,000, and in 1912-1913 $15,000,000. Prior to 1910 the total never reached $10,000,000 in any fiscal year, having been $5,250,000 in 1905 and $2,000,000 in 1895.

Our imports of meats are mainly supplied by Argentina. The fiscal year 1915 brought 131,000,000 pounds of fresh beef and veal from Argentina, 15,000,000 pounds from Canada, 14,000,000 from Uruguay, 10,000,000 from Australia, and 9,000,000 from the United Kingdom.

The United States still exports far more meats than it imports, for although there have been record-breaking arrivals in the last two years, exports have been even larger, the value of meat and dairy products exported in 1915 having exceeded $220,000,000 in value, thus rising above the level that marked the decade prior to 1909.

A study of the official figures shows that while the imports have consisted chiefly of beef and mutton in the primary stages of preparation, the exports have included considerable quantities of bacon, hams, lard, canned and preserved meats, and other meat products in a more or less advanced state.

In fresh beef there is now a large movement both into and out of the country. The large outward movement, however, is a development of recent months. Approximately 50,000,000 pounds of fresh beef were exported in June, and more than 168,000,000 pounds in the period from August 1, 1914, when the European war began, to the end of June, 1915; while the aggregate for the three-year period ending June 30, 1914, was only 29,000,000 pounds.

It is also apparent that the United States pays less for the meats which it buys than it receives for those it sells. In June we imported 15,500,000 pounds of fresh beef valued at 9 cents per pound, f. o. b. countries of origin. In the same month we exported 48,750,000 pounds valued at 13 cents per pound at the domestic port of shipment. For the ten months ending with April, 1915, the imports and exports were 184,000,000 and 170,000,000 pounds respectively, valued at 9 cents per pound for the imports and 12¾ cents per pounds for the exports.

SOLDIERS' HOMES.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

President of the Board of Managers...Col. Frederick J. Close, Commerce Building, Kansas City, Mo.
Secretary.....Gen. George H. Wood, Dayton, Ohio.

There are branches of the National Home at Dayton, Ohio; Milwaukee, Wis.; Togus, Me.; Hampton, Va.; Leavenworth, Kan.; Santa Monica, Cal.; Marion, Ind.; Danville, Ill.; Johnson City, Tenn., and Hot Springs, S. Dak. The aggregate number of members cared for is about 35,000.

REQUIREMENTS FOR ADMISSION.

1. An honorable discharge from the United States service during a war in which it was engaged.
2. Disability which prevents the applicant from earning his living by labor.
3. Applicants for admission will be required to stipulate and agree to abide by all the rules and regulations made by the Board of Managers, or by its order; to perform all duties required of them, and to obey all the lawful orders of the officers of the Home. Attention is called to the fact that by the law establishing the Home the members are made subject to the Rules and Articles of War, and will be governed thereby in the same manner as if they were in the Army of the United States.
4. A soldier or sailor must forward with his application for admission his Discharge Paper, and when he is a pensioner, his Pension Certificate, which papers will be retained at the branch to which the applicant is admitted, to be kept there for him, and returned to him when he is discharged. This rule is adopted to prevent the loss of such papers and certificates, and to hinder fraudulent practices; and no application will be considered unless these papers are sent with it. If the original discharge does not exist, a copy of discharge, certified by the War or Navy Department, or by the Adjutant-General of the State, must accompany the application.

There are State Homes for disabled volunteer soldiers provided by the States of California, Colorado, Connecticut, Idaho, Illinois, Indiana, Iowa, Kansas, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Washington, Wisconsin, and Wyoming.

UNITED STATES SOLDIERS' HOME FOR THE REGULAR ARMY.

The United States Soldiers' Home in the District of Columbia receives and maintains discharged soldiers of the *regular* army. All soldiers who have served twenty years as enlisted men in the army (including volunteer service, if any), or who have served in any war, and all soldiers of less than twenty years' service who have incurred such disability, by wounds, disease, or injuries *in the line of duty while in the regular army*, as unfits them for further service, are entitled to the benefits of the Home.

A pensioner who enters the Home may assign his pension, or any part of it, to his child, wife, or parent, by filing written notice with the agent who pays him. If not so assigned, it is drawn by the treasurer of the Home and held in trust for the pensioner, to whom it is paid in such sums as the governor of the Home deems proper while he is an inmate of the Home, the balance being paid in full when he takes his discharge and leaves the Home.

Inmates are subject to the Rules and Articles of War, the same as soldiers in the army. They are comfortably lodged, fed, and clothed, and receive medical attendance and medicine, all without cost to them. There are 1,462 men now receiving the benefits of the Home.

Applications for admission to the Home may be addressed to the "Board of Commissioners, U. S. Soldiers' Home, War Department, Washington, D. C.," and must give date of enlistment and date of discharge, with letter of company and number of regiment for each and every term of service, and rate of pension, if any, and must be accompanied by a medical certificate showing nature and degree of disability if any exists.

CONFEDERATE SOLDIERS' HOMES

There is a home for Confederate veterans of the Civil War at Beauvoir, near Biloxi, Miss. It is supported by the United Sons of Confederate Veterans' Society and the United Daughters of the Confederacy. There is another home in Washington, D. C., which was opened by the Southern Relief Association.

AMERICAN PIONEERS OF '98.

This organization was formed and registered with headquarters in San Juan, Porto Rico, December, 1913, for the purpose of promoting social intercourse and friendship, and providing means for closer ties of friendship, between the American pioneers of Porto Rico, who constitute its membership, and to maintain a register of American pioneers in Porto Rico. *President*—Harrison Johnson. *Secretary*—John L. Haas. *Treasurer*—John E. Heinzman.

ORGANIZATION OF THE ARMY.*

THE army in active service as now organized under the acts of Congress of February 2, 1901, January 25, 1907, April 23, 1908, and March 3, 1911, comprises 15 regiments of cavalry, 765 officers and 14,148 enlisted men; 6 regiments of field artillery, 252 officers and 5,541 enlisted men; a coast artillery corps, 170 companies, 715 officers and 19,019 enlisted men; 30 regiments of infantry, 1,530 officers and 35,339 enlisted men; 3 battalions of engineers, 1,942 enlisted men, commanded by officers detailed from the corps of engineers; the Porto Rico Regiment of Infantry, 32 officers and 599 enlisted men; staff corps, Service School detachments, Military Academy, Indian scouts, recruits, etc., 7 officers and 10,039 enlisted men, and a provisional force of 52 companies of native scouts in the Philippines, 182 officers and 5,733 enlisted men. The total number of commissioned officers, staff and line, on the active list, is 4,827 (including 91 first lieutenants Medical Reserve Corps on active duty, 60 dental surgeons, and 229 additional and detached line officers), and the total enlisted strength, staff and line, is 87,248, exclusive of the provisional force and the Hospital Corps, and Quartermaster Corps. The law provides that the total enlisted strength of the Army shall not exceed at any one time 100,000. * For Military Departments and Commands, see Index.

ENLISTMENT LAW FOR THE UNITED STATES ARMY.

THE Army act of August 24, 1912, prescribes a seven years' term of enlistment in the Army after November 1, 1912, in lieu of the previous term of three years, the first four years with the colors in active service, and the remaining three years on furlough, without pay, and attached to the Army Reserve established by the same act. The Army Reserves are subject to be called into active service only in the event of actual or threatened hostilities.

A soldier after four years' continuous service, either under a first or any subsequent enlistment, may be re-enlisted for seven years and receive a final discharge from his prior enlistment, or after three years' continuous service may, upon his written request, be furloughed and transferred to the reserve. Enlistment periods for service pay are counted as four years. First enlistments are confined to men between the ages of 18 and 35 years. All soldiers receive, in addition to their pay, rations, clothing, bedding, and medical attendance while with the colors.

The monthly pay during first enlistment ranges from $15 to $18 for privates. For non-commissioned officers the rates are $21, $24, $30, $40, $45, $50, $65 and $75, respectively, according to grade, arm or corps, and nature of duties. Master electricians of the Signal Corps and the Coast Artillery Corps, and chief musicians of bands, receive the highest rate, $75 per month.

Additional pay of from $1 to $4 per month for continuous service is allowed during each enlistment period of four years, after the first, up to and including the seventh. In addition to all other pay, qualified or expert gunners, riflemen, sharpshooters and marksmen receive from $2 to $5 per month. Casemate electricians, plotters, planters, loaders, gun commanders, gun pointers, etc., of the Coast Artillery Corps receive from $6 to $9 per month additional. Twenty per cent. increase of pay is allowed for service in the Philippines and China.

Enlisted men may be retired after 30 years' service, with three-fourths of the pay of their grade, and $15.75 per month additional in lieu of clothing, subsistence, quarters, fuel and light. Unmarried soldiers under 30 years of age of not less than two years' service may compete in examination for promotion to Second Lieutenant.

UNITED STATES MILITARY ACADEMY AT WEST POINT.

EACH Senator, Congressional District, and Territory, including Porto Rico, Alaska, and Hawaii, is entitled to have one cadet at the academy; the District of Columbia, two cadets. There are also forty appointments at large, specially conferred by the President of the United States. The law (act of March 4, 1915) provides that until the appointment of Representatives in Congress among the several States under the Fourteenth Census of the United States becomes effective (March 4, 1923), whenever any cadet shall have finished three years of his course at the academy his successor may be admitted.

Appointments are usually made one year in advance of date of admission, by the Secretary of War, upon the nomination of the Senator or Representative. These nominations may either be made after competitive examination or given direct, at the option of the Representative. The Representative may nominate two legally qualified second candidates, to be designated first and second alternates. The alternates will receive from the War Department a letter of appointment, and will be examined with the regular appointee, and the better qualified will be admitted to the academy in the event of the failure of the principal to pass the prescribed preliminary examinations. Appointees to the Military Academy must be between seventeen and twenty-two years of age, free from any infirmity which may render them unfit for military service, and able to pass, unless a satisfactory certificate is submitted, a careful examination in English grammar, English composition, English literature, algebra through quadratic equations, plane geometry, descriptive geography and the elements of physical geography, especially the geography of the United States, United States history, the outlines of general history. The Secretary of War is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Philippine Commission, to receive instruction at the United States Military Academy at West Point; *Provided* That the Filipinos undergoing instruction shall receive the same pay, allowances, and emoluments as are authorized by law for cadets at the Military Academy appointed from the United States, to be paid out of the same appropriations; *And provided further*, That said Filipinos undergoing instruction on graduation shall be eligible only to commissions in the Philippine Scouts; serve for eight years, unless sooner discharged.

The course of instruction, which is quite thorough, requires four years, and is largely mathematical and professional. The principal subjects taught are mathematics, English, French, drawing, drill regulations of all arms of the service, natural and experimental philosophy, chemistry, chemical physics, mineralogy, geology, electricity, history, international, constitutional, and military law, Spanish, civil and military engineering, art and science of war, and ordnance and gunnery. About one-fourth of those appointed usually fail to pass the preliminary examinations, and but little over one-half the remainder are finally graduated. The discipline is very strict—even more so than in the army—and the enforcement of penalties for offences is inflexible rather than severe. Academic duties begin September 1 and continue until June 4. Examinations for cadets not having made satisfactory progress in studies are held in each December and June, and cadets found proficient in studies and correct in conduct are given the particular standing in their class to which their merits entitle them.

From about the middle of June to the end of August cadets live in camp, engaged only in military duties and receiving practical military instruction. Cadets are allowed but one leave of absence during the four years' course, and this is granted at the expiration of the first two years. The pay of a cadet is $709.50 per year, and, with proper economy, is sufficient for his support.

Upon graduating, cadets are commissioned as Second Lieutenants in the United States Army. The whole number of graduated from 1802 to 1915, inclusive, has been 5,476. It is virtually absolutely necessary for a person seeking an appointment to apply to his Senator or Member of Congress. The Superintendent is Colonel Clarence Page Townsley, Coast Artillery Corps, U. S. A., and the military and academic staff consists of 134 persons.

MILITARY SMALL ARMS.

COMPILED from latest available data. Changes are frequently made, and it is difficult to present accurate statistics.

About 1880 all the civilized countries began rearming their troops with magazine rifles of small calibre, using high power cartridges with smokeless powder. Modifications and improvements in these as well as in carbines and pistols, have materially added to their effectiveness. At the present time no great difference exists in the effectiveness of the kinds of rifles with which the armies of the great powers are supplied with regard to their ranges and shooting qualities. It is well known that the effectiveness of any arm depends greatly on the experience and skill of the men who use it, and that, other things being equal, the troops most thoroughly instructed and drilled in the use of the rifle are the most efficient in battle.

An automatic rifle will be, doubtless, the military weapon of the near future. The United States and nearly all of the principal countries of Europe have been experimenting with rifles of this type. It seems, however, that, as yet, no automatic shoulder rifle has been brought forward that is considered to be sufficiently reliable and effective for war purposes to justify the great expense of adopting it in the place of those now in use.

A few years ago the Mexican Government ordered some 4,000 rifles of the automatic type, known as the "Mondragon," with which to arm part of its army. This gun has the same calibre and uses the same cartridge as the German Mauser, with which the Mexican troops are mostly armed, but information as to the result of this experiment of introducing an automatic rifle to actual military use is lacking.

Germany adopted an automatic pistol for military use in 1908. The United States has adopted for the Army and Navy, in place of the service revolver, the Colt automatic pistol, after extended experiments and tests. This is regarded as a very effective weapon. Its length is 8.5 inches; length of barrel, 5 inches; weight, 2 lbs. 7 oz.; calibre, .45; cartridges in magazine, 7. The German automatic pistol has a length of 8.54 inches; length of barrel, 4.02 inches; weight, 1 lb. 13½ oz.; calibre, .35; cartridges in magazine, 8.

EXPENDITURES FOR THE ARMY AND NAVY DURING 120 YEARS, BEGINNING IN 1794.

Total naval expenditures, 1794 to 1914, inclusive, $3,071,179,958. Two-fifths of this sum was spent from 1897 to 1913, inclusive, $1,464,604,422.

The annual expenditures have grown in recent years as follows: 1879, $15,125,126; 1889, $21,378,809; 1897, $34,561,546; 1893, $58,823,984; 1904, $102,956,101; 1914, $139,682,186.

The army expenditures have grown as follows: 1879, $40,425,660; 1914, $173,522,804.

Total estimated present value of Navy Yards and naval stations, $195,000,000. The sites cost $2,836,375; the buildings, improvements, and machinery, 1800 to 1910, cost $159,173,509; the maintenance, including repairs, has cost, $159,604,944; average yearly cost of maintenance is now about $12,251,954. The total sums provided for the principal yards, 1899 to 1916, inclusive, have been: Brooklyn, $7,809,729; Philadelphia, $6,381,569; Washington, $3,230,505; Norfolk, $7,055,147; Boston, $4,754,250; Portsmouth, $4,622,425.

During the Taft Administration the appropriations for naval shore stations averaged over $5,000,000 a year. In the Wilson Administration they have averaged $2,300,000 a year, the bulk of the appropriation going for new ships and other improvements.

COST OF MAINTAINING ARMIES AND NAVIES.

(Does not include special or war emergency appropriations incidental to the present war. Figures for 1915-16 relating to foreign powers shown below in some instances not available.)

The cost of the British Army, according to estimates for 1914-15, amounted to $143,331,350. The estimates for the Navy for 1914-15 were placed at $256,150,026. The United States Army appropriations for 1915-16 amount to *$102,938,798 plus $4,255,401 unexpended of prior appropriations. Does not include the expenditure by the several States on their National Guard or the enormous sums paid for pensions to ex-volunteers. The Navy appropriations for 1916 amount to †$145,398,820. The estimated military expenditure of the German Empire in the budget for 1914-15 amounted to $293,289,155. The German Naval estimates for 1914-15 amounted to $113,918,367. The military budget of France for 1914 shows an estimated expenditure of ‡$202,141,122. The Navy estimate for 1915 amounted to $96,255,733. Italy during 1914-15 spent about $50,600,000 on her Navy, and about $80,025,234 on her Army. The military budget of Russia for 1914-15 called for $393,193,808, and the Navy expenditures in 1914-15 amounted to about $129,298,966. The Army estimate of Austria-Hungary for 1914 was $47,571,755, and for the Navy $35,975,338. The military expenditure of Japan for 1915 was about $47,037,809. The Navy estimates for 1916 amount to $50,000,000 and $3,000,000 allotment in 1916 for construction of new warships.

* This does not include cost of fortifications, Military Academy, etc., but only for the Army.
† This includes construction of ships, Naval Academy, Navy Yards, etc. ‡ Excluding cost of colonial troops not serving in France.

MILITARY EDUCATIONAL SYSTEM OF THE UNITED STATES.

THE military educational system of the United States, exclusive of the Military Academy at West Point, comprises the following:

I. **The Army War College,** Washington, D. C., under the management of a President and directors detailed from officers of the army. The course of instruction is for one year, beginning September 1. A limited number of officers not below the rank of captain, selected on account of exceptional efficiency and fitness, are detailed annually for instruction. The purpose of the college is to make practical application of knowledge already acquired, not to impart academic instruction.

II. **The Army Service Schools.** The group of schools established at Fort Leavenworth, Kan., consisting of the Army School of the Line as the basic school, the Army Staff College, the Army Signal School, the Army Field Engineer School, and the Army Field Service and Correspondence School for Medical Officers as special affiliated schools, are designated the Army Service Schools, and are under the direction of a Commandant not of lower grade than that of a Brigadier-General.

The course of instruction at the schools, except as otherwise stated, is included in one term from September 1 to June 30 of the following year.

1. **The Army School of the Line.** The object of this school is the instruction of selected officers from the line of the army in the leading and care of troops in time of war and their training in time of peace. The Assistant Commandant of the Army Service Schools is also the Director of the School of the Line.

Upon graduation, the student class are graded, in order of merit, as "honor graduates," "distinguished graduates," and "graduates," respectively.

2. **The Army Staff College,** for the instruction of officers detailed annually from the highest graduates of the latest class of the School of the Line, recommended by the academic Board of that school. The object of this college is to impart instruction to officers in the duties of the general staff of an army; to prepare them for the Army War College and to investigate military inventions, discoveries and developments.

The Commandant, Assistant Commandant, Secretary and Senior Instructors of the School of the Line hold corresponding positions in the Staff College.

3. **The Army Signal School,** for instruction of officers of the Signal Corps in their duties, including aeronautics; for instruction of officers of the line, who are designated therefor, in signal duties, and to make research and experiments in subjects pertaining to the work of the Signal Corps. The school is under the general direction of the Commandant of the Army School of the Line.

4. **The Army Field Engineer School,** for the instruction of officers of the Engineer Corps, not exceeding ten, and engineer officers of the National Guard.

5. **The Army Field Service and Correspondence School for Medical Officers,** for the instruction of officers of the Medical Corps and of the National Guard. Part one of this school requires attendance in person for a graded course of study, and part two for a course by correspondence. The course of instruction is eight weeks, from April 1 of each year. Students who complete the course satisfactorily receive certificates of proficiency.

III. **The Army Medical School,** Washington, D. C., for the instruction of medical officers of the army, candidates for appointment in the Medical Corps, and medical officers of the National Guard. The faculty consists of a President and Instructors. The course of instruction is for eight months, from October 1 each year. Graduates receive diplomas.

IV. **The Coast Artillery School,** Fortress Monroe, Virginia. The object of this school is to enlarge the field of instruction of the garrison schools for Coast Artillery officers by advanced courses of study and practical training in technical duties; to prepare specially selected officers for the more important positions in the Coast Artillery; also to educate and train selected enlisted men for the higher non-commissioned staff grades in the Coast Artillery. The courses of instruction for officers and enlisted men are each comprised in one school year, from January 3 to December 1. Special courses in ballistics are also provided.

Officers who are graduated are furnished with diplomas, as "honor graduates," "distinguished graduates," or "graduates," according to their standing.

V. **The Engineer School,** Washington Barracks, D. C. This school is under the control of the Chief of Engineers. Its object is to prepare junior officers of engineers for the active duties of their corps; to make experiments and recommendations, and to give instruction pertaining to the civil engineering work of the army. The course of instruction is thirteen months, beginning September 1, and ending September 30, the following year. Diplomas are given to students who successfully complete the course.

VI. **The Mounted Service School,** Fort Riley, Kansas, is under the command of a field officer detailed for that purpose, who also commands the post of Fort Riley. The object of the school is to give practical instruction to field and company officers of cavalry and field artillery, and to farriers and horseshoers. The courses for field officers begin April 1 and October 10; the courses for company officers are from September 25 to June 30, following, for the first-year course, and from July 1 to June 30, following, for the second-year course, and for farriers and horseshoers two courses of four months each. Company officers who are graduated receive diplomas.

VII. **The School of Fire for Field Artillery,** Fort Sill, Oklahoma, for practical instruction in field artillery firing. Courses of instruction are prescribed: A. for captains and lieutenants; B. for field officers of field artillery; C. for non-commissioned officers, and D. for officers of the militia. Officers and enlisted men who complete any course satisfactorily receive certificates of proficiency.

VIII. **School of Musketry,** Fort Sill, Oklahoma, for instruction in small-arms firing.

IX. **Garrison Schools,** one at each military post, for the instruction of officers of the army and the National Guard, in subjects pertaining to their ordinary duties. The course covers three years and the annual terms five months each, from November 1. Certificates of proficiency in each subject of study are given to those who pass the prescribed examination therein.

X. **Post Schools for Instruction of Enlisted Men** in the common branches of education and military subjects.

XI. **Schools for Bakers and Cooks,** at The Presidio of Monterey, California, Fort Sam Houston, Tex.; Fort Shafter, Hawaii; Washington, D. C., and Fort Riley, Kansas, for the instruction of selected enlisted men.

XII. **The Signal Corps Aviation School,** San Diego, California. The object of this school is the training of officers and enlisted men in matters of military aviation.

Officers of the National Guard are admitted to most of the Army Schools, under the Militia law of January 21, 1903, and regulations prescribed by the War Department. They must be nominated by the Governors of their States. Those admitted to any of the schools receive mileage and money commutations for subsistence, quarters, etc. A considerable number of militia officers enter these schools, notably the garrison schools, annually.

THE ORGANIZED AND UNORGANIZED MILITIA OF THE UNITED STATES.

(Compiled for THE WORLD ALMANAC from the latest official reports.)

THE Militia law of January 21, 1903, as amended by the act of May 27, 1908, provides: "That the militia shall consist of every able-bodied male citizen of the respective States * * * and every able-bodied male of foreign birth who has declared his intention to become a citizen, who is more than 18 and less than 45 years of age, and shall be divided into two classes—the organized militia, to be known as the National Guard * * * or by such other designations as may be given them by the laws of the respective States or Territories; the remainder to be known as the reserve militia."

* Males from 18 to 44 years of age according to 1910 census. (a) No organized militia in Nevada. Reserve militia unorganized, 12,940.

Alaska has no militia, though provision is made for such if need arises. Guam and Samoa have each a small provisional force, used more for police purposes than for military. The Philippines have a constabulary force which can be used either for police or war purposes, provided the latter is on the islands. Porto Rico has a regiment of eight companies of infantry which is a part of the army. The enlisted men of this regiment are natives of Porto Rico. The reserve militia in the Southern States is assumed to include negroes capable of bearing arms.

ARMY AVIATION.

The act of Congress approved July 18, 1914, created an "Aviation Section" in the Signal Corps, authorizing an addition to that corps of sixty officers of the grades of captain and first lieutenant, and 260 enlisted men. The officers are to be charged with the duty of operating or supervising the operation of all military air craft and all appurtenances belonging thereto and in the instruction of the enlisted men. The officers are to be selected from the next lower grade in the line of the Army and are to be rated as military aviators and junior military aviators. Those to be rated as military aviators shall not exceed fifteen and to be selected from the junior military aviators after three years' service with that rating. The act also provides that there shall be attached to the aviation section a sufficient number of aviation students to make, with the aviation officers actually detailed in said section, a total number of sixty aviation officers and aviation students.

Military aviators receive 75 per cent. increase in their pay, and junior military aviators 50 per cent. increase, and aviation students 25 per cent. increase while on duty requiring them to participate regularly and frequently in aerial flights. Aviation enlisted men, while on duty that requires them to participate regularly and frequently in aerial flights or while holding the rating of aviation mechanician, the number of which shall not at any time exceed forty, shall receive 50 per cent. increase in their pay.

THE TRIPLE ALLIANCE AND THE TRIPLE ENTENTE.

Of the several triple alliances that have been formed in Europe, probably the best known is the one ntered into by Germany, Austria-Hungary, and Italy, which was concluded and signed May 20, 1882. appears that the aim of Italy in joining the alliance was to protect herself and to isolate her enemy, rance, in Europe. There was in existence a defensive treaty between Germany and Austria-Hungary, hich was signed October 7, 1879, but was not made public until 1888.

The establishment of a protectorate, by France, over Tunisia aroused considerable resentment in Italy imposing a menace to the South Italian and Sicilian coasts, and undoubtedly hastened the formation the Triple Alliance. This compact was to last five years, and on March 17, 1887, it was renewed. It as a defensive alliance, and specified the disposition of the military forces in the event of an attack by ther France or Russia, or by both simultaneously, but contained (in the renewal) no provision for offensive arfare; thus the terms in regard to an offensive demonstration by Italy were modified. In March, 1891, was renewed for a period of twelve years, and on June 26, 1902, it was again renewed for a further period ten years, terminating in May, 1912. It appears that in the early part of December, 1912, a further re-ewal was made. The Triple Alliance desired Italy to remain neutral, and to this end Austria-Hungary fered certain territorial concessions to Italy. They were refused by Italy. Italy denounced the alliance, nd on May 24, 1915, formally declared war on Austria-Hungary. Thus the alliance reverted to the dual ondition.

Germany and Russia, by means of a secret convention concluded in September, 1884, guaranteed to ach other "a benevolent neutrality" in the event of hostilities between Russia and Great Britain. After he death of Bismarck this convention became known, and aroused considerable resentment in Austria-ungary.

In order to secure the consent of Italy to a renewal, Germany made certain conciliations with regard the commercial products of Italy. Thus the signature of Italy to the alliance insured European peace nd guaranteed Germany security. Of recent years there has been quite a change of feeling on the part Italy toward France, tending toward an amicable settlement of disputes.

Great Britain, noting the increase in the naval programmes of the several countries, and having adopted e two-power standard for her navy, entered into agreements with France and Russia to secure the balance power and maintain the peace of Europe. The Anglo-French agreements were signed April 8, 1904, pub-ched April 12, 1904, and were ratified by France November 13, 1904. It defined the spheres of influence regard to Egypt, Morocco, Newfoundland, West Africa, Siam, Madagascar, and the New Hebrides. he Anglo-Russian agreements were signed August 31, 1907, but the full terms were not published until eptember 24, 1907. The spheres of influence in Asia were defined in view of the Anglo-Japanese Alliance.

Great Britain, maintaining a large fleet in the Mediterranean by reason of its interests, has always romoted and fostered a friendliness toward Italy. The conclusion of a commercial treaty by Italy with rance, coupled with her friendliness toward Great Britain, in view of the Anglo-French and the Anglo-ussian agreements, have all tended to isolate Germany and Austria-Hungary in Europe.

The formation of the Balkan League, comprising Serbia, Bulgaria, Roumania, Montenegro, and Albania, as introduced disquieting features into European politics, and the several states, by not acting in concert th each other, have caused the contracting parties to the alliance and the entente much concern as to hom will be the recipient of their aid.

The aims of the Triple Entente are said to be as follows: 1. To maintain a balance of power. 2. To eserve peace and the *status quo*. 3. To further the interests of peace by means of treaty laws. 4. The sarmament and the lessening of the expenditures for armaments.

THE BOY SCOUTS OF AMERICA.

ORIGIN AND GROWTH OF SCOUTING.

LIKE many other things showing permanence and power, the Scout movement can be traced back to widely separated sources where constructive ideas came to boy workers and were tested with varying degrees of success. In America there were a number of originators of methods, plans and principles that have proved effective. In Great Britain, Lieut.-Gen. Sir Robert S. S. Baden Powell became active in organization work based partly on the ideas and methods of American workers. He did this so successfully that the enrolment of British Boy Scouts soon grew into the hundred thousands, with the emphasis, not on the military note, but on peace virtues and learning practical trades. Then the movement spread to Germany, France, Italy, Australia, and New Zealand to Canada and the United States; to South American republics; in short, almost the world over since it is already established in twenty-seven different countries in addition to the numerous colonial possessions of Great Britain and the United States. Everywhere it has shown adaptation to new fields and nationalities.

In Germany the boys have engaged in the work with such enthusiasm and in such numbers that the Prussian and Bavarian authorities are giving the movement financial aid. While the number of Boy Scouts enrolled throughout the world is estimated as not less than one million, one-fifth of the whole number are in the United States. The emphasis and ideals of the movement belong here also to the highest plans—that of efficient citizenship, service, and character-building.

"The Boy Scouts of America," the name under which the movement in the United States was incorporated February 8, 1910, has as its Honorary President the Hon. Woodrow Wilson, President of the United States, and Hon. William H. Taft and Col. Theodore Roosevelt as its Honorary Vice-Presidents. Associated with these in approval and promotion of the movement are eminent citizens from all walks of public life, who are members of the National Council and of the local councils in the cities and towns of the whole country, and a host of others who earnestly co-operate in the work.

A group of men, representing the various religious and civic organizations of the community that are engaged in boys' work, are brought together as a local council for the promotion of Scout work. This local council receives a charter from the national organization, giving them full authority to deal with all questions relating to scouting in that district and to pass upon all Scout Masters' applications. In many cases this council engages a Scout Executive to take charge of the work in that community. He is responsible to the local council for the direction and promotion of the work. He is the leader of the Scout Masters, and as such gives such instructions and help as may be necessary, arranges inter-troop meets, games, camps, and in general makes uniform the plan of work conducted in that community. The Scouts are organized in patrols and troops. Eight boys constitute a patrol, one of whom is chosen as the Patrol Leader. Three patrols make up a troop. The Scout Master is the adult leader of the troop. Already there are about 700 local councils in as many cities throughout the United States and under the direction of each there are from five to one hundred and fifty Scout Masters in charge of troops.

The Scout programme is proving practicable as a civic enterprise. There are many cities so thoroughly organized that every phase of boy life in the community is being reached by Scout activities. The movement is adapting itself not only to the wealthy classes, but to the boys of the slums, to the newsboys and to foreign boys alike. Over six thousand Scout Masters are already registered with the national organization, representing about 300,000 boys that are being reached by the movement. Work to some extent has been started in practically every city in this country having a population of 4,000 or over, besides in the Hawaiian Islands, the Philippine Islands, Porto Rico and Guam. Any boy, of any class or creed, over 12 years of age, is eligible to become a Scout. The initial requirements are that he know the Scout salute, sign and laws, and that he take the Scout oath. By meeting certain requirements, he is in line to become a Tenderfoot, Second-Class and First-Class Scout.

Scouting means outdoor life, and so health, strength, happiness and practical education. By combining wholesome, attractive outdoor activities with the influence of the Scout oath and law, the movement develops character and worth-while ability.

Scoutcraft includes instruction in first aid, life saving, tracking, signalling, cycling, nature study, seamanship, campcraft, woodcraft, chivalry and all the handicrafts.

It is one of the principal purposes of the Boy Scout movement, abroad, as well as in our own country, to teach boys that to create is better than to destroy, and that peace, not war, will make a great nation. This claim is amply borne out by the splendid first aid and other humanitarian services of the most practical nature rendered by the Scouts in the present European war.

The national organization is largely maintained by public subscriptions. Sustaining and Contributing Memberships are issued to men and women throughout the country who are financially assisting in the development and promotion of this organization among boys.

The United States Marine Corps is an independent branch of the military service of the United States, serving generally under the direction of the Secretary of the Navy. The corps may be detached by order of the President for service with the army, and on various occasions parts of the corps have so served.

Marines served on shore and on board vessels of the navy throughout the Revolutionary War, two battallions having been authorized by the Continental Congress November 10, 1775, but the present organization dates from July 11, 1798, when an act of Congress was approved for establishing and organizing a marine corps to consist of 1 major, 4 captains, 16 first lieutenants, 12 second lieutenants, 48 sergeants, 48 corporals, 32 drums and fifes, and 720 privates.

The authorized strength of the corps (September, 1915) was 346 officers and 9,921 enlisted men, as follows: 1 major-general commandant, 12 colonels, 12 lieutenant-colonels, 28 majors, 107 captains, 96 first lieutenants, 90 second lieutenants, 12 sergeant-majors, 79 quartermaster sergeants, 1 drum major, 114 first sergeants, 106 gunnery sergeants, 500 sergeants, 967 corporals, 124 drummers, 124 trumpeters, 1 leader of the band, 1 second leader of the band, 30 first-class musicians, 30 second-class musicians, and 7,832 privates

The following duties are assigned to the marine corps: To garrison the different navy yards and naval stations, both within and beyond the continental limits of the United States. To furnish the first line of the mobile defence of naval bases and naval stations beyond the continental limits of the United States. To man such naval defences, and to aid in manning, if necessary, such other defences as may be erected for the defence of naval bases and naval stations beyond the continental limits of the United States. To furnish such garrisons and expeditionary forces for duties beyond the seas as may be necessary in time of peace. To serve on board all battleships and armored cruisers of the navy, and such other vessels as may be directed, and detachments of not less than 8% of the strength of the enlisted men of the navy on said vessels. CHAPLAINS IN UNITED STATES ARMY AND NAVY—*Continued.*

An act of Congress approved June 30, 1914, provides that "Hereafter the total number of Chaplains and Acting-Chaplains in the Navy shall be one to each twelve hundred and fifty of the total personnel of the Navy and Marine Corps as fixed by law, including Midshipmen, apprentice seamen and naval prisoners, and of the total number of Chaplains and Acting-Chaplains herein authorized, ten per centum thereof shall have the rank of Captain in the Navy, twenty per centum the rank of Commander, twenty per centum the rank of Lieutenant-Commander, and the remainder to have the rank of Lieutenant and Lieutenant (junior grade). Acting-Chaplains have the rank, pay and allowances of Lieutenant (junior grade), and, after serving as such at sea for three years, are appointed Chaplains. The act provides further that not more than seven Acting-Chaplains shall be commissioned Chaplains in any one year.

(*a*) Figures to the nearest dollar. The base pay in all armies is increased for length of service by percentages similar in all. In European armies officers receive extensive allowances in addition to their pay. The laws and regulations in the different countries about pay and allowances are so voluminous and cover so many varying conditions that a simple comparison of the amounts received either in pay or allowances is very difficult. The table gives, however, approximately the minimum pay for the grade.

(*b*) Grade of Lieut.-General discontinued in United States by act of Congress, March 2, 1907.

(*c*) In the British army and many others the grade of Brigadier-General is not a permanent grade, but is temporary and ex-officio only.

(*d*) In United States pay is increased with each enlistment to the seventh. Enlisted men may retire on thirty years' service with 75 per cent. of pay and allowances.

NOTE—The United States and Great Britain are the only countries having volunteer armies, and the United States the only one having a thoroughly democratic army in which both officers and men are drawn from all walks of life and which, therefore, has to offer monetary inducements in competition with the wages of labor.

In a memorandum for the Secretary of War on the subject of the pay and allowances of the different countries Brig.-Gen. M. M. Macomb, President of Army War College, made the following remarks:

"In order to make intelligent comparison of the figures given it is necessary to take into account—

1. The purchasing power of a dollar, or the cost of living in different countries.

2. That the United States and Great Britain are the only countries adhering to a volunteer system and hence having to offer monetary inducements for soldiers in competition with the wages of labor.

3. That as regards officers, the United States is the only *democratic* volunteer army. Its officers are drawn from all walks of life, and it is supposed that their salaries are sufficient to support them and their families.

In Great Britain officers are drawn almost entirely from the upper and wealthier classes, and it is not supposed that their salaries are sufficient to support them. For example, second sons and committance men generally, if possible, become officers of the army or navy, enter the diplomatic service or the clergy.

In Germany an officer before receiving permission to marry must show that he or his wife has sufficient private income to maintain himself according to his position.

In the matter of pay a simple comparison of the figures in this table, without having in mind the preceding remarks, can only lead to erroneous conclusions.

ALLOWANCES.

In the matter of allowances, all soldiers in all armies receive quarters, clothing, and rations. All officers receive quarters or allowance in lieu thereof. All mounted officers receive allowances for horse and equipment. Beyond these the allowances in different armies are impossible of comparison. In the United States officers receive allowances for fuel and light, extra pay when on aviation duty, and both officers and soldiers receive additional pay for tropical service.

In European armies the pay for different duties and the allowances for different circumstances are so many that books are required to cover them. In Russia, for example, the subject of pay is covered in four volumes.

In England additional pay is given for foreign service, for command, for armament pay, for engineer pay, for corps pay, and allowances for fuel, light, servants, mess, official entertainments, etc.

In France additional pay is given for children, for belonging to the Legion of Honor, for prison duty, for marches and manœuvres, for being stationed in Paris (on account of the high cost of living), etc., and allowances for service expenses incident to commands, office expenses, etc.

In general, the allowances in Europe for officers are relatively greater than in the United States and the pay less. But the allowances are so varied, not only between different grades but between officers and soldiers of the same grades, and the whole subject so comprehensive that any attempt to reduce the allowances of the armies of the world to a uniform basis so that they can be compared in a table is an impossibility.

POINTS CONCERNING UNCLE SAM'S NAVY.

To provide for the welfare and comfort of the officers and enlisted men of the Navy during the fiscal year of 1916, it is going to cost Uncle Sam just $41,370,563. Of this amount $11,605,153 is required to pay the officers on the active list, while the retired officers receive the sum of $3,070,230.

The perquisites allowed officers of the Navy will aggregate about three-quarters of a million dollars in 1916. Of this amount $550,000 will be spent in providing quarters for those officers who cannot be accommodated in buildings or houses maintained by the Government, and $200,000 for the item of heat and light for officers using other than Government quarters and in Government quarters where no heating and lighting plant is maintained by the Government; also the item of rations, for enlisted men and certain officers, which figured at 30 cents a day amounts to nearly $5,500,000. The sum of $540,000 is required to pay the midshipmen under instruction at the Naval Academy.

The pay of the enlisted men of the Navy is divided into the following items. Pay of 48,000 petty officers, seaman, etc., $23,616,000; 3,500 apprentices under training, $742,560; 435 retired enlisted men, $340,000, and 1,000 enlisted men in prisons undergoing sentences of court-martial, etc., $200,000.

Each man in the Navy holding an honorable discharge receives a bounty. This item will cost the Government $927,000 in 1916. There is also required the sum of $15,520 for interest on the deposits held by Uncle Sam for the enlisted men of the Navy. One hundred and sixteen thousand nine hundred and forty dollars is required to pay the Female Nurse Corps of the Navy and $15,480 is allowed them for commutation of quarters.

Each officer or enlisted man in the Navy who dies from wounds or disease contracted in the line of duty is entitled to have paid to his beneficiary a sum equal to one-half of his annual pay. For this purpose the sum of $75,000 will be required for the fiscal year 1916.

MORTALITY OF THE NAVY AND MARINE CORPS.

For comparison with civil mortality statistics, the following data concerning the mortality of the United States Navy and Marine Corps were supplied by the Surgeon-General of the Navy:

The low rates as compared with those of the registration area are, of course, dependent upon the special age distribution of the naval force, which is for the most part composed of men in the most favorable periods of life. The marked reduction in the mortality of the entire service from 8.88 in 1900 to 3.82 in 1913 is notable. Comparative figures for the English Navy, 1911, are as follows: Average strength of service afloat, 117,100; total deaths, 366, or 3.12 per 1,000; deaths from diseases, 260, or 2.22 per 1,000; deaths from violence, 106, or 0.90 per 1,000.

THE NAVY LEAGUE OF THE UNITED STATES.

The Navy League of the United States was incorporated under the laws of the State of New York on January 2, 1903, its declared object being "to acquire and spread before the citizens of the United States, through branch organizations and otherwise, information as to the condition of the naval forces and equipment of the United States, and to awaken public interest and co-operation in all matters tending to aid, improve and develop their efficiency." It is strictly non-partisan. Men, women and children are eligible to membership. The button of the league is of silver gilt and blue enamel, with letters in white and anchor of gold, and is worn by members. The membership fee is two ($2) dollars annually. The headquarters of the league is at the Southern Building, Washington, D. C.

The General Officers are: *President*—Col. Robert M. Thompson. *Secretary*—Arthur H. Dadmun. *Treasurer*—Lewis L. Clarke.

NOTE—Battleships Nos. 43 and 44 have been authorized. Design in course of preparation.

The origin of the Navy Department may be said to date from October 13, 1775, when Congress authorized the equipment of two cruisers, mounting respectively 10 and 14 guns. Before the end of that year 15 more vessels of from 20 to 36 guns were authorized. The affairs of the Navy were at that time intrusted to a "Maritime Committee." In 1798 the present department was formally created, and Benjamin Stoddart appointed the first Secretary.

JOINT STATE AND NAVY NEUTRALITY BOARD.

Shortly after the outbreak of the European war the President of the United States appointed a Neutrality Board to advise the Department of State and other departments of the Government regarding the numerous questions with respect to the duties and the rights of the United States as a neutral nation, in cases which have constantly arisen and many of which are of a very delicate character. The Chairman of the Neutrality Board is Dr. James Brown Scott, formerly Solicitor for the Department of State and now Secretary of the Carnegie Endowment for International Peace and Director of its Division of International Law; associated with him are Capt. Harry S. Knapp, member of the General Board of the Navy and of the joint Army and Navy Board, and Capt. James H. Oliver, Director of the Office of Naval Intelligence and member of the General Board of the Navy. Headquarters, Washington, D. C.

The Neutrality Board holds daily sessions to consider questions referred to it by the Department of State.

Principal Battleships of Naval Powers.

(Compiled from the latest authentic sources of official information. Only the principal and more modern battleships are given. Most of the principal powers possess powerful armored cruisers equal to or in greater number than battleships, and in addition many vessels of smaller and older types.)

Following Great Britain, the first naval power, Germany now ranks second, the United States third, France fourth, Japan fifth, Russia sixth, Italy seventh, and Austria eighth.

UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

THE students of the Naval Academy are called midshipmen. Two midshipmen are allowed for each Senator, Representative, and Delegate in Congress, two for the District of Columbia, ten each year from the United States at large and fifteen each year from the enlisted personnel of the Navy who have been one year in the service. The appointments from the District of Columbia and ten each year at-large are made by the President, while the fifteen each year from the enlisted personnel of the Navy are made by the Secretary of the Navy after a competitive examination One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the President, on the recommendation of the Governor of Porto Rico. The Congressional appointments are equitably distributed, so that as soon as practicable each Senator, Representative, and Delegate in Congress may appoint one midshipman during each Congress. The course for midshipmen is four years at the academy, when the succeeding appointment is made and the examination for graduation takes place. Midshipmen who pass the examination for graduation are appointed to fill vacancies in the lower grade of the Line of the Navy, in the order of merit as determined by the Academic Board of the Naval Academy. The act of June 29, 1906, prescribes that the Secretary of the Navy shall as soon as possible after June 1 of each year preceding the graduation of Midshipmen in the succeeding year, notify in writing each Senator, Representative, and Delegate in Congress of any vacancy that will exist at the Naval Academy because of such graduation, and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative or Delegate, if such recommendation is made by March 4 of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, Congressional District, or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, Congressional District, or Territory in which the vacancy will exist, and of the legal qualification under the law as now provided. Candidates allowed for Congressional districts, for Territories and for the District of Columbia must be actual residents. Candidates at the time of their examination must be physically sound, well formed and of robust constitution. Attention will also be paid to the stature of the candidate, and no one *manifestly* under size for his age will be received at the academy The height of candidates for admission shall not be less than 5 feet 2 inches between the ages of 16 and 18 years and not less than 5 feet 4 inches between the ages of 18 and 20 years; and the minimum weight at 16 years of age shall be 100 pounds, with an increase of not less than 5 pounds for each additional year or fraction of a year over one-half. Any marked deviation in the relative height and weight to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any midshipman who shall marry, or who shall be found to be married, before his graduation, shall be dismissed from the service. All candidates must, at the time of their examination for admission, be between the ages of 16 and 20 years. The pay of a midshipman is $600, beginning at the date of admission. The regulations regarding places and times of examinations and subjects of examinations may be obtained by addressing the Chief of the Bureau of Navigation, Navy Dept., Washington, D. C.

UNITED STATES NAVAL ENLISTMENT.

THE term of enlistment in the Navy is four years, except for boysunder eighteen, who enlist for minority, with the consent of parents or guardian. Minors over eighteen are enlisted without the consent of parents or guardian, but they must furnish a birth certificate or verified written statement of parent or guardian as to their age. Only American citizens of good character who may reasonably be expected to remain in the service are enlisted, and every applicant must pass the required physical examination, be able to read and write English and take the oath of allegiance. No boy under seventeen can be enlisted except by special permission from the department.

Information regarding rates, with pay, opportunities for advancement, allowances, etc., can be obtained by addressing: BUREAU OF NAVIGATION, NAVY DEPARTMENT, WASHINGTON, D. C.

NAVY RECRUITING SERVICE.

On July 1, 1910, publicity offices were established at New York, N. Y. (153 West Twenty-third Street), for the Eastern district, and Indianapolis, Ind. (Post-Office Building) for the Western district, where full information regarding the pay, opportunities, etc., of service in the United States Navy may be obtained. Inquiries from the different States should be sent to the nearest of the two districts enumerated above. Address "Publicity Office, Navy Recruiting Service, 153 West Twenty-third Street, New York," or "Indianapolis, Ind.," as the case may be. All inquiries will be promptly answered by an officer of the Navy. Better still, if you are in a position to do so, call at the nearest station and get all information first hand from the enlisted men who have seen service in our Navy.

NATIONAL ASSOCIATION OF PATRIOTIC INSTRUCTORS.

President—John B. Lewis. *Secretary*—Mrs. Elizabeth Robbins Berry, 8 Forest Street, North Cambridge, Mass. *Treasurer*—Mrs. Nellie D. Orchard, New London, Ct. Objects—The objects of this association shall be to afford all persons interested in the promotion of patriotism and good citizenship an opportunity for acquaintance and interchange of ideas and experiences; to study systematically the best methods for the advancement of patriotic work; by unity of effort to secure the enactment and enforcement of such laws as will safeguard our American institutions and protect our flag from insult or desecration, or displacement by any other banner, also of laws in every State for the flying of the flag over public buildings and schoolhouses. Eligibility—Members of all hereditary and other patriotic societies, and all desirable persons over 15 years of age, who are interested in the objects of this association may become members. The association is represented in forty-two States and the District of Columbia. Annual meetings at the same time and place as the Grand Army of the Republic. Headquarters, 101 Tremont Street, Boston, Mass.

It is practically impossible to give the exact amounts received by officers, because of differences of pay of the same grade under varying conditions.

NAVAL ADVISORY BOARD.

The Secretary of the Navy, during the Summer of 1915, organized a Naval Advisory Board composed of a number of scientists for the purpose of making available the latent inventive genius of the country to improve the Navy by the development of inventions and such suggestions as may be of practical utility. In this connection it is the intention to establish an experimental and research laboratory in the Navy Department. The members of the Advisory Board will receive no compensation for their services, there being no provision of law providing therefor. In selecting the members of the board, the Secretary requested Mr. Thomas A. Edison to become Chairman, who has accepted such designation. He further requested eleven great engineering and scientific societies to select by popular election two members each to represent their society on the board. The following are the societies with the members selected and accepted:

American Chemical Society—W. R. Whitney and L. H. Baekeland.

American Institute of Electrical Engineers—Frank Julian Sprague and Benjamin G. Lamme.

American Mathematical Society—Robert Simpson Woodward and Arthur Gordon Webster.

American Society of Civil Engineers—Andrew Murray Hunt and Alfred Craven.

American Aeronautical Society—Matthew Bacon Sellers and Hudson Maxim.

Inventors' Guild—Peter Cooper Hewitt and Thomas Robins.

American Society of Automobile Engineers—Howard E. Coffin and Andrew L. Riker.

American Institute of Mining Engineers—William Lawrence Saunders and Benjamin Bowditch Thayer.

American Electrochemical Society—Joseph William Richards and Lawrence Addicks.

American Society of Mechanical Engineers—William Le Roy Emmet and Spencer Miller.

American Society of Aeronautic Engineers—Henry A. W. Wood and Elmer A. Sperry.

The following committees have been formulated to deal with the various kinds of technical problems submitted by the Navy Department. The name of Chairman is given.

Chemistry and Physics—W. R. Whitney.

Aeronautics (including aero motors)—Henry A. Wise Wood.

Internal Combustion Motors—Andrew L. Riker.

Electricity—Frank J. Sprague.

Mines and Torpedoes—Elmer A. Sperry.

Submarines—William Le Roy Emmet.

Ordnance and Explosives—Hudson Maxim.

Wireless and Communications—P. C. Hewitt.

Transportation—Benjamin B. Thayer.

Production, Organization, Manufacture, and Standardization—Howard E. Coffin.

Ship Construction—Frank J. Sprague.

Steam Engineering and Ship Propulsion—Andrew M. Hunt.

Life-Saving Apparatus—Spencer Miller.

Aids to Navigation—Elmer A. Sperry.

Food and Sanitation—L. H. Baekeland.

Public Works, Yards, and Docks—Alfred Craven.

AUSTRIA-HUNGARY.

Francis Joseph I., the Emperor of Austria and King of Hungary, was born August 18, 1830, and was proclaimed Emperor of Austria after the abdication of his uncle, Ferdinand I., and the renunciation of the crown by his father on December 2, 1848. He was crowned King of Hungary June 8, 1867 He married, in 1854, Elizabeth, a daughter of Duke Maximilian of Bavaria. She died by the hand of an Anarchist in Geneva, September 10, 1898. They had issue:

1. Archduchess Gisela, born 1856; married to Leopold, son of Prince Luitpold of Bavaria.
2. Archduke Rudolf, late heir-apparent, born 1858; died by suicide, 1889. He married, 1881, Stephanie, daughter of the late King of the Belgians, and had issue one daughter, the Archduchess Elizabeth Marie, born 1883; married, 1902, Prince Otto Windisch Graetz. The widowed Crown Princess Stephanie married, March, 1900, Count Elemer Lonyay.
3. Archduchess Marie Valerie, born 1868; married, 1890, Archduke Francois-Salvator.

The Emperor's eldest brother was Archduke Ferdinand (Maximilian), Emperor of Mexico from 1864 to 1867, when he was shot at Queretaro. His widow, Marie Charlotte, survives him.

On the death of the Crown Prince, in 1889, the right of succession to the throne passed to the Emperor's second brother, the Archduke Charles Louis, who was born 1833 and died 1896; he married, first, 1856, Marguerite, Princess of Saxony; she died 1858; second, 1862, the Princess Annunciata, daughter of King Ferdinand II. of Naples; she died 1871; third, 1873, Marie-Therese of Portugal and had issue (second marriage) Archduke Francois Ferdinand, born 1863, who was the heir-presumptive to the throne (married morganatically, 1900, Countess Sophie Chotek, who had title Duchess of Hohenberg conferred upon her October, 1909, and renounced the claim of his issue by her to the throne). They were both shot and killed in Sarajevo, Bosnia, 1914, by an assassin; the Archduke Otto, born 1865, died 1906, married to the Princess Marie Josefa of Saxony, had two sons (Archduke Charles, born 1887, heir to the throne, married, 1911, Princess Zita of Parma, has issue Francis Joseph Otto, born 1912, Adelaide-Marie, born 1914, Robert Charles Ludwig, born February, 1915); and Maximilian, born 1895; the Archduke Ferdinand, born 1868, renounced his rights in 1911 to marry Berta Czuber. He died 1915. By a third marriage the Archduke Charles Louis had two daughters, Archduchess Marie Annunciata, born 1876, an abbess in a convent, and Archduchess Elizabeth Amelie, born 1878, married 1903, Prince Aloyse of Liechtenstein.

The Emperor has a third brother, the Archduke Louis Victor, born 1842, who is unmarried.

There are over eighty other archdukes and archduchesses of Austria, cousins of the Emperor, collateral relatives of the reigning house and members of the formerly reigning branches of Tuscany and Modena.

BAVARIA.

Louis III., King of Bavaria, born January 7, 1845, succeeded his cousin, Otto, who, after having been nominal King since Louis II.'s death in 1886, was declared incapable of occupying the throne in October, 1913. It was necessary to alter the Constitution to bring about the succession. Louis III. married the Archduchess Maria Theresa of Austria-Este, and has six daughters and three sons The eldest, Prince Rupert, the Crown Prince, was born in 1869, and in 1900 married his cousin, Duchess Marie Gabriele, who died October, 1912, leaving the Princes Luitpold, born 1901, and Albrecht, born 1905, and Rudolf, who died 1912. 2. Princess Adelgunda, born 1870. 3 Princess Marie, born 1872, married Prince Ferdinand of Bourbon. 4. Prince Karl, born 1874. 5. Prince Franz, born 1875; married Princess Isabella von Croy 1912, and has issue: Louis-Charles, born 1913, and Marie-Elizabeth born 1914. 6. Princess Hildegard, born 1881. 7. Princess Wiltrude, born 1884. 8. Princess Helmstrud, born 1886. 9. Princess Gundelinde, born 1891. Prince Luitpold, died August 27, 1914.

The King's brother, Leopold, born 1846, is married to the Archduchess Gisela of Austria. Issue: Elizabeth-Marie, born 1874, married, 1893, Count de Seefried de Buttenheim; Augustine-Marie, born 1875, married Joseph, Archduke of Austria; Georg-Francis, born 1880, married, 1912, Princess Isabelle, of Austria (marriage annulled 1913); Conrad, born 1883. The King's sister is Princess Theresa, a doctor of philosophy, member of the Academy of Sciences, and Lady Abbess of a convent. A second brother, Francis, born 1852, died 1907, married Therese, Princess of Liechtenstein. She has one son, Prince Henry, born 1884.

The royal house of Bavaria descends from the Counts of Wittelsbach, who flourished in the twelfth century, one of whom was elevated to the rank of Elector; a later one was made King by Napoleon I.

BELGIUM.

Albert, King of the Belgians, was born April 8, 1875, and was the nephew of the late King Leopold II., who died December 17, 1909. The grand uncles of the Duke of Orleans (who were the sons of King Louis Philippe) are dead. They were Louis, Duke of Nemours, born 1814, died 1896, married 1840, Victoria, Princess of Saxe-Coburg and Gotha; Prince of Joinville, born 1818, died 1900, married, 1843, Frances, Princess of Bragance; Antony, Duke of Montpensier, born 1824, died 1890, married, 1846, Louise, Infanta of Spain. The children of the Duke of Nemours are Gaston, Comte of Eu, born 1842, married, 1864, Isabelle, Princess of Bragance, and has three sons—Pierre of Alcantara, born 1875; Louis, born 1878, and Antony, born 1881; Duke of Alençon, born 1844, died 1910, married, 1868, Sophie, Duchess of Bavaria (who was burned in the Paris bazaar fire in 1897), and Blanche, born 1857. The children of the Prince of Joinville are Frances, born 1844, married, 1863, Robert, Prince of Orleans, Duke of Chartres, and Pierre, Duke of Penthievre, born 1845. The children of the Duke of Montpensier are Isabelle, born 1848, married, 1864, Philippe, Count of Paris, and Antony, Duke of Galliera, born 1866, married, 1886, Eulalie, Infanta of Spain. Prince Pierre of Alcantara, son of the Comte of Eu, has two children, Isabelle, born 1911, and Pierre, born 1913. His brother, Prince Louis, married, 1908, Marie, Princess of Bourbon-Siciles, and has three children, Pierre, born 1909; Louis, born 1911, and Pie-Marie, born 1913. Another brother, born 1881, is unmarried.

The Duke of Alençon has issue: Princess Louise, born 1869, married, 1891, Prince Alphonse of Bavaria; Emmanuel, Duke of Vendôme, and Alençon, born 1872, married Henrietta, Princess of Belgium. The children of Prince Antony are Alphonse, born 1886, married 1909, Beatrice, Princess of Saxe-Coburg and Gotha, and Louis Ferdinand, born 1888.

By the death of the Count of Chambord, in 1883, the elder line of the Bourbons of France became extinct, and the right of succession merged in the Count of Paris, grandson of King Louis Philippe, representative of the younger, or Orleans, line.

DURATION OF SUNSHINE ON UNITED STATES TERRITORY.

THE acquisition of Porto Rico, the Sandwich and Philippine Islands, and a portion of the Navigator or Samoan Group has very considerably affected the duration of continuous sunshine on our territory. The mathematical discussion of this subject would be out of place here, but any one who desires to inform himself on this matter can easily and satisfactorily do so by using a terrestrial globe having an artificial horizon attached to it, and carefully complying with the following instructions: Place the globe so that the North Pole shall be directed toward the north, and elevate it 23° above the horizon as indicated by the brass meridian. Assuming, of course, that the sun is in the zenith, this will be the position of the earth in reference to the sun at the Summer solstice, June 22. As we turn the globe on its axis from west to east, the sun will be rising at all places on the western and setting at all places on the eastern horizon, and we shall find on turning the globe through an entire revolution that some portion or other of our territory—including the islands named above—will always be above the horizon or will have continuous sunshine during the twenty-four hours. If we now depress the North Pole 23° below the horizon we shall have the relative position of things at the Winter solstice, December 22, and we shall find the opposite conditions to prevail; that is to say, the sun will not now shine continuously on our territory, but some portion of it will always be involved in darkness or *below* the horizon.

Again, if we place the poles of the globe in the horizon, which is the relative position at the equinoxes, March 21 and September 23 and turn the globe through a complete revolution, we shall find that for a very short time during the twenty-four hours the whole of our territory will be below the horizon or in darkness. Finally, let us elevate the North Pole about 5° above the horizon; then we shall find, as we revolve the globe on its axis, that some portion of our territory is always above the horizon or has sunshine. Therefore, we conclude that when the sun's northern declination exceeds 5°, or from the 3d of April to the 10th of September, the sun will shine continuously over some part or other of United States territory.

If we consider the effect of refraction, which accelerates the time of rising and retards the time of setting, the above dates may be practically extended to within two or three days of the equinoxes.

Great Britain, France, and Holland are the only nations on whose dominions the sun never sets. Those of Great Britain are very extensive and scattered far and wide over both hemispheres, so that while the sun may be setting at one it is rising on another. The French possessions consist for the most part of numerous small islands in the Atlantic, Indian, and Pacific Oceans, with continental territories in South America Africa, and Asia, and accordingly are so distributed that the sun is always above the horizon of some of them. The foreign possessions of Holland are far more extensive than most people imagine. With the exception of Dutch Guiana in South America, they consist of two groups of islands—one on the coast of Venezuela and the other embracing Sumatra, Java, Celebes, portions of Borneo and New Guinea and a host of smaller islands scattered throughout the East Indian Archipelago, extending over 46° of longitude. These, with Holland itself, are so situated as to their difference of longitude that the sun is always shining on some of them.

On the conclusion of the war between Russia and Japan in 1905 a treaty and additional agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter cities and towns in Manchuria were opened as places of international residence and trade. In July, 1910, a convention was signed between Russia and Japan agreeing to co-operate to maintain the *status quo* in Manchuria in accordance with the treaties and conventions already made. In March, 1915, China agreed to extend the lease of the territory on the peninsula to 99 years.

Latest estimates of the foreign residents at the open ports of China are as follows: British, 8,966; Japanese, 80,219; Americans, 5,340; Russians, 56,765; Germans, 2,949; French, 2,292; Portuguese, 3,486; other nationalities, 3,810; total, 163,827.

Commerce—The foreign trade of China (exclusive of bullion) was as follows in 1913: Imports, £86,-118,303; exports, £60,915,941.

Railways—About 5,960 miles, inclusive of the Manchurian lines.

Shipping—In 1913 there were 1,130 vessels registered for inland waters navigation; of these 194 were foreign and 936 under the Chinese flag. In 1913 the total tonnage of vessels entered and cleared at the treaty ports was 93,334,830; of these 898,750 tons were American, 38,120,300 tons British, 1,232,763 tons French; 6,320,466 tons German; 23,422,487 tons Japanese; 1,687,796 tons Russian; 19,903,944 tons Chinese.

Telegraphs—The total length of line in operation at the end of 1914 was 36,339 miles, with 49,963 miles of wire.

Postal—The number of Chinese post-offices in 1913 was 7,808, and the number of postal articles handled was 629,500,000.

THE BRITISH PARLIAMENT.—(See foot note.)

THE supreme legislative power of the British Empire is, by its Constitution, vested in Parliament. This body consists of two houses, the Lords and the Commons.

THE HOUSE OF LORDS.

The House of Lords is composed of the whole Peerage of England and of the United Kingdom, and of certain representative Peers of Scotland and Ireland, but many members of these latter have also English titles which give them seats in the House. The Duke of Buccleuch sits as Earl of Doncaster, and the Duke of Leinster as Viscount Leinster. The House at present consists of 3 Princes of the Blood, 2 Archbishops, 21 Dukes, 26 Marquesses, 121 Earls, 46 Viscounts, 24 Bishops, 356 Barons, 16 Scottish Representative Peers elected for each Parliament, and 27 Irish Representative Peers elected for life.

The Lord Chancellor of England is the Speaker of the House of Lords.

THE HOUSE OF COMMONS.

The House of Commons consists of 670 members—465 for England, 30 for Wales, 72 for Scotland, and 103 for Ireland. Salary £400.

The division of parties in the House of Commons, after the General Election in December, 1910, was as follows: Liberals, 272; Nationalists, 76; Independent Nationalists, 8, and 42 Labor members; Unionists, 272; the ministerial majority being 126; the majority on November 1, 1914, was 96. In June, 1915, a Coalition Ministry was formed, political parties thus becoming blended.

The Speaker of the House is the Rt. Hon. James William Lowther, M. P. for Penrith.

NOTE—The last General Election in Great Britain was held in December, 1910, and the next would, in ordinary circumstances, take place not later than December, 1915, Parliament being elected for a maximum period of five years, but it has been announced that the regular general election would be postponed until the end of the war.

FOREIGN DIPLOMATS DISMISSED FROM UNITED STATES.

CITIZEN GENET, sent here in 1793, after the execution of Louis XVI. by the French Committee of Safety, tried to commission privateers here to prey on British commerce, besides making inflammatory speeches. Thomas Jefferson asked for his recall.

The Marquis of Casa Yrujo, Spanish Minister in 1805, attempted to bribe a Philadelphia editor to favor Spain in a controversy with the United States. He was handed his passports.

F. J. Jackson, British Minister, was recalled because he tried to arouse feeling against the United States by circularizing British Consuls, in which he accused the American Government of bad faith in 1809.

In 1849 M. Poussin, French Minister, because of insolence to the American Secretary of State, was recalled.

For enlisting soldiers for the Crimean War in 1855 British Minister Crampton was recalled and the exequators of three British Consuls were cancelled.

In 1888 passports were handed Lord Sackville-West, who, in response to a decoy letter, advised Americans of British birth to vote for Grover Cleveland for President.

The Spanish Minister, Dupuy de Lome, wrote disrespectfully of President McKinley to a friend in Cuba, for which he was dismissed in 1898.

During President Taft's term passports were handed to the Nicaraguan Chargé d'Affaires, Mr. Rodrigues, to protest against the judicial murder in Nicaragua of two Americans.

The Turkish Ambassador, Rustem Bey, whose criticisms of the United States aroused so much discussion in 1914, left this country in October of that year "on leave of absence."

Recall of Dr. Constantin Theodor Dumba Austrian Ambassador, was requested by United States in September, 1915, as a result of his attempts to cripple American industries.

Formal announcement was made by Secretary of State Lansing on December 3, 1915, that Germany had been requested to immediately recall Captain Boy-Ed and Captain von Papen, the Naval and Military Attachés respectively, on account of what the United States Government considered improper activities in military and naval matters.

The present Constitution of Mexico bears date February 5, 1857, with subsequent amendments. By its terms Mexico is considered a Federative Republic, divided into States, nineteen at the outset but at present twenty-seven in number, with three Territories and one Federal District, each having a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the Federal Government are divided into three branches—the legislative, executive, and judicial. The legislative power is vested in a Congress, consisting of a House of Representatives and a Senate; the executive in a President, and the judicial in Federal Courts. Representatives elected by the suffrage of married males if eighteen years of age and twenty-one years of age if unmarried, at the rate of one member for every 40,000 inhabitants or fraction exceeding 20,000, and hold their places for two years. The qualifications requisite are to be twenty-five years of age and a resident in the State. The Senate consists of two members from each State, of at least thirty years of age, who hold their places for four years. Senators are elected indirectly, half of the Senate being renewed every two years. The members of both houses receive salaries of 3,000 pesos each year.

The President is elected by electors popularly chosen in a general election, and holds office for six years. In case of his sudden death or disability, the Vice-President, who is also permanent President of the Senate, officiates in his place. Congress holds two regular sessions annually, from September 16 to December 15, and from April 1 to May 31, and a permanent committee of both houses sits during the recesses.

THE UNION OF SOUTH AFRICA.

A federation of four British Colonies in South Africa, namely, the Cape Colony, Natal, the Transvaal and Orange Free State, was formed provisionally in 1909 by a convention held at Cape Town. The federation was confirmed by an act passed by the British Parliament August 16, 1909, and the date appointed for the establishment of the Union was fixed for May 31, 1910. Viscount Gladstone was appointed Governor-General and assumed office on that date.

The act of Union vested the executive government in the King and his successors, a Governor-General advised by an Executive Council and Ministers of state. Legislative power was vested in a Parliament composed of the King, a Senate of forty members, eight nominated for ten years by the Governor-General in council, and eight for each original province elected for ten years by the two houses of the Colonial Legislature sitting together, and a House of Assembly, consisting of members chosen as follows: From the Cape Colony, 51; Natal, 17; Transvaal, 36; Orange Free State, 17. The Governor-General has the power to summon, prorogue and dissolve Parliament, and that body shall sit annually.

Provision is made for an Administrator for each province for five years, appointed by the Governor-General, and a Provincial Council elected for three years.

Pretoria, in the Transvaal, is the seat of Government of the Union, and Cape Town the meeting place of Parliament. The English and Dutch languages are both official. It is provided that the British South African Company's territories may be received into the Union and the government of native territories may be transferred to the Union Government.

The area of the Union of South Africa is as follows, in square miles: Cape Colony, 276,995; Natal, 35,290; Transvaal, 110,426; Orange Free State, 50,389. Total Union, 473,100.

The population is as follows: Cape Colony, 3,000,000; Natal, 1,500,000; Transvaal, 2,000,000; Orange Free State, 586,000. Total Union, 7,086,000.

THE COMMONWEALTH OF AUSTRALIA.

The Commonwealth of Australia consists of the six original Australian Colonies: New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania. Each of these is a self-governing State, except as to the powers reserved to the Confederation. The Commonwealth of Australia was proclaimed at Sydney, January 1, 1901. Legislative power is vested in a Federal Parliament, consisting of the King—represented by a Governor-General—a Senate and a House of Representatives. The Senate consists of thirty-six Senators—six for each State—chosen for six years. The House of Representatives consists of seventy-five members, distributed as follows: New South Wales, 27; Victoria, 22; Queensland, 9; South Australia, 7; Western Australia, 5; Tasmania, 5.

The legislative powers of the Federal Parliament embrace commerce, shipping, finance, defence, post-office, telegraph, census and statistics and conciliation and arbitration in industrial disputes extending beyond the limits of any one State. Authority is given to the Commonwealth to assume jurisiction regarding railways, lighthouses, marriage and divorce, and emigration and immigration. The executive power is vested in the Governor-General, assisted by an Executive Council of responsible Ministers. There is also a Federal Judicature. The present seat of Government is at Melbourne, the Federal capital (Canberra) being in process of building. The area of the Commonwealth, with the Territories (Northern Territory, Papua) and Federal District (Canberra), is 3,063,041 square miles, and the population is 4,941,000.

Each of the States has its own Parliament, Governor, Ministry and Judiciary.

High Commissioner in London, England, Sir George H. Perley (acting).

The Dominion of Canada has an area of 3,729,665 square miles (excluding the Hudson Bay, the Gulf of St. Lawrence and all tidal waters) and comprises one-sixteenth of the land surface of the globe. It is the largest of all the British possessions, Australia, the next in size, containing 2,946,691 square miles. The Government of Canada is federal, centred at Ottawa, which city is the capital of the Dominion, while the provinces have their respective local Legislatures. The head of the Federal Government is the Governor-General, appointed by the King of Great Britain, and holding office for five years, his salary being paid by the Dominion Government.

The Lieutenant-Governors of the several provinces are appointed by the Federal Government for a term of five years. The Legislatures are elected by the people of each province The highest court in the Dominion is the Supreme Court, composed of a Chief Justice and five Judges, each of whom receives a salary of $9,000 per annum, except the Chief Justice, who is paid an additional $1,000. From the decisions of this court the only tribunal to which appeal can be made is to the Judicial Committee of the Imperial Privy Council of Great Britain. The only other Federal court is the Exchequer Court, presided over by a single Judge, for trying cases connected with the revenue. Salary $8,000. All others are of a provincial character limited to jurisdiction in their respective provinces only.

Defence.

Every Canadian citizen is liable to service in the militia from the age of 18 to that of 60. Militiamen are enrolled for three years to the "active" militia. The actual training varies in length, according to the branch of the service, from 12 to 16 days.

It is provided that if the embodiment of the militia becomes necessary, the men, both active and reserve, would be called out in four classes or levies; first, the unmarried men and widowers (without children) from 18 to 30; secondly, the unmarried men and widowers (without children) from 30 to 45; thirdly, the married men and widowers (with children) from 18 to 45; fourthly, all the remaining men up to 60. In the case of a *levee en masse*, all male inhabitants capable of bearing arms may be required to serve without regard to age, class or distinction.

The active militia includes the "permanent force," which furnishes the personnel of the training schools and some nucleus units of garrison artillery, etc. There are various schools of military instruction which are established in the six divisional areas and the three military districts into which Canada is now divided. A proportion of the officers are trained at the Royal Military College at Kingston. Total active militia in 1914 was:

EXHIBITION OF MANUFACTURES IN URUGUAY.

(Statement of United States Vice-Consul at Montevideo.)

A PERMANENT exposition will be established in the Museum of Manufactures of the Uruguayan National School of Commerce, according to an announcement furnished by the Ministry of Foreign Affairs (a translated copy of which may be had from the Bureau of Foreign and Domestic Commerce, Washington, D. C). The ministry requests that the contents of this announcement be made known in the United States in order that manufacturers may have an opportunity to contribute to the exposition.

The exposition will be free to exhibitors and will be an important factor in developing direct business by informing local merchants of the origin of the different articles, with data that will facilitate their purchase. It is hoped that many American manufacturers will take advantage of this opportunity to display samples. Correspondence should be addressed to the Ministerio de Instrucción Pública, Montevideo, and the samples marked "Para el Museo Merciológico de la Escuela Nacional de Comercio." It is requested that manufacturers who send samples, etc., inform this consulate of that fact for its own information.

BRAZIL.

THE Republic of the United States of Brazil is the largest of the South American countries and the second largest of the American republics. It is situated between 4° 22′ north and 33° 45′ south and longitude 34° 40′ and 75° 15′ west, and touches every other South American republic with the exception of Chile; besides, it is bounded by British, Dutch, and French Guiana.

The language of the country is Portuguese. Under the Constitution Brazil is a Federal Union of States, republican and representative. The Union is composed of 21 States, one National Territory, and the Federal District.

It was announced that the Brazilian Government presented to the National Congress the following budget for 1915: Estimated receipts, $61,152,000 gold and $108,508,000 paper; expenditures, $48,288,000 gold and $125,966,000 paper.

For commerce see table of "Latin-American Foreign Trade."

ARGENTINA.

ARGENTINA, the third largest of the American Republics, is situated between latitude 22° and 56° south and longitude west of Greenwich 53° and 57°, being bounded by the Republics of Chile, Bolivia, Paraguay, Brazil, Uruguay, and the Atlantic Ocean.

It is a Federal republic of fourteen Provinces, ten Territories, and one Federal District. The provinces and Federal District are represented in the National Congress, composed of a Senate and Chamber of Deputies.

For commerce see table of "Latin-American Foreign Trade."

The total length of railroads in operation at the close of 1914 was 20,502 miles, representing a capitalization of $1,120,210,000. In 1913 there were 2,980 post-offices, 2,600 telegraph offices and about 43,202 miles of wire; 7,183 public schools for primary instruction, with an enrolment of 746,725 pupils, aside from the numerous schools supported by the provinces, and schools of higher education.

CHILE.

THE Republic of Chile extends over more than 38 degrees of latitude, from 17° 57′ to 55° 59′ south, stretching from the Samu River to Cape Horn, and occupying a long, narrow strip of land between the Andean mountain range and the Pacific Ocean, with a coast line of 2,625 miles and an average width of 90 miles. The republic has a single republican form of government, with the customary division into legislative, executive and judicial branches. There are twenty-three provinces and one Territory.

The principal exports are nitrate of soda, copper, wheat, iodine, borate of lime, oats, bran, wool, etc. The principal imports are textiles, mineral products, coal oils, etc., machinery, hardware, carriage, etc., vegetable products, animal products, paper, and manufactures; wines, liquors, and other beverages. For commerce see table of "Latin-American Foreign Trade."

The above returns were compiled from the reports of the Pan-American Union (Union of American Republics).

THE PAN-AMERICAN SOCIETY OF THE UNITED STATES.

THE objects of this society are: To promote acquaintance among representative men of the United States and those of the other republics of America; to show hospitality and attention to representative men of the other republics of America who visit the United States; to take such other steps, involving no political policy, as the society may deem wise; to develop and conserve mutual knowledge and understanding and true friendship among the American republics and peoples. *President*—Henry White. *Vice-Presidents*—John Bassett Moore, Cabot Ward and John Barrett. *Secretary*—Harry Erwin Bard. *Treasurer*—Lorenzo Daniels. Headquarters, Mills Building, 15 Broad Street, New York City.

PAN-AMERICAN UNION.

THE Pan-American Union is the official international organization maintained in Washington by the 21 American republics for the development of good understanding, friendly intercourse, commerce and peace among them. It is supported by the joint contributions of these Governments, based on population, and controlled by a Governing Board composed of the Secretary of State of the United States and the diplomatic representatives in Washington of the other republics. Its affairs are administered by a Director-General and an Assistant Director, who, in turn, are assisted by a staff of international experts, statisticians, editors, compilers, translators and librarians. It was first established in 1890, and was reorganized in 1906. It occupies a building and grounds at the Seventeenth Street entrance to Potomac Park, representing an expenditure of $1,100,000, toward which Mr. Andrew Carnegie contributed $850,000, and the American republics $250,000. In it is housed the Columbus Memorial Library of 30,000 volumes and 20,000 photographs, which are the best collection of present-day Pan-Americana in the world. The officers are: *Director-General*—John Barrett. *Assistant Director*—Francisco J. Yánes. *Chief Clerk and Editor*—Franklin Adams. All communications should be addressed to the Director-General, Pan-American Union, Washington, D. C.

PERU.

PERU became an independent republic July 28, 1821. It is divided into 19 departments and three pr inces. The executive power is vested in the President, who is elected for four years. The legislative po is intrusted to a Senate of 52 members and a House of Representatives of 116 members. The Governm owns and operates the postal and telegraph lines in Peru, with the exception of the railway telegraphs. Th are about 800 post-offices and 340 telegraph offices in the country. The total length of the various line about 10,500 miles (16,800 kilometres.) There are 19 telephone systems in the country with about 4,000 struments and over 11,000 miles (17,702 kilometres) of wire. Panama has 202 miles of railroads in operation, 96 post-offices and telegraph offices. A contract has been let for a wireless station at Colon. There are excellent educatio advantages in the republic. For commerce see table of "Latin-American Foreign Trade."

PARAGUAY.

THE Constitution of Paraguay provides for a republican form of government, with the usual divis of legislative, executive, and judicial authority. The National Congress is composed of the Senate and Cha ber of Deputies, both elected by direct popular vote, all citizens over 18 years of age being entitled to s frage. Senators are elected for six years on the basis of one for every 12,000 inhabitants, or fraction o 8,000. Deputies are elected for four years at the rate of one for every 6,000 inhabitants, or fraction exce ing 3,000. The Senate is renewed by thirds and the Chamber of Deputies by halves every two years. C gress meets annually on April 1 and continues in session until August 31, but extraordinary sessions m be called at any time by the President or on motion of four Deputies and two Senators. The Presid and Vice-President are elected by electors chosen for that purpose for a term of four years.

With a subtropical climate considerably modified and made healthful by several mountain cha and an extensive hydrographic system, most of the products of the Tropical and Temperate Zones are s cessfully cultivated.

Beef products, the valuable quebracho wood, yerba maté or Paraguay tea, and lace are the princi articles of export. Lapacho, curupaz, and cedar are valuable woods found in considerable quantities, a oranges, tobacco, coffee, rice, cotton, mandioca, and sugar are grown and exported. The beautiful n duti lace is one of the products of native industry. For commerce see table of "Latin-Americ Foreign Trade."

URUGUAY.

THE Constitution of Uruguay, promulgated on July 18, 1830, is in force. The Senate and House Representatives compose the General Assembly, in which all legislative power is vested, and meet annua from February 15 to June 15. Representatives, the number of whom varies with the population, are elec directly by popular vote in the proportion of one for every 3,000 inhabitants, or fraction exceeding 2,0 and for a term of three years. The Senate consists of 19 members, who are elected indirectly for a term six years, one for each department. The Senate is renewed by thirds every two years. Every citizen o 20 years of age, who is physically and mentally able to do so, and is registered, is entitled to vote In c of the President's disability or death, the presiding officer of the Senate assumes the Presidency, as th is no Vice-President in Uruguay.

The republic of Uruguay lies between the Atlantic Ocean, the Rio de la Plata (River Plate), Bra and the Argentine Republic. It is separated from Brazil by the Rivers Cuareim and Yaguaron and Lake Merim, and from the Argentine Republic by the Rio de la Plata and the Uruguay River. It is smallest republic in South America. The most notable feature of Uruguay is its extent of long rolling plai comprising almost the entire length of the country, occasionally broken by low mountain ranges and co ously watered by numerous streams. It is naturally suited for both sheep and cattle, the raising of whi is its principal industry. Agriculture is also practiced to a considerable extent, nearly all of the cereals be grown. In the forests are found a number of excellent cabinet and other woods noted for their beauty a durability, and some mining is carried on.

Principal exports: Wool, hides and skins, meats and extracts, grease and tallow, live animals, oil-p ducing grains, flour, etc. For commerce see table of "Latin-American Foreign Trade."

ASIATIC INSTITUTE.

The Asiatic Institute was organized April 21, 1913, to promote the study of progress and conditions in East Asia and the Pacific; to disseminate in the United States knowledge of the same and to promote the solution of questions arising from the contact of two civilizations in the Pacific Basin. It seeks to secure a wider appreciation of Pacific affairs, and to be a repository and arsenal of information of all that concerns the two civilizations, as well as to realize the stable relationship and understanding that must ultimately exist between them.

CONSULAR SERVICE.

C. G., Consul-General; C., Consul; V. C., Vice-Consul; D. C., Deputy Consul; C. A., Consular Assistant.

To insure prompt attention letters upon consular business should be addressed "To the American Consul at .....". Such letters are opened and attended to by the person who happens to be in charge of the office. If addressed to the Consul by name they are forwarded to him unopened if he should be absent, and a delay thus intervenes; if he should in the mean time have gone out of office they may wholly escape attention.

Consuls at the principal places in the world are given here. Where there are a Consul and Vice or Deputy Consul at the same place only the Consul is given. Consular officers are *ex-officio* notaries for all the States of the United States.

CONSULS-GENERAL AT LARGE.

EXAMINATIONS FOR THE CONSULAR SERVICE.

In pursuance of the Executive order of June 27, 1906, whereby the President promulgated regulations governing appointments and promotions in the consular service, the following rules have been adopted by the Board of Examiners, who, under that order, have been designated to formulate rules for and hold examinations of applicants for admission to the consular service whom the President shall have designated for examination to determine their eligibility for appointment therein:

1. The examinations will be the same for all grades and will be to determine a candidate's eligibility for appointment in the consular service, irrespective of the grade for which he may have been designated for examination and without regard to any particular office for which he may be selected.

2. The examinations will consist of an oral and a written one, the two counting equally. The object of the oral examination will be to determine the candidate's business ability, alertness, general contemporary information, and natural fitness for the service, including moral, mental, and physical qualifications, character, address, and general education and good command of English. In this part of the examination the applications previously filed will be given due weight by the Board of Examiners, especially as evidence of the applicant's business experience and ability. The written examination will include those subjects mentioned in the Executive order, to wit: French, German, or Spanish; the natural, industrial and commercial resources and the commerce of the United States, especially with reference to possibilities of increasing and extending the foreign trade of the United States; political economy, and the elements of international, commercial and maritime law. It will likewise include American history, government, and institutions; political and commercial geography; arithmetic (as used in commercial statistics, tariff calculations, exchange, accounts, etc.); the modern history, since 1850, of Europe, Latin-America, and the Far East, with particular attention to political, commercial and economic tendencies. In the written examination, composition, grammar, punctuation, spelling, and writing will be given attention.

3. To become eligible for appointment, except as student interpreter, in a country where the United States exercises extra territorial jurisdiction, the applicant must pass the examination outlined above, but supplemented by questions to determine his knowledge of the fundamental principles of common law, the rules of evidence, and the trial of civil and criminal cases.

4. The examinations to be given candidates for appointment as student interpreters will follow the same course as in the case of other consular officers, provided, however, that no one will be examined for admission to the consular service as a student interpreter who is not between the ages of nineteen and twenty-six, inclusive, and unmarried; and, provided further, that upon appointment each student interpreter shall sign an agreement to continue in the service so long as his services may be required, within a period of five years.

5. Upon the conclusion of the examinations the names of the candidates who shall have attained upon the whole examination an average mark of at least eighty, as required by the Executive order, will be certified by the board to the Secretary of State as eligible for appointment in the consular service, and the successful candidates will be informed that this has been done.

6. The names of candidates will remain on the eligible list for two years, except in the case of such candidates as shall within that period be appointed or shall withdraw their names, and of candidates holding subordinate positions in the consular service, when eligibility shall not expire until appointment to consular rank or until separation from the service. Candidates whose names have thus been dropped from the eligible list will not be eligible for appointment unless upon fresh application, designation anew for examination, and the successful passing of such second examination.

DUTIES OF CONSULAR OFFICERS.

Consular officers are expected to endeavor to maintain and promote all the rightful interests of American citizens, and to protect them in all privileges provided for by treaty or conceded by usage; to visa and, when so authorized, to issue passports; when permitted by treaty, law or usage, to take charge of and settle the personal estates of Americans who may die abroad without legal or other representatives, and remit the proceeds to the Treasury in case they are not called for by a legal representative within one year; to ship, discharge, and, under certain conditions, maintain and send American seamen to the United States; to settle disputes between masters and seamen of American vessels; to investigate charges of mutiny or insubordination on the high seas and send mutineers to the United States for trial; to render assistance in the case of shipwrecked or stranded American vessels, and, in the absence of the master or other qualified person, take charge of the wrecks and cargoes if permitted to do so by the laws of the country; to receive the papers of American vessels arriving at foreign ports and deliver them after the discharge of the obligations of the vessels toward the members of their crews, and upon the production of clearances from the proper foreign port officials; to certify to the correctness of the valuation of merchandise exported to the United States where the shipment amounts to more than $100; to act as official witnesses to marriages of American citizens abroad; to aid in the enforcement of the immigration laws, and to certify to the correctness of the certificates issued by Chinese and other officials to Chinese persons coming to the United States; to protect the health of our seaports by reporting weekly the sanitary and health conditions of the ports at which they reside, and by issuing to vessels clearing for the United States bills of health describing the condition of the ports, the vessels, crews, passengers, and cargoes; and to take depositions and perform other acts which notaries public in the United States are authorized or required to perform. A duty of prime importance is the promotion of American commerce by reporting available opportunities for the introduction of our products, aiding in the establishment of relations between American and foreign commercial houses, and lending assistance wherever practicable to the marketing of American merchandise abroad.

In addition to the foregoing duties, consular officers in China, Turkey, Siam, Maskat, Morocco, and a few other so-called un-Christian countries, are invested with judicial powers over American citizens in those countries. These powers are usually defined by treaty, but generally include the trial of civil cases to which Americans are parties, and in some instances extend to the trial of criminal cases.

MILITARY ORDER OF THE CARABAO.

A military organization composed of those officers of the United States Volunteer or Regular Army, Navy, Marine Corps, Philippine Scouts, or as a Naval cadet or midshipman, or as acting assistant surgeon, contract surgeon, contract dental surgeon, or any person who served as an enlisted man in the United States Army, Navy or Marine Corps and subsequently received a commission for appointment in any of the above named classes, and accredited war correspondents who served in the Philippine Islands between May 1, 1898 and July 4, 1902. Members of the order are known as Carabao. The oldest lineal male descendant of a Carabao is eligible for membership. The order is composed of a main body at Washington, known as the Main Corral, and branches in Manila, P. I.; San Francisco, Cal.; San Antonio, Tex., and Fort Monroe, Va.

The order was created for the purpose of fostering a high standard of military and social duty and to perpetuate the memories and associations of military service in the Philippines during the early days of American occupation. The origin of the order grew out of an idea conceived at a dinner at the Officers' Club in Manila shortly after the return of troops from China in 1900. The name was suggested by Major George L. Byram, United States Army, in recognition of the services rendered to the American forces by the faithful carabao, the principal beast of burden in the Philippines. The emblem of the order is a carabao's head on a pendant. The officers of the Main Corral are elected each year.

Officers of the Main Corral: *Grand Paramount Carabao* (*National Commander*)—Admiral Thomas B. Howard, U. S. N. *Grand Patriarch of the Herd* (*National Vice-President*)—Major-Gen. James B. Aleshire, U. S. A. *Grand Lead and Wheel Carabao* (*National Secretary and Treasurer*)—Major Joseph M. Heller, U. S. V., the Marlborough, Washington, D. C.

The maximum salary of rural carriers was increased July 1, 1914, from $1,100 to $1,200.

GEOGRAPHICAL RESEARCH IN 1915.

A review specially prepared for THE WORLD ALMANAC by the National Geographic Society, and covering the period from January 1 to October 15.

IN GENERAL.

THE war in Europe, involving more territory and more people than ever before in the history of the world were involved in one war, laid the foundation for a great many changes in the political map of the world. Not since the year of which 1915 is the centennial have there been such changes in the boundaries of European countries as will probably take place at the end of the great conflagration. Not only will European boundary lines probably be shattered with old nations resurrected. existing ones broken up. and new ones created, but the colonial geography of the earth may come to be rewritten The Turkish Empire, which, at the outbreak of the war dominated practically every bit of the Bible lands from the Garden of Eden to the crucifixion of Christ, early in the war saw Egypt wrested from her possession and made a part of the British Empire.

As a result of hostilities in Europe, geographic research received a very severe setback. Many expeditions were cancelled, and in numerous cases field parties were summoned home to fight.

AFRICA.

About the middle of March the railroad line from Cabalo, on the Congo, to Lake Tanganyika, following the course of the Lukuga River, was completed. This makes the final link in a line of steam transportation across Africa from the Atlantic to the Indian Ocean, partly by rail and partly by water.

The "Kitty A." West African Islands expedition sailed from Newport, R. I., June 29, to explore the Azores and other islands off the African coast in the interest of the Department of Comparative Zoölogy of the Peabody Museum of Harvard University. The party included Henry R. Emory of Newport and Boston, Prof. Charles Wellington Furlong of Boston, and Dr. William G. Erving of Harvard.

To facilitate the operation of her military forces in Southwest Africa, the Union Government built a railroad line to connect its system with that of German West Africa. The distance between the two systems was three hundred miles.

In spite of the troublous times, Prof. G. Guerich completed his geological investigations in East Africa, and Dr. L. Bruehl, assistant in the Institut für Meereskunde, although forced to give up his study of sea fauna, directed his attention to the study of the interior waters of German East Africa.

While reports were coming in of unusual drought conditions in South Africa, the records of Egypt show increased rainfall there.

Dr. Clargie L. Fisher, curator of the Egyptian section of the University of Pennsylvania Museum, leader of the Eckley B. Coxe, Jr., expedition to Egypt, unearthed a great temple at Memphis. He believes it to be the one built by Seti I., later described in Herodotus.

ASIA.

Members of the Stötzner Szetschevan expedition, unable to return to Germany, continued their investigations in the Chinese hinterland toward Thibet. The zoölogist and entomologist of the expedition were the only members who continued their work in Tschoeng-tu after the outbreak of the war. They remained behind to systematize and pack the collections.

On account of the burdens of the great war, the Government of the Dutch Indies felt itself forced to withdraw the subsidies which it has regularly set aside for geographical research. This withdrawal interrupted the exploration and mapping of Dutch New Guinea, which exploration in the last few years has been making such satisfactory progress.

Capt. F. M. Bailey and Morshead determined and finally solved the question of the Tsangpo-Brahmaputra Rivers, which question has concerned itself in determining through which water course the great Tsangpo River of Thibet unites itself with the Brahmaputra.

The expedition composed of the Italian geologist, Prof. O. Marinelli, Meteorologist C. Lessandri, together with the English topographers, Major H. Wood and A. J. Spranger, besides assistants from the Indian Office for surveying, which, in 1914, had made detailed studies of the Dapsang plateaus in the Himalayas, was turned back by news of the war's outbreak in Europe just at the start of a second expedition into the great mountains. The Italian scientists were called home to the army. The Englishmen continued the expedition alone, making thorough geological studies through Baltistan to East Karakoram, also making meteorological and topographical observations for determining the topography of the region.

Sir Aurel Stein visited again the cave temples of the Thousand Buddhas near Tenhuang. He followed the wall for about 250 miles. It was a remarkable construction, made of carefully secured fascines of reeds or brushwood with gravel layers between them.

The English archæologist, Miss Gertrude Lowthian Bell, returned from her visit to Hail, the capital of the Shammar Arabians. Her visit is the first made in twenty years. She remained eleven days in the city.

The English naturalist, C. Boden-Kloss, in the interests of the Museum in Kuala Lumpur, on the Malacca Peninsula, undertook a trip into Central Sumatra in company with the director of the museum, H. C. Robinson, for the purpose of investigating the animal and plant world in the territory of the Gunung Korintji, the highest point in Sumatra.

The so-called military expedition to Northern New Guinea, for the exploration of the Mamberamo territory, was called back shortly before the outbreak of the war. Its last success was the mapping of the Rouaffar River.

A Netherlands expedition cleared up the mystery of the Kehrwieder River (Keerom), determining it to be identical with the Idenburg River. This is the longest of the river sources of the Mamberamo River in New Guinea.

The ethnographist, Dr. R Thurnwald, carries out investigations of the native tribes of primeval forests of New Guinea, but publication of his investigations will probably be delayed by the war.

A grant was made to the Department of Geology in Harvard University from the Sheldon fund for an expedition to the Fiji Islands to secure new data concerning the origin of coral reefs, the composition and the physiography of volcanic islands and the problems of zoo-geography.

EUROPE.

Lohmann of Kiel has made it possible to study the nature and distribution of even the most minute of the drifting organisms of the sea. A litre of water from the Western Baltic has been found to contain 2,500,000 diatoms; a litre from the Adriatic has only 90,000. The result is that the Baltic fisheries are infinitely more valuable than those of the Adriatic.

The reports of the earthquakes in Central Italy, which occurred on January 13, show that the destruction was more due to the faulty construction of houses than to the severity of the shock. In Avezzano about 90 per cent. of the total population, 11,000, were killed.

The Russian Government undertook the construction of a new railroad line to the port of Kola, which is 300 miles further north than Archangel.

NORTH AMERICA.

During the Summer of 1915 not less than twelve expeditions were engaged in topographical work in Alaska. The most important work was done in the Ruby district on the Yukon and on the Copper River.

Announcement of the route to be followed by the Government railroad in Alaska created a stampede to the tidewater terminus of the projected railroad equalling the famous gold stampedes in the Territory since the Bonanza Creek discoveries.

Secretary Redfield of the Department of Commerce announced on January 25 that a practical, navigable channel from Bering Sea into the mouth of the Kuskokwim River had been discovered by Captain Lukens of the Coast and Geodetic Survey. The river is nine miles wide at its mouth and navigable for more than 600 miles. The submerged flats of the delta extend 100 miles out to sea. More than 14,000 soundings over an area of 100 square miles were made in locating the channel.

Capt. Joseph Bernier, Canadian Arctic explorer, reached port safely after a successful trip to the new land known as Baffin Island, which, in 1916, will be recognized as a Canadian possession.

The non-magnetic yacht Carnegie on March 6 started on her fourth cruise, which is to continue for two years, with Colon, Panama, Honolulu, Dutch

Harbor, and Port Lyttleton, New Zealand, as the vessel's chief ports of call.

Henry Fairfield Osborn, President of the American Museum of Natural History, announced early in the year that the museum had twenty-nine expeditions in the field, working on three continents.

Anthony Fiala was awarded the gold medal of the International Exposition of Photographic Arts and Industries for the best exhibit of geographical photography.

Announcement was made from Montreal that a number of hitherto uncharted islands have been discovered near the centre of Hudson Bay by the Sir William Mackenzie expeditions. The islands are said to extend north and south nearly 400 miles, and to have a total area of 4,000 square miles.

The eruption of Mount Lassen on May 19 was more violent than usual. The volcano has become a subject of co-operative study by the Geological Survey and the Forest Service. J. S. Diller of the United States Geological Survey has been in charge of the investigation.

Through the generosity of Mrs. Mary C. Thompson of New York an area of 75 acres near Syracuse, N. Y., has been set aside as a glacial park. One of the powerful streams at the time of the retreat of the ancient ice sea cut a gorge through the Helderberg escarpment, forming great cataracts which must have rivalled Niagara, and have left deep plunge-basins, one of which is now occupied by Green Lake.

A movement was carried forward during the year of establishing an association to be known as the National Council of Geography Teachers.

Joseph H. Battel left 20,000 acres of forest land to Middlebury College, and a mountain peak to the United States Government.

The steamship Discovery, carrying the international oceanographic expedition, under command of J. F. Stackhouse, has started on a seven-year voyage for the purpose of locating danger spots in the Pacific and Atlantic Oceans.

The Discovery, the ship in which Capt. Robert Scott made his celebrated and tragic expedition to the South Pole, was engaged in carrying ammunition from New York to the allies during the year.

Miss Mary L. Jobe undertook a second expedition to the new ice mountain in the Canadian Rockies that she explored and climbed to an altitude of 8,000 feet last year. The mountain has been named Mount Kitchi.

Dr. Andrew J. Gilmour and Prof. Edward W. D. Holway, of the University of Minnesota, reached the top of Mount Gelkie in the Canadian Rockies August 5.

POLAR RESEARCH.

Reports from Sir Ernest Shackleton in the early part of the year were to the effect that he had erected true meridian posts in South Georgia, where whaling and other ships could test their compasses. He announced that he hoped to start in November for his sledge journey over the Antarctic continent to the Pole and thence to Ross Sound.

Sir Douglas Mawson, visiting the United States after his remarkable escape from death in the Antarctic, declared before the National Geographic Society that the world had not given the United States and Rear-Admiral Wilkes proper credit for the work done by their expedition in the Antarctic three-quarters of a century ago.

The Swedish-English Antarctic expedition, which Prof. O. Nordenskjold expected to lead into West Antarctic regions in 1915, and which had been subsidized by the Swedish Legislature to the amount of 135,000 crowns, was postponed on account of the war's outbreak, which made the participation of the English division of the expedition impossible. Postponement has been indefinitely decided upon up to 1916.

On September 18 news reached the United States that Vilhjalmur Stefansson, commanding the Canadian Arctic expedition, was still alive, and that he had discovered a new land in the Arctic. It was the first word received from the explorer since April 7, 1914, when the Karluk, held helplessly in the ice, drifted away from him and his companions. The new land discovered by Stefansson lies at 73 degrees 43 minutes north latitude and 115 degrees 43 minutes west longitude. Stefansson has continued his work in the Arctic regions during the year.

The Amundsen expedition to the North Pole has been indefinitely postponed. Captain Amundsen felt that his fatherland, Norway, might have other uses for the 150,000 crowns, in the face of the world war.

The Polar expedition under O. Sverdrup goes in the winter quarters on the coast between the Yenisei mouth and the Island of Taimyr.

O. Olsen Norwegian expedition to the upper Jenisei or Yenisei was turned back by the outbreak of the world war, having received the news while among the unknown tribe of Sojotes settled in the sources of the upper Yenisei.

The ice-breakers Taimyr and Waigatsch, which left the harbor of Petropawlowsk, in Kamtschatka, in July, 1914, to make their way through the Bering Sea to Europe, are heard from.

The Russian Polar expeditions of 1914 were accompanied by little good fortune. Two expeditions left Vladivostok in July, 1914, for the purpose of attempting to reach Europe by way of the Bering Sea. They were unable to make port during the following year. The outbreak of the great war interrupted and made impossible a number of other Polar expeditions in preparation and on eve of departure.

Dr. W. S. Bruce, the Scottish Polar explorer, started on his seventh expedition in July, 1914, which was financed by the Prince of Monaco, for the purpose of investigating the Starfjord. Upon learning at Green Harbor of the outbreak of the war he gave up his attempt to force his way to the Starfjord and turned back to Edinburgh.

Five members of the Smithsonian expedition which left Seattle, under command of Koren, the Norwegian naturalist, to collect specimens in the Antarctic, returned to Nome the middle of September.

Relics of the second Grinnell expedition, which set out for the Arctic region in May, 1853, in search of Sir John Franklin, were deposited in the United States National Museum by the daughters of Amos Bonsall, the last survivor of the expedition.

A company of considerable capital was formed at Reykjavik for the purpose of exploiting the Island of Jan-Mayen, situated in the Arctic Ocean between Iceland and Spitzbergen. The island has never been taken possession of by any Nation and is not inhabited.

Knud Rasmussen, the Greenland explorer, made another journey to North Greenland to complete the work of his expeditions of 1913.

A relief expedition was sent to Greenland from Sydney, Novia Scotia, to search for Donald B. MacMillan, who headed a company which sought to find Crocker Land.

SOUTH AMERICA.

One result of the world war, which closed vast areas in Africa and Asia to the scientific investigator, was to turn the attention of American geographers to South America; especially has this been true in the case of the nature students and collectors of specimens.

Dr. C. H. F. Lummis led an expedition in December, 1914, from Los Angeles to the west coast of South America for the purpose of taking films in the fields of geography, archæology, and natural science. The expedition left in a steamer especially equipped for its uses. The itinerary included the seldom visited Pacific Islands and the East Islands, Pitcairn, Tahiti, and Christmas Islands.

Prof. E. O. Hovey, of the American Museum in New York, undertook studies of volcanic action in the islands of the West Indies.

Reports of Dr. R. Lütgen's investigations in Hayti were published. These researches were conducted in the service of the Hamburg Geographical Society and resulted in some interesting volcanic data.

The Argentine Government sends its regular relief expedition to the South Orkney Islands, where a meteorological station is maintained.

The increase in the size of the steamers entering the mouth of the Rio de la Plata has led to a proposition to deepen the channel at the entrance to thirty feet.

The National Geographic Society-Yale University expedition to Peru, under the leadership of Prof. Hiram Bingham, left New York in March. Much new material was gathered.

The Joint Commission of Bolivia and Brazil concluded the exploration and delimitation of the frontier line of the two countries along the rivers Abuna, Rapirran, and Madeira. Wireless telegraph time signals were used to determine longitude.

A state geological survey was founded in Chile.

The Field Museum of Chicago and the American Museum of Natural History of New York sent a joint expedition to Bolivia, whence the party crossed the Andes and descended to the tributaries of the Amazon, intending finally to reach that river by the Madeira.

SCIENTIFIC PROGRESS IN 1915.

BY CHARLES H. HUGHES.

ARCHAEOLOGY.

A REMARKABLE discovery of flint implements was made at Highfield, Southampton, England. An entire series was unearthed covering the rough shaped slabs of table flint to beautifully chipped and completed implements with their edges still unabraded.

At a meeting of the British Association in Australia there was described a completely mineralized human skull found near Warwick, in the Darling Downs of Queensland. It probably dates from a period when the great fossil marsupials were living and is earlier than any other human remains hitherto found in Australia

Fossil bacteria were discovered in very ancient limestones collected in Gallatin County, Montana, by Dr. C. D. Walcott, Secretary of the Smithsonian Institution. Before his discovery it was believed that bacteria were modern forms of life, but now it is apparent that they existed many million years ago.

Further accounts were published of the discoveries made at Meroë, on the River Nile, in Southern Nubia. There is evidence to show that there was a place and equipment for astronomical observations at Meroë in the second century B. C.

To preserve the home of prehistoric people who lived near Quirigua, Guatemala, the United Fruit Company made a reservation of 72 acres. There are at present 13 visible stone monuments, with ruins of temples and pyramids.

Accounts were published of the finding of beautiful jewelry ornaments and tools in a pyramid some sixty miles south of Cairo, Egypt.

An expedition from the Museum of the University of Pennsylvania, Philadelphia, Pa., unearthed at Memphis, Egypt, the temple of Seti 1 or Merneptah, and the palace of the Kings of Memphis. Many interesting discoveries were made, such as the finding of moulds for making amulets, a large number of terra cotta heads, stone vases and pomade boxes.

In excavating for a house near Aztec, New Mexico, there was found a clay image about 16 inches high, which is estimated to be 1,500 years old.

In the renovation of the Roman Pharos, near Dover Castle, England, there was found a Roman sentry box inside the ancient tower. An entrance to Colton Tower was also disclosed, as well as an oven where the troops in Norman days did their cooking.

Nearly a complete fossil elephant of enormous size was excavated at Upnor, near Chatham, England. The one found belonged to a species known as elephas antiqus of the early Pleistocene epoch and was much larger than the mammoth.

At Cyrene (near the village of Grenna, Barca, Africa) a colossal bronze statue of Alexander the Great was discovered. Only the left hand of the statue, which is believed to be the work of the Greek sculptor Lysippus is missing.

Some Roman pottery was found when the general post-office in St. Martin's le Grand (London) was demolished. A few whole pots and many fragments of Samian ware were unearthed, besides whetstones, beads, coins, and other small objects.

In a paper on the stone age of Egypt, published in Ancient Egypt, part III, 1915, the writer describes the striking resemblance between the coarse flakes which abound in prehistoric Egyptian graves with those of the Magdalenian cave type.

A specimen of the genus sirenia was placed in the Museum of Natural History, New York City. It is seven feet long, and the thick upper lip covers prominent incisors and forms a kind of snout. The eyes are very small and have a third lid, which veils them horizontally.

From excavations made in St. Augustine's Abbey, Canterbury, England, there was disclosed the tombs of Archbishops Lawrence, Mellitus, and Justus, the three successors of St. Augustine, with portions of the original flooring.

Relics of an ancient and heretofore unknown race of Indians were unearthed near Moorestown, N. J., by an expedition from the University of Pennsylvania Museum.

Discoveries indicating that in Honduras, Central America, was a large city which was the centre of a high civilization were made by an expedition from the Museum of the American Indian, New York.

ASTRONOMY.

A new comet was discovered by J. E. Mellish, Cottage Grove, Wis., in February, and has been named after the discoverer, viz., a 1915 Mellish. Its nearest approach to the earth was in June, when it was about 40,000,000 miles away.

Observations at Mount Wilson Observatory on the star O. Arg. S. 14,320 indicate that it has a remarkably rapid motion in space. From calculations made from the observations it has a velocity of about 358 miles per second.

The development of apparatus for the delicate work of measuring the radiation from the stars was continued by the United States Bureau of Standards. The present apparatus is so sensitive that, when combined with a three-foot reflecting telescope, it will give a galvanometer deflection of one millimetre when exposed to a candle placed at a distance of 53 miles.

Based on the stars counted on photographic plates, S. Chapman stated that the total light of all the stars is equivalent to 690 stars of the first magnitude, according to the photographic standard, or from 900 to 1,000 first magnitude stars on the visual scale.

The crepe ring of Saturn was observed and measured at the Lowell Observatory, and was found to be wider on the east than on the west side during the month of March.

The contract for the construction of a 60-inch reflecting telescope for the National Observatory at Cordoba, Argentina, was awarded. The mirror will be eight inches thick, while the tube will be 27 feet long and 6 feet in diameter, and with its accessories will weigh more than 14 tons. This will be the largest telescope in the Southern Hemisphere.

A great sun spot, estimated to be 100,000 miles long, was disclosed by the development of a photographic plate exposed at the Naval Observatory, Washington, D. C.

Observations made at the Lowell Observatory on the varying brightness of two satellites of Saturn, viz., Mimas and Enceladus, indicate that they rotate on their axes in periods identical with those of their revolution around Saturn.

The second international conference of the Society of Practical Astronomy was held in Chicago, Ill., on August 16, 17, and 18.

Winnecke's Comet, which was last visible in 1909-10, returned very nearly according to previous calculations, having been found by H. Thiele with the great reflector of the Hamburg Observatory on April 4.

Photographs of Saturn, taken at Lowell Observatory on March 12, confirm visual observations in revealing that Carsini's division is visible in part above the contour of the ball by about four-tenths of its true width.

Messrs. Hirayama and Ogura published, in the proceedings of the Tokio Mathematico-Physical Society, the results of their attempts to fix the dates of early eclipses recorded in Chinese literature.

A testing device for small telescopes, suitable for use as a universal standard, was described in the May number of Comptes rendus. It consists of a collection of rectangular diagrams, each of which is a group of straight, vertical and parallel lines, spaced at intervals of the same breadth as the lines.

The spectrum of Mellish's Comet was observed at Lowell Observatory with the slit spectrograph on April 20, and was found to consist of the usual series of cometary bright bands, but with a relatively intense background of continuous, *i. e.*, solar spectrum of the emission bands.

Jupiter has undergone marked changes during the past year A new belt is gradually widening and the planet is surrounded by clouds of steam.

Professor Sola of the observatory at Barcelona University, Spain, announced that he discovered on September 15 a new planet in the Pisces constellation.

CHEMISTRY.

Two remarkable processes for producing gasoline were brought out—one by Dr. W. F. Rittman and the other by Dr. W. O. Snelling.

The United States Department of Agriculture issued a bulletin on the kelp beds on the Pacific Coast, with suggestions for their exploitation. Kelp can be used as a fertilizer and also can be utilized for obtaining nitrogen.

An Italian chemist (Guido Fel) invented a powder, suitable for use in guns in aeroplanes, that burns without either flame or smoke and does not flare up on detonation.

One of the most elaborate investigations of the relation between the amount of radium emanation in the atmosphere was made by J. R. Wright and O. F. Smith at Manila, P. I. Rainfall and wind movement seem to be the principal meteorological controls, the amount of emanation in the air being greatest when these factors are at a minimum, and *vice versa*.

The Institute of Chemistry published the report of the Glass Research Committee appointed to conduct investigations with the view of arriving at suitable formulas for laboratory glassware, miners' lamp glass, and other glasses.

A novel system of sewage treatment was published in the *Journal of the Society of Chemical Industry* (Vol. XXXIV.). Briefly, the system consists in the separating of the solids from the sludge by treating it with .5 per cent. of yeast for 24 hours at 33° C.

A new heat insulating material combined with excellent electric conductivity was brought out and given the trade name Fibrox. It is a fibrous material of the composition of silicon oxycarbide, is perfectly permanent in air, and is not hygroscopic.

In the studies of electric furnace spectra which have been made at Mount Wilson Observatory in connection with solar research problems, spectra of vanadium and chromium have been investigated. With vanadium 2,000° C. appears to be about the lowest limit for the appearance of a spectrum. In the case of chromium at 1,700° to 1,800° C. a number of the most persistent lines in the spectrum are given.

A process was devised by M. Le Chatelier for the nickel plating of aluminum. The piece of aluminum to be plated is given a preliminary treatment in a bath of hydrochloric acid containing a certain portion of iron. The iron is precipitated on the surface of the aluminum, forming a kind of network. When this is passed into a nickel bath the nickel becomes entangled in the network and adheres strongly to the aluminum.

There was brought out an improved method for the purification of petroleum. Instead of using sulphuric acid, as heretofore, mineral bauxite is used, and the results obtained with it by the Burmah Oil Company, Ltd., Rangoon, Burma, are reported to be very satisfactory.

A report on the investigation of crystal forms of metallic selenium was published in the *Physical Review*. It was noted that all the crystal forms increase in conductivity when illuminated, and with but one exception they have been observed to be doubly refracting.

The Association of Official Agricultural Chemists (Washington, D. C.) was organized for the purpose of securing uniformity and accuracy in the analyses of fertilizers, dairy products and other materials connected with rural industries.

A new form of balance of particular value for weighing chemical substances in a vacuum was described by Dr. J. S. Anderson in a paper read before the Faraday Society of England. It is essentially a current weighing balance reversed, for instead of weights being used, one scale pan is replaced by a coil moving in the field of two fixed coils all connected in series and carrying an adjustable current.

Another crystalline variety of silver was described in the *Journal of the American Chemical Society* for September. The new variety was obtained in long needle-shaped crystals easily visible to the naked eye.

GEOLOGY.

The Geological Survey of Great Britain issued a memoir on the country around Windsor and Chertsey, England. In the memoir is shown how the site chosen for Windsor Castle is due to the erosion of an anticline of chalk which rises from beneath the level Cainozoic beds.

The geology of Central Minas Geraes, Brazil, was discussed in the *Journal of Geology* for May. The present topography of Central Minas Geraes has resulted to a large extent from different erosions of rock formations which offer varying resistances to the processes of degradation.

A remarkable oil field was opened near Thrall, Williamson County, Tex. The peculiarity of the field is that the oil is held in an igneous rock found in the lower portion of a clay known as Taylor marl.

The origin of China clay is dealt with to a considerable extent in a handbook on the collection of kaolin, China clay, and China stone in the Museum of Practical Geology, London. The principal hypotheses put forward to account for the production of kaolin are based on the following agencies: (1) surface weathering, (2) water descending from swamps and bogs, (3) ascending waters containing carbon dioxide, (4) emanations following igneous activity, (5) sulphuric acid solutions and hydrogen sulphide, and (6) hydrolysis.

The geological survey of Panama was continued under the auspices of the Isthmian Canal Commission, United States Geological Survey, and the Smithsonian Institution. A systematic study of the physiography, stratigraphy, and structural geology is being made.

An actual demonstration of the sinking and rising of crystals in artificial melts, corresponding in chemical composition to certain igneous rocks, was discussed in the *American Journal of Science* for February. The author states that the sinking of crystals in magmas must henceforth be accepted as of fundamental importance in explaining the observed diversity in certain igneous masses.

The origin of the Rocky Mountains is described in a pamphlet published by the Geological Survey of Canada. The castellated crags, horns, cols, and cirques are not due to the forms originating with the building of mountain ranges. The final moulding of the Rocky Mountains into their present form is due to the erosive action of ice.

The question as to whether the mountains in Northern Japan have been glaciated or not was discussed in the *Scottish Geological Magazine* for March. The evidence reviewed by one authority comes to the conclusion that there are undoubted traces of glacial phenomena on certain peaks.

The Geological Survey (English) issued a pamphlet entitled "Notes on Sources of Temporary Water Supply in the South of England and Neighboring Parts of the Continent." This was written primarily to aid the Royal Army Medical Corps in finding drinking water at short notice.

From a new consideration of the Interglacial Gorges of Six Mile Creek at Ithaca, N. Y. (*Journal of Geology*, Vol. XXIII.), the authors conclude that at least three glacial epochs are indicated as separated by periods of time longer than that since the last epoch. The great Wisconsin ice extension entered the interglacial stream gorges and deposited its drift there without appreciably modifying their walls.

Important papers were published by the United States Geological Survey on "Geology and Ore Deposits of Copper Mountain and Kasaan Peninsula, Alaska," and "Geology and Coal Resources of North Park, Colorado."

ENGINEERING.

The European war has shown the great engineering skill that was used in manufacturing guns and ammunition. The Skoda mortars of Austria fire a projectile weighing about 860 pounds at a maximum horizontal range of nearly 7.5 miles. Rifle bullets were made of a special shape, and instead of having a flat trajectory had a rising one.

The largest lock canal in the western part of the United States was completed by the United States Government on the Oregon side of the Columbia River, above Dalles, Ore. This canal makes the Columbia River navigable for 500 miles from the sea.

A piece of engineering work which has an important bearing on international railroad traffic was the completion of the Moutier-Granges tunnel, which connects the French railroads with the Swiss, centring at Berne. The tunnel is about five miles long.

Preliminary work was started on a municipal water system for Denver, Col. The estimated cost of the system is $8,000,000.

Plans were submitted by the Ontario Hydro-electric Commission to the Ontario Government for an eventual development at Niagara Falls and the spillways of the new Welland Canal of 250,000 H.-P. and an immediate development of 100,000 H.-P.

From a mechanical standpoint it is interesting to note that the largest typewriter in the world ever

built was exhibited at the Panama-Pacific Exposition. The typewriter was 21 feet wide by 15 feet high and was complete in every detail.

What is considered to be the fastest automobile race track in the world was completed at Sheepshead Bay, Brooklyn. The track has a circumference of two miles, with two straightaway stretches of 1,790 feet and two turns of 3,489 feet.

A through train service was established on the Canadian Northern Pacific Railroad between Port Mann, B. C., and Quebec.

Contracts were awarded and work was started on sections of a rapid transit system in Philadelphia, Pa. The two lines proposed for immediate construction, the Broad Street Subway and the Frankford Elevated Line, will cost together nearly $42,000,000.

A hydro-electric plant at Porjus, Sweden, was completed. This plant is worthy of note, as it is above the Arctic Circle, and the intake and discharge tunnels and the power station are all under ground as provision against interruption by ice.

Work was started on one of the largest oil storage reservoirs in the United States, near Port Arthur, Cal. It will have a capacity of 500,000,000 barrels of oil, and its roof of three and one-half acres will be covered by redwood.

One of the most important engineering contracts under way is the eight-mile ship canal that will connect Seattle, Wash., with Lake Washington. When the canal is completed it will create for Seattle a fresh water harbor of about 25,000 acres.

Unusual designs of piers and floor system characterize the new bridge over the Columbia River, which will cost about $1,500,000. The bridge will be nearly three and one-quarter miles long and connect the cities of Vancouver, Wash., and Portland, Ore. The centre span is arranged to lift between towers to a height of 150 feet above high water.

The largest single tandem gas-blowing engine ever built in the United States (1915) was turned out by the Mesta Machine Company. The gas cylinders are 46 inches in diameter, the air cylinder 84, with a common stroke of 60 inches.

Harbor development on an extensive scale was under way at Victoria, B. C. The improvements include a 2,500-foot breakwater, two piers 800 and 1,000 feet long, and the dredging of the present channel.

The Bassano Dam, a part of the Canadian Pacific Railway Company's irrigation project in Southern Alberta, Canada, the largest individual project of its kind on the American continent, was completed in April. The Bassano Dam is the second largest dam in the world, the largest being the Assouan Dam in Egypt.

Water from the Apennines was distributed for the first time in April to the provinces of Bari, Foggia, and Lecce, Italy, through the Apulia aqueduct, which is 150 miles long and is one of the longest aqueducts in the world.

WORTH KNOWING.

The average estimated velocity of different bodies is as follows:

	Miles per Hour.		Miles per Hour.		Miles per Hour.		Miles Per Second.
A man walks..	3	A duck flies...	90	Slow rivers flow.	3	Light moves...	186,320
A horse trots..	7	A sparrow....	92	Rapid rivers..	7	Electricity moves.....	288,000

THE AMERICAN BONAPARTES.

PRINCE JEROME BONAPARTE (King of Westphalia), born Ajaccio, Corsica, November 15, 1784; died at Ville Genis, near Paris, June 24, 1860. Married, first, at Baltimore, Md., December 24, 1803, Elizabeth, daughter of William Patterson, Esq. She was born at Baltimore, February 6, 1785, and died in that city April 4, 1879. The issue of the marriage was:

Jerome Napoleon Bonaparte, born at Camberwell, England, July 7, 1805; died at Baltimore, Md., June 17, 1870. Married, November 3, 1829, Susan May, daughter of Benjamin Williams, who was born in Roxbury, Mass., but spent his life in Baltimore, Md. She was born April 2, 1812, and died September 15, 1881. The issue of the marriage was:

(1) Jerome Napoleon Bonaparte, born at Baltimore, Md., November 5, 1830; died at Beverly, Mass., September 3, 1893. He was educated at and graduated from West Point Military Academy, and served for two years in the American Army, entered the French Army in 1854, took part in the Crimean and Italian campaigns and resigned after seventeen years' service at the close of the Franco-German war, with the rank of Lieutenant-Colonel.

He was married September 7, 1871, to Caroline Le Roy, daughter of Samuel Appleton, granddaughter of Daniel Webster, and widow of Newbold Edgar. She died November 19, 1911. The issue of the marriage was:

(1) Louise Eugenie Bonaparte, born February 7, 1873. Married December 29, 1896, Comte Adam de Moltke-Huitfeldt, of Denmark, and has issue; (1) Marie Louise Caroline, born November 7, 1897; (2) Leon Charles Joseph, born November 14, 1898; (3) Jerome Eugene Otto, born January 14, 1902; (4) Adam Nicolas, born May 17, 1908; (5) Eyler Helweg.

(2) Jerome Napoleon Bonaparte, born Paris, France, February 26, 1878. Harvard B. A. and Georgetown University. Lives in Washington, D. C. Married April 8, 1914, to Blanche Pierce Strebeigh.

(2) Charles Joseph Bonaparte, born at Baltimore, Md., June 9, 1851. Married September 1, 1875, Ellen Channing, daughter of Thomas Mills Day, of Hartford, Ct. No issue. Mr. Bonaparte is a Harvard B. A., 1871; LL. B., 1875; a lawyer. Was Secretary of the Navy from July 1, 1905, to December 17, 1906, and Attorney-General of the United States from December 17, 1906, to March 5, 1909; is now President of Enoch Pratt Library of Baltimore and was for 12 years Overseer of Harvard; is now Trustee Catholic University.

These Grand Lodges are in full affiliation with the English Grand Lodge, of which the Duke of Connaught is Grand Master, and the Grand Lodges of Ireland, Scotland, Cuba, Peru, South Australia, Mexico, the Netherlands, Belgium, Sweden, Norway, Denmark, New South Wales, Victoria, and also with the Masons of Germany and Austria. They are not in affiliation and do not correspond with the Masons under the jurisdiction of the Grand Orient of France; they, however, affiliate with and recognize Masons under the jurisdiction of the Supreme Council. Freemasonry is under the ban of the Church in Spain and other Catholic countries and the membership is small and scattered.

ANCIENT ACCEPTED SCOTTISH RITE MASONS.

SUPREME COUNCIL OF SOVEREIGN GRAND INSPECTORS-GENERAL OF THE THIRTY-THIRD AND LAST DEGREE.

The officers of the Northern Jurisdiction are: *M. P. Sovereign Grand Commander*—Barton Smith, Toledo, Ohio. *P. G. Lieutenant-Commander*—Leon M. Abbott, Massachusetts. *Grand Minister of State*—Amos Pettibone, Ill. *Grand Treasurer-General*—Leroy A. Goddard. *Grand Secretary-General*—James H. Codding, office, 299 Broadway, New York City.

The officers of the Southern Jurisdiction are: *Sovereign Grand Commander*—George F. Moore. *Secretary-General*—J. H. Cowles, 433 Third Street N. W., Washington, D. C. These grand bodies are in relations of amity with the Supreme Councils for France, England, Scotland, Ireland, Belgium, Brazil, Argentina, Uruguay, Paraguay, Peru, Portugal, Italy, Mexico, Colombia, Chile, Central America, Greece, Canada, Cuba, Switzerland, Egypt, Turkey, Spain, Serbia, Ecuador, and the Netherlands.

ROYAL ARCH MASONS.

OFFICERS OF THE GENERAL GRAND CHAPTER.

General Grand High Priest—Geo. E. Corson, Washington, D. C. *General Grand King*—Wm. F. Kuhn, Kansas City, Mo. *General Grand Treasurer*—Thos. J. Shryock, Baltimore, Md. *General Grand Secretary*—Charles A. Genover, Coldwater, Mich.

The General Grand Chapter was organized at Boston, Mass., October 24, 1797, and is a central organization of the grand chapters of the several State jurisdictions. It exercises direct jurisdiction over territory not occupied by any Grand Chapter.

The number of grand chapters, each representing a State or Territory (except Pennsylvania and Virginia), is 47, and the number of enrolled subordinate chapters is 3,241. Hawaii, Chile, Philippine Islands, Cuba, Porto Rico, Canal Zone, Alaska, and Panama are under the immediate jurisdiction of the General Grand Chapter, with a total of 10 subordinate chapters.

The total membership of the enrolled subordinate chapters is 422,359. The degrees conferred in chapters are Mark Master, Past Master, Most Excellent Master, and Royal Arch Mason.

The next Triennial Convocation will be held at San Francisco, Cal., 1918.

KNIGHTS TEMPLAR.

OFFICERS OF THE GRAND ENCAMPMENT OF THE UNITED STATES OF AMERICA.

Acting Grand Master—Lee Smith, Pittsburgh, Pa. *Grand Treasurer*—H. Wales Lines, Meriden, Ct. *Grand Recorder*—Frank H. Johnson, Louisville, Ky.

The number of Grand Commanderies in the United States and Territories, each representing individual States or Territories (except that Massachusetts and Rhode Island are combined), is 46. Commanderies subordinate to Grand Commanderies, 1,370, with a membership of 236,060. Commanderies subordinate to Grand Encampments, 10; membership, 1,308; total number of commanderies, 1,345; total membership, 237,368. The orders conferred in a Commandery of Knights Templar are Red Cross, Knight Templar, and Knight of Malta. A Mason, to obtain these orders, must be a Master Mason and Royal Arch Mason in good standing, and a member of both Lodge and Chapter. The next Triennial Conclave will be held in Los Angeles, Cal., June, 18, 1916.

FREE AND ACCEPTED (COLORED) MASONS OF THE STATE OF NEW YORK.

There are at present about two thousand (2,000) members in the State of New York, more than four hundred (400) Royal Arch Masons, two hundred (200) Knights Templar, two hundred Scottish Rite Masons, and about one hundred and seventy-five Nobles of the Mystic Shrine. In the United States at present there are about one hundred and twenty-five thousand (125,000) Masons with members of the Adoptive Rites in like proportion as those of New York State. *Grand Master*—William O. Payne. *Deputy Grand Master*—Rev. John C. Des Verney. *Grand Treasurer*—Thomas H. Wright. *Grand Secretary*—David W. Parker, 51 West 139th Street, New York City. The Seventy-first Annual Grand Communication will be held in New York City on June 7, 1916.

NOBLES OF THE MYSTIC SHRINE.

The Ancient Arabic Order of the Nobles of the Mystic Shrine is not a regular Masonic body, but its membership is composed strictly of Masons who have reached the 32d degree, A. A. S. Rite (18th degree in England), or Knights Templar in good standing. There are 139 temples in the United States, and a total membership of about 220,000.

The following are the imperial officers for the United States for 1915-16: *Potentate*—J. Putnam Stevens, Portland, Me. *Deputy Potentate*—Henry F. Niedringhaus, Jr., St. Louis, Mo. *Chief Rabban*—Charles E. Ovenshire, Minneapolis, Minn. *Treasurer*—William S. Brown, 523 Wood Street, Pittsburgh, Pa. *Recorder*—Benjamin W. Rowell, 206 Masonic Temple, Boston, Mass. The 1916 Conclave will be held at Buffalo, N. Y., July 11, 12, 13.

SOCIETAS ROSICRUCIANA IN AMERICA.

Incorporated under the laws of the State of New York in 1912. Has jurisdiction throughout the United States, operating through a High Council and subordinate colleges, also maintaining colleges on the African West Coast. Is in fraternal communication with councils in Great Britain, Germany, France, Spain and Egypt. *Secretary-General's* address, 45 John Street, New York City. Object: "The teaching and study of moral philosophy and ethical principles through the exploration of the archæological, historical and traditional subjects of Rosicrucianism, Freemasonry, Druidism and other arcane organizations.

PRINCIPAL FRATERNAL ORGANIZATIONS.

NOTICE—The following data concerning fraternal organizations is based upon the latest information obtainable, but is subject to the frequent changes incidental to the formation of these bodies.

BEN HUR, TRIBE OF—Founded 1894; supreme temple, Crawfordsville, Ind.; courts, 1,439; members, 101,011; benefits disbursed since organization, $13,163,013; benefits disbursed last fiscal year, $1,291,060; Supreme Chief, R. H. Gerard; Supreme Scribe, J. C. Snyder, Crawfordsville, Ind.; Supreme Keeper of Tribute, S. E. Voris.

B'NAI B'RITH, INDEPENDENT ORDER OF—Founded 1843; grand lodges, 11; subordinate lodges, 436; members, 40,083; benefits disbursed last fiscal year, $524,209; President, Adolf Kraus, Chicago, Ill.; First Vice-President, Lucius L. Solomons, San Francisco, Cal.; Second Vice-President, Archibald A. Marx, New Orleans, La.; Treasurer, Jacob Furth, St. Louis, Mo.; Secretary, A. B. Seelenfreund, Tribune Building, Chicago, Ill.

B'RITH ABRAHAM ORDER—Founded 1887; grand lodge, 1; sub-lodges, 733; members, 194,490; benefits disbursed since organization, $5,911,677; benefits disbursed last fiscal year, $704,100; Grand Master, Leon Sanders, 220 Broadway, New York; Secretary, Max L. Hollander, 37 East Seventh Street, New York; Treasurer, David Goldberg, Brooklyn, N. Y. Next convention held in New York City, June, 1916.

BROTHERHOOD OF AMERICAN YEOMEN—Founded 1897; supreme castle, 1; subordinate homesteads, 3,735; members, 196,478; benefits disbursed since organization, $11,760,933; benefits disbursed last fiscal year, $1,700,338; Grand Foreman, William Koch; Chief Correspondent, W. E. Davy; Grand Master of Accounts, F. S. Dunshee. Address of officers, Des Moines, Iowa.

CATHOLIC BENEVOLENT LEGION—Founded 1881; State councils, 6; subordinate councils, 346; members, 15,484; benefits disbursed since organization, $24,214,312; benefits disbursed last fiscal year, $629,008; President, R. B. Tippett, Baltimore, Md.; Secretary, John E. Dunn, 186 Remsen Street, Brooklyn, N. Y.; Treasurer, Wm. T. Reynolds, Brooklyn, N. Y.

CATHOLIC KNIGHTS OF AMERICA—Founded 1877; grand councils, 26; subordinate councils, 511; members, 18,220; benefits disbursed since organization, $19,612,837; benefits disbursed last fiscal year, $582,347; Supreme President, Felix Gaudin, New Orleans, La.; Supreme Vice-President, Geo. D. Landwehr, Cumberland, Md.; Supreme Secretary, Henry Siemer, St. Louis, Mo.; Supreme Treasurer, Charles E. Hannauer, St. Louis, Mo.

WIDOW MOTHERS' PENSIONS.

RELIEF FOR THE CHILDREN OF WIDOWED MOTHERS.

Twenty-five States now have so-called "Widow Mothers' Pension" acts. The word "pension" is a misnomer and therefore misleading. A law passed in 1915 by the New York Legislature shows the clear purpose of these acts. In a memorandum on that law, on signing it, Governor Whitman said: "The bill provides for the appointment of local boards of child welfare in the city of New York and in each county of the State outside of New York City. * * * Such boards are created for the sole purpose of granting 'allowances to widowed mothers with one or more children under the age of 16 years, in order that such children may be suitably cared for in their homes by such mothers.' Such allowances are to be granted in the discretion of the board when money has been appropriated therefor, in the county by the Board of Supervisors and in the city by the Board of Estimate and Apportionment and Board of Aldermen. The powers of the board in affording the relief provided by the bill will therefore be limited by the money made available by the local authorities. * * * An allowance to a widowed mother may only be made under the bill where the board determines that the mother is a suitable person to bring up her own children and that aid is necessary to enable her to do so. It must further appear that if such is not granted the child or children must be cared for in an institutional home. The amount of allowance to the mother is limited to the amount which it would be necessary to pay to an institutional home for the care of such child or children. The allowance, when made, is to continue for a period of not longer than six months and may thereafter be continued for similar periods if renewed by the board, or it may be revoked at the pleasure of the board."

An investigation by a committee of the State Senate of New York, of which Senator William H. Hill is Chairman, disclosed "the fact that Missouri was the first State to attempt even in a limited form to have half-orphans cared for by their mothers in their home, said mothers to be compensated for such service from public funds." Senator Hill stated in a letter to Governor Whitman in 1915 that "the Missouri law was approved April 7, 1911, and went into effect in June, 1911. By a population limitation it only applied to Jackson County, in which Kansas City is situated. The law has by amendment since been extended to St. Louis and possibly by later amendments to a larger territory. Illinois, in the same year (1911) passed a similar but more comprehensive 'Funds to Parents act.' The third State was Colorado, which adopted by popular vote the 'Mothers' Compensation act,' submitted at the November election in 1912. The law followed in general the provision of the Illinois 'Funds to Parents act' and became operative upon proclamation of the Governor on January 22, 1913. At the present time twenty-eight States have either general or limited laws commonly known as 'widowed mothers' pension laws,'" as follows:

Florida—Legislature of 1915 authorized appointment of commission to study question of mothers' pensions. Commission of five persons has been appointed.

An account of the various widows' "pension" laws was given by the Hon. David F. Tilley, a member of the Massachusetts State Board of Charities, before the National Conference of Catholic Charities, held at Washington in September, 1914. He said: "The purpose underlying all these laws is that of preventing the breaking up of the home when, on account of death or disability, the support of the natural breadwinner of the family is removed. The methods adopted to secure this end vary widely in the different States, as will be seen from the following summary of the laws:

"Persons to Whom Aid May Be Given.—The law applies to any parent who, on account of poverty, is unable to care properly for a dependent or neglected child, but is otherwise a proper guardian, in Colorado and Nebraska; to any parent or grandparent in Nevada; to any parent or guardian in Wisconsin. In other States it applies only to mothers. In California, New Jersey, Oklahoma (and also in St. Louis), the mother must be a widow to receive the benefits of the act. In the remaining States not only widows but the following other classes of mothers with dependent children are included: In Idaho, Iowa, Minnesota, Missouri, Ohio, Oregon, South Dakota, and Washington, mothers whose husbands are in prison; in Iowa, Minnesota, Missouri Oregon and Washington, mothers whose husbands are in State insane asylums; in Illinois, Minnesota, Ohio, Oregon, South Dakota, and Washington, mothers whose husbands are totally incapacitated, physically and mentally; in Michigan, Ohio (if deserted three years), Pennsylvania and Washington (if deserted one year), deserted wives. In Michigan are included also unmarried and divorced mothers. The law in Massachusetts applies to all mothers with dependent children who shall have resided in the Commonwealth not less than three years. In Colorado, Oregon and Wisconsin, if the person having custody of the child is not regarded as capable of expending the aid wisely the court may order it to be paid to some other person for the benefit of the child.

"Conditions On Which Aid Is Given—(a) Degree of Poverty.—The condition of receiving aid under these laws is uniformly that of poverty, with certain definitions added in some of the laws. For instance, in Washington the mother must be destitute; in New Hampshire and Utah she must be dependent entirely on her own efforts for support; in Oregon, wholly or partly dependent; in Illinois she may not own real property or personal property other than household effects. In Idaho, Illinois, Missouri, New Hampshire, Ohio, South Dakota and Utah the aid must, in the judgment of the court, be necessary to save the child from neglect; in New Jersey, from becoming a public charge. In Massachusetts we have few restrictions other than that the mother must be fit to bring up her children and that public relief is necessary.

"(b) Home Conditions—In most of the laws the requirement is made that the mother is a fit person morally and physically to bring up her children and that it is for the welfare of the child to remain at home. In Idaho, Illinois, Missouri, New Hampshire, Ohio, South Dakota and Utah it is made conditional that the child or children be living with the mother and that the mother shall not work regularly away from home. In South Dakota she may not be absent from work more than one day in a week; in Illinois and Ohio the amount of time is left to the discretion of the court, while in Massachusetts the Overseers granting the relief determine how much work the mother may perform and give proper care to her family.

"(c) Residence—In Washington and Minnesota one year's residence in the county is required; in Idaho, Missouri, New Hampshire, Ohio and Utah, two years' residence; in Illinois, Pennsylvania and Massachusetts, three years' residence. Some of the States require 'legal' residence in the State. Minnesota, two years' residence, and California, three years. California and Illinois require, in addition, that the applicant be a citizen of the United States.

"Age of Child—The maximum age of a child

WIDOW MOTHERS' PENSIONS—*Continued.*

on whose account an allowance may be made is 14 years in California, Iowa, Massachusetts, Minnesota, Missouri, South Dakota and Wisconsin, also Illinois, although the limit may be extended to 16 years if child is ill or incapacitated for work; 15 years in Idaho, Utah and Washington; 16 in Colorado, New Hampshire, New Jersey, Oklahoma, Oregon and Michigan; 18 in Nebraska and Nevada. The legal working age is the limit in Ohio and Pennsylvania.

"Amount of Allowance—The maximum allowance for one child is $2 a week in Iowa; $3 a week in Michigan. It is $9 a month for one child, $14 for two children, and $4 for each additional child in New Jersey; $10 a month for each child in Minnesota and Nebraska; $10 a month for one child, $5 for each additional child in Idaho, Missouri (i. e., Jackson County), New Hampshire, and Utah; $10 for one child and $7.50 for each additional child in Oregon; $12 for one child and $4 for each additional child in Wisconsin (amount may, however, be temporarily increased in cases of sickness or unusual conditions); $12 for one child, $20 for two children, $26 for three children and $5 for each additional child in Pennsylvania; $12.50 for each child in California ($6.25 a month by the State and a like amount by the city or county); $15 for one child and $5 for each additional child in Washington; $15 for one child and $7 for each additional child in Ohio and South Dakota; $15 for one child and $10 for each additional child in Illinois (not to exceed, however, $50 for any one family). In Colorado, Nevada and Massachusetts no maximum is set, but the amount must be sufficient to care properly for the children, with the restriction in Nevada that it may not exceed what it would cost to maintain and educate the child in a county or State home. In Oklahoma the 'school scholarship' is the equivalent of the wages of the child. In the city of St. Louis the maximum is $3.50 a week, which may be increased temporarily on account of sickness or other exceptional conditions.

"Administration—The law is administered by the Juvenile Court or some other county court with similar functions in Colorado, Illinois, Idaho (Probate Court), Iowa, Michigan, Minnesota, Missouri, Nebraska, Nevada, New Jersey (Common Pleas), Ohio, Oregon, South Dakota, Utah, Washington and Wisconsin; by the County Commissioners, upon the advice of the School Board, in New Hampshire; by the City or Town Overseers of the poor in Massachusetts, and by an unpaid board of five to seven women residents of each county, appointed by the Governor, in Pennsylvania. In Ohio, Nebraska and South Dakota, the order granting aid is good only for six months unless renewed. In Idaho, Illinois, Minnesota, Missouri, Nevada, New Hampshire, Ohio, Utah and Washington the court may at any time modify or discontinue the allowance. In California supervisory powers are given to the State Board of Control, which can appoint three State children's agents with an unpaid advisory committee of three persons in each county; in New Jersey all cases granted aid are under the supervision of the State Board of Children's Guardians. In Massachusetts certain supervisory powers are given to the State Board of Charity; in Wisconsin to the State Board of Control. In Illinois and Ohio the law requires that visits shall be made to the homes from time to time by the probation officers; in Massachusetts, that the Overseers of the Poor shall visit the families at least once every three months and reconsider each case at least once a year.

"Source of Funds—In all the States except California, Massachusetts, Pennsylvania and Wisconsin the funds for carrying out the provisions of these laws come out of the county treasury. In Illinois they are raised by a special tax of not exceeding three-tenths of a mill on the dollar of a taxable property of the county, and in Ohio by a tax not exceeding one-tenth of a mill.

"Reimbursements to the extent of $75 a year is made to the local authorities by California, and in Massachusetts one-third of the amount in settled cases and the whole amount in unsettled cases. The State bears one-half of the expense in Pennsylvania and Wisconsin, within the limits of the appropriation, which is apportioned according to the population of the counties.

"Penalty for Fraud—Penalties are provided for procuring or attempting to procure an allowance fraudulently in Idaho, Illinois, Missouri, Nevada, Ohio, Pennsylvania, South Dakota, and Washington."

THE GOVERNORS' CONFERENCE, 1915.

THE last meeting of the Governors' Conference, the eighth annual session of that organization, was held at Boston, August 24 to August 27, 1915. Daily sessions were held in the Massachusetts State House during those four days.

Four principal topics were included on the official programme, namely, (1) "Penology," (2) "Greater Efficiency in State Administration," (3) "Conservation," and (4) "The Relation of the State to the National Defence."

Two papers were read under the general heading "Penology," namely, (1) "Abolition of Capital Punishment," and (2) "The Duty and Responsibility of the Governor in Dealing with Prisoners."

Four papers were read under the general heading "Greater Efficiency in State Administration," namely, (1) "Economy and Efficiency in the State," (2) "The Short Ballot," (3) "Governor's Initiative," and (4) "Functions of the Executive Department in Relation to the Budget."

Four papers were read under the general heading "Conservation," namely, (1) "Conservation of Natural Resources," (2) "State Control of Water Power," (3) "Development of the West," and (4) "Conservation of Mankind and Natural Resources."

Two papers were read under the general heading "The Relation of the State to the National Defence."

Discussions by the Governors followed the reading of the formal papers under each of these four principal divisions.

The greatest interest centred around the subject "The Relation of the State to the National Defence." In connection with the formal papers and discussions of this timely and important subject, Secretary of the Navy Daniels honored the members of the Governors' Conference with a review of the North Atlantic Fleet off Boston Light, the members of the conference being the guests of the Secretary of the Navy and Admiral Fletcher on board the U. S. S. Wyoming. The Massachusetts Volunteer Militia were also mobilized at Boston for the occasion.

The functions of the Governors' Conference as set forth in its articles of organization are as follows: "The functions of the Governors' Conference shall be to meet yearly for an exchange of views and experiences on subjects of general importance to the people of the several States, the promotion of greater uniformity in State legislation, and the attainment of greater efficiency in State administration."

Inasmuch as the Legislatures of but few States will meet in regular session in 1916, the usual important places on the programme were not given over to subjects under the general heading "Uniformity of State Laws." Most of the programme for the next meeting will be reserved for particular topics under this general heading.

The next meeting of the Governors' Conference will be held at Salt Lake City, Utah. The exact date for the meeting will be fixed by the members of the Executive Committee. The officers of the Governors' Conference elected at Boston are as follows:

Members of the Executive Committee—Gov. William Spry, of Utah, Chairman; Gov. Henry C. Stuart, of Virginia, and Gov. Arthur Capper, of Kansas. *Treasurer*—Former Gov. John Franklin Fort, Newark, N. J. *Secretary*—Miles C. Riley, Madison, Wis.

The proceedings of the annual sessions of the Governors' Conference are published in an official annual report.

THE estimates in the first two tables, except footnotes thereto, are by Whitaker's (London) Almanack; those of Religious Divisions in Europe and the World, by Gustav Sundbärg in *Webb-Mulhall*. A distinction should be observed between followers and actual communicants.

For countries outside Europe, Roman Catholics are not separately specified, but are included under the heading "Others." It is estimated that there are about 89 million Roman Catholics outside Europe, thus making a total in the world of about 268 millions, as against 177 million Protestants. Greek Catholics numbered 119,300,000. Buddhists and Brahminists about 550 millions † Including Greek Catholics. ‡ Readjustment of boundaries owing to the European wars has doubtless affected the figures given in table.

* By the acquisition of new territories, as the result of the wars with Turkey and Bulgaria in 1912-13, the number of the Jewish population of Greece has been immensely increased. A similar remark applies to the various Balkan states.

† In 1904 the Jewish population of Turkey in Europe was estimated at 188,900. Since the Balkan wars it has been reduced to 80,000, the greater portion concentrated in Constantinople.—*Jewish Review.*

Grand Total for 1914	178,313	225,486	38,805,559

The aggregate of 38,805,559 represents actual church membership, and includes all Catholics (communicants, but not unconfirmed minors). It does not give all persons affiliated by family ties to Protestant bodies. The larger of the Protestant bodies may claim twice the number of their communicants as nominal adherents.—Editor of The Almanac.

Note.—(b) The American Jewish Year Book for 1913-14 estimates the number of the Jewish race in the United States as 2,043,762. (c) Census of 1906. (d) Process union with Northern Baptists. ‡ Returns for 1913. * For 1907.

SEATING CAPACITY OF CHURCHES.

The total seating capacity of church edifices reported in 1906, according to the Census Bulletin of August 20, 1909, was 58,536,830, an increase over 1890 of 14,976,767, or 34.4 per cent. The seating capacity reported for the Protestant bodies was 53,282,445; for the Roman Catholic Church, 4,494,377; and for the remaining bodies, 760,008. The rate of increase was practically the same for both the Protestants and the Roman Catholics, being 33.6 per cent. for the former, and 33.3 per cent. for the latter. The increase in the seating capacity of churches has kept pace with the increase in population, the seating capacity being 69.2 per cent. of the population in 1890, compared with 69.5 per cent. in 1906.

The average seating capacity per organization for the Protestant bodies taken together was 317, and for the Roman Catholic Church, 436. With the single exception of the Roman Catholic Church, all the denominations showed an average seating capacity considerably in excess of the average membership. For the Protestant bodies the average seating capacity was three times the average membership per organization, while for the Roman Catholic Church the average membership was almost two and one-fourth times the average seating capacity.

The floor space of the large cathedrals of the world is as follows, in square feet: St. Peter's, Rome, 227,069; Seville, Spain, 124,000; Milano, Italy, 107,000; St. John the Divine, New York City, 99,500; Cologne, Germany, 91,464; St. Paul's, London, 84,025; York, England, 72,860; Amiens, France, 71,208; St. Sophia, Constantinople, 70,000; Chartres, France, 68,260; Lincoln, England, 66,900; Winchester, England, 64,200; Notre Dame, Paris, 64,108; Westminster, England, 61,729; St. Patrick's, New York City, 55,000.

Seventh-Day Adventists—The following statement has been prepared by H. E. Rogers, Statistical Secretary of the General Conference:

The doctrine of the second coming of Christ was preached extensively in the United States and Europe during 1840-1844, and found adherents in many denominations. The circulation of books and journals on this question deepened the interest, and this study and agitation brought about the formation of a movement which assumed definite form in 1846 in the New England States and was later organized as the Seventh-Day Adventist denomination. The chief tenets of this body are a belief in the literal, personal second appearance of Christ, yet without ever setting a time for that event, and the observance of the seventh day of the week as the Sabbath. They believe that the dead sleep until Christ's second coming; that the righteous dead are then raised to life, and that the living righteous are made immortal. Their total communicants throughout the world is 125,844. They have 128 organized conferences, 106 mission fields, 3,702 churches, 67 advanced educational institutions, 611 primary schools; total enrolment, 19,700.

Beginning in 1894, active work was begun in non-Christian lands, and has been continued until the present, so that a segregation of the work conducted in non-Christian and non-Protestant lands, from the foregoing figures, indicates the following: Mission work is carried forward in 67 countries, with a total force of 1,706. There are 710 churches, 23,000 adherents, 10,000 pupils in 210 schools taught by 375 foreign and native teachers.

Headquarters, Takoma Park, Washington, D. C.

Latter Day Saints' Reorganized Church—The Reorganized Church of Jesus Christ of Latter Day Saints is a separate body, having its headquarters at Lamoni, Ia. Its membership now numbers 73,899. It has about 1,000 active ministers in the field, 33,062 Sunday-school members and 637 Sunday schools. It claims to be the church in succession to the one founded by Joseph Smith in 1830. It was reorganized in 1852, and is presided over by Frederick M. Smith, of Independence, Mo., grandson of the Prophet. *Presiding Bishop*—Edmund L. Kelley, Independence, Mo. *General Church Secretary*—Richard S. Salyards, Lamoni, Ia. The only church of this denomination in New York City is at Park Place and Schenectady Avenue, Brooklyn, N. Y. *Pastor*—E. B. Hull, 1339 Prospect Place, Brooklyn, N. Y.

Missionary Education Movement—*Chairman*—Fred P. Haggard. *Vice-Chairman*—Samuel Thorne, Jr. *Recording Secretary*—F. C. Stephenson. *General Secretary*—Harry W. Hicks. *Treasurer*—James S. Cushman. Headquarters, 156 Fifth Avenue, New York City.

Young People's Society of Christian Endeavor—*President*—Rev. Francis E. Clark, D. D. *General Secretary*—William Shaw, LL. D.

Each society is in some local church, and in no sense outside. It exists simply to make the young people loyal and efficient members of the Church of Christ. It is the church training the young. Its motto is, "For Christ and the Church." In July, 1915, there were more than 77,000 societies, with a membership of about 4,000,000, chiefly in the United States and Canada, and in Australia, Great Britain, China, India, Japan, and in all missionary lands. It is found in about the same proportions in all the great evangelical denominations and in all their subdivisions. Headquarters, Christian Endeavor House, 31 Mount Vernon Street, Boston, Mass.

American Sunday-School Union—The First Day Society, founded in Philadelphia in 1791, still active, led to the formation of the Philadelphia Sunday and Adult School Union in 1817, which, uniting with other similar societies, was changed in name to the American Sunday-School Union in 1824. Its object is twofold: To establish and maintain Sunday-schools; to publish and circulate moral and religious publications. It is a voluntary union of Christians of different denominations to teach the truths of our common Christianity as they are taught in the Bible.

Its great field is the rural districts. The Philadelphia Union began with one juvenile book in 1817, and one missionary in 1821. The American Sunday-School Union now issues a thousand works and nine periodicals. In ninety years it has circulated $12,000,000 to $15,000,000 worth of Bibles, testaments, and religious works. In ten years it founded 24,614 Sunday schools, with 943,930 members; resulting in 97,076 hopeful conversions and 914 churches. In ninety years the union founded 127,720 Sunday schools, with 5,677,970 members. It employs Sunday school missionaries, who have organized an average of four new Sunday schools for each day of the last ninety years. Its benevolent work costs $250,000 yearly. Officers: *President*—Martin L. Finckel. *Vice-Presidents*—Richard Ashhurst, Clarkson Clothier, James F. Stone, M. D. *Recording Secretary*—William H. Hirst. *Treasurer*—John E. Stevenson. Headquarters, 1816 Chestnut Street, Philadelphia, Pa.

National Woman's Christian Temperance Union—The National W. C. T. U. was organized in Cleveland, Ohio, in 1874, and is the sober second thought of the great woman's crusade. It is now regularly organized in every State of the Union.

There are about 12,000 local unions, with a membership and following, including the children's societies, of about half a million. The W. C. T. U. has forty distinct departments of work, presided over by as many women experts, in the National and in nearly every State organization. All the States have laws requiring the study of scientific temperance in the public schools, and all these laws were secured by the W. C. T. U.; also the laws forbidding the sale of tobacco to minors. The first police matrons and most industrial homes for girls were secured through the efforts of this society, as were the refuges for erring women.

The World's W. C. T. U. was founded by Frances E. Willard in 1883, and has auxiliaries in more than fifty countries and provinces. The white ribbon is the badge of all the W. C. T. U. members, and is now a familiar emblem in every civilized country.

The headquarters of the National organization is The Willard, Rest Cottage, Evanston, Ill. The following are the officers: *President*—Miss Anna A. Gordon, Evanston, Ill. *Corresponding Secretary*—Mrs. Frances P. Parks, Evanston, Ill. *Treasurer*—Mrs. Margaret C. Munns, Evanston, Ill.

The Vedanta Society—The Vedanta Society of New York was established in 1894 by Swami Vivekananda of India and was regularly incorporated in 1898 by Swami Abhedananda. The object of the society is to explain through logic and reason the spiritual laws that govern our lives; to show that the True Religion of the Soul is not antagonistic to, but in harmony with, philosophy and science; to establish that Universal Religion which underlies all the various sects and creeds of special religions; to propagate the principles taught by great seers of Truth and religious leaders of different countries; and to help mankind in the practical application of those principles in their spiritual, moral, intellectual and physical needs.

The present headquarters of the society, with its Circulating Library, Reading Room and Meditation Room, is at 236 Central Park West, New York City.

The officers of the society are: *President*—W. N. Goodyear. *Vice-President*—M. Kreedop. *Secretary*—Mrs. M. Storey Williams. *Treasurer*—A. U. Treadwell.

The society has a large publishing department and issues a catalogue containing nearly forty titles of works on the Philosophy and Religion of Vedanta. Within the last five years it has sent out from its headquarters 39,876 books and pamphlets written by Swamis of India. There are also centres in Pittsburgh, San Francisco, Los Angeles, and Washington, D. C., besides a Peace Retreat in the mountains of Santa Clara County, Cal. These organizations in American are affiliated with hundreds of Vedanta Societies throughout India and Ceylon.

The Daughters of the King—The Order of the Daughters of the King was organized on Easter evening, 1885. It is desired by its promoters that a careful distinction shall be made between the Daughters of the King and the King's Daughters. This is the older organization, and differs from the King's Daughters in many important particulars. In the first place, it is an order, and is distinctively Episcopal. Its work is definite, and is "for the spread of Christ's kingdom among women," and the "active support of the rector's plans in the parish in which the particular chapter may be located." Its emblem is a cross of silver, a Greek cross fleury, and its motto is "Magnanimeter Crucem Sustine" and its watchword "For His Sake." Its colors are white and blue—white, the old royal color of Israel, and blue, the color of the Virgin Mary, the "blessed daughter of Israel's King, the Mother of the King of Kings." Its Con-

stitution is framed, as far as possible, in the terms of that of the Brotherhood of St. Andrew, the work of the two organizations being similar. The officers of the Council are: *President*—Mrs. Adam Denmead, Baltimore, Md. *Treasurer*—Mrs. Charles H. Arndt, Germantown, Pa. *General Secretary*—Emma E. Behlendorff. Office of the Council, Church Missions House, 281 Fourth Avenue, New York City.

United Brethren Christian Endeavor Union—The union was organized June 5, 1890. It is a union of all forms of young people's societies within the Church of the United Brethren in Christ. There are now 2,301 societies, with 93,988 members. Each conference is called a Branch and holds annual conventions, when a review of the year's work is made and new plans formed. *The Watchword* is the organ of the union. Rev. H. F. Shupe, D. D., Dayton, Ohio, is editor. The General Secretary, Rev. O. T. Deever, Dayton, Ohio, is elected by the General Conference to serve for the Quadrennium. The work is under the direction of a Board of Control. Rev. J. G. Huber, D. D., of Dayton, Ohio, is Chairman of the Board and also Chairman of the Executive Committee of the Young People's Department, which has supervision of the Christian Endeavor work of the denomination.

Christian Science—The Christian Science Committee on Publication contributes the following statement:

Christian Science is a religion based on the Bible, which was founded by Mary Baker Eddy in 1866. Her interpretation of the Scriptures, which she named Christian Science, is set forth in a book entitled "Science and Health, with Key to the Scriptures," first published in 1875. Since then it has been often reprinted, with occasional revisions of its wording, before her decease. Other works by the same author are "People's Idea of God" (1886), "Christian Healing" (1886), "Unity of Good" (1887), "Retrospection and Introspection" (1891), "Rudimental Divine Science" (1891), "No and Yes" (1891), "Church Manual" (1895), "Miscellaneous Writings" (1896), "Christ and Christmas" (1897), "Christian Science Versus Pantheism" (1898), "Pulpit and Press" (1898), "Messages to the Mother Church" (1900, 1901, 1902), "The First Church of Christ, Scientist, and Miscellany" (1913).

The First Church of Christ, Scientist, in Boston, Mass., founded in 1879, and known as "The Mother Church," is the parent organization of the Christian Science denomination. Local churches, known as branches of "The Mother Church," are situated in towns and cities throughout the world, but mainly in countries where the English language is spoken. "The Mother Church" is governed by a board of five directors, while the branch churches are self-governed, subject only to a limited supervision by "The Mother Church" as defined in the Church Manual. At present the number of local organizations is 1,566, a considerable number of which have beautiful and costly church edifices.

In the Church of Christ, Scientist, the place of preaching is taken by the reading of a "lesson-sermon" composed of selections from the Bible and from "Science and Health, with Key to the Scriptures" by Mrs. Eddy. The remainder of the Sunday service consists of hymns, a solo, silent prayer, the Lord's Prayer, and a responsive reading from the Bible.

The Wednesday night meeting includes readings from the Bible and "Science and Health, with Key to the Scriptures," hymns, silent prayer, the Lord's Prayer, and testimonies of Christian Science healing from voluntary speakers. This church now claims to be attended by a greater percentage of men than is apt to be the case in other churches.

The Christian Science Publishing Society, under the auspices of "The Mother Church," issues a quarterly periodical named *The Christian Science Quarterly Bible Lessons;* a monthly periodical, *The Christian Science Journal;* a monthly, *Der Herold der Christian Science;* a weekly, the *Christian Science Sentinel*, and a daily, *The Christian Science Monitor*, the latter being a daily newspaper of general circulation devoted to clean journalism, but including in each issue an essay or article on Christian Science.

Christian Scientists are unique among religionists by reason of the extent to which they rely on the practice of their religion for the prevention and cure of disease. For this they assign several reasons. They have found Christian Science most effective and reliable for this purpose; they believe it to be the same method of healing that was used and taught by Christ Jesus; they expect that this method of dealing with evil, as it becomes better known and more generally practised, will abate and ultimately abolish sin and mortality.

In this way the Church of Christ, Scientist, is regarded as a necessary agency in the restoration of original Christianity and the realization of the highest ideal in religious hope and faith. Headquarters, 52 Vanderbilt Avenue, New York City.

The Theosophical Society—The Theosophical Society was founded in New York City on November 17, 1875, by Mme. H. P. Blavatsky and Col. Henry S. Olcott, but its headquarters was removed in 1879 to Adyar, Madras, India, where the President, Mrs. Annie Besant, resides. Its objects are three: (*a*) To form a nucleus of the universal brotherhood of humanity, without distinction of race, creed, sex, caste or color; (*b*) to encourage the study of comparative religion, philosophy and science; (*c*) to investigate unexplained laws of nature and the powers latent in man. It has now twenty-three territorial sections, each presided over by a General Secretary, three by Presidential Agents; America, England and Wales, India, Scandinavia, Hungary, France, Italy, Germany, Australia, Cuba, Finland, Russia, Bohemia, South Africa, Scotland, Switzerland, Belgium, Dutch East Indies, Netherlands, Burma, Austria, Norway and New Zealand. Three non-sectionalized countries with Presidential Agents: South America, Spain and Ireland. During the 39 years of its existence it has chartered over 1,405 branches. The membership at present of the Society is approximately 30,000, of which the membership in the American section is about 4,937; there are 157 branches. Although there is but one dogma in the society, namely, the belief in the Universal Brotherhood of Man, yet Reincarnation and Karma are among some of the basic stones of the Theosophical system. *National President*—A. P. Warrington, Krotona, Hollywood, Los Angeles, Cal., contributes the above statement.

The National Spiritualists' Association—Organized September 28, 1893; incorporated November 1, 1893, at Washington, D. C. The object of said association shall be the organization of the various Spiritualist societies of the United States into one general association for the purpose of mutual aid and co-operation in benevolent, charitable, educational, literary, musical, scientific, religious and missionary purposes and enterprises germane to the phenomena, science, philosophy, and religion of spiritualism.

Active working local societies, 1,000; State associations, 22; other local societies meeting at irregular intervals, 400; public meetings not organized as societies, 500; camp meeting associations, 32; academy for liberal education, 1; churches and temples, 200; membership of avowed Spiritualists, 600,000; unidentified with organized societies, but believers in the philosophy and phenomena and frequent attendants at public services, 1,500,000 to 2,000,000; number of public mediums, 1,500; private mediums, many thousands; ordained ministers, 500; total valuation church, temple and camp meeting property, $6,000,000.

President—Dr. George B. Warne, 749 Oakwood Boulevard, Chicago. *Secretary*—George W. Kates, 600 Pennsylvania Avenue, S. E., Washington, D. C. *Treasurer*—Cassius L. Stevens, Pittsburgh, Pa. Headquarters, 600 Pennsylvania Avenue, Washington, D. C. The next annual convention will be held in St. Paul, Minn., October, 1916.

The Brotherhood of Andrew and Philip—This organization, founded by Rev. Rufus W. Miller in Reading, Pa., in 1888, held its first federal convention in the City of New York in 1893. It is composed of members of fifteen evangelical denominations, among them the Reformed Church in America, the Reformed Church in the United States, the Congregational, Presbyterian (North, South, Canadian, and United), Methodist Episcopal, Methodist Protestant, Baptist, United Brethren, Lutheran, Reformed Episcopal, Church of Christ, Friends, United Evangelical, Free Baptist, African Methodist Episcopal, and Evangelical Association. It has chapters in Australia and Japan, China and England, Jamaica, Philippines, Alaska. Its objects are embodied in the statement that "any man can belong to the brotherhood who will promise to pray daily for the spread of the kingdom of Christ among men, and to make an earnest effort to bring men

within the hearing of the Gospel." The number of chapters of the brotherhood organized in the United States is 1,300, and the membership 15,000; 102 boys' chapters enrolling 3,000 members. The office of Rev. R. Howard Taylor, General Secretary, is at 1328 Chestnut Street, Philadelphia, Pa.

The Brotherhood of St. Andrew—"The Brotherhood of St. Andrew is an organization of men in the Protestant Episcopal Church. Its sole object is the spread of Christ's kingdom among men. It works under two rules, known as (1) The Rule of Prayer: To pray daily for the spread of Christ's kingdom among men, especially young men, and for God's blessing upon the labors of the brotherhood, and (2) The Rule of Service: To make at least one earnest effort each week to lead some man nearer to Christ through His church." There are now 1,200 active chapters with a membership of about 13,000 men.

The Brotherhood of St. Andrew in the Church of England in the Dominion of Canada has been formed, with 300 chapters and 3,000 men. A similar organization has been formed in the Scottish Episcopal Church. In the West Indies there is a membership of 1,000 men, and there is also a national organization in Japan. June 12, 1896, the Brotherhood of St. Andrew in the Church of England was formed, and now has a membership of 1,200. It is also well organized in New Zealand.

The brotherhood in the United States includes a Junior Department. It has 500 chapters in the United States, with about 4,000 members.

The officers are: *President*—Edward H. Bonsall. *Editor of St. Andrew's Cross and General Secretary*—Hubert Carleton, Church House, Twelfth and Walnut Streets. Philadelphia, Pa.

The National Council of Congregational Churches—Is composed of delegates from Congregational conferences and associations, and was organized November 17, 1871. The officers are: *Moderator*—Henry M. Beardsley, Kansas City, Mo. *Secretary*—Rev. Hubert C. Herring, D. D., Boston, Mass. *Treasurer*—Rev. John J. Walker, Boston, Mass.

Next meeting, Los Angeles, Cal., October, 1917.

Federation of American Zionists—*President*—Harry Friedenwald. *Chairman Executive Committee*—Louis Lipsky. *Secretary*—Bernard A. Rosenblatt. *Treasurer*—Louis Robison. Societies, 140; camps, 87; Circles of Young Judæa, 185. Office, 44 East Twenty-third Street, New York City.

The Epworth League—Officers of the Epworth League of the Methodist Episcopal Church: *President*—Bishop Frank M. Bristol, Omaha, Neb. *General Secretary*—Wilbur F. Sheridan, D. D. *Treasurer*—Edwin H. Forkel, Chicago, Ill. The central office of the Epworth League is located at 1020 Wabash Avenue, Chicago, Ill.

The Epworth League was organized at Cleveland, Ohio, May, 1889, by the union of five societies then existing in the Methodist Episcopal Church. These several societies held under their jurisdiction 1,500 local societies, with a membership of about 800,000. The league now consists of two branches, senior and junior, with a membership of about one and one-half million. Its official organ, the *Epworth Herald*, has a circulation of over 100,000.

Officers of the Epworth League of the Methodist Episcopal Church South: *President*—Bishop J. H. McCoy, D. D. *General Secretary*—Rev. Fitzgerald S. Parker, D. D. *Assistant Secretary-Editor*—J. M. Culbreth. *Junior League Secretary*—Ada Trawick. The general organ of the league is the *Epworth Era*, published monthly by the publishing agents of the Methodist Episcopal Church South, Nashville, Tenn., Dallas, Tex., and Richmond, Va. The league in the Methodist Episcopal Church South was provided for by the General Conference of 1890, and in December of the same year its organization was effected. It came under the supervision of the Sunday-School Board. The General Conference of 1894 created it a separate connectional board and elected a General Secretary. The Epworth League includes an organization for adolescent boys called the Knights of Ezelah, and a parallel organization for girls called the Girls of Epworth. It has now 4,360 chapters, with a total membership of 146,907. Office, 810 Broadway, Nashville, Tenn.

Catholic Educational Association—The Catholic Educational Association was organized at St. Louis in 1904. It consists of three general departments, the Seminary, College, and School, and embraces in its membership representatives from all the Catholic educational establishments in the United States. It issues in November a report of the year's work and of the annual convention held each year in the last week of June. The Twelfth Annual Convention was held at St. Paul, Minn., June 28 to July 1, 1915. The most interesting development of the year is the growth of secondary and college education. *Honorary President*—James Cardinal Gibbons. *President-General*—Rt. Rev. Thomas J. Shahan, D. D., Rector of the Catholic University at Washington. *Secretary-General*—Rev. Francis W. Howard, LL. D., 1651 East Main Street, Columbus, Ohio. Office of the association is at Columbus, Ohio.

The Catholic Church Extension Society—Officers: *Cardinal Protector*—Sebastian Cardinal Martinelli. *Vice-Chancellor*—Archbishop Sebastian G. Messmer. *President*—Very Rev. Francis C. Kelley. *General Secretary*—Rev. E. B. Ledvina. *Recording Secretary*—Mr. Warren A. Cartier. *Treasurer*—Mr. John A. Lynch. Headquarters, McCormick Building, Chicago, Ill.

The objects of this society are to develop the missionary spirit in the clergy and people of the Catholic Church in the United States. To assist in the erection of parish buildings for poor and needy places. To support priests for neglected and poverty-stricken districts. To send the comfort of religion to pioneer localities. In a word, to preserve the faith of Jesus Christ to thousands of scattered Catholics in every portion of our own land, especially in the country districts and among immigrants.

Society of St. Vincent De Paul—Organized in Paris, France, 1833. A Roman Catholic society the objects of which are: (1) the practice of a Christian life; (2) to visit the poor in their dwellings and to carry them succor in kind; (3) to promote the elementary and religious instruction of poor children; (4) to distribute moral and religious books; (5) to undertake any other charitable work to which its resources are adequate.

The society is organized in all countries and is under the general jurisdiction of the Council-General, located at Paris, France. The society in the United States is under the jurisdiction of the Superior Council of the United States, Society of St. Vincent De Paul, with headquarters at Washington, D. C. The President of the Superior Council is Thomas M. Mulry, 51 Chambers Street, New York City.

The society in the city of New York is under the jurisdiction of: The Particular Council of New York, Michael J. Scanlan, *President*, for the Boroughs of Manhattan and Richmond, office, 375 Lafayette Street. The Particular Council of Brooklyn, Thomas W. Hynes, *President*, for the Boroughs of Brooklyn and Queens, office, 4 Court Square. The Particular Council of Bronx, for the Borough of Bronx, James J. Reid, *President*, office, 509 Willis Avenue.

Conferences: Nearly all the Roman Catholic churches in New York City have conferences of the society. The name of the conference is usually the same as that of the church with which it is connected; its work is confined to the parish in which it is located, and the parish priest is, in most cases, its Spiritual Director. Applications may be made to the Director or to the President.

Special Works: In addition to the Conferences, there are a number of special works maintained by the Particular Councils and directed by committees made up of members of the Particular Councils and Conferences.

The several committees above referred to visit regularly every Sunday the hospitals, prisons, and other city institutions, furnishing reading matter, giving religious instructions to those of their faith, and supplying such material aid and advice as is needed by the sick and convalescent.

The Society for the Propagation of the Faith—*President and Treasurer*—Rt. Rev. Joseph Freri. *Vice-President*—Rev. W. P. Cantwell. *Secretary*—Very Rev. John J. Dunn.

The society assists missionaries in 325 dioceses, vicariates, and prefectures in Africa, Asia, Oceania, the United States, and the non-Catholic countries of Europe. It is the oldest missionary organization in the Catholic Church, dating back to 1822. Since its foundation it has given seven millions of dollars to the various missions of the United States.

The official publication is *The Annals of the Propagation of the Faith*, issued bi-monthly and distributed from the national office at 343 Lexington Avenue, New York City. Total membership in the world, 3,000,000. United States membership, 796,000.

American Federation of Catholic Societies—The American Federation of Catholic Societies was founded in 1901. It is composed of twenty-eight national organizations, many State and county federations and parishes. Total membership about 3,000,000. Its objects are the cementing of the bonds of fraternal union among the Catholic laity, and the fostering and protection of Catholic interests. The federation has the approval and blessing of 102 archbishops and bishops, and of Pope Pius X. and Benedict XV. National headquarters is at 175 Jackson Boulevard, Chicago, Ill. The officers are as follows: *President*—John Whalen, New York. *First Vice-President*—Thos. Flynn, Chicago, Ill. *Secretary*—Anthony Matre, Chicago, Ill. *Treasurer*—C. H. Schulte, Detroit, Mich.

The Catholic Missionary Union was incorporated under the laws of the State of New York, November, 1896. Its object is to arouse the Catholic people and clergy of the United States to greater missionary activity; to train priests to be Home Missionaries; to establish bands of Diocesan Missionaries in the United States, and to present the truths of the Catholic Church to all the people in a purely expository manner, without any controversy or religious rancor. Its home and training college is the Apostolic Mission House on the grounds of the Catholic University, at Brookland Station, Washington, D. C.

The Catholic Foreign Mission Society of America—The Catholic Foreign Mission Society of America is incorporated under the laws of New York State to train missionaries for heathen lands.

In connection with its work it publishes books, pamphlets and other reading matter, including a monthly periodical, *The Field Afar*.

Its incorporators include His Eminence John Cardinal Farley, Very Rev. James A. Walsh, Superior of the society; Rev. Thomas F. Price, Vice-President; Rt. Rev. Patrick J. Hayes, D. D.; Very Rev. John J. Dunn; the Hon. Victor J. Dowling, John U. M. Ewing, Michael Maginnis.

Although having its centre in New York, the work is a national one, being organized under the protection of the entire American hierarchy.

Its offices and seminary are located on a large tract of land, "Maryknoll," reached from the Ossining railroad station, and situated part in Ossining and part in New Castle, N. Y.

The Guild of the Love of God—Object: To unite all faithful Anglican Catholics by prayer and service, and to promote mutual recognition and friendship by the adoption of a distinctive badge.

The guild admits to membership only those who go to confession. Members are pledged to help other members anywhere, at any time, and therefore isolated and lonely Catholics are especially invited to join this guild.

Sub-Warden—Rev. C. T. Pfeiffer, Laurel, Del. *Secretary-General*—Rev. F. S. DeVona, St. Clair, Mich. A quarterly magazine entitled *Caritas* is published by the society.

The purposes of the convention, as defined in its by-laws, are "to give expression to the opinions of its constituency upon moral, religious and denominational matters, and to promote denominational unity and efficiency for the evangelization of the world."

The next meeting will be held in Minneapolis, Minn., 1916.

National Baptist Convention — *President* — Rev. E. C. Morris, Helena, Ark. *Secretary*—Prof. R. B. Hudson, Selma, Ala. *Treasurer*—Rev. A. J. Stokes, Montgomery, Ala

The object of the convention is to do foreign mission, home mission, educational, publishing, Young People's Union, and other work of a religious nature; this work to be done through and by its seven boards.

The membership of the National Baptist Convention as reported by the statistician at the last National Baptist Convention was 2,614,581.

Southern Baptist Convention — *President* — Lansing Burrows, D. D., Americus, Ga. *Secretaries*—Oliver F. Gregory, D. D., Baltimore, Md.; Hight C. Moore, D. D., Raleigh, N. C.

It shall be the design of the convention to promote foreign and domestic missions, and other important objects connected with the Redeemer's kingdom, and to combine for this purpose such portions of the Baptist denomination in the United States as may desire a general organization for Christian benevolence, which shall fully respect the independence and equal rights of the churches. Next meeting, Asheville, N. C., May 17, 1916.

Lake Mohonk Conferences—*Secretary*—H. C. Phillips, Mohonk Lake, N. Y. Lake Mohonk Conference on the Indian and Other Dependent Peoples—The first annual conference was held in 1883, when Mr. Albert K. Smiley, who was a member of the Board of Indian Commissioners, invited a number of those interested in Indian affairs to a meeting at Mohonk Lake to confer regarding measures affecting the interests of the Indians. On Mr. Smiley's death his brother, Daniel Smiley, succeeded him as host of the conferences. In 1904 the scope of the conference was enlarged to include the peoples of the Philippines, Porto Rico, and other dependencies of the United States. The conference seeks to clarify public opinion on these great questions through free discussion by those having first-hand knowledge of existing conditions.

Lake Mohonk Conference on International Arbitration—The first of these annual conferences was held in 1895. The purpose is specifically to create and direct public sentiment in favor of international arbitration and an international court, and generally to encourage the substitution of pacific methods for war in settling disputes between nations. The conference maintains a permanent office.

The Federal Council of the Churches of Christ in America—The Federal Council was organized as the chief consummation of the National Federation of Churches at its first meeting, held in Philadelphia, December 2-8, 1908. It is the delegated congress of thirty leading Christian bodies which are constitutionally federated for the purpose of providing this congress, through which to realize their fellowship and united action. The Federal Council, through its commissions and secretaries, seeks to organize efficient State and local federations, to secure co-operation in home missionary work, and to promote moral reform and social service by the churches throughout the United States.

The following churches are represented in this Federal Council: Baptist (North), Free Baptist, Christian, Congregational, Disciples of Christ, Evangelical Association, Evangelical Synod, Friends, Lutheran General Synod, Methodist Episcopal, Methodist Episcopal (South), German Evangelical Synod, Colored Methodist Episcopal, Methodist Protestant, African Methodist Episcopal, African Methodist Episcopal Zion, Mennonite, Moravian, Presbyterian, Presbyterian (South), Welsh Presbyterian, Reformed Presbyterian, United Presbyterian, Protestant Episcopal, Commissions on Christian Unity and Social Service, Reformed Church in America, Reformed Church in the U. S. A., Reformed Episcopal, Seventh-Day Baptist, United Brethren in Christ, United Evangelical, National Baptist Convention.

The Council has active Commissions on Foreign Missions, Home Missions, Sunday Observance, Evangelism, Peace and Arbitration, Temperance, Family Life, Social Service, and Christian Education. The executive and field work of the council is in charge of the General Secretary, Rev. Chas. S. Macfarland, D. D. The officers may be addressed at the national office, 105 East Twenty-second Street, New York City. An office in Washington, D. C. (Woodward Building), is in charge of Rev. H. K. Carroll, D. D., Associate Secretary.

Religious Education Association—The Religious Education Association was organized on February 12, 1903, at the close of a three days' convention held in Chicago, called to consider the improvement of moral and religious education. Its object is the promotion of moral and religious training in existing educational agencies, in homes, and

through the press. It has no theological platform. It now enrolls over 3,000 members, including laymen, college presidents and professors, pastors, teachers and parents interested in the problem of reverent, scientific, effective character training.

The officers are: *President*—Rev. George B. Stewart, Auburn, N. Y. *Secretary*—Henry Frederick Cope, D. D., 332 South Michigan Avenue, Chicago, Ill.

Luther League of America—*President*—E. A. Miller, Philadelphia, Pa. *Secretary*—Luther M. Kuhns, Omaha, Neb.

The first National Convention of the Luther League of America was held at Pittsburgh, Pa., October 30 and 31, 1895. The league is a Lutheran organization, linking together the Lutheran young people who are laboring for the good of the church by means of many individual societies of various names and styles of organization, each within its own immediate church. The Constitution declares that its objects shall be "to encourage the formation of the young people's societies in all Lutheran congregations in America, to urge their affiliation with their respective State or Territorial leagues, and with this league to stimulate the various young people's societies to greater Christian activity and to foster the spirit of loyalty to the church." The fundamental principles are federation and co-operation, and it is non-synodical in character. The membership of the various organizations is over 100,000. These are comprised in twenty-five States, fourteen of which already have permanent State organizations, and five foreign countries. The first local organization adopting the title of "The Luther League" was organized by delegates of six Lutheran Church societies in the city of New York, April 19, 1888, also in Canada, Nova Scotia, Porto Rico, Japan, China, and India.

American Unitarian Association—This association was organized in Boston, Mass., May 25, 1825, and incorporated in 1847. Its objects, as defined in the report of the Committee on Organization, are as follows:

1. To collect and diffuse information respecting the state of Unitarian Christianity in our country.
2. To produce union, sympathy, and co-operation among liberal Christians.
3. To publish and distribute books and tracts, inculcating correct views of religion, in such form and at such price as shall afford all an opportunity of being acquainted with Christian truth.
4. To supply missionaries, especially in such parts of our country as are destitute of a stated ministry.
5. To adopt whatever other measures may hereafter seem expedient—such as contributions in behalf of clergymen with insufficient salaries, or in aid of building churches.

President—Rev. Samuel A. Eliot, D. D., Boston, Mass. *Secretary*—Rev. Lewis G. Wilson, Boston, Mass. *Treasurer*—Henry M. Williams, Boston, Mass.

Christian and Missionary Alliance—Officers: *President and General Superintendent*—Rev. A. B. Simpson. *Secretary*—Rev. Walter M. Turnbull. *Treasurer*—David Crear.

The Christian Alliance was founded in 1887. It combined with the International Missionary Alliance in 1897, and the present title was adopted. Membership consists of all professing Christians who shall subscribe to the principles of the movement and enroll their names. The objects of the alliance are stated to be "World-wide diffusion of the Gospel in its fulness, the promotion of a deeper and higher Christian life, and the work of evangelization, especially among the neglected classes at home and in heathen countries." Its income in 1914 was over three hundred thousand dollars. Connected with the alliance are the Missionary Training Institute at Nyack, N. Y., a Bible school for the training of home and foreign workers; Wilson Memorial Academy, a boarding school for boys and girls with primary, grammar, and high school departments. Headquarters of the alliance, 690 Eighth Avenue, New York City.

The Volunteers of America—The Volunteers of America is a philanthropic, social, and Christian movement. It was inaugurated in March, 1896, in response to a number of requests on the part of American citizens. It was subsequently incorporated on November 6, 1896, under the Membership act of the State of New York. It is organized in military style, having as its model the United States Army, but in conjunction with military discipline and methods of work it possesses a thoroughly democratic form of government. Its constitution and by-laws are framed by a Grand Field Council, which represents the minor councils of officers throughout the country annually. Though only nineteen years old, the Volunteers have representatives and branches of their benevolent cause in almost all the principal centres of the United States.

The Volunteers have some 48 principal homes and institutions of benevolence, many of which are Volunteer property, and are open for poor and deserving people in different sections of the country. During the past year the commissioned workers in their visitation called upon and aided, in one form or another, no less than 28,362 families. This was primarily in the poorer sections of the large cities. In the different permanent philanthropic homes and institutions no less than 241,297 free lodgings have been given, and 247,855 have been paid for by work and other means, while 875,119 free meals were given, and 303,201 meals were distributed to persons who paid for them, many doing so by work.

In their latest undertaking, which has proved a large responsibility, that is, the Volunteer Hospital, a separate corporation, which hospital is located at Beekman and Water Streets, New York City, in the shadow of the Brooklyn Bridge, there have been 2,212 ambulance calls, 11,713 days' treatment given to patients in the surgical and medical wards, 9,435 new cases treated, 14,298 old cases treated.

The Volunteer Prisoners' League has embraced upward of some 81,000 members since its inauguration. It has leagues in nearly thirty State prisons, and over 70 per cent. of those having left the prisons are, through their Hope Halls, living reformed and honest lives. Through the Fresh Air branch of the work many thousands of mothers and children have been taken from crowded cities for a change in the open air amid hills and lakes, rivers and dales. From the regimental reports of Volunteer centres, it is carefully calculated that 783,279 persons were gathered to their indoor services, while 1,895,686 persons were listeners in God's natural cathedral, their open-air stands. By these services 5,368 were led to promise that they would lead a new life.

In addition to the Volunteer reading rooms, thousands of copies of Christian literature are circulated in the State prisons, jails, hospitals, soldiers' homes, and children's homes. In connection with the Volunteers there are also sewing classes, hospital nursing, temporary financial relief departments, fresh air camps, Thanksgiving and Christmas dinners, and many other worthy undertakings. The headquarters of The Volunteers of America is at 34 West Twenty-eighth Street, New York City. The principal officers are General and Mrs. Ballington Booth, Presidents; General Edward Fielding, Vice-President; Col. Walter J. Crafts, Treasurer, and Col. James W. Merrill, National Secretary. THE MODERN HISTORIC RECORDS ASSOCIATION.

President—Justice Victor J. Dowling. *Secretary*—Alfred Kreymborg, 20 Exchange Place, New York City. *Founder*—Alexander Konta.

The Modern Historic Records Association is a non-commercial body. Its purpose is to preserve, for future generations, the records of our contemporary history and achievement by the best methods known to modern science, and to be of vital service and inspiration to historians, students, educators, and others in the life of our own time. The varying mediums employed are: Moving pictures, phonograms, talking pictures, autographic records on parchment, special stories of great events printed on rag paper, permanent photographs on glass positives, clay tablets, lantern slides, and whatever other means the progress of science and the new triumphs of invention may provide. The organization was founded in 1911 by Alexander Konta, and among its incorporators are some of the most prominent individuals from every field of human activity all over the world.

The larger part of the records of our contemporary history, progress, life, and civilization, as given in our books, newspapers, periodicals, pamphlets, and reports, is printed on sulphite or on wood-pulp paper. Many of these records are doomed to dust in from fifty to seventy-five years. In a century comparatively little of the printed record of this great age will be in existence. To seek to offset this situation, so far as possible, by permanent records of the vital events in our history, and to remedy the evil itself, so far as its powers and influence permit, is the aim of the Modern Historic Records Association, the only organization of its kind in the world. The possibilities of the value of this work may be suggested in a single illustration from the past. Lincoln's immortal speech at Gettysburg is one of the treasures of English literature, yet there have been published over a hundred different versions of it. Congress has twice printed it incorrectly. Had it been possible to secure a phonogram record of the address when delivered there could be, at present, no dispute as to the actual words spoken by Lincoln.

Pending the securing by the association of a building of its own, for which tentative designs have been made, the association has the privilege of preserving its records in the New York Public Library. Among the many names of famous men who have recorded themselves for all time are: Thomas Edison, ex-President Madero of Mexico, Captain Rostron of the Carpathia, Peary and Amundsen, ex-President Taft, Maurice Maeterlinck, Eugene Brieux, George Brandes, Paul Heyse, George Bernard Shaw, Prof. Paul Ehrlich, Col. Theodore Roosevelt, Dr. Luther Burbank, Hon. James Bryce, Prof. Paul Dubois, Sir Hiram S. Maxim, Hon. William Jennings Bryan, Andrew Carnegie, Admiral George Dewey, Arthur Wing Pinero, John Muir, Richard Strauss, H. G. Wells, Tommaso Salvini, Sir William Ramsay, and Maximilian Harden.

IMPORTANT PEACE MOVEMENTS.

In the first century a temple was dedicated to peace by Vespasian. From that time on there were peace conferences held at various times, including the Peace of Religion signed at Augsburg on September 15, 1555; the unsuccessful conference between Benjamin Franklin John Adams, and Edward Rutledge, appointed by the United States Congress, and Admiral Howe, September 11, 1776, and the United States Treaty of 1814. It was not, however, until 1815 that the first peace society in the world was organized. It was called the New York Peace Society. In 1828 a national organization was formed and into this the State societies merged. On February 4, 1861, a peace conference was held in Washington, D. C., to prevent the Civil War in the United States.

International Peace Congresses were held in the following cities: London, 1843, 1851, 1890, 1908; Brussels, 1848, 1882; Paris, 1849, 1878, 1889, 1900; Frankfort, 1850; Edinburgh, 1853; Geneva, 1867, 1912; Berne, 1884, 1892; Rome, 1891; Chicago, 1893; Antwerp, 1894; Budapest, 1896; Hamburg, 1897; Glasgow, 1901; Monaco, 1902; Rouen, 1903; Boston, 1904; Lucerne, 1905; Milan, 1906; Munich, 1907; Stockholm, 1910; The Hague, 1913.

National Peace Congresses were held in the United States in New York City, 1907; Chicago, 1909; Baltimore, 1911; St. Louis, 1913.

The first Hague conference was held May 18, 1899, with twenty-six nations represented; the second was held June 15, 1907, with forty-four nations.

The following peace treaties were also signed: Terminating the War of the Austrian Succession, Aix-la-Chapelle, October 7, 1748; settling the Eastern Question: Germany, Russia, Turkey, Great Britain, Austria, France, and Italy, Berlin, July 13, 1878; cession by Austria to France, Campo Formio, October 17, 1797; independence of Crimea, etc.: Russia and Turkey, Kutschouc Kainardji, July, 1774; on behalf of Greece: Great Britain, Russia, and France, London, July 6, 1827; settling the relations between Turkey and Egypt, London, July 15, 1840; cession by Sweden to Russia, Nystadt, August 30, 1721; cession of Canada to Great Britain by France and Florida by Spain, Paris, February 10, 1763; cession by France to Sweden, Paris, January 6, 1810; terminating the War of the Spanish Succession, Utrecht, April 11, 1713; ending the Thirty Years' War, Westphalia, October 24, 1648. The neutrality of Belgium was guaranteed by treaty between Prussia, Austria, Great Britain, France, Russia, and the Netherlands and was signed in London April 19, 1839, and ratified between the contracting powers in 1870.

INTERNATIONAL PEACE PLAN—PRESIDENT WILSON'S PEACE PROPOSAL.

The parties hereto agree that all questions of whatever character and nature in dispute between them shall, when diplomatic efforts fail, be submitted for investigation and report to an international commission (the composition to be agreed upon); and the contracting parties agree not to declare war or begin hostilities until such investigation is made and report submitted.

The investigation shall be conducted, as a matter of course, upon the initiative of the commission, without the formality of a request from either party; the report shall be submitted within (time to be agreed upon) from the date of the submission of the dispute, but the parties hereto reserve the right to act independently on the subject matter in dispute after the report is submitted. (For Supplementary Memorandum by the Secretary of State, see World Almanac of 1915, p. 734.)

Treaties embracing this peace plan have been signed up to August 16, 1915, by thirty countries, as follows:

Salvador	Bolivia.	Costa Rica.	Norway.	Chile.	China.
Guatemala.	Portugal.	Dominican Republic.	Peru.	Paraguay.	Russia.
Panama.	Persia.	Venezuela.	Uruguay.	Great Britain.	Ecuador.
Honduras.	Denmark.	Italy.	Argentina.	France.	Greece.
Nicaragua.	Switzerland.		Brazil.	Spain.	Sweden.
Netherlands.					

All of these treaties, with the exception of those with the Dominican Republic and Panama, have been approved by the Senate, and the treaties with Guatemala, Great Britain, Costa Rica, Norway, Portugal, Paraguay, Spain, Peru, Bolivia, Sweden, Denmark, France, Russia, Uruguay, and Italy have become effective by the exchange of ratifications.

IMPORTANT PEACE MOVEMENTS—*Continued.*

PLANS FOR PEACE IN ENTIRE WORLD ADOPTED BY SWISS.

The Swiss Peace Society at its annual meeting in Basel, May 18, 1915, adopted the following resolutions, which it was declared should be considered when the time came for the conclusion of peace in Europe:

First—The avoidance of any annexation or territorial changes which are in opposition to the interests and wishes of a population; a guarantee of religious liberty, free speech, and equality before the law for the minority.

Second—The creation of a permanent organization in which all European states shall be equally represented, for the purpose of safeguarding the order, peace, and safety of our portion of the earth.

Third—The development of an international law organization by continual Hague conferences.

The eighteenth of May is Peace Day (Hague Day) and the Sunday before Christmas is Peace Sunday. Its observance was asked by the American School Peace League.

WOMEN'S PEACE PARTY.

On January 9, 10, 1915, a conference was held in Washington, D. C., at which representatives from all the leading women's organizations and movements assembled to consider measures for promoting and formulating peace sentiment in the United States, and perhaps throughout the world. The Woman's Peace Party was thus formally launched. The purpose of this organization is to enlist all American women in arousing the nations to respect the sacredness of human life and to abolish war. The following was adopted as their platform:

1. The immediate calling of a convention of neutral nations in the interest of early peace. 2. Limitation of armaments and the nationalization of their manufacture. 3. Organized opposition to militarism in our own country. 4. Education of youth in the ideals of peace. 5. Democratic control of foreign policies. 6. The further humanizing of governments by the extension of the franchise to women. 7. "Concert of Nations" to supersede "Balance of Power." 8. Action toward the gradual organization of the world to substitute law for war. 9. The substitution of an international police for rival armies and navies. 10. Removal of the economic causes of war. 11. The appointment by our Government of a commission of men and women, with an adequate appropriation, to promote international peace.

INTERNATIONAL PEACE FORUM.

To promote peace among the nations of the world, by encouraging a systematic study of the causes of war and the best methods to effect its abolition:

1. By the maintenance of a literary bureau for the moulding of public opinion regarding the various phases of the peace movement and the appalling nature and consequences of war;

2. By conducting a speakers' bureau to secure representative men for mass meetings, religious and patriotic services, conferences, conventions, chautauquas and congresses;

3. By organizing in every State in the Union and throughout the world, auxiliaries of the forum, to be controlled and directed from the international headquarters;

4. By creating public sentiment favorable to the establishment of a World Court for the judicial settlement of international disputes;

5. Also to work for the establishment of peace in the industrial world, by diffusing information relating to economic questions, and thus safeguard the rights of life, liberty and

Charles S. Davison	Franklin H. Giddings	O. B. Mitcham	Maurice Leon	Robt. M. Thompson
Caspar F. Goodrich	Jacob M. Dickinson	Frank S. Streeter	Wardner Williams	

The purposes of the society are:

1. To foster Americanism in the citizenship of the United States.

2. To bring together into a closer union, through the use of the federation idea, all those societies, associations, and general organizations, and all individuals engaged in any work which tends toward the use of our National language and an understanding of American laws and institutions.

3. To bring into mutual understanding all resident aliens intending to become citizens, all naturalized citizens, and all native citizens.

4. To aid in upholding the fundamental institutions of the United States and in fostering American ideals and loyalty to our common American destiny; and to that end to foster patriotism and inculcate in all the people a spirit of single-minded allegiance to our country and our flag.

5. The principal offices of the said society shall be in the Borough of Manhattan, city of New York, and the society shall have power to conduct its operations in all its branches, or in any part or parts thereof, in any of the States, Territories, and possessions of the United States, including the District of Columbia, and in any or all foreign countries where American citizens reside.

THE BIG BROTHERS' MOVEMENT.

This movement was founded in 1904 by Ernest K. Coulter in New York City. Since that time the work has been taken up in over one hundred cities. There is a staff of paid workers, supplemented by volunteers—lawyers, physicians, merchants, executives, teachers—all busy men, selected because of their good will and natural ability to do effective work. The Little Brothers are boys referred by parents, hospitals, police, courts, by other boys and by the boys themselves. They are the sons of widows, inebriates, prisoners, of careless or ignorant parents—boys who are largely the victims of their environment.

The task is to ascertain the cause of the boy's trouble—whether it be truancy, stealing, lying, running away from home, etc.; then, with the co-operation of parents, through the mediation of the Big Brothers, to build up within the boy a sense of honor and good citizenship. Every possible agency is employed to secure results—hospitals for examination or operation, the Y. M. C. A., church and settlement gymnasiums, industrial classes and boys' clubs, Boy Scouts, trade schools, camps, and farm schools. *President*—Franklin C. Hoyt. *Vice-Presidents*—Luther H. Lewis, Robert L. Gerry. *Chairman Executive Committee*—Ernest K. Coulter. *Secretary*—Charles A. Taussig. *Treasurer*—Francis J. Danforth. *General Secretary*—R. C. Sheldon. Headquarters, 200 Fifth Avenue, New York City.

PATRIOTIC INSTRUCTORS' ASSOCIATION.

President—Joseph H. Barker. *Vice-President*—Joseph W. Clymer. *Treasurer*—James S. Pierce. *Secretary*—James De La Montanye. *Headquarters*—314 West Fifty-third Street, New York City.

The object of the association is to enroll the members of the Grand Army of the Republic and other patriotic societies for the purpose of reaching the boys and girls in the public schools and other educational institutions of the United States and to endeavor to inculcate a true patriotic spirit, thereby establishing a permanent bulwark for the safeguarding of the Nation, knowing that this influence will lead to better citizenship.

Any person is eligible to membership who is a member of the Grand Army of the Republic, associate societies and auxiliaries thereto, all patriotic societies, teachers in the public schools, and any citizen of good repute.

The annual meeting, at which officers and directors for ensuing year shall be elected, will be held in the city of New York at the regular January meeting. Membership 600.

THE AMERICAN LEGION.

CO-OPERATING WITH CONFERENCE COMMITTEE ON NATIONAL PREPAREDNESS.

The American Legion, Inc., was incorporated under the laws of the State of New York on March 6, 1915. Object: The United States Government has no record of the present addresses and qualifications of its honorably discharged soldiers, sailors and marines, nor has it information of available men trained in the various occupations essential to the conduct of modern war. The American Legion is formed to enroll the names of all such citizens qualified either by previous military or technical experience and who will now express their willingness to respond in case the Government should at any time need their services. The information obtained by the legion, carefully classified as to qualifications and localities by a thorough system of cross-indexing, is intended for the use of the Government.

Ineligible: Men serving in the Army, Navy or Marine Corps of the United States, or in the National Guard of any of the several States, being in the first line of defence are not eligible for enrolment in the legion. Upon their resignation or honorable discharge they, however, become eligible.

UNITED HISTORICAL AND PATRIOTIC SOCIETIES AND ASSOCIATIONS OF NEW YORK.

Committee of Nine representing the United Historical and Patriotic Societies of New York. Object—To place on record facts proving that the Empire State played not only a prominent part, but a leading part in the events that brought about the independence of this country. *Chairman*—Dr. George F. Kunz. *Treasurer*—Stuyvesant Fish, 52 Wall Street, New York City. *Secretary*—Abram Wakeman, 96 Water Street, New York City.

THE AMERICAN DEFENCE SOCIETY, INC.

National Headquarters, 303 Fifth Avenue, New York.

Advisory Board—Theodore Roosevelt, Charles J. Bonaparte, Truman H. Newberry, Hudson Maxim, David Jayne Hill.

Purpose—The definite object of the American Defence Society is to educate the voters of the country to the necessity of legislation for adequate National defence.

Platform—The American Defence Society is urging: An adequate Army, an adequate Navy, an adequate National Guard, an adequate National reserve.

To tell the truth about our defenceless condition; to say frankly what the Administration at Washington is doing, and also what it is not doing; to work for a careful expenditure of public moneys; to secure an adequate National defence without the perils of militarism, and, finally, to work for a permanent international peace—that, in short, is the platform of the American Defence Society.

Membership—Membership in the American Defence Society is open to all citizens of the United States who believe in securing and maintaining an adequate National defence. Membership includes: Service, 25 cents; annual, $1.00. The American Defence Society is dependent entirely upon the public for support.

Society of the Cincinnati.

GENERAL OFFICERS.

President-General.....Hon. Winslow Warren, Mass.
Vice-President-General..... ....Hon. James Simons, LL.D., S. C.
Secretary-General..... ..... Hon. Asa Bird Gardiner, LL. D., L. H. D., R. I.
Assistant Secretary-General.....Mr. John Collins Daves, N. C.
Treasurer-General..... Mr. Charles Isham, Ct.
Assistant Treasurer-General.....Mr. Henry Randall Webb, Md.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the Continental army on the Hudson at the close of hostilities in the War of the Revolution for American Independence, May 10, 1783.

In forming the society it was declared that, "To perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute, and combine themselves into one Society of Friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen State societies were formed, and one in France, under the direct patronage of Louis XVI., which was dispersed at the Reign of Terror in 1793. Upon the roll of original members appeared the names of all the great historic military and naval characters of the Revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the Declaration of Independence.

THE RIGHT TO MEMBERSHIP.

All Continental officers who had served with honor and resigned after three years' service as officers, or who had been rendered supernumerary and honorably discharged, in one of the several reductions of the American army, or who had continued to the end of the war, and all French officers who had served in the co-operating army under Count d' Estaing, or auxiliary army under Count de Rochambeau, and held or attained the rank of colonel for such services, or who had commanded a French fleet or ship of war on the American coast, were entitled to become original members, and upon doing so were required to contribute a month's pay.

STATE SOCIETIES.

The Cincinnati is organically *one* society in membership, but for convenience in admission of members and in its charitable and patriotic objects is subdivided into State societies, there being thirteen. Four dormant societies were restored to membership at the triennial meeting of 1902.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society when legislating for the good of the Order is composed of the general officers and five delegates from each State society, and meets triennially. In 1854 it ruled that proper descendants of Revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

GENERAL OFFICERS SINCE ORGANIZATION.

The following have been the principal general officers:

PRESIDENTS-GENERAL.

1783. Gen. George Washington, LL. D., Va.

General Historian—Holdridge O. Collins, Los Angeles, Cal.

The society of the "Sons of the Revolution" was instituted in New York City December 18, 1875, on the motion of John Austin Stevens, to be composed exclusively of gentlemen of Revolutionary War ancestry; reorganized December 4, 1883, to include civil officers who materially assisted in establishing American Independence, and incorporated May 3, 1884, to "perpetuate the memory of the men who, in military, naval or civil service, by their acts or counsel, achieved American Independence; to promote and assist in the proper celebration of the Anniversaries of Washington's Birthday, the Battles of Lexington and Bunker Hill, the Fourth of July, the Capitulations of Saratoga and Yorktown, the Evacuation of New York by the British Army, and other prominent events relating to or connected with the war of the Revolution; to collect and secure for preservation the manuscript rolls, records and other documents and memorials relating to that war; to inspire among the members and their descendants the patriotic spirit of their forefathers; to inculcate in the community in general sentiments of nationality and respect for the principles for which the patriots of the Revolution contended; to assist in the commemorative celebration of other great historical events of national importance, and to promote social intercourse and the feeling of fellowship among its members."

Eligibility to membership is confined to male descendants, above the age of twenty-one years, from an ancestor who as either a military, naval or marine officer, soldier, sailor or marine, or official in the service of any one of the thirteen original Colonies or States, or of the National Government, representing or composed of those Colonies or States, assisted in establishing American Independence during the war of the Revolution between the 19th day of April, 1775, when hostilities commenced, and the 19th day of April, 1783, when they were ordered to cease. The triennial meetings of the general society are held in the city of Washington.

The officers of the New York Society Sons of the Revolution are as follows: *President*—Robert Olyphant. *Vice-Presidents*—Col. William W. Ladd, Philip Livingston and Col. William G. Bates. *Secretary*—Henry Russell Drowne, Fraunces' Tavern, corner Broad and Pearl Streets, New York. *Treasurer*—Arthur Melvin Hatch. *Registrar*—Edgar B. Van Winkle. *Chaplain*—Rt. Rev. David H. Greer, D. D.

There are thirty-one State societies and a society in the District of Columbia. The aggregate membership is 7,000, that of the New York Society being over 2,300 and the Pennsylvania Society over 1,100.

President—Miss Julia Chester Wells. *Vice-President*—Miss Laura Sylvina Hellner. *Secretary*—Miss Clara Richards, 113 West 31st Street, N. Y. City. *Treasurer*—Miss Annie Clarkson. Incorporated in 1894. The objects are "to renew, foster and develop among its members the friendships formed and cemented amid the trying ordeals of the war of the Revolution, in the camp, and on the battlefield by their ancestors; to advance and encourage investigation and study of the history of the Revolution, its causes and results; to cherish the memory and record the deeds of the noble women who encouraged and assisted the patriot cause; to commemorate by celebrations and tablets the achievements of our ancestors in the Revolution, and to gather and carefully preserve documents and relics relating to the Revolutionary period."

THE DRAMA SOCIETY.

It is an organization of art-loving playgoers on a basis that secures to regular members of the society the best seats, for the best productions only, at the box-office price. There are no dues, and no initiation fees. The only condition imposed is that the members yearly attend ten productions found worthy of the intelligent playgoer, within the first month of the run. By insuring that intelligent plays receive immediate attendance and financial support, the society hopes to encourage the better forms of dramatic art.

President—Mrs. E. R. Hewitt, New York City. *Secretary*—John Corbin, 131 East Fifteenth Street, New York City. *Treasurer*—Thomas W. Lamont, 23 Wall Street, New York City. *Executive Committee*—Mrs. August Belmont, Mrs. George G. Haven, Jr., Mrs. Philip Lydig, Mrs. Frederic B. Pratt, Mrs. W. K. Vanderbilt, Mrs. Egerton L. The American Cross of Honor—This order was organized in 1898 and incorporated by act of Congress in 1906. The charter members were H. A. George, Richard Stockton, John J. Delaney, Andrew M. Taylor, Eugene Longstreet, and Thomas H. Herndon. The regular membership is composed of persons upon whom the United States Government has conferred the life-saving medal of honor, and its object is to advocate those great principles of the value and sanctity of human life, and the best means of preserving it.

Bronze crosses of honor are conferred in certain cases where great heroism is shown in saving human life. A gold cross of honor is awarded in exceptional cases to persons who by great daring have highly distinguished themselves in saving life. This cross also is conferred biennially upon some person nominated by the Royal National Life-Boat Institution of Great Britain for the most heroic service in saving life; the person thus honored must have received the gold life-saving medal of the said institution.

The President of the United States is Honorary President of the order. M. Armand Fallières, ex-President of France; the German Emperor, the King of Great Britain, the King of Italy, ex-Presidents Roosevelt and Taft, and Andrew Carnegie are honorary members.

Society of Colonial Wars—The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval, and civil positions of high trust and responsibility, by their acts or counsel assisted in the establishment, defence, and preservation of the American Colonies, and were in truth the founders of the Nation. With this end in view it seeks to collect and preserve manuscripts, rolls, and records; to provide suitable commemorations or memorials relating to the American Colonial period." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under Colonial or British authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Deputy-Governor, Lieutenant-Governor, Member of the Council, or other high civil officer in the service of the Colonies, or under the banner of Great Britain. There are branch societies in 28 States.

Governor-General—Richard M. Cadwalader, Philadelphia, Pa. *Secretary-General*—John L. Merrill, 43 Cedar Street, New York City. *Treasurer-General*—William Macpherson Hornor, Philadelphia, Pa.

The Order of the Founders and Patriots of America—*Governor-General*—William Cary Sanger, Sangerfield, N. Y. *Secretary-General*—Henry S. Kissam, New York Society, 25 Madison Avenue, New York City. *Treasurer-General*—George E. Scranton.

The order was founded in 1896, its object being "to bring together and associate congenial men whose ancestors struggled together for life and liberty, home and happiness, in the land when it was a new and unknown country, and whose line of descent from them comes through patriots who sustained the Colonies in the struggle for independence in the Revolutionary War; to teach reverent regard for the names and history, character and perseverance, deeds and heroism of the founders of this country and their patriot descendants; to discover, collect, and preserve records, documents, manuscripts, monuments, and history relating to the first Colonists and their ancestors and their descendants, and to commemorate and celebrate events in the history of the Colonies and the Republic.' Eligibility—Any man above the age of twenty-one years, of good moral character and reputation, and a citizen of the United States, who is lineally descended, in the male line of either parent, from an ancestor who settled in any of the Colonies now included in the United States of America prior to May 13, 1657, and whose intermediate ancestors in the same line during the Revolutionary period adhered as patriots to the cause of the Colonies. There are State societies in New York, Connecticut, New Jersey, and Pennsylvania. The Governor of the New York Society is William E. Fitch, M. D., 25 East Sixtieth Street, New York City. *Secretary*—Eugene J. Grant, 189 Montague Street, Brooklyn, N. Y.

Society of Tammany, or Columbian Order—This organization was formed in 1789, being the effect of a popular movement in New York having primarily in view a counterweight to the so-called "aristocratic" Society of the Cincinnati. It was essentially anti-Federalist or democratic in its character, and its chief founder was William Mooney, an upholsterer and a native-born American of Irish extraction. It took its first title from a noted ancient, wise and friendly chief of the Delaware tribe of Indians, named Tammany, who had, for the want of a better subject, been canonized by the soldiers of the Revolution as the American patron saint. The first meeting was held May 12, 1789. The act of incorporation was passed in 1805. The Grand Sachem and thirteen Sachems were designed to typify the President and the Governors of the thirteen original States. William Mooney was the first Grand Sachem. The society is nominally a charitable and social organization, and is distinct from the General Committee of the Tammany Democracy, which is a political organization, and cannot use Tammany Hall without the consent of the society.

Grand Sachem—John R. Voorhis. *Sachems*—Louis F. Haffen, George W. Loft, Thomas F. McAvoy, Edward C. Sheehy, John J. Scannell, Charles F. Murphy, Henry W. Unger, John F. Ahearn, Asa Bird Gardiner, George W. Plunkitt, Wauhope Lynn, William Dalton, Thomas Darlington. *Secretary*—Thomas F. Smith. *Treasurer*—William Sohmer. *Sagamore*—Bryan P. Henry. *Wiskinkie*—John A. Boyle, New York City.

Daughters of the Revolution—*President-General*—Mrs. Clarence L. Bleakley, New York. *Recording Secretary-General*—Mrs. Henry T. Kent, Clifton Heights, Pa. *Corresponding Secretary-General*—Mrs. Fred M. Goss, Mass. *Treasurer-General*—Mrs. Frank P. Whiting, New York.

The general society was organized in the city of New York August 20, 1891. Eligibility to membership is restricted to "women who are lineal descendants of an ancestor who was a military or naval or marine officer, soldier, sailor or marine in actual service under the authority of any of the thirteen Colonies or States, or of the Continental Congress, and remained always loyal to such authority, or descendants of one who signed the Declaration of Independence, or of one who as a member of the Continental Congress or of the Congress of any of the Colonies or States, or as an official appointed by or under the authority of any such representative bodies, actually assisted in the establishment of American independence by service rendered during the war of the Revolution, becoming thereby liable to conviction of treason against the Government of Great Britain, but remaining always loyal to the authority of the Colonies or States." The office of the General Secretary is 33 West Forty-second Street, New York City.

New York State Society—*Secretary*—Miss Edith P. Gambrill, 2032 Madison Avenue, New York City.

Sons of the American Revolution—A society of descendants of Revolutionary patriots and others was organized in San Francisco, Cal., after the centennial parade of July 4, 1876, entitled "Sons of Revolutionary Sires," from whence was organized in 1889 the California Society Sons of the American Revolution and became part of the National Society in that year. State societies exist in forty-three States, the District of Columbia, Hawaii, and France. The total membership of the organization is about 13,000. *President-General*—Newell B. Woodworth, Syracuse, N. Y. *Vice-President-General*—Henry F. Punderson, Springfield, Mass. *Treasurer-General*—

The Veteran Corps of Artillery of the State of New York—The Veteran Corps of Artillery of the State of New York was instituted in New York City November 25, 1790, exclusively by officers and soldiers of the War of the Revolution, and was duly confirmed as a separate corps in the organized militia of the State by Governor George Clinton March 3, 1791. Congress, in its Militia laws of 1792, 1874, 1903, and May 27, 1908, enacted that it should retain "accustomed privileges" as a component part of the organized militia, supplemental to the National Guard and the status of the corps, as part of the active militia, has also been embodied in several State statutes.

When composed wholly of Revolutionary veterans, it was in the military service of the United States, June 25 to July 2, 1812, and September 2, 1814, to March 2, 1815, and afterward recruited exclusively from veterans War of 1812, until 1890, when the surviving veteran original members amended their regulations to admit male descendants of original members or male descendants of those who served honorably in the War of 1812 and the War of the Revolution, which limitation was fixed by law March 9, 1895.

On January 8, 1826, the Military Society of the War of 1812 was formed at New York City exclusively by officers of the regular Army, Navy, and volunteer services of that war, and consolidated January 8, 1848, with the Veteran Corps of Artillery, and was constituted by law the Civic Association of the Corps, for "patriotic and other laudable purposes." Its last Revolutionary member, Daniel Spencer, died March 4, 1854, aged 95; its last War of 1812 member, Hiram Cronk, died May 13, 1905, aged 105.

The officers are: *Colonel-Commandant*—Asa Bird Gardiner. *Vice-Commandant*—Lieut.-Col. Charles Elliot Warren. *Brigadier-Major*—Walter Lispenard Suydam, 60 East Forty-second Street, New York City. *Paymaster*—James Mortimer Montgomery. *Chaplain*—F. Landon Humphreys.

The officers are commissioned, and the Corps, with the National Guard, form a part of the active militia of the State.

Eligibility—Any loyal Union man who between April 12, 1861, and April 9, 1865, served as President, Vice-President, Justice of Supreme Court, Cabinet Officer, Minister Plenipotentiary abroad, Senator, Member of House of Representatives, Special Commissioner or Executive Secretary of the United States, citizens who received by name the thanks of Congress for valuable services rendered to the Government during the Civil War, loyal Governor of loyal State, Lieut.-Governor, Secretary of State, State Attorney-General, State Treasurer, Commissioned Officer of Governor's Military Staff, President of State Senate, Speaker of House of Representatives, Executive Secretary, State Executive, Counsellor, Office of State Provost Marshal's Department on recruiting duty for United States Volunteer Service, State Military Agent, member of commission, board or committee appointed by Governor to aid and assist in matters connected with National protection and defence, United States Military or Provisional Governor of secession State. Any other loyal Union man may be elected to membership who, outside the military or naval service of the United States between the aforesaid dates, rendered services to the National Government and Union cause, which may be considered by the General Board of Managers to have been of sufficient value to warrant his election to membership in the society. Any man twenty-one years of age is eligible to membership who is descended from any of the foregoing classes provided he may be found worthy.

George Washington Memorial Association—*President*—Mrs. Henry F. Dimock, New York. *Treasurer*—Mrs. Frank Northrop, New York. *General Secretary*—George Milbank Hersey, 609 Publicity Building, Boston, Mass.

To furnish our National capital with a building which will provide facilities for the holding of congresses and conventions—both National and international. The building will also provide office accommodations for the many societies of National scope devoted to the advancement of humanity which require National headquarters, such as the patriotic, scientific, educational, art, literary, sociological, and civic virtue federations. It will also set apart a room for each State (which appropriates its quota of the total amount to be raised) so that a permanent exhibit of the State's resources may be accessible to the vast number of people visiting the National capital. It is to cost $2,000,000 and will have an endowment fund of $500,000 for maintenance. The building may also be used for inaugural receptions and special public meetings authorized by Congress. The structure which is to embody this idea is to be known as the George Washington Memorial Building. In a broader sense it will fulfil Washington's wish expressed in his Farewell Address, to "promote as an object of primary importance institutions for the general diffusion of knowledge." President Taft signed the bill on March 4, 1913, giving the association permission to erect this building in the north end of the reservation known as Armory Square, bounded by Sixth and Seventh Streets West, and B Street South, Washington, D. C. The Governors of forty-three States have accepted the Honorary Chairmanship of Advisory Councils being organized or appointed in their respective Commonwealths.

The total amount to be raised, $2,500,000, is equitably apportioned to the different States; for instance, Rhode Island, $50,000; Connecticut, $100,000; Massachusetts, $200,000; New York, $350,000, etc., etc. A considerable amount has been raised and paid in to Mr. Charles J. Bell, Trustee of the Permanent Fund, President of the American Security and Trust Company of Washington, D. C. Gifts are invited.

The United States Hay Fever Association—Forty-two years ago the United States Hay Fever Association came into existence as a joke. But very soon it was discovered that real service might be rendered hay fever sufferers through organization. The "joke" became a "practical" one and has so remained to date. The forty-second annual convention of the association was held at Bethlehem, N. H., on September 2, 1915.

The object of the association is the seeking for information which will serve to relieve sufferers with hay fever and their mutual benefit and comfort. Not only hay-feverites, but the townspeople and proprietors of hotels of places exempt from hay fever, the manufacturers of remedies for hay fever, and especially physicians who have made a study of this disease are invited to become members of the association, that all may work together for the best results.

State meetings were held at Ocean Beach, Fire Island, N. Y., John A. Wilbur, Chairman; Lake Placid Club, N. Y., Melvil Dewey, Chairman; Kane, Pa., Charles G. Snyder, Chairman; Eagles' Nest, North Carolina.

The Universal Brotherhood and Theosophical Society—The Universal Brotherhood and Theosophical Society, founded by Mme. H. P. Blavatsky in New York, 1875, continued after her death under the leadership of the co-founder, William Q. Judge, and now, under the leadership of their successor, Katherine Tingley, has its international headquarters at the world's theosophical centre, Point Loma, Cal.

This organization declares that brotherhood is a fact in Nature. The principal purpose of the organization is to teach brotherhood, demonstrate that it is a fact in nature, and make it a living power in the life of humanity, establishing Raja Yoga schools throughout the world, and creating a new literature. Its subsidiary purpose is to study ancient and modern religion, science, philosophy, and art, to investigate the laws of nature and the latent divine powers in man. It declares in its Constitution that every member has a right to believe or disbelieve in any religious system or philosophy, each being required to show that tolerance for the opinions of others which he expects for his own.

Secretary—J. H. Fussell, Point Loma, Cal.

National Association for the Study and Education of Exceptional Children—"This association, which was founded by Dr. Maximilian P. E. Groszmann, has approached the problem of exceptional development from the point of view of the normal, or potentially normal, child as representing an actual, positive asset in human society. In doing this, this association has endeavored to elaborate a suitable and scientifically tenable classification and terminology which would enable students of this problem to understand the different types of excep-

tional development in their true perspective. It is the purpose of this association to evolve methods by which this human waste can be avoided, just as modern processes of manufacture and industry have led to saving what was formerly waste material and what is now often turned into products more valuable than the original object of production." Organized in New Jersey in 1905.

President—Dr. Ira S. Wile, New York City. *Vice-President*—A. A. D'Ancona, San Francisco, Cal. *Secretary and Treasurer*—Waldemar H. Groszmann, Plainfield, N. J. *Educational Director*—Dr. Maximilian P. E. Groszmann, Plainfield, N. J.

ELIGIBILITY TO MEMBERSHIP AS FOLLOWS:

Original companions of the first class—Commissioned officers and honorably discharged commissioned officers of the United States Army, Navy and Marine Corps, regular or volunteer, including officers of assimilated or corresponding rank by appointment of the Secretary of War or Navy, who were actually engaged in the suppression of the Rebellion prior to the 15th day of April, 1865, or who served under the President's call of the 15th day of April, 1861; or who, having served as non-commissioned officers, warrant officers or enlisted men, during the War of the Rebellion, have since been or may hereafter be commissioned as officers in the United States Regular or Volunteer Army, Navy or Marine Corps. All midshipmen in the United States Navy and all cadets of the United States Army, who, while pursuing their course in the United States Naval Academy or the United States Military Academy at West Point, actually rendered service.

Hereditary companions of the first class—The direct male lineal descendants, who shall have attained the age of 21 years, of deceased original companions of the first class, and of deceased officers not members of the order, but who were eligible as such, and whose direct descent shall in every case be traced anew from the original founder of the membership in the order, or from the deceased eligible officer, and not otherwise.

Any original companion having no direct lineal male descendant, may, by writing, filed with the Recorder of his Commandery, nominate a companion of the second class from among the collateral male members of his family, descending only from his own brother or sister, and the person so nominated when he shall have attained the age of 21 years shall become eligible to membership for life in the second class.

Second class—The sons, and if there be no sons, the grandsons, of living companions of the first class, whether original, in succession, or by inheritance, who shall have attained the age of 21 years, shall be eligible to membership.

Third class—Companions of the third class are those gentlemen who in civil life during the Rebellion were specially distinguished for conspicuous and consistent loyalty to the National Government and were active and eminent in maintaining the supremacy of the same; and who, prior to the 15th day of April, 1890, were elected members of the order pursuant to the then existing provisions of the Constitution, the power to elect such having ceased at that date.

EDUCATIONAL SOCIETIES.

Chautauqua Institution—*Chancellor Emeritus*—John H. Vincent. *Chancellor*—George E. Vincent. *President*—Arthur E. Bestor. *President of Trustees*—Clement Studebaker, Jr. *Treasurer*—Fred W. Hyde.

The Chautauqua Assembly, now Chautauqua Institution, was organized in 1874 as a result of the joint plan of Lewis Miller and John H. Vincent. The annual assembly during July and August at Chautauqua, N. Y., is a sixty-day programme of lectures, addresses, concerts, recitals, and various forms of platform entertainment, out-of-door recreation, and highly organized social group life. Local assemblies patterned after the parent Chautauqua in the United States number over 3,000.

The Chautauqua Summer Schools (Percy H. Boynton, Principal of Summer Schools) are annually conducted during six weeks of the assembly season. Faculty, 115; courses, over 200, in fourteen departments; six in academic subjects usually pursued in academies and colleges, eight in special professional work in Library Training, Domestic Science, Music, Physical Education, Arts and Crafts, etc. Over 3,500 students annually.

The Chautauqua Literary and Scientific Circle (E. H. Blichfeldt, Manager), organized at Chautauqua in 1878, continues the educational influence of the assembly throughout the year. More than 350,000 members have been enrolled. Individual readers may pursue the course alone, or local circles may be formed. The time required is about one-half hour daily for nine months. Diplomas are granted to those who complete the course. Any one may become a member of the C. L. S. C. by sending $5 for the unit (four books, membership book and magazine for one year) to Chautauqua Institution, Chautauqua, N. Y.

National Society for Broader Education—National Society for Broader Education of New York was organized in December, 1909; incorporated January, 1910, under the laws of New York. Its purpose is: "Through the education of the adult to aid in the normal development of National life; in removing the causes of distrust and antagonism between classes and in promoting the interests of the whole people."

The society carries on its work through the lecture platform, the pulpit, and the newspapers. In 1915 its speakers delivered 543 lectures, its singers gave 458 concert lectures, several hundred sermons, conducted 527 discussions, conducted efficiency campaigns in 28 towns. *President*—George Edward Reed, S. T. D., LL. D., Harrisburg, Pa. *Managing Director*—Guy Carleton Lee, Ph. D., 55 West Forty-fourth Street, New York City. *Secretary and Treasurer*—Dr. H. H. Langsdorf, 168 West High Street, Carlisle, Pa.

The Northfield Conferences and Summer Schools were established by D. L. Moody, and meet annually between about June 15 and about September 1. Bible Studies and Special Addresses are given in connection with the above, and the Northfield Schools each year from May 1 to October 1. The Northfield Schools comprise the Northfield Seminary for young women and Mount Hermon School for young men. *President*—William R. Moody. *Clerk*—Ambert G. Moody. Headquarters, East Northfield, Mass.

The John F. Slater Fund—In 1882 Mr. John F.

EDUCATIONAL SOCIETIES—*Continued.*

Slater of Connecticut placed in the hands of trustees the sum of $1,000,000 for the purpose of "uplifting the lately emancipated population of the Southern States and their posterity." For this patriotic and munificent gift the thanks of Congress were voted, and a medal was presented. The board consists of William A. Slater, President; Richard H. Williams, Vice-President; John A. Stewart, John M. Glenn, Cleveland H. Dodge, Wickliffe Rose, David F. Houston, Francis P. Venable, William Lawrence, James H. Dillard, Fairfax Harrison, Charles Scribner. The Treasurer is the Metropolitan Trust Company of New York. *Director*—Jas. H. Dillard, Charlottesville, Va. *Field Agents*—W. T. B. Williams, Hampton, Va., and B. C. Caldwell, Natchitoches, La. *Office Secretary*—Miss G. C. Mann, Charlottesville, Va. The fund has grown through judicious investment, and the Trustees have now an annual income of about $80,000. which is used in encouraging industrial and normal training in institutions for the colored race in the South.

The General Education Board—The General Education Board was organized in New York February 27, 1902, and incorporated by an act of Congress, signed January 12, 1903. The following are members of the board: Frederick T. Gates, Chairman; L. G. Myers, Treasurer; Wallace Buttrick, Secretary; E. C. Sage and Abraham Flexner, Assistant Secretaries; Charles W. Eliot, Andrew Carnegie, Walter H. Page, J. D. Rockefeller, Jr., Albert Shaw, Wallace Buttrick, Starr J. Murphy, Jerome D. Green, Anson Phelps Stokes, Edwin A. Alderman, Hollis B. Frissell, Harry Pratt Judson, Edgar L. Marston, Wickliffe Rose, and George E. Vincent. The purposes of the board are to promote education in the United States, without distinction of race, sex, or creed, and especially to promote, systematize, and make effective various forms of educational beneficence. Office, 61 Broadway, New York City.

The Southern Conference for Education and Industry—Successor to the Southern Educational Association (organized 1890), the Conference for Education in the South (organized 1898), and the Southern Education Board (organized 1901), consolidated at Chattanooga April 29, 1915. *President*—W. CARNEGIE ENDOWMENT FOR INTERNATIONAL PEACE.

On December 14, 1910, Andrew Carnegie of New York transferred to a Board of Trustees $10,000,000 in 5 per cent. first mortgage bonds, the income of which is to be devoted to "hastening the abolition of international war." The methods by which the annual income can best be expended for this purpose were left to be determined by the Trustees. The Board of Trustees consists of the following members:

Elihu Root.	John W. Foster.	James Brown Scott.
Robert Bacon.	Austen G. Fox.	James L. Slayden.
Robert S. Brookings.	George Gray.	Oscar S. Straus.
Thomas Burke.	William M. Howard.	Charles L. Taylor.
Nicholas Murray Butler.	Samuel Mather.	Charlemagne Tower.
Joseph H. Choate.	Andrew J. Montague.	Andrew D. White.
Cleveland H. Dodge.	Henry S. Pritchett.	John Sharp Williams.
Charles W. Eliot.	George W. Perkins.	Robert S. Woodward.
R. A. Franks.	J. G. Schmidlapp.	Luke E. Wright.
Arthur William Foster.		

The officers of the endowment are Hon. Elihu Root, President; Hon. Joseph H. Choate, Vice-President; Dr. James Brown Scott, Secretary, and Hon. Charlemagne Tower, Treasurer. These officers have been annually re-elected. The Executive Committee consists of the President, the Secretary, the Treasurer, and Messrs. Butler, Fox, Montague, and Pritchett. The headquarters of the endowment is at Nos. 2 and 4 Jackson Place, Washington, D. C., which property has recently been purchased. The trustees operate under a series of by-laws.

They have divided the work of the endowment into three divisions, viz.: Division of Intercourse and Education, President Nicholas Murray Butler of Columbia University, Acting Director; Division of Economics and History, Prof. John Bates Clark of Columbia University, Director; and Division of International Law, of which Dr. Scott, the Secretary, is the Director.

The first division has established a European Bureau at 24 Rue Pierre Curie, Paris, of which M. Jules-Jean Prudhommeaux is Secretary-General. A European Advisory Council has also been established, of which Baron d'Estournelles de Constant is the President.

This division has conducted its work of propaganda by co-operation with other existing peace organizations in this country and in other countries; by a series of international visits of representative men to and from this country; and by a series of publications for gratuitous distribution, the most important of which thus far are "Some Roads Toward Peace," by Dr. Charles W. Eliot, containing observations and impressions in China and Japan in 1912; and the report of an international commission appointed to conduct an inquiry into the "Causes and conduct of the two Balkan wars."

The second division, the purposes of which are "to promote a thorough and scientific investigation and study of the causes of war, and of practical methods to prevent and avoid it," works in co-operation with a Committee of Research, consisting of nineteen of the leading economists of Europe, Japan, and the United States who have blocked out an elaborate schedule of researches, to be carried forward by well known students and professors. More than a hundred studies of this character have been arranged for, and several of these have been published.

The Division of International Law has for its purpose "to aid in the development of international law and a general agreement on the rules thereof, and the acceptance of the same among nations to establish a better understanding of international rights and duties and a more perfect sense of international justice among the inhabitants of civilized countries; to promote a general acceptance of peaceable methods in the settlement of international disputes." This division is now engaged in the preparation of a collection of all known international arbitrations and a companion work consisting of all known arbitration treaties. It has also in process of preparation the following works: Reports to The Hague Conventions; Cases Heard Before the Permanent Court of Arbitration; Resolutions of the Institute of International Law; an edition in Spanish of The Hague Conventions of 1899 and 1907; Treatise in Spanish International Law, and a number of other works, including publications in French of the following works: Lawrence—*The Principles of International Law.* Liszt—*Lehrbuch des Voelkerrechts.* Scott—*The Hague Peace Conferences of 1899 and 1907.* Triepel—*Voelkerrecht und Landesrecht.* Westlake—*International Law.* Kleen—*Krigets Lagar.* De Louter—*Het Stellig Voelkenrecht.* The Institute of International Law has accepted its invitation to act as the advisor of the division regarding the conduct and development of its work. The trustees have approved a plan for the maintenance of a Summer or vacation school of internationallaw at The Hague, of which teachers and students of the subject from all countries may take advantage.

The main activities of the endowment are thus arranged on scientific lines, the results of the activities and researches of the latter two divisions to be utilized and popularized as a part of the propaganda of the first division. The plans of the trustees contemplate a world-wide international co-operation in each branch of the endowment's work. While these plans have been seriously interrupted, and may be somewhat modified by the European war, the outbreak of that war enormously emphasizes and illustrates the importance and the necessity of its work.

The annual meeting of the trustees is held at Washington on the second Friday of April, and a special meeting of the board occurs on the second Friday of November in each year.

The offices of the first two divisions are at 407 West One Hundred and Seventeenth Street, New York City. The Division of International Law occupies the headquarters building of the endowment in Washington.

CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

An institution founded by Andrew Carnegie in 1905, and incorporated by the Congress of the United States in 1906. The institution is endowed with $15,000,000, to provide retiring allowances for teachers and officers of colleges, universities, and technical schools in the United States, Canada, and Newfoundland, and with $1,250,000 to provide for educational inquiry and publication. By the ninth annual meeting of the trustees in 1914, 332 allowances were being paid to teachers, and 100 pensions to widows of teachers, at an annual cost of $634,863. The amount of the average retiring allowance is $11,594.83, the average age of retirement being about sixty-nine years.

In the administration of its endowment, the foundation has restricted its allowances to professors and officers in a list of seventy-three institutions selected for their educational standing, and has published a series of widely influential reports and bulletins concerning educational conditions. The President of the foundation is Dr. Henry S. Pritchett; Secretary, Clyde Furst; address, 576 Fifth Avenue, New York City.

THE CARNEGIE INSTITUTION OF WASHINGTON.

The Carnegie Institution of Washington was founded by Mr. Andrew Carnegie, January 28, 1902, when he gave to a board of trustees $10,000,000, in registered bonds, yielding 5 per cent. annual interest. In general terms, he stated that his purpose was to "found in the city of Washington an institution which, with the co-operation of institutions now or hereafter established, there or elsewhere, shall in the broadest and most liberal manner encourage investigation, research and discovery, show the application of knowledge to the improvement of mankind, and provide such buildings, laboratories, books, and apparatus as may be needed." Mr. Carnegie added $2,000,000 to his gift in 1907, and $10,000,000 in 1911, making a total endowment of $22,000,000.

By an act of Congress, approved April 28, 1904, the institution was placed under the control of a board of twenty-four trustees, all of whom had been members of the original board referred to above.

The trustees meet annually, and during the intervals between such meetings the affairs of the institution are conducted by an executive committee, chosen by and from the board of trustees, acting through the President of the institution as chief executive officer.

The Administration Building is situated on the S. E. corner of Sixteenth and P Streets N. W., Washington, D. C.

CARNEGIE CORPORATION OF NEW YORK.

Carnegie Corporation of New York, incorporated by an act passed by the New York Legislature June 9, 1911, was organized November 10, 1911. As stated in the charter, it was organized "for the purpose of receiving and maintaining a fund or funds and applying the income thereof to promote the advancement and diffusion of knowledge and understanding among the people of the United States, by aiding technical schools, institutions of higher learning, libraries, scientific research, hero funds, useful publications, and by such other agencies and means as shall from time to time be found appropriate therefor."

Mr. Carnegie transferred to the corporation $25,000,000 and later added $100,000,000 to the original gift. The work carried on by Mr. Carnegie as an individual for many years in founding and aiding educational institutions and in the making of grants to churches for the purchase of organs has been turned over to the corporation.

The trustees are Andrew Carnegie, Elihu Root, Henry S. Pritchett, S. H. Church, Robert S. Woodward, Charles L. Taylor, Robert A. Franks, and James Bertram. The officers are: *President*—Andrew Carnegie. *Vice-Presidents*—Elihu Root and Robert A. Franks. *Treasurer*—Robert A. Franks. *Secretary*—James Bertram, 576 Fifth Avenue, New York City.

THE CARNEGIE HERO FUND.

In April, 1904, Andrew Carnegie created a fund of $5,000,000 for the benefit of the dependents of those losing their lives in heroic effort to save their fellow men, or for the heroes themselves if injured only. Provision was also made for medals to be given in commemoration of heroic acts.

The endowment known as "The Hero Fund" was placed in the hands of a commission composed of twenty-one persons, residents of Pittsburgh, Pa., of which Charles L. Taylor is President, and F. M. Wilmot, Secretary and Manager of the fund.

In his letter to the Hero Fund Commission Mr. Carnegie outlined the general scheme of the fund thus: "To place those following peaceful vocations, who have been injured in heroic effort to save human life, in somewhat better positions pecuniarily than before, until able to work again. In case of death, the widow and children or other dependents are to be provided for until she remarries, and the children until they reach a self-supporting age. For exceptional children, exceptional grants may be made for exceptional education. Grants of sums of money may also be made to heroes or heroines as the commission thinks advisable—each case to be judged on its merits."

The fund applies only to acts performed within the United States of America, the Dominion of Canada, the Colony of Newfoundland, and the waters thereof, and such acts must have been performed on or after April 15, 1904, and brought to the attention of the commission within three years of the date of the act.

Applications should be made by letter addressed to the manager, Oliver Building, Pittsburgh, Pa.

The commission has awarded 1,128 medals—723 bronze, 387 silver, and 18 gold. In addition to the medals, $1,249,656 has been awarded for disablement benefits, and for educational and other special purposes, and for the dependents of heroes who lost their lives, including payments made to December 31, 1915, on monthly allowances. Pensions in force as of this date amount to $79,200 annually. The commission has also awarded $169,462 for relief of sufferers from disasters—at Brockton, Mass., $10,000; from the California earthquake, $54,462; at Monongah Mines, Monongah, W. Va., $35,000; at Darr Mine, Jacobs Creek, Pa., $25,000; at Lick Branch Mine, Switchback, W. Va., $10,000; at McCurtain Mine, McCurtain, Okla., $15,000; at Jed Mine, Jed, W. Va., $10,000, and for relief of Ohio and Indiana flood sufferers, $10,000.

ACTORS' FUND OF AMERICA.

President—Daniel Frohman. *First Vice-President*—Joseph R. Grismer. *Second Vice-President*—F. F. Mackay. *Treasurer*—William Harris. *Secretary*—E. D. Miner.

The Actors' Fund was established in 1882 to provide assistance for disabled and needy members of the theatrical profession, and burial for such as leave no means therefor. The Actors' Fund Home, West New Brighton, Staten Island, under the direction of the Actors' Fund of America, was opened May 10, 1902. This is a home for aged and needy actors and actresses. There are 31 honorary members and 441 life members. Office, 1476 Broadway, New York City.

RUSSELL SAGE FOUNDATION.

Russell Sage Foundation was incorporated under the laws of the State of New York, April 1, 1907, for the improvement of social and living conditions in the United States of America. The foundation does not attempt to relieve individual or family needs, but aims to eradicate the causes of distress.

TRUSTEES.—*President*—Mrs. Russell Sage. *Vice-President*—Robert W. de Forest. *Treasurer*—Cleveland H. Dodge; John H. Finley, John M. Glenn, Mrs. William B. Rice, Miss Louisa Lee Schuyler, Mrs. Finley J. Shepard, and Alfred T. White. *General Director*—John M. Glenn. Office, 130 E. 22d Street, New York City.

NATIONAL REPUBLICAN LEAGUE OF THE UNITED STATES.

The National Republican League of the United States was organized in Chickering Hall, New York City, December 15-17, 1887, by delegates from about 350 Republican clubs of the United States, assembled in national convention, pursuant to a call issued by the Republican Club of New York City. It is composed of the Republican clubs of the United States, organized by States and united in a national organization. Its purpose is "Organization and Education." It aims to enlist recruits for the Republican party, particularly the younger men and the "first voters." National conventions have since been held at Baltimore, 1889; Nashville, 1890; Cincinnati, 1891; Buffalo, 1892; Louisville, 1893; Denver, 1894; Cleveland, 1895; Milwaukee, 1896; Detroit, 1897; Omaha, 1898 (biennial sessions afterward); St. Paul, 1900; Chicago, 1902; Indianapolis, 1904; Philadelphia, 1906; Cincinnati, 1908; New York, 1910; Chicago, 1912. At the close of the campaign of 1908, the league, including the Taft campaign clubs, comprised approximately 4,000 clubs, with a membership of 1,500,000. *Officers*—President, John Hays Hammond, Gloucester, Mass.; Secretary-Treasurer, D. B. Atherton, New York City.

Board of Regents, Edward Douglass White, Chief Justice of the United States, Chancellor; Thomas R. Marshall, Vice-President of the United States; Henry Cabot Lodge, Member of the Senate; William J. Stone, Member of the Senate; Henry F. Hollis, Member of the Senate; Scott Ferris, Member of the House of Representatives; Ernest W. Roberts, Member of the House of Representatives; Maurice Connolly, Member of the House of Representatives; Andrew D. White, citizen of New York; Alexander Graham Bell, citizen of Washington, D. C.; Charles F. Choate, Jr., citizen of Massachusetts; George Gray, citizen of Delaware; John B. Henderson, Jr., citizen of Washington, D. C.; Charles W. Fairbanks, citizen of Indiana.

The Institution at Washington, D. C., was established by statute in 1846, under the terms of the will of James Smithson, who bequeathed his fortune in 1826 to the United States to found an institution for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian Building, was erected on land given by the United States. The Institution is legally an establishment having as its members the President of the United States, the Vice-President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice-President, the Chief Justice, three members of the United States Senate, three members of the House of Representatives, and six citizens of the United States appointed by joint resolution of Congress. It is under the immediate direction of the Secretary of the Smithsonian Institution, who is the executive officer of the board and the director of the Institution's activities.

For the increase of knowledge, the Institution aids investigators by making grants for research and exploration, supplying books, apparatus, laboratory accommodations, etc. It occasionally provides for lectures, which are published. It has initiated numerous scientific projects of national importance, some of which have been turned over to the Government and resulted in the creation of independent Government bureaus. It advises the Government in many matters of scientific importance, especially in those that have an international aspect. It co-operates with national scientific bodies, such as the National Academy of Sciences, the American Association for the Advancement of Science, the American Historical Association, etc. It issues three regular series of publications: Annual Reports, containing papers of general interest intended to keep the ordinary reader abreast of the progress of science; Contributions to Knowledge, the distinct feature of which is that each memoir constitutes an original contribution to knowledge; Miscellaneous Collections, which contain bibliographies, reports of expeditions and of various scientific researches, and standard tables. All these publications are distributed gratuitously to important libraries throughout the world.

The Institution maintains a library, in co-operation with the Library of Congress, which numbers 265,000 volumes and consists mainly of the transactions of learned societies and scientific periodicals. While the body of the library is deposited in the Library of Congress and accessible to all its readers, a working library is maintained at the Institution. Lists, bibliographies, rules for cataloguing and library work have been published. The Institution supports a table at the Naples Zoological Station. All these and numerous other activities may be carried on solely from the income of the Smithsonian fund. The Regents are empowered to accept gifts without action of Congress, in furtherance of the purposes of the Institution, and to administer trusts in accord therewith.

The parent Institution has the administrative charge of several branches which grew out of its early activities and which are supported by Congressional appropriations. These are the National Museum, including the National Gallery of Art; the International Exchange Service, the Bureau of American Ethnology, the National Zoological Park, the Astrophysical Observatory, and the United States Regional Bureau for the International Catalogue of Scientific Literature.

THE UNITED STATES NATIONAL MUSEUM is the depository of the national collections. It is especially rich in the natural history, geology, paleontology, archæology and ethnology of America, and has unique collections of American history, as well as many series relating to fine arts and the industrial arts. It is both an educational and a research museum, and issues numerous scientific publications. The National Gallery of Art consists largely of the collections of etchings and engravings of George P. Marsh, the collections of Charles L. Freer, containing numerous paintings and etchings by Whistler, and examples of Oriental art; the Harriet Lane Johnston collection, including works of a number of the greatest English portrait painters, and the collection of William T. Evans, of one hundred and fifty-one paintings, representing some of the best work of one hundred and six American artists.

THE INTERNATIONAL EXCHANGE SERVICE, carried on in accordance with the terms of treaties entered into between the United States and various foreign nations, is for the free interchange of scientific, literary and governmental publications between the Government of the United States and foreign Governments and institutions, and investigators in the United States and foreign lands. It has correspondents in all parts of the world, and since its establishment more than 4,000,000 packages, containing many millions of publications, have been handled by it.

THE BUREAU OF AMERICAN ETHNOLOGY, for the study of the American Indian; THE ASTROPHYSICAL OBSERVATORY, for the investigation of solar phenomena; THE NATIONAL ZOOLOGICAL PARK at Washington, containing about 1,400 animals; the Regional Bureau of the INTERNATIONAL CATALOGUE OF SCIENTIFIC LITERATURE, for the preparation of a classified index to the current scientific literature of the United States, and the LANGLEY AERODYNAMICAL LABORATORY are also branches of the Institution.

COPYRIGHT LAW OF THE UNITED STATES.

DIRECTIONS FOR SECURING COPYRIGHT UNDER ACT OF CONGRESS OF MARCH 4, 1909.

THE copyright law approved March 4, 1909, which took effect on July 1, 1909, provides that the application for registration of any work "shall specify to which of the following classes the work in which copyright is claimed belongs":

SUBJECT MATTER OF COPYRIGHT.

(a) Books, including composite and cyclopædic works, directories, gazetteers and other compilations; (b) periodicals, including newspapers; (c) lectures, sermons, addresses, prepared for oral delivery; (d) dramatic or dramatico-musical compositions; (e) musical compositions; (f) maps; (g) works of art; models or designs for works of art; (h) reproductions of a work of art; (i) drawings or plastic works of a scientific or technical character; (j) photographs; (k) prints and pictorial illustrations. The amendment of August 24, 1912, adds: (l) motion picture photo-plays; (m) motion pictures other than photo-plays.

The application for registration of any article should distinctly specify to which one of these classes the work belongs. An article is not entitled to registration unless it is reasonably possible to class it under one or the other of the designations named in the statute.

STEPS NECESSARY TO SECURE COPYRIGHT REGISTRATION.

For works reproduced in copies for sale or public distribution: 1. Publish the work with the copyright notice. The notice may be in the form "Copyright, 19.... (year date of publication) by..... (name of copyright proprietor), or in case of works specified above (f) to (k) the notice may consist of the letter C enclosed in a circle (C) accompanied by the initials, monogram, mark or symbol of the proprietor—provided that his name shall appear on some accessible part of the copies." 2. Promptly after publication send to the Copyright Office, Library of Congress, Washington, D. C., two copies (or if the work is by a foreign citizen and is first published in a foreign country, one copy only) of the best edition of the work, with an application for registration. In the case of motion picture photo-plays and of motion pictures other than photo-plays a description of the work must be filed and a money order payable to the Register of Copyrights for the statutory registration fee of $1.

In the case of books by American authors, or permanent residents of the United States, the copies deposited must be accompanied by an affidavit, under the official seal of an officer authorized to administer oaths, stating that the typesetting, printing and binding of the book have been performed within the United States Affidavit and application forms will be supplied by the Copyright Office on request.

Books of foreign origin in a language or languages other than English are not required to be manufactured in the United States. In the case of a book in the English language published abroad before publication in this country, an *ad interim* copyright for 30 days from the day of the deposit of the foreign copy may be secured by depositing in the Copyright Office one complete copy of the foreign edition within 30 days after its publication abroad. If two copies of such book manufactured in this country are deposited with application for registration and fee ($1) during the *ad interim* term, the copyright shall be extended for the full term of 28 years.

For works not reproduced in copies for sale: Copyright may also be had of certain classes of works (see a, b, c, below) of which copies are not reproduced for sale, by filing in the Copyright Office an application for registration, with the statutory fee of $1, sending therewith: (a) In the case of lectures or other oral addresses or of dramatic or musical compositions, one complete manuscript or typewritten copy of the work. This privilege of registration, however, does not exempt the copyright proprietor from the deposit of printed copies of a dramatic or musical composition or lecture where the work is later reproduced in copies for sale. A new application must be made in such cases and another fee of $1 paid. (b) In the case of photographs not intended for general circulation, one photographic print. (c) In the case of works of art (paintings, drawings, sculpture); or of drawings or plastic works of a scientific or technical character, one photograph or other identifying production of the work. In the case of a motion picture photo-play, a title and description and one print taken from each scene or act. In case of a motion picture other than a photo-play, a title and description with not less than two prints to be taken from different sections of a complete motion picture. In all these cases, if the work is later reproduced in copies for sale, two copies must then be deposited.

COPYRIGHT FEES.

For registration of any work subject to copyright, $1, which sum is to include a certificate of registration under seal. But only one registration at one fee is required in the case of several volumes of the same book deposited in the Copyright Office at the same time. For every additional certificate of registration, or copy of record under seal, 50 cents. In the case of photographs the fee shall be 50 cents where a certificate is not requested. For recording and certifying an assignment of copyright, or for a certified copy of an assignment, $1, if the instrument is not over three hundred words in length; if more than three hundred and less than one thousand words in length, $2; if more than one thousand words in length, $1 additional for each additional one thousand words or fraction thereof over three hundred words. For comparing a copy of an assignment with the record of such document in the Copyright Office and certifying the same under seal, $1. For recording the transfer of the proprietorship of copyright articles, 10 cents for each title of a book or other article, in addition to the fee prescribed for recording the instrument of assignment. For recording an extension or renewal of copyright, 50 cents. Remittances should be made by money order payable to the Register of Copyrights. Forms for application for copyright registration will be furnished on request.

DURATION OF COPYRIGHT.

The original term of copyright runs for twenty-eight years. Within one year prior to the expiration of the original term, the author, if living, or the widow or widower of the author, or the children of the author if he be not living; or if none of these be living then the author's executors, or in the absence of a will, the author's next of kin may secure a renewal for a further term of twenty-eight years, making fifty-six years in all. In case of composite works, if the proprietor secured the original copyrights, he may also secure the renewal.

ASSIGNMENTS.

Copyrights are assignable by any instruments of writing. Every assignment of copyright must be recorded in the Copyright Office within three calendar months after its execution in the United States or within six calendar months after its execution without the limits of the United States. "In default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, whose assignment has been duly recorded." Every assignment of copyright executed in a foreign country must be acknowledged by the assignor before a consular officer or secretary of legation of the United States authorized by law to administer oaths or perform notarial acts. The certificate of such acknowledgment under the hand and official seal of such Consular Officer or Secretary of Legation is *prima facie* evidence of the execution of the instrument.

INTERNATIONAL COPYRIGHT RELATIONS.

Copyright is not secured in foreign countries by action in the Copyright Office, but only by complying with the legislation of such countries.

Copyright relations have been established with the following foreign countries by proclamation of the President: Austria, Belgium, Chile, Costa Rica, Cuba, Denmark, France, Germany, Great Britain and her possessions, Italy, Luxemburg, Mexico, Netherlands and possessions, Norway, Portugal, Spain, Sweden, Switzerland, Tunis.

Copyright treaties have also been entered into with China, Japan and Hungary (the latter in effect on October 16, 1912). The Copyright Convention of Mexico of 1902 has been ratified by the United States and is effective from July 1, 1908, as between the United States and Costa Rica, Guatemala, Honduras, Nicaragua and Salvador.

THE LIBRARY OF CONGRESS.

THE Library of Congress was established in 1800, destroyed in 1814 by the burning of the Capitol, afterward replenished by the purchase by Congress of the library of ex-President Jefferson, 6,760 volumes (cost, $23,950); in 1851, 35,000 volumes destroyed by fire; in 1852, partially replenished by an appropriation of $75,000; increased (1) by regular appropriations by Congress; (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress with the stipulation that future accessions should follow it. One hundred sets of Government publications are at the disposal of the Librarian of Congress for exchange, through the Smithsonian, with foreign Governments, and from this source are received about 12,000 volumes annually. Other special accessions have been: The Peter Force collection (22,529 volumes, 37,000 pamphlets), purchased 1867, cost $100,000; the Count de Rochambeau collection (manuscript), purchased 1883, cost $26,000; the Toner collection (24,484 volumes, numerous pamphlets), gift in 1882 of Dr. Joseph M. Toner; the Hubbard collection (engravings).

The collection is now the largest in the Western Hemisphere, and third in the world. It comprised at the end of the fiscal year (June 30, 1915) about 2,363,873 printed books and pamphlets (including the law library which, while a division of the Library of Congress, still remains at the Capitol), manuscripts, maps, and charts, pieces of music, and photographs, prints, engravings and lithographs numbering about a million.

The collection is rich in history, political science, in official documents, National, State, and foreign, and in Americana, including important files of American newspapers and original manuscripts (Colonial, Revolutionary, and formative periods). Many of the rare books and manuscripts belonging to the library are exhibited in show cases on the second floor.

The library is rich in special collections acquired since 1897.

In **Prints**—The Hubbard collection, gift in 1898 of Mrs. Gardiner G. Hubbard; Noyes works of Japanese artists; Garrett, 19,113 prints (on deposit); George Lothrop Bradley, 1,980 engravings; prints issued by the Government calcographies of France, Germany, Italy, Japan, and Austria-Hungary.

Manuscripts—The PAPERS OF NINE PRESIDENTS: Washington, Jefferson, Madison, Monroe, Jackson, Van Buren, Polk, Pierce, and Johnson. AMERICAN STATESMEN AND POLITICIANS: Franklin, R. Morris, Hamilton, Van Buren, Duff Green, Washburne, Clayton, Chase, Crittenden, Lyman Trumbull, E. M. Stanton, John Sherman, Gideon Welles (deposited); James H. Hammond, J. L. M. Curry, Thomas Ewing. MILITARY PAPERS: Pickett papers, Gen. George B. McClelland, Gen. W. T. Sherman. DIPLOMATIC: Wm. Short papers. NAVAL PAPERS: Preble, John Paul Jones. COMMERCIAL HISTORY: Ellis, 1805-1853; Bourne, 1776-1816; Galloway (early part of the eighteenth century); letters of William Taylor (the latter part of the eighteenth century); of John White, cashier of the Bank of the United States at Baltimore; Edward Dixon, merchant of Port Royal, 1743-1796. Biddle papers (Bank of the U. S.), deposited. DISTRICT OF COLUMBIA: Papers of William Thornton; George Watterston. EUROPEAN ARCHIVES: Stevens Index, 1763-1783; upward of 100,000 folios of transcripts of documents relating to American Colonial history. Mercy-Argenteau family papers, fifteenth to nineteenth century. STATE PAPERS: Continental Congress; House of Representatives. COLONIAL DOCUMENTARY HISTORY: Records of Virginia Company; Spanish papers of New Mexico and Florida; Philippine and Guam documents. SCIENTIFIC: Maury papers. MEXICAN HISTORY: Yturbide papers; Inquisition papers, 1759. LITERARY: Louise Chandler Moulton collection of letters.

Maps—The Kohl collection; manuscript maps of Lord Howe (and many other manuscript maps); the Lowery collection of maps of Spanish possessions now within the limits of the United States.

Printed Books—The Weber library (Sanskrit literature, 3,018 volumes, 1,002 pamphlets); Hattala (Slavic, about 1,500 volumes); Yudin (Russian, 80,000 volumes); the Hultfeldt-Kaas (Scandinavian, 5,000 volumes); the John Boyd Thacher collection of Incunabula (deposited); the Delnard collections of Hebraica, comprising upward of 14,000 titles, were given to the Library by Mr. Jacob H. Schiff in 1912 and 1914.

In 1897 the main collection was removed from the Capitol to the building erected for it under the acts of Congress approved April 15, 1886; October 2, 1888, and March 2, 1889, at a cost of $6,347,000 (limit by law, $6,500,000), exclusive of the land, which cost $585,000. The architects who furnished the original designs were John L. Smithmeyer and Paul J. Pelz. By the act of October 2, 1888, before the foundations were laid, Thomas L. Casey, Chief of Engineers of the Army, was placed in charge of the construction of the building, and the architectural details were worked out by Paul J. Pelz and Edward P. Casey. Upon the death of Gen. Casey, in March, 1896, the entire charge of the construction devolved upon Bernard R. Green, Gen. Casey's assistant, and under his superintendence the building was completed in February, 1897, opened to the public November, 1897. The building occupies three and three-quarter acres upon a site ten acres in extent at a distance of 1,270 feet east of the Capitol, and is the largest and most magnificent library building in the world. In the decorations some forty painters and sculptors are represented—all American citizens. The floor space is 326,195 square feet, or nearly eight acres. The book stacks including the new stack built over the southeast interior court, contain about 100 miles of shelving, affording space for 3,540,000 octavo volumes and 84,000 volumes of newspapers.

The library is maintained by annual appropriations by Congress for various purposes, including the purchase of books. Total appropriation for 1916, $660,105.00. For service and contingent expenses, $451,460.00; purchase of books, $98,000.00; building and grounds, $110,645.00.

Library Service—Library proper, 255 employés; copyright, 91; distribution of cards, 44; legislative reference, 17; disbursement and care of building and grounds, 134. Total, 541. By virtue of the act of 1897, employés in the library proper are appointed by the Librarian of Congress "solely with reference to their fitness for their particular duties."

Copyright Office—The Copyright Office is a distinct division of the Library of Congress, and is located on the ground floor, south side; open 9 to 4.30. It is under the immediate charge of the Register of Copyrights, who, by the acts of February 19, 1897, and March 4, 1909, is authorized "under the direction and supervision of the Librarian of Congress," to perform all the duties relating to copyrights. Copyright registration was transferred to the Librarian of Congress by the act of July 8, 1870. Of most articles copyrighted two copies, and of some one copy, must be deposited in the Library of Congress to perfect copyright.

Entitled by statute to draw books for home use are the following: The President, the Vice-President, Senators, Representatives, and Delegates in Congress (no books may be given out upon the orders of members in favor of those who are not members); Heads of Departments; the Justices, Reporter, and Clerk of the Supreme Court; the Judges and Clerk of the Court of Claims; Judges of the Court of Appeals of the District of Columbia and Judges of the Supreme Court of the District of Columbia; representatives at Washington of foreign Governments; the Solicitor-General and Assistant Attorney-General; the Secretary of the Senate; the Clerk of the House of Representatives; the Solicitor of the Treasury; ex-Presidents of the United States; the Chaplains of the two Houses of Congress; the Secretary and Regents of the Smithsonian Institution; the members and Secretary of the Interstate Commerce Commission, and Chief of Engineers of the Army.

Inter-Library Loans—While not a lending library, but a reference library, primarily and essentially, the Library of Congress maintains an inter-library loan system by which special service is rendered to scholarship by the lending of books to other libraries for the use of investigators engaged in serious research, which it is not within the power or duty of the library in question to supply, and which at the time are not needed in Washington.

Hours—The Library building is open to the public all days in the year excepting 4th of July and Christ-

mas. The hours are from 9 A. M. to 10 P. M. week days, from 2 P. M. to 10 P. M. Sundays and holidays, and 9 A. M. to 1 P. M. on Saturdays from June 15 to September 15.

The Main Reading Room and Periodical Reading Room are open to the public from 9 A. M. to 10 P. M. week days, and from 2 P. M. to 10 P. M. Sundays and holidays.

The Librarian's Office is open for the transaction of business from 9 A. M. to 4.30 P. M. week days, and from 2 P. M. to 6 P. M. Sundays and holidays.

The other administrative divisions of the Library, including the Copyright Office, are open for the transaction of business from 9 A. M. to 4.30 P. M. all days in the year, excepting legal holidays and Sundays.

Librarians Since the Inception of the Library—1800-1814, the Clerk of the House of Representatives (for the time being); 1815-1829, George Watterston; 1829-1861, John S. Meehan; 1861-1864, John G. Stephenson; 1864-1897 (June 30), Ainsworth R. Spofford; 1897-January 17, 1899, John Russell Young; 1899 (April 5), Herbert Putnam.

General Administration—Librarian of Congress, Herbert Putnam; Chief Assistant Librarian, Appleton P. C. Griffin; Chief Clerk, Allen R. Boyd; Secretary, Jessica L. Farnum.

RO.

Ro is the name of the universal language constructed by Rev. Edward P. Foster of Marietta, Ohio. The first publication—an eight-page outline—of the language was issued in 1906.

Ro uses the method technically known as *a priori*; that is, it rejects all existing root words, whether of Latin or any other language, and uses as a basis simply the twenty-six letters of the alphabet. These letters it makes absolutely phonetic. No accents or diacritical marks are employed.

For the formation of words, Ro first analyzes ideas into their ultimate elements. Having completed the analysis, it chooses an initial letter or initial syllable to designate one of these primary elements or general concepts. Each added letter subdivides or particularizes so that the completed word represents an individual thought of the general signification denoted by the initial of the word. The initial letter represents, as it were, an army corps, the second letter a division of that corps, the third a brigade, the fourth a regiment, the fifth a company, and the final letter the individual soldier.

For example, Ro takes the initial "a" to denote pronoun; "ab" for pronoun of the first person; "abi" for this pronoun in the nominative case, "I;" "abiz," we; "abe," my; "abez," our; "abo," me; "aboz," us. The initial "e" denotes verb; "eb" infinitive mood; "eba," to be; "ebe," to become; "ebi," to make; "ebni," to unmake; "ebo," to be made (passive voice). The initial "t" denotes time; "ta", definite period of time "tab," moment, second; "tac," minute; "tad," hour; "tada," morning hour; "tadab," 1 A. M.; "tadib," 1 P. M.; "tag," day; "Tagab," Sunday; "tal," month; "Talab," January; "z" denotes number; "za," unit column; "zab," one; "zac," two; "zad," three; "zaf," four; "zag," five; "zeb," ten; "zec," twenty; "zed," thirty; "zib," one hundred; "zibzedzaf," 134.

This method of word-building is chosen as the scientific method, the only one that is absolutely international, definite or adequate for the twentieth century.

THE PRINCIPAL LANGUAGES OF THE WORLD.

THERE are said to be 3,424 spoken languages or dialects in the world, distributed as follows: America, 1,624; Asia, 937; Europe, 587; Africa, 276.

The English language is spoken by more than 150,000,000 of people.

German by more than	120,000,000 of people.	Spanish by more than	55,000,000 of people.
Russian " " "	90,000,000 " "	Italian " " "	40,000,000 " "
French " " "	60,000,000 " "	Portuguese " " "	30,000,000 " "

The English language contains approximately 600,000 words. Of this total nearly one-half consists of scientific terminology seldom met outside of text-books and of archaic, obsolescent or obsolete terms.

Various estimates of the sources of English words have been made at different times. On the basis of the Lord's Prayer, George Hickes calculated that nine-tenths of our words were of Saxon origin. Sharon Turner's estimate was that the Norman were to the Saxon as 4 to 6. Trench computed 60 per cent. Saxon; 30 per cent. Latin, including those received through French; 5 per cent. Greek, and 5 per cent. other sources. Prof. W. W. Skeat in the recently published fourth edition of his Dictionary, which contains approximately 20,000 words, shows the following sources:

Anglo-Saxon and English	3,681	Spanish	108
Low German	126	Portuguese	21
Dutch	207	Greek direct or through Latin, Late Latin, French or other sources	2,498
Scandinavian	693	Slavonic	31
German	333	Lithuanian	1
French from Low German	54	Asiatic: Aryan languages, including Persian and Sanskrit	163
" " Dutch or Middle Dutch	45	European non-Aryan languages	20
" " Scandinavian	63	Semitic: Hebrew	99
" " (1) German	85	Arabic	272
" " (2) Middle High German	27	Asiatic: Non-Aryan, not Semitic, including Malay, Chinese, Japanese, Tatar, Australian	135
" " (3) Old High German	154	African languages	32
" " (4) Teutonic	225	American	102
" (Romance languages)	297	Hybrid	67
" from Latin	4,842	Unknown	12
" " Late Latin	828		
" " Italian	162		
Celtic	170		
Latin (direct)	2,880		
Provencal, from Latin	25		
Italian	99	Total	19,160

As regards the number of words in the principal other languages no estimate of any practical value has been made in recent years, but existing dictionaries show the following facts:

The vocabulary of the New Standard Dictionary of the English Language aggregates approximately 450,000 words.

The German word-book (Kürschner's Universal-Konversations-Lexikon) contains not more than 300,000 words, including personal names.

Grimm's Dictionary of the German Language contains approximately 150,000 words; Littre's Dictionary of the French Language, 210,000 words; Dahl's Dictionary of the Russian Language, 140,000 words; Carlos de Ochoa's Dictionary of the Spanish Language, 120,000 words; Petrocchi's Dictionary of the Italian Language, 140,000 words.

This table was prepared by Dr. Frank H. Vizetelly, Managing Editor of the Standard Dictionary.

ESPERANTO, THE INTERNATIONAL LANGUAGE.

Esperanto is an artificial language invented by the Russian Dr. L. L. Zamenhof, of Warsaw, Poland. It has only one object in view, namely, to serve as an international auxiliary language; it is not in the least intended to replace the national languages. The first book in the new language was published in 1887.

The Esperanto words are mostly of Latin, but to some extent also of Anglo-German origin, so that at the first glance Esperanto has the familiar appearance of a Roman language.

The great success of Esperanto, which is now known and studied all over the world, is chiefly due to the facility with which it may be mastered. The pronunciation is strictly phonetic, making the study of spelling unnecessary. The grammar does not admit of any exceptions to the rules, and is so logical and simple that it may be learned completely in a few hours by any person who is familiar with the grammar of his mother tongue. The vocabulary consists of about 2,500 root words, a large majority of which is known to any one whose language contains a great number of Latin roots—for instance, English.

In spite of this small number of root words Esperanto has been made rich in words and expressions by the adoption of certain affixes and certain methods of word combination. By these simple and easy means a considerable vocabulary may be obtained. Esperanto is a well-sounding language when spoken.

Esperanto is now used for all civilized purposes by many hundreds of thousands of persons in all civilized countries. It made its appearance in the United States in an organized form in 1905, when the first society for its study was formed in Boston, and this was followed soon afterward by societies in New York and Philadelphia. It is now promoted by a large and flourishing national association, the "Esperanto Association of North America."

Esperanto has a large literature, over a hundred periodicals, including a number in the United States, being published and a large and powerful "Universal Esperanto Association" maintains a regular system of consulates all over the world, to facilitate the transaction of all kinds of legitimate business for its members by means of the common tongue.

International congresses of Esperantists have been held at Boulogne, Geneva, Cambridge, Dresden, Barcelona, Washington, Antwerp, Cracow, Berne and San Francisco. Delegates representing the Esperantists of forty different nations and languages have been in attendance.

The Esperantists of America have established in Boston an office from which may be obtained without charge, any desired information of the movement. Address "Esperanto Office," West Newton (Boston Postal District), Mass.

THE RHODES SCHOLARSHIPS AT OXFORD UNIVERSITY.

CECIL J. RHODES, statesman and capitalist, who died at Cape Town, South Africa, March 26, 1902, directed in his will, dated July 1, 1899, that a part of his fortune should be applied for the creation of a fund for the support of a certain number of scholarships covering a three years' course at Oxford University. He directed that the selection of the recipients of this gift should be made as follows: From three to nine scholars from each of the British Colonies, two from each State and Territory of the United States, or one hundred in all. Mr. Rhodes desired that in awarding the scholarships account should be taken of different qualities—literary and scholastic attainments, love of outdoor sports, strong, manly qualities such as courage, generosity, kindness, etc., high moral character, and desire to serve in public affairs.

The agencies for final selection vary a good deal. Scholars from Cape Colony are chosen by the individual schools to which the scholarships are especially assigned. In several of the Canadian provinces it has been decided that an appointment shall be made in rotation by the leading universities. In most of the States of the Union, in outlying colonies like Bermuda, Jamaica and Newfoundland, in provinces of Canada, in New Zealand and the States of Australia, the final choice of the scholar is left in the hands of a Committee of Selection. Great care has been taken in the constitution of these committees, as it has been felt that on the wise and impartial exercise of their judgment depends more than upon anything else the full success of the scheme.

The conditions regulating the award of scholarships in the American States provide that the candidates shall have satisfactorily completed the work of at least two years in some college of liberal arts and sciences. The upper age limit must be twenty-four years at the time of entering upon the scholarship at Oxford. To be eligible the candidate must be a citizen of the United States, or the son of a citizen, and must be unmarried. Each student receives an allowance of £300 a year, which is equivalent to $1,500, payable in quarterly instalments, which is just enough to enable a man to pay the expenses of vacations as well as terms. The first instalment is not payable until the student has actually gone into residence at Oxford, so he should go abroad with one or two hundred dollars in his possession.

The full number of scholarships, when all are filled, is, as at present, 189; and this number should be maintained from year to year, vacancies being filled as the men complete their three-years' course. The last examination in the United States took place in October, 1915. The next qualifying examinations will be held in all States of the Union in October, 1916.

Hitherto scholars have been elected in all States of the Union in two successive years, while in each recurring third year none was chosen. In the future scholars will be selected each year from 32 States. The 48 States have for this purpose been divided into three groups (A, B and C) of sixteen each.

For the year 1916 scholars will be elected from groups A and B; for 1917 from groups A and C; and for 1918 from B and C, and subsequently in the same rotation year by year.

The qualifying examination, which is in essence the same as that for entrance into Oxford University, consisting of Latin, Greek and Mathematics, will be held in *all the States each year.*

The division of the States into groups, for the purpose above mentioned, is as follows:

A.	A.	B.	B.	C.	C.
Maine.	Maryland.	California.	Michigan.	Arizona.	North Carolina.
New Hampshire.	New Jersey.	Washington.	Missouri.	Delaware.	North Dakota.
Vermont.	Virginia.	Oregon.	Iowa.	Florida.	Oklahoma.
Massachusetts.	Ohio.	Colorado.	Georgia.	Idaho.	South Carolina.
Rhode Island.	Indiana.	Nebraska.	Texas.	Louisiana.	South Dakota.
Connecticut.	Kentucky.	Kansas.	Alabama.	Montana.	Utah.
Pennsylvania.	Illinois.	Minnesota.	Arkansas.	Nevada.	West Virginia.
New York.	Tennessee.	Wisconsin.	Mississippi.	New Mexico.	Wyoming.

The examinations are not competitive, but qualifying. Inquiries as to particulars by intending candidates may be addressed to any college. Information may also be obtained from The Rhodes Trust, Seymour House, Waterloo Place, London S. W., or from F. J. Wylie, Secretary to the Rhodes trustees, 9 South Parks Road, Oxford, England.

There were five annual German Scholarships which were created by a codicil to the will of 1899, scholars for which were appointed by the German Emperor. These scholarships were for three years and had an annual value of £250. They have naturally stopped since the outbreak of hostilities, but nothing has been decided with regard to the income which has accrued. As they were created by a codicil to the original will of Mr. Rhodes, the English Parliament can divert this fund without affecting the other scholarships.

NEW YORK PUBLIC LIBRARY.

ASTOR, LENOX AND TILDEN FOUNDATIONS.

ESTABLISHED by consolidation of the "Trustees of the Astor Library," the "Trustees of the Lenox Library," and the "Tilden Trust," May 23, 1895, twenty-one trustees being chosen from the Trustees of these corporations; in 1902 the number of Trustees was increased to twenty-five, of which number the Mayor of the city of New York, the Comptroller, and the President of the Board of Aldermen serve *ex officio*. The agreement of consolidation provided for the establishment and maintenance of a free public library and reading room in the city of New York, with such branches as might be deemed advisable for the continued promotion of the objects and purposes of these several corporations.

The Trustees soon after consolidation in 1895 determined to pursue a liberal policy and to create a great library system that would serve the needs of scholars and of the general reading public as well. An act was passed by the Legislature and approved May 19, 1897, giving the city the necessary authority to issue bonds for the construction of a building on the present site and to contract with the New York Public Library for its occupancy. Carrère & Hastings were appointed architects of the building on December 9, 1897. The corner-stone was laid November 10, 1902, and the building was opened to the public on May 23, 1911.

The building is in the form of a rectangle 390 feet long and 270 feet deep, built around two inner courts, each about 80 feet square; it has a cellar, basement, and three upper floors. The area covered is about 115,000 square feet, the cubic contents 10,380,000 cubic feet. The material is largely Vermont marble (375,000 cubic feet), bonded in brick walls. There are seats for 768 readers in the main reading room and seats in other public rooms bring the total capacity up to 1,760. In the main stack room are 334,530 feet (63.3 miles) of shelving, with capacity for about 2,500,000 volumes. Book stacks in the special reading rooms amount to about 70,000 feet, with capacity for about 500,000 volumes.

The building fronts on Fifth Avenue, looking east. On the basement floor, with entrance from Forty-second Street, are the rooms for circulation of books, for children's reading, for newspapers, a library school and its offices, and public telephones; on this basement floor, with entrance on Fortieth Street, are the shipping rooms and the printing and binding offices. On the first floor are the business offices of the circulation department, the offices of the bursar, exhibition rooms, and reading rooms for current periodicals, technology, patents. On the second floor are the offices of the Director, a lecture room, the ordering and cataloguing rooms, and reading rooms for Jewish literature. Oriental literature, Slavonic literature, science, economics, and sociology, and public documents. On the third floor are the public catalogue room and the main reading room, the latter occupying nearly the whole of the west front of the building, in size about 300 feet long by 80 feet wide, with seats for 768 readers. Along the south side of the third floor are special reading rooms devoted to American history, maps, and engravings. Along the Fifth Avenue front are the art and architecture reading room, the Stuart room, the picture galleries, and the manuscripts division. Along the north front of the third floor are reading rooms for music and for genealogy and local history.

On March 12, 1901, Mr. Andrew Carnegie offered to give $5,200,000 to the city for the construction and equipment of free circulating libraries upon condition that the city should provide the land and agree to maintain the libraries when built. This communication was submitted to the Mayor on March 15, and on April 26 an act was passed authorizing acceptance of the gift by the city upon the terms imposed by Mr. Carnegie. An agreement with the city was executed on July 17, the library acting as agent for Mr. Carnegie, under which forty-two buildings are to be erected in Manhattan, the Bronx, and Richmond (later increased to fifty), on sites to be selected and purchased by the city with the approval of the library, the buildings to be leased to the library and to be under its control. The city agrees to provide adequate yearly maintenance, 10 per cent. of the cost of each building being agreed upon as a minimum.

On November 7, 1901, an agreement was made with three firms of architects in New York to prepare plans and specifications for these branch libraries. On June 6, 1902, an issue of bonds for $250,000 was authorized for purchase of sites. The first Carnegie building, known as the Yorkville branch, was opened December 13, 1902, at 222 East Seventy-ninth Street; the second, providing a new home for the Chatham Square branch, was opened November 2, 1903, at 33 East Broadway. By the end of 1915 thirty-seven branches had been opened under this contract.

The Trustees of the library are John W. Alexander, William W. Appleton, Andrew Carnegie, Cleveland H. Dodge, John Murphy Farley, Samuel Greenbaum, Frederic R. Halsey, John Henry Hammond, Lewis Cass Ledyard, J. P. Morgan, Morgan J. O'Brien, Stephen H. Olin, Henry Fairfield Osborn, William Barclay Parsons, George L. Rives, Chas. Howland Russell, Edward W. Sheldon, George W. Smith, Frederick Sturges, Henry W. Taft, Mayor of the city of New York, *ex officio;* Comptroller of the city of New York, *ex officio;* President of the Board of Aldermen, *ex officio.*

There is an advisory committee on circulation consisting of W. W. Appleton, *Chairman;* Mark Ash, J. H. McMahon, H. W. Taft, Samuel Greenbaum, George W. Smith, Lucius Wilmerding, John Henry Hammond. *Director and Head Librarian,* Edwin H. Anderson.

There are 18,000 regularly established libraries in the United States, according to statistics compiled by the United States Bureau of Education. The number of volumes is an increase of 20,000,000 since 1908.

Of the 2,849 libraries containing 5,000 volumes or over, 1,844 are classified as "public and society libraries," and 1,005 are school and college libraries. Public and society libraries have an aggregate of over 50,000,000 volumes, with 7,000,000 borrowers' cards in force; 1,446 of these libraries were entirely free to the public.

Libraries reporting from 1,000 to 5,000 volumes numbered 5,453, of which 2,188 were public and society libraries and 3,265 school libraries. These libraries contained 11,689,942 volumes. Another group of still smaller libraries, comprising those that reported from 300 to 1,000 volumes, increased the total by 2,961,007 volumes.

The distribution of library facilities is still uneven of the 1,844 public and society libraries reported for the entire United States, more than half were in the North Atlantic States, and they contained 24,627,921 volumes out of the total of 50,000,000; and of the 3,000,000 volumes added to library collections for the year 1913 almost one-half were for the same section.

New York State had 7,842,621 volumes in her 214 libraries; Massachusetts, 7,380,024 in 288 libraries; Pennsylvania, 3,728,070, and Illinois, 3,168,765 volumes. Four-fifths of the borrowers' cards in use were in the North Atlantic and Northern Central States.

There are at least five libraries in the world which hold over a million books: The Bibliotheque Nationale of Paris (which claims over 3,000,000), the British Museum, the Imperial Library at Petrograd the Congressional Library at Washington, and the New York Public Library.

BABY WEEK TO BE CELEBRATED.

The Children's Bureau of the United States Department of Labor announced late in November, 1915 that State health officials of thirty-nine States had already pledged their co-operation in the observance of the nation-wide Baby Week, March 4 to 11, 1916, proposed by the General Federation of Women's Clubs. Scores of letters about Baby Week had been pouring into the Children's Bureau ever since the plan was announced and the bureau's preliminary circular of information about Baby Week was sent in response to inquiries from organizations in forty-five States and the District of Columbia.

The bureau has prepared these circulars and has in press a longer bulletin on Baby Week, which will shortly be available for free distribution, in order to place at the disposal of all communities the practical experience of those cities which successfully conducted local Baby Week campaigns, notably New York, Chicago, Pittsburgh, Indianapolis, Grand Rapids, Topeka, Yonkers, and Long Beach, Cal. Special sections of the circulars are devoted to suggestions for Baby Week in small towns and villages.

A SHAKESPEARE TERCENTENARY.

The Shakespeare Celebration Association with headquarters at No. 10 East 43d Street, New York City, was incorporated in 1915 to provide for the celebration of the three hundredth anniversary of the death of William Shakespeare on April 23, 1916, by the people of the State of New York.

This is a State affair, without relation to a National movement with similar purpose.

The celebration will consist of exercises in schools, colleges, social settlements, churches and among societies which will organize festivals, readings, musical programmes, Elizabethan masques, pageants and dramatic performances. Special programmes will be given by musical organizations. A branch of the English Folk Dance Society will form classes and arrange competitions in Morris and sword dances.

Libraries will co-operate by publishing bibliographies and having books of the Elizabethan period easily accessible. Shakespeare's plays, including some of the less familiar ones, will be presented by professionals.

Percy Mackaye has written a "Community Masque," designed as a climax. It will have professional actors, and choral, dance and processional interludes will enlist thousands of trained amateurs. After the New York production the masque will be available for outdoor presentation elsewhere in Spring and Summer.

The New York Public Library will give an exhibition early in January, in which books relating to Shakespeare will be accessible. Miss Ada Rehan has donated to the library her prompt books, containing notes, comments and directions written by Augustin Daly.

Among prominent citizens of New York who will take part in the arrangements for the celebration are Dr. Nicholas Murray Butler, Edward H. Sothern, Thomas W. Churchill, Daniel Frohman, Otto H. Kahn, Gertrude Atherton, Augustus Thomas, and His Honor Mayor Mitchel.

NATIONAL READING CIRCLE.

THE United States Bureau of Education has established the National Reading Circle and will issue certificates to readers who meet requirements. The Reading Circle comes under the auspices of the Home Education Division of the Bureau of Education at Washington, and for the benefit of those who wish to be enrolled among its students various courses of readings are recommended. The following courses are either ready for distribution or preparation:

The bureau invites all who wish to undertake this course of reading under its direction to join its Second National Reading Circle. For admission to this circle it is only necessary to write to the "Home Education Division of the Bureau of Education Washington, D. C.," giving your name, post-office address, your age, and a very brief statement of your education and occupation. You should also write the Home Education Division of the bureau when you have finished reading any course.

To each person submitting satisfactory evidence of having read all the books on this list within three years from the time of joining circle, there will be awarded a certificate bearing the seal of the United States Bureau of Education and signed by the Commissioner of Education. In States where the State Department of Education co-operates with the bureau this certificate may bear the signature of the chief school officer of the State also. All young men and women who wish to lay a good foundation for a knowledge of the best literature are invited to join this circle.

Charles Alphonso Smith, Edgar Allan Poe Professor of English in the University of Virginia; Charles Forster Smith, Professor of Greek in the University of Wisconsin; Richard Burton, Professor of English Literature in the University of Minnesota, and William Lyon Phelps, Professor of English Literature in Yale University, will assist the Bureau of Education in directing this course of reading.

In writing about this course refer to it as "United States Bureau of Education, Home Education Division, Reading Course No. II., or, Great Literature—Ancient, Mediæval, and Modern."

Readers may take one or more courses. They are required to read Course I. twice during the three years succeeding enrolment. Any other courses are to be read but once. No reading done previous to the date of enrolment will be considered adequate.

Let the bureau know when each book is begun and when it is completed. Send a brief statement of what the book means to you when you have finished reading it.

Evidence Required—When you have completed a course and notify the bureau it will choose a book which you have read and ask you to write about it.

Books may be purchased of publishers or borrowed from libraries or elsewhere. The Bureau of Education does not furnish or lend them for this purpose.

If the editions named are not available any editions may be used. Any edition of the Bible may be used, but the advantage to be gained from "Moulton's Modern Readers' Bible" will more than pay for the additional cost.

"The Reader's Handbook of Famous Names in Fiction, Allusions, References, Etc.," by E. Cobham Brewer, published by Lippincott & Co., Philadelphia, Pa., will be helpful in reading.

THE HALL OF FAME.

MARCH 5, 1900, the Council of New York University accepted a gift of $100,000, afterward increased to $250,000, from a donor, whose name was withheld, for the erection and completion on University Heights, New York City, of a building to be called "The Hall of Fame for Great Americans." A structure was built in the form of a terrace with superimposed colonnade connecting the University Hall of Philosophy with the Hall of Languages. On the ground floor is a museum 200 feet long by 40 feet wide, consisting of a corridor and six halls to contain mementoes of the names that are inscribed above. The colonnade over this is 600 feet long with provision for 150 panels, each about 2 feet by 6 feet, each to bear the name of a famous American.

Only persons who shall have been dead ten or more years are eligible to be chosen. Fifteen classes of citizens were recommended for consideration, to wit: Authors and editors, business men, educators, inventors, missionaries and explorers, philanthropists and reformers, preachers and theologians, scientists, engineers and architects, lawyers and judges, musicians, painters and sculptors, physicians and surgeons, rulers and statesmen, soldiers and sailors, distinguished men and women outside the above classes. Fifty names were to be inscribed on the tablets at the beginning, and five additional names every fifth year thereafter, until the year 2000, when the 150 inscriptions will be completed. In case of failure to fill all the panels allotted, the vacancies are to be filled in a following year.

In February, 1904, the plan was announced of a Hall of Fame for Women near the former, with places for 50 tablets. Its foundation has been begun.

The rules prescribed that the council should invite nominations from the public. Every nomination seconded by a member of the University Senate should be submitted to an electorate of one hundred eminent citizens selected by the council. Chancellor Emeritus MacCracken presides in the Senate when the Hall of Fame is considered. Address University Heights, New York City.

In October, 1900, the University Senate received the ballots of the electors. Of the one hundred judges selected ninety-seven voted. The number of names which had been submitted to them was 252. Of these each judge returned a vote for fifty. The rule required that no candidate receiving less than fifty-one votes could be accepted. The returns showed that but twenty-nine candidates received the required number and were chosen. These were as follows: George Washington, Abraham Lincoln, Daniel Webster, Benjamin Franklin, Ulysses S. Grant, John Marshall, Thomas Jefferson, Ralph Waldo Emerson, Henry W. Longfellow, Robert Fulton, Washington Irving, Jonathan Edwards, Samuel F. B. Morse, David G. Farragut, Henry Clay, Nathaniel Hawthorne, George Peabody, Robert E. Lee, Peter Cooper, Eli Whitney, John J. Audubon, Horace Mann, Henry Ward Beecher, James Kent, Joseph Story, John Adams, William E. Channing, Gilbert Stuart and Asa Gray.

In October, 1905, under the rules named above, the Senate received the ballots of 95 electors out of 101 appointed, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women, a majority of only 47. The following persons were found to be duly chosen: John Quincy Adams, 59; James Russell Lowell, 58; William Tecumseh Sherman, 58; James Madison, 56; John Greenleaf Whittier, 53; Mary Lyon, 58; Emma Willard, 50, and Maria Mitchell, 48.

The hall was dedicated May 30, 1901, when twenty-five or more National associations each unveiled one of the bronze tablets in the colonnade, and on May 30, 1907, eleven new tablets were unveiled, orations being given by the Governors of New York and Massachusetts.

In October, 1910, the next ballot was taken, the number cast being 97 and the number required for a choice being 51. The following persons had the requisite number of votes: Harriet Beecher Stowe, 74; Oliver Wendell Holmes, 69; Edgar Allan Poe, 69; James Fenimore Cooper, 62; Phillips Brooks, 60; William Cullen Bryant, 59; Frances E. Willard, 56; Andrew Jackson, 53; George Bancroft, 53; John Lothrop Motley, 51. There were 211 nominees.

The fourth quinquennial election in 1915 secured the ballots of ninety-seven electors, three electors having died within the year, nine names were admitted, viz., Alexander Hamilton, 70 votes; Mark Hopkins, 69; Francis Parkman, 68; Elias Howe, 61; Joseph Henry, 56; Rufus Choate, 52; Daniel Boone, 52; with one woman, Charlotte Cushman, 53. Of these Hamilton and Agassiz had been elected in 1905 to the separate hall proposed for famous foreign-born Americans. When the Constitution was amended in 1914, to do away with the line of discrimination between native-born and foreign-born, it was required that the four foreign-born, already chosen, be re-elected in competition with the native-born put in nomination. The two above named were approved, while John Paul Jones and Roger Williams lacked a majority, but remain in nomination for the year 1920. The total names admitted in the four quinquennial elections is 50 men and 6 women. The hall has recently received $27,000 toward its completion and $10,000 toward its endowment.

NATIONAL FEDERATION OF COMMONS CLUBS.

Alsop, Philadelphia, Pa. Editor of the *Transactions*, Wendell M. Strong, New York. The Actuarial Society of America was organized in 1889 for the purpose of promoting actuarial science. Applicants whose nominations are approved by the council are admitted to membership on passing the requisite examinations. There are two classes of members: Fellows, now numbering 140, and associates, 123. Besides including the actuaries of life insurance companies and consulting actuaries of the United States and Canada, the membership embraces leading actuaries in Europe and Australasia.

Aeronautical Engineers' Society, A. S. of A.—Founded 1914. This society has for its principal objects the promotion of the science of aeronautics and the various branches of engineering kindred to it; to create and promote an intercourse between persons interested, and to create a body which, by the Constitution of its membership and achievement, will be entitled to represent the interests of aeronautical engineering before proper bodies in this country. A further purpose is to review technical and scientific papers relating to aeronautical engineering.

Persons eligible for membership include graduates of engineering schools in good standing; persons who for a period of not less than one year have been in charge of responsible work of an engineering nature; persons who have shown high proficiency in flying; persons who have rendered signal service to the development of the science or art of aviation.

There is no initiation fee. The yearly dues are $25. *Chairman*—Charles Wesley Howell. *Secretary and Treasurer*—Lewis R. Compton. Headquarters, 29 West Thirty-ninth Street, New York City.

AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS.

The head office of the American Board of Commissioners for Foreign Missions is at the Congregational House, 14 Beacon Street, Boston, Mass. There are three district offices: (1) at the United Charities Building, Twenty-second Street and Fourth Avenue, New York City, Rev. E L. Smith, D. D., Secretary; (2) 19 S. La Salle Street, Chicago, Ill., Rev. A. N. Hitchcock, D. D., District Secretary; (3) San Francisco, Cal., Henry H. Kelsey, D. D., District Secretary. Its officers are: *President*—Edward C. Moore, D. D. *Corresponding Secretaries*—James L. Barton, LL. D., Cornelius H. Patton, D. D., Edward L. Smith, D. D. *Treasurer*—Frank H. Wiggin.

The American Board, which is the oldest foreign missionary society in the United States, was organized June 29, 1810. During its history it has sent out over 3,000 missionaries, of whom 638 are now in service. Into the 673 churches which have been organized by these missionaries there have been received from the first 229,373 members. The total receipts from the beginning have been $45,488,439; for year 1915, $1,102,243.02.

The mission fields now occupied by the board are: Mexico; Micronesian Islands; Mindanao, Philippine Islands; Japan; North China; Shansi, in Northwestern China; Foochow and Canton, in Southern China; Ceylon; Madura, in Southern India; the Marathi field of Western India; in Southern Africa, the Rhodesian branch and the Zulu branch; West Central Africa; European and Asiatic Turkey; Austria, Spain, Greece, and Serbia.

THE SCHOOL OF JOURNALISM.

(From a statement prepared by Dr. Talcott Williams, Director.)

THE School of Journalism in Columbia University, New York City, on the Pulitzer Foundation, opened September 30, 1912. On November 1, 1915, it had in all 180 students, of whom 36 are women. Divided by classes, there are 69 in the first-year class, 43 in the second-year class, 43 in the third-year class, and 25 in the fourth-year class. Of the women who will take their degree in the School of Journalism, 17 are in Barnard, and 8 of the men at present registered in Columbia College are taking courses in the School of Journalism. Of the first-year class entering last Fall, 55 are men and 10 are women. Of this number, 43 men entered on examination and 11 under the provision laid down by the late Joseph Pulitzer in his gift, that students of maturity, experience and marked fitness should be admitted without examination. Of the women, 10 entered Barnard College, to be there two years, on examination. Admission without examination, as Mr. Pulitzer expected, has enabled a number of journalists to enter the school. On pursuing courses for two years with credit, these students are admitted to candidacy for the degree of Bachelor of Literature in Journalism. This degree was conferred on 22 graduates in the course at the last commencement of Columbia University; of the fourth-year class, 13 were in the school last year in the third-year class, and 12 are graduates of other colleges. This is a notable step toward giving the school a graduate character.

The total attendance is far larger than was expected and establishes the leading position of the school among institutions of its kind in this or any other country. The number attending is greater in proportion to the number of journalists in the country than the number attending the law and medical courses in Columbia University is in proportion to the number of those practising law and medicine. In September, 1913, the school entered its new building, for which $500,000 was provided by Mr. Pulitzer's bequest. The building is excellently equipped in every way for training in journalistic work, and contains a reference library, files of a hundred daily papers, American and foreign, and a morgue of 400,000 newspaper clippings made under the supervision of the Director during the last thirty years.

No step in professional education has attracted wider public attention or awakened a more general approval in the American press. When Mr. Pulitzer proposed the school twelve years ago its plan, purposes and need were all challenged. From the announcement of the appointment in February, 1912, of its Director, Talcott Williams, formerly of the NEW YORK WORLD staff and for 38 years in active journalism, to its successful opening and full operation the school has commanded the confidence of newspapers and journalists. One-third of its teaching staff of 25 have been in active service on newspapers.

The plan of the school and its course of study were approved and at many points directed by an Advisory Board of eleven journalists, including Mr. John Langdon Heaton, of the editorial staff of the NEW YORK WORLD; Mr. Ralph Pulitzer, President of the Press Publishing Company (the NEW YORK WORLD), and Mr. George S. Johns, editor of the St. Louis *Post-Dispatch*. The other journalists on this Advisory Board, of which President Butler of Columbia University is a member, are S. B. Griffin, *Springfield Republican;* Victor Fremont Lawson, *Chicago Daily News;* Charles Ransom Miller, *New York Times;* Edward Page Mitchell, *The Sun*, New York; Melville Elijah Stone, *Associated Press*, New York; Charles H. Taylor, *Boston Globe*, and Samuel Calvin Wells, *Philadelphia Press*.

The administrative work of the school is conducted by an Administrative Board, composed of President Butler; the Director, Talcott Williams; the Associate Director, Prof. John W. Cunliffe; Frederick P. Keppel, Dean of Columbia College; William P. Trent, Professor of English Literature; Henry R. Seager, Professor of Political Economy; James T. Shotwell, Professor of History; Ashley H. Thorndike, Professor of English, and Charles A. Beard, Associate Professor of Politics.

While there are 41 universities and colleges which give courses in various phases of journalism and several which have schools of journalism, no other school has an endowment so large, reaching $1,000,000 at present, with other gifts in prospect from the Pulitzer estate; none has a course giving so much time to the solid study needed for the training of the journalist, and this has also the crowning advantage of a metropolis like New York in which to train its students in reporting by sending them to see and to write upon events as they come in the life of a great city. The City Hall, the departments and the regular newspaper assignments have all been used to train men in getting news as well as in writing it. Attendance on first-night performances is employed in training for dramatic criticism. From the second year on, the students are under direction and correction, writing articles on financial and business subjects, editorials, special articles, and in other fields of newspaper work. The headquarters of the political parties in New York City have given opportunity for training in National and State politics.

This practical training in the work of the journalist in the greatest news centre of the country comes in the last two years, but of the four years' course four-fifths are devoted to the study of history, constitutional law, political science, economics, statistics, American and European literature, etc.; a mastery of either French or German is insisted on. These studies follow the lines laid down by Mr. Joseph Pulitzer in his plan for the school. They are taught with the comprehensive thoroughness only possible in a great university. The work and study required is on a professional standard. Taking the technical work of reporting and their studies, the students of the school are working as hard as in a newspaper office, covering the same range of subjects and writing under close supervision and correction from men trained as journalists.

LITERATURE OF 1915.

BY FREMONT RIDER.

CAUTION induced by the war and falling off of importations materially reduced the number of books published in the United States in 1915. Trade, however, on the whole, held its own, there being no such wholesale cessation of publishing as in Germany and France.

FICTION decreased in quantity and hardly improved in quality. DRAMA and POETRY continued to gain in both importance and quality, but books on such lighter subjects as AMUSEMENTS dropped near zero. There was also a heavy falling off in FINE ARTS, BIOGRAPHY and TRAVEL, counterbalanced by a flood of books on the WAR in every one of its thousand phases. The booksellers tell us that "war books" are not selling, but the publishers continue to publish them nevertheless. A special attempt is here made to list all those of any reasonable significance. Also a new subject, always prominent in European publishing but practically unknown heretofore here, looms up: MILITARY AND NAVAL SCIENCE.

The following 800 odd titles out of some 11,000 published in 1915 aim to include the most *important*, not only in the sense of having more or less enduring value, but also because of their popularity, possibly transient, but no less significant, as evidenced by sales or repute. Where choice was necessary, emphasis has been laid on the popular and practical, rather than the scholarly and theoretical. Endeavor has been made, in other words, to list books of legitimate interest to the stenographer as well as the economist, to the farmer as well as the reader of belles-lettres. The *classification* adopted is a rough adaptation of the Dewey Decimal classification for books, which is in wide international library and bibliographical use.
